HAM RADIO IN SPACE: ARISSAT-1 MADE READY FOR DEPLOYMENT FROM ISS

If all goes as planned, Arissat One should be on-orbit by Wednesday, August 3rd. Jeremy Boot, G4NJH, of the RSGB News is here with this update:

--

AMSAT satellite ARISSAT-1, currently aboard the International Space Station, has had a checkered history.

As previously reported, it was not deployed in February as originally planned. A further date in July also came and went.

The RSGB understands that it will now be tested within the ISS on 30th and 31st of July, the weekend of the AMSAT-UK Colloquium. It is planned to monitor the tests from the Colloquium using the facilities of GB4FUN.

The satellite will probably transmit its standard 2 meter band-plan, centered on 145.938MHz. All being well it will be hand-launched from the ISS on Wednesday the 3rd of August.

I'm Jeremy Boot, G4NJH, and you are listening to the Amateur Radio Newsline.

--

We will have more on ARissat One in next weeks Amateur Radio Newsline report. (AMSAT-UK)

RESTRUCTURING: PORTUGAL TO GIVE HAMS 50 to 52 MHz NEXT APRIL 4

The National Communications Authority of Portugal has accepted a proposal filed to it by CT1DHM and CT1FBF to amend the upper range limit on the 6 meters band effective April 4th 2012. That coincides with the date of the complete switch-off of the analogue TV broadcasting transmissions and changeover to digital terrestrial television. The new limits of the band allocation for Portugal will be from 50 to 52 MHz once analog television disappears from that spectrum. (CT1ETL)

**

RESTRUCTURING: SLOVAKIA HAMS GET NEW 5 MHZ CHANNEL

OK1RP reports that Radio Amateurs in Slovakia have access to a single channel in the 5 MHz or 60 meter band. Stations in Slovakia can use the channel ranging from 5.2585 to 5.2615 MHz with a maximum power of 100 Watts Effective Radiated Power. A special permit is required to operate in this new band sliver. Licenses are valid for 1 year from the date of issue which is the same as found in the Czech Republic. Further 60m information can be found on-line at 60mband slash blogspot dot com. (OK1RP, Southgate)

**

RESTRUCTURING: NETHERLANDS HAMS GET 70 MHZ BAND AND TEMPORARY 500 KHZ BAND

Hams in the Netherlands now have access to bands at 500 kHz and 70 MHz. This after the Dutch Minister of Economic Affairs, Agriculture & Innovation issued a Decree on July 6 changing the National Frequency Plan.

The revised bandplan shows an amateur service bands at 501 to 505 kHz that will remain available until January 1st, 2014. It also shows a new allocation from 70.0 to 70.5 MHz that has no time limit. More on this restructuring in the Netherlands is on-line at tinyurl.com/NetherlandsGazette20110706 (VERON)

**

ENFORCEMENT: DOMESTIC U.S. 17 METER INTERFERENCE RESOLVED

According to W3ON via the Ohio Penn DX newsletter the Morse transmissions heard on 18 point 085 MHz over the last several weeks are gone. This thanks to the quick action by the FCC's Enforcement Bureau taken in response to several complaints including one from the ARRL and another from him.

According to an e-mail that W3ON received from the FCC's Laura Smith, the errant C-W signal was traced to a transmitter operating in the state of California. The FCC visited the radio site, and the transmissions ceased. Smith's note to W3ON stated that the transmissions were found to be inadvertent butr no further details were furnished.

W3ON says that he is glad to find that the FCC does react to requests sent by e-mail. He says that in his case that he received an E-mail within a few hours from Smith that her agency was investigating the incident. (OPDX)

KAITLYN COLE, KS3P, AGE 11, NAMED 2011 AMATEUR RADIO NEWSLINE YOUNG HAM OF THE YEAR

Amateur Radio Newsline's Young Ham of the Year Judging Committee has announced that Kaitlyn Cole, KS3P, of Harvest, Alabama, has been chosen as this years award recipient. Bill Pasternak, WA6ITF, is here with the details:

--

WA6ITF: "You are the 2011 Young Ham of the Year.

KS3P: "Oh my god.thats so awesome."

--

That's a very surprised Kaitlyn Cole, KS3P, of Harvest, Alabama, who at age 11 learns that she is the youngest person ever to receive the Amateur Radio Newsline(tm) "Young Ham of the Year Award." But her lack of chronologic age is more than made up for by her selfless dedication to her community and the youth of Alabama through her chosen hobby/service of amateur radio.

This past On April 27, the Huntsville, Alabama area, including the small community of Harvest, was hit by a series of destructive tornadoes. The severe weather took a heavy toll in lives lost and property damaged. Kaitlyn and her father immediately volunteered to help with amateur radio relief activities. Kaitlyn began by logging contacts and running errands, but in short order took on the role of Net Control Station, working for many days from 7:30 a.m. to 4:00 p.m. With cellular and wireline telephone coverage being spotty to non-existent, Kaitlyn's duties as Net Control involved dispatching amateur radio operators with rubble clearance machinery and debris pickup teams. For her efforts, Kaitlyn received many compliments from veteran operators on the professionalism that she displayed during this crisis situation.

Kaitlyn is also Assistant Section Manager for Youth Activities in the ARRL Alabama section. In this role, she visits many hamfests where she speaks to other young hams. Kaitlyn has also volunteered her services the past three years at the ARRL Expo Youth Lounge at the Dayton Hamventionc and ran a special event operation to honor the local Volunteer Fire Department in her hometown.

The daughter of Stanley, NX3P, and Amy Cole, Kaitlyn joined the amateur radio fraternity at the tender age of 8. She passed her Technician exam in September 2009, her General in October 2009, and her Extra Class this past January 3rd. Since being first licensed, Kaitlyn has participated in many amateur radio activities, with a special emphasis on the public service and the youth activity aspects of the hobby.

The 2011 Amateur Radio Newsline(tm) "Young Ham of the Year Award" will be presented to Kaitlyn will be honored on Saturday, August 20th at the Huntsville Hamfest in Huntsville, Alabama. Kaitlyn will receive --courtesy of Vertex-Standard -- an expense-paid trip to the Huntsville Hamfest, along with a gift of Yaesu brand ham radio equipment. CQ magazine will treat her to an expense-paid week at Spacecamp Huntsville, and will present Kaitlyn with a variety of CQ products. Amateur Radio Newsline(tm) will provide Kaitlyn with a commemorative plaque at the award ceremony. The cost of the plaque is once again underwritten by Dave Bell, W6AQ, President of DBA Entertainment Inc., Hollywood, California. Heil Sound Ltd. will also be presenting Kaitlyn with a ham radio related gift.

With the honor of making this announcement about a very fine young radio amateur who is a true asset to the hobby and her community, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

This year's award ceremony will be hosted by Don Wilbanks, AE5DW, of Amateur Radio Newsline(tm), Rich Moseson, W2VU, and Chip Margelli, K7JA, of CQ Communications, along with representatives of corporate underwriters Vertex-Standard and Heil Sound. (ARNewsline(tm))

ENFORCEMENT: FBI ARRESTS MEMBERS ALLEGED DDOS GROUP

The FBI says that it has arrested a total of fourteen individuals thought to belong to the hacking group Anonymous. This, for their alleged participation in a series of distributed denial-of-service or DDOS attacks against PayPal last year.

According to the indictment unsealed by a Federal court in San Jose, California, the 14 individuals who were arrested were all members of Anonymous who conspired to attack PayPal last December in retaliation for its perceived opposition to WikiLeaks. The defendants, all of whom are in their 20's or early 30's, were arrested on no-bail arrest warrants in a series of raids on July 19th in Alabama, California, Colorado, the District of Columbia, Massachusetts and five other states. Two other individuals were also arrested on what the FBI said were related cyber-crime charges. (Published News Reports)

**

RADIO LAW: MORE INFORMATION ON LIGHTSQUARED VS. GPS REVEALED

A federal report documenting GPS interference by the proposed LightSquared satellite and terrestrial broadband network has been released and because of it the National Telecommunications and Information Administration has recommended that the project remain on hold until the problem is solved.

In its findings, the NTIA said that it supports a recommendation that additional tests be performed. It also recommends that the FCC

continue to withhold authorization for LightSquared to commence commercial operations until all the available test data can be analyzed and all valid concerns have been resolved.

As previously reported, the interference issue started to vex LightSquared soon after it started testing its system. In response, LightSquared filed a modified operational plan with the FCC on June 30th that also took issue GPS receiver quality. The company noted that GPS receivers do not adequately reject adjacent-band interference and should be made to do so per FCC rules.

In response, an EXCOM test concluded that GPS receivers could be modified to reject interference, but that it would be impractical to do so. This is because it would require significant modification or complete redesign and replacement of GPS equipment currently in use. The report concluded that the timeline to develop new GPS receivers for some applications, from initial concept development through production, can take between 10 to 15 years. (B&C)

HAM RADIO ON THE WEB: ARRL STARTS NEW ON-LINE FORUMS

The ARRL has established three forums on its website that it says is to assist League members in communicating with one another and with ARRL staff on topics of common interest. The topics of these discussions are contesting, awards and technology. To take part, simply take your web browser to www dot arrl dot org slash forums. The ARRL says that it's planning to create additional forums on other topics once it has gained some experience with these first three. (ARRL)

**

HAM RADIO ON THE WEB: RADIOWAVES - THE MOVIE

Radiowaves is the title of a short film about amateur radio in Ireland. Produced by Tony Flynn, it features Thos Caffrey, EI2JD, and Anthony Murphy, EI2KC operating Dundalk Amateur Radio Society station EI0W as well as erecting antennas and discussing the various aspects of the hobby including contesting. The eight minute film also tells the story of two ham radio friends and how the hobby is a part of both of their lives. It can be viewed on line at ei7dar dot com stroke video985 dot html. (Southgate)

RADIO REMEMBRANCES: HELP COMMEMORATE 911

A reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day. If you have plans to commemorate 911, please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many

as we can on our website at www dot arnewsline dot org.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest. (ARNewsline(tm))

HAM RADIO IN SPACE: BRAZIL ANNOUNCES NANOSATC-BR HAMSAT

In ham radio space related news, word that Brazil is preparing to launch its first amateur radio satellite to be known as the NANOSATC-BR.

The NANOSATC-BR is being developed by the National Institute for Space Research and students of Federal University of Santa Maria. It will have a cross-band transponder with an uplink on UHF and a downlink on VHF. Its telemetry beacon will transmit at 145.865 MHz using 9k6 BPSK.

In addition to the ham radio payload, BR-NANOSATC will also carry two scientific instruments. One is a magnetometer while the other is a particle detector of precipitation. It will be used to monitor real-time precipitation of particles in the magnetosphere above Brazil.

The BR-NANOSATC project is receiving support from the Amateur Radio Association Santamariense. The call sign for the satellites ground control station will be PY3EB. More is on-line at tinyurl.com/brazil-hamsat. (Southgate, PS8RF)

WORLDBEAT: DONATIONS BRING REPEATER VANDALIZED IN IRELAND BACK ON THE AIR

Ireland's Limerick 2 meter repeater on 145.725 is back on the air once again. This after being off due to vandalism at the repeater site.

The repair involved installing a new run of hardline coax from the repeater to the antenna. Also, a new security door was installed on the repeater site building.

The repairs were made possible through donations received from hams all across Ireland for which ythe Limerick club says that it is sincerely grateful. (IRTS)

**

WORLDBEAT: HCJB GLOBAL SAYS 5000 SOLAR POWERED RADIO SENT TO AFRICA

HCJB Global has announced the near-completion of its major effort to bring its broadcasts to thousands of listeners throughout Africa. The campaign began last fall when HCJB partnered with Moody Radio to publicize the need for the funds to purchase, program and distribute 5,000 SonSet Radio solar-powered radios to missions in Ghana.

As it turned out, the program brought in enough money to acquire an additional 2,000 radios to be delivered to missions in Sierra Leone and Burkina Faso. Additionally, 2,500 radios were recently shipped directly from the manufacturer to ministries in the Asia Pacific region. This included 1,000 to Indonesia, 1,000 to Thailand and 500 to Nepal.

The SonSet Radios are rugged, moisture-resistant handheld models featuring solar power-charged batteries and individual buttons for five fixed-tuned settings. The radios are programmed, tested and repackaged at the HCJB Global Technology Center before distribution. (Southgate)

DX

In DX, VA3ITA will be on the air August 8th to the 11th portable ZB2 in a VHF only operation from Gibraltar. Operations will be on 6 and 2 meters using a mix of digital, SSB and CW from the east side of the Rock, facing the Mediterranean Sea. Please check his qrz.com page for the latest news and email him directly to schedule a contact. QSL direct via home call either direct or via the bureau.

PA6NH, the contest team of North Holland, will be active during the RSGB IOTA contest held on to be held July 30th and 31st. Their operation weill take place from Texel Island using 100 watts into simple antennas. More on this operation is on-line www.pa6nh.com.

WB6OJB will be on the air as 7P8JK from Lesotho between September 15th to the 22nd. While mno other information was given, during his last Lesotho operation he was on the High Frequency bands from 40 to 10 meters using mostly SSB with some CW. QSL direct to his home callsign.

Members of the Jersey Contest Group will be active as GJ2A from Jersey Island during the Radio Society of Grreat Britain's Islands on the Air Contest. If you work them, QSL via Logbook of the World or direct to GJ3DVC.

PB2JJ will be active as 9H3JN from Malta between September 2nd and the 14th. Operations will be on 80 through 10 meters mostly CW but with the bpossibility of some SSB. QSL this operation alson via his home callsign.

EA3PT will be active stroke EA6 on Menorca Island between August 8th and the 21st. This operation will be holiday style meaning that he

will be on the air as he feels the need or as time permits. Bands announced are 40 through 10 using SSB only. QSL via Logbook of the World or by paper QSL to his home callsign.

Lastly, KF8UN will be in Peru until August 16th. He will be active stroke OA4 and says that he plans to work 20 meters with particular emphasis all day on August 8th. At other time he too will be operating holiday style. QSL via his home callsign.

Above from various DX news sources

THAT FINAL ITEM: SPY VS. SPY - 20th CENTURY STYLE

And finally this week how many of you remember the old "Spy Vs. Spy" comic in Mad Magazine. Well here's something that reads like its right out of that genre. Its a story about the Internet foreign intrigue that will leave you smiling and maybe wanting something sweet to eat. Amateur Radio Newsline's Bruce Tennant, has the story of the spies that got hacked by food:

--

According to published news reports, British spies successfully hacked into an al-Qaida website to replace instructions on how to build a bomb with - ready for this? Recipes for making cupcakes.

Nope, we are not kidding. The cyber offensive reportedly took place last year when the English language magazine aimed at Muslims in the West called Inspire was launched by supporters of al-Qaida in the Arabian Peninsula.

British intelligence officers based at the Government Communications Headquarters which is the state eavesdropping service, attacked the 67-page magazine, leaving most of it garbled. Instead of being able to read how to "Make a Bomb in the Kitchen of Your Mom," readers were greeted with computer code which actually contained recipes from The Best Cupcakes in America, published by U.S. talk show hostess Ellen DeGeneres.

The Washington Post reported that the British action followed a dispute between the CIA and the newly formed U.S. Cyber Command. The cyber unit had wanted to block the al Qaeda magazine but the CIA, which had countered such an attack, would expose sources and intelligence methods, won the debate and declined to allow an attack on Inspire. So the U-K did it for them and reports say that it took almost two weeks for magazine to post a corrected version after it had been sabotaged.

For the Amateur Radio Newsline, I'm Bruce Tennant, trying not to laugh to hard as I read this from Los Angeles.

--

An unnamed British security source said the Washington Post report was accurate but could not confirm details of the reported cupcake operation. (Various published news reports)

Is this Lloyd slimeball who never had a REAL ham ticket and used to get on some flame ham radio newsgroup (I wish I could remember the name) the same one that used to harbor a lot of bigotry and made himself a bigger rectum with every post? In fact he became such a big a-hole, he used to use Miralax as a dentifrice.

"Lardass Lloyd" <lardass.lloyd.davies@gmail.com> wrote in message news:fb85a234-7fdd-4cd5-819a-241ba144f96a@glegroupsg2000goo.googlegroups.com
...
> I happened to be traveling through Huntsville, Alabama early this morning, I
> decided to stop in Athens and see just how tough Lloyd Davies was going to act
> when he saw me in person.
>
>
> Many of you know that a few years ago, Lloyd got smart with several people in
> the Deja Newsgroup (now Google) and I issued a challenge to him. I told him I
> would be attending the Dalton, Ga. Hamfest if he wanted to continue the
> conversation. He said he would be there and he was going to kick my ass.
>

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

There are only 5 or 6 channels I give a shit about. Would you pay a hundred
bucks a month to watch Nat Geo and the History channel? I realize you spend
most of your time jerking off at your computer, so you may not be able to
relate to this.

It's not "can't," Cum-Guzzler. It's a matter of common sense. I pay for
hundreds of channels, yet only watch half a dozen. That's simply not worth a
hundred bucks a month.

Let's talk about you, now that I trolled you into admitting you're a faggot.
What's your preferred brand of anal lube, or does your boyfriend just spit on
it, prison-style?

==> + AMATEUR RADIO IN SPACE: AFTER DELAYS, ARISSAT-1 DEPLOYED FROM ISS

Amateur Radio has a new satellite! Despite concerns that led to an almost four hour delay in deployment from the International Space Station, ARISSat-1/KEDR is in operation. According to reports flowing in from around the world, both the transponder and telemetry are working. Cosmonauts Sergei Volkov, RU3DIS, and Alexander Samokutyaev, successfully deployed Amateur Radio's newest satellite: ARISSat-1/KEDR. The deployment -- originally scheduled to occur at 1457 UTC on Wednesday, August 3 -- was delayed due to antenna concerns. Read more here <http://www.arrl.org/news/arissat-1-finally-deployed-from-iss>.

==> + AMATEUR RADIO IN SPACE: HAMS REPORT ARISSAT-1'S LINEAR TRANSPONDER IS WORKING

After its eventful deployment yesterday
<http://www.arrl.org/news/arissat-1-finally-deployed-from-iss>,
ARISSsat-1 is definitely working. Hams from all over the world have
reported hearing the voice, CW and SSTV transmissions. Despite concerns
that the UHF antenna was either missing or damaged, the linear
transponder is working and some people are already making contacts with
it. The August 3 deployment was delayed nearly four hours after
cosmonauts Sergei Volkov, RU3DIS, and Alexander Samokutyaev, expressed
concerns that only one antenna -- the VHF antenna -- was visible.

"I was able to hear myself with as little as 1 W on the 0425 UTC
pass," AMSAT Vice President for Operations Drew Glasbrenner, KO4MA,
wrote on the AMSAT e-mail reflector. "Antennas are a M2 CP42 on RHCP
up, and a 10 element horizontal Yagi down. ARISSat-1 sounded very good,
and cycled on and off with the telemetry. I also managed to grab two
frames of telemetry right after AOS." Glasbrenner posted a video
<http://www.youtube.com/watch?v
FyZNAbOeA> of his transponder test.

Calling it a "very good first day," ARISSat-1/KEDR Project Manager
Gould Smith, WA4SXM, said that hams are submitting SSTV images to ARISS
SSTV Gallery <http://www.amsat.org/amsat/ariss/SSTV/>, and BPSK-1000
telemetry and experiment data is coming into the telemetry server.
"ARISSat-1/KEDR continues to work well with good reports coming in from
around the world," he said. "The satellite is warmer than we expected,
so we will continue to monitor this."

The 435 MHz/145 MHz linear transponder operates in Mode U/v (70 cm up,
2 meters down). It is a 16 kHz wide inverting passband, and the
convention is to transmit LSB on the 435 MHz uplink and receive USB on
the 145 MHz downlink.

==> + AMATEUR RADIO IN SPACE: ARISS TEAM EXCITED BY NEW PROPOSAL
PROCESS

Earlier this year, the education office at NASA's Johnson Space
Center (JSC) sent a message to more than 18,000 US educators,
describing the Amateur Radio on the International Space Station (ARISS)
program. This kicked off the first step in a new process used by the
ARISS team in selecting US schools for ARISS educational events, such
as an Amateur Radio contact between the ISS and the classroom. Early
last fall, staff from JSC's Teaching From Space program approached
ARISS leaders, looking to revise how they work with schools in order to
greatly increase the number of educators who know about ARISS.

According to ARRL ARISS Program Manager Rosalie White, K1STO, the
ARISS team has worked steadily for the past six months on an end-to-end
transition for the new proposal process. The work began last October
with ARRL Education Services Manager Debra Johnson, K1DMJ, hosting a
meeting at ARRL Headquarters for representatives from NASA, ARRL and
AMSAT. In May, White and four NASA and AMSAT team members gathered in
Maryland for a two day meeting to hammer out the final details. Read
more here

<http://www.arrl.org/news/ariss-excited-by-new-proposal-process>.

==> + ARRL RECOGNIZES: ARRL BOARD NAMES ANGEL SANTANA, WP3GW, WINNER OF SILVER ANTENNA AWARD

Angel Santana, WP3GW, has been named the winner of the 2011 Philip J. McGan Memorial Silver Antenna Award for his volunteer public relations work on behalf of Amateur Radio. Santana was recognized for his work and recommended for the award by the ARRL Public Relations Committee; the ARRL Board of Directors conveyed the award at their 2011 Second Meeting last month. "It came as a surprise when ARRL Southeastern Director Greg Sarratt, W4OZK, sent me the notification about winning the 2011 Philip J. McGan Award," Santana said. "I had about two hours of shock before landing again to Earth!" ARRL Media and Public relations Manager Allen Pitts, W1AGP, called Santana a "sparkplug for a major surge of good publicity" in Puerto Rico. Read more here <http://www.arrl.org/news/arrl-board-names-angel-santana-wp3gw-winner-of-silver-antenna-award>.

==> + INVESTIGATION BY ARRL OOS, RESEARCHERS LEADS TO RESOLUTION OF 60 METER INTERFERENCE

Collaboration between ARRL Official Observers and researchers at Rutgers University has resulted in a change of operating frequency of coastal HF radars, eliminating interference to amateur stations using two frequencies in the 60 meter (5 MHz) band.

In July 2003, radio amateurs in the US received secondary privileges on 60 meters. Its strict guidelines -- no CW, operation just on five distinct channels using USB, a maximum effective radiated power of 50 W and only open to General, Advanced and Amateur Extra class licensees -- have prevented it from being popular. At first, amateurs interested in operating on 60 meters had to make modifications to the radios in use at the time. But now, more rigs are available that are designed to operate on 60 meters directly, or with a simple manipulation of menus.

Over time, radio amateurs heard various signals on the channels; users assumed these signals were those of government users and protected as such. Normally, advice to amateurs is to "use it or lose it" in regard to band usage, but on 60 meters, the watchword seemed to be "misuse" the band and lose it. So amateurs were cautious and compliant and when the band was made available to radio amateurs, users reported that everyone on the band was friendly and courteous, with at least one amateur reporting "that it was the way all the other bands used to be."

But recently, with more users and people monitoring and using the band, amateurs began hearing more Coastal Ocean Dynamics Applications Radar (CODAR) signals on the channels. CODAR is a form of HF radar used by a number of institutions to research and study ocean currents and waves. Amateurs frequently reported CODAR sounds as that "repetitive loud swishing sound" on the band. Read more here

<http://www.arrl.org/news/investigation-by-arrl-oos-researchers-leads-to-reso
lution-of-60-meter-interference>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that
the ARRL is doing on behalf of its members. This installment -- which
covers the month of July -- takes a look at the 2011 Second Meeting of
the ARRL Board of Directors, the Republic of South Sudan -- the newest
DXCC entity, the latest equipment and resource grants awarded to
schools, the League's request to the FCC to keep open a proceeding
regarding 2300 MHz, reports from the Official Observer Desk and more.

<http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-36>.

==> SOLAR UPDATE

Tad "The Sun in my disgrace
<http://www.youtube.com/watch?v=3mbBbFH9fAg&ob=av3e>" Cook, K7RA,
reports: Solar activity increased markedly this week, with the sunspot
number rising to 130 on August 1, the highest since a reading of 131 on
April 14, 2011. The average daily sunspot number for this week rose
nearly 54 points to 99.3. But the big news is a couple of coronal mass
ejections hurtling clouds of energy toward Earth, which should upset
geomagnetic conditions from their recent quiet. The CMEs came from
sunspot group 1263, which is quite large and centrally located on the
solar disc. The latest forecast has the planetary A index for August
4-11 at 5, 25, 20, 25, 20, 12, 5 and 8. The predicted solar flux for
August 4-5 is 120; August 6-10 is 115, 110 for August 11, and 100 on
August 12-16. Geophysical Institute Prague predicts active conditions
on August 5-7, unsettled to active August 8, quiet to unsettled August
9 and quiet conditions August 10-11. Look for more information on the
ARRL website on Friday, August 5. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation

==> + ARRL RECOGNIZES: JERRY CLEMENT, VE6AB , WINS JULY QST COVER
PLAQUE AWARD

The winner of the QST Cover Plaque Award for July is Jerry Clement,
VE6AB , for his article "Gain Twist 75 Meter Mobile Monobander. "
Congratulations Jerry! The QST Cover Plaque award -- given to the
author or authors of the best article in each issue -- is determined by
a vote of ARRL members on the QST Cover Plaque Poll Web page
<http://www.arrl.org/cover-plaque-poll> . Cast a ballot for your
favorite article in the August issue today.

==> THIS WEEK ON THE RADIO

This week:

- August 5 -- NCCC Sprint Ladder
- August 6 -- TARA Grid Dip Shindig; European HF Championship
- August 6-7 -- ARRL UHF Contest
<http://www.arrl.org/news/the-bands-heat-up-for-the-2011-arrl-august-uhf-cont
est>;
North American QSO Party (CW); 10-10 International Summer Contest (SSB)
- August 7 -- RSGB RoPoCo CW; SARL HF Phone Contest
- August 10 -- NAQCC Straight Key/Bug Sprint
- August 10-11 -- CWops Mini-CWT Test

Next week:

- August 12 -- NCCC Sprint Ladder
- August 13-14 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 14 -- SKCC Weekend Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page

RADIO LAW: FCC DISMISSES PETITION TO BAR ALL CONVICTED FELONS FROM HOLDING HAM LICENSES

The FCC has turned away a petition for rule making that asked that convicted felons be barred from holding an amateur radio license. Amateur Radio Newslne's Bruce Tennant, K6PZW, has the details:

--

In its July 29th letter to Bernard J. Parker, K5BP, of Dallas Texas, the FCC stated that it was dismissing his Rule Making request filed May 25, 2011 that dealt with a rules change request to bar convicted felons from holding amateur radio service licenses.

In its dismissal order the FCC stated that before it will revoke a license or deny an application based on the felony conviction, that it takes into consideration factors that may mitigate a licensee's felonious misconduct.

For example, the Commission says that it reviews the willfulness of the misconduct; the frequency of the misconduct; how recently the misconduct occurred; the seriousness of the misconduct; efforts made to remedy the wrong and the persons overall record of compliance with FCC rules and policies. It also takes under consideration any form of rehabilitation that a convicted felon may have been subject to.

The FCC went on to say that Parker has not presented grounds for the Commission to revisit this policy. It stated that Parker's argument that the policy is contrary to the basis and purpose of the amateur service fails to recognize that the Commission has an established

process for assessing whether a felony conviction is grounds for denying participation in the amateur radio service.

The FCC then continued that Parker offered no persuasive argument for barring anyone convicted of any felony from ever obtaining an amateur radio operator license and that he gave no evidence that the current policy is undermining the purpose of the amateur radio service. Nor that it is otherwise contrary to the public interest.

Rather, says the Dismissal order, Parker's petition relies entirely on the case of a single amateur licensee and does not discuss why a higher standard should apply to the amateur service than to other communications services.

Thus, says Scot Stone who is Deputy Chief of the FCC's Mobility Division, a felony conviction does not necessarily disqualify all people from holding am amateur service license. Rather, the question of disqualification is addressed on a case-by-case basis.

Based on its findings the FCC has concluded that the regulatory change petition filed by Bernard J. Parker presents no evidence of an existing problem that has not been considered before, or other evidence meriting a rule change. Therefore, Parkers petition has ben dismissed.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Who the amateur the Parker petition was referring to was not mentioned by name or call in the FCC dismissal order. Nor is it known if Parks will appeal the staff decision dismissing his petition to ban convicted felons from the amateur service to the entire commission or possibly into the Federal courts. (FCC)

DX NEWS: ST0R CONTINUES TO RACK UP CONTACTS FROM THE SOUTH SUDAN

The ST0R operations from the newly created Republic of the South Sudan continues to work through the pile ups. By Monday, August 1st U-T-C time the contact number was passing the 60,000 QSO mark. They continue to operate five stations and are trying to get as many QSO's as possible before its time for them to secure their operations.

As is the custom and practice of the Intrepid-DX Group, they invited local youth to visit see the operation. 25 boys from the Juba Secondary Boy's Academy have already visited. They were given a tour of the ST0R where they were the various aspects of amateur radio were demonstrated. They also listened in as QSO's were made around the world. Their visit was recorded in photos now posted at tinyurl.com/juba-students

The ST0R DXpedition and will continue to be active through August 10th. We will have more DX news later on in this weeks Amateur Radio Newsline report. (Intrepid DX Group)

**

HAM RADIO IN SPACE: ARISSAT-1 NOW ON ORBIT

The ARISSAT One ham radio satellite is now on-orbit. Bill Pasternak, WA6ITF, is in our Newsroom with the latest

--

ARISSat-1 telemetry: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

In NASA-ese, that's the sound of a satellite on-orbit. In this case it's the two meter downlink of the brand new ARISSat-1 that was successfully deployed from the International Space Station at 14:43 EDT on Wednesday, August 3rd .

Russia's Sergei Volkov, RU3DIS, was the space walking cosmonaut who actually hand-tossed the box-like satellite into space. This, after he and fellow space walker Alexander Samokutyaev pushed the 57 pound ARISSat-1 through an air-lock and away from the ISS, but not without incident.

Soon after the spacewalk began, the astronauts and flight controllers realized one of two 70centimeter antennas may have somehow broken off the satellite. Experts on the ground have no idea how or when it may have happened, but after debating for close to three hours, Mission Control instructed Volkov to release it. As he did, Samokutyaev photographed the event as ARISSat-1 left the space station at a rate of just over 3 feet per second. Not long after ARISSat-1 was in space, its telemetry beacon was received by JR8LWY as the satellite passed over Japan.

According to several sources, the transmitting capability of ARISSat-1 will not be affected by the loss of that antenna, but the reception of signals from the ground might be somewhat degraded. None the less, test transmissions its voice transponder by AMSAT Vice President for Operations Drew Glasbrenner, KO4MA, proved that ARISSat-1 is a viable relay station in space at power levels on the uplink as low as 1 watt:

--

KO4MA test audio: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

According to Glasbrenner, he was able to hear himself with as little as 1 watt on the 0425 UTC pass. His antenna system consisted of an M2 CP42 with right hand circular polarization on the uplink and a 10

element horizontal yagi for reception. We took the audio file supplied to us by Dave Marthouse, N2AAM, applied a bit of digital filtering magic and KO4MA, literally popped out of the background noise. Take a listen:

--

KO4MA test audio noise reduced: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

So whats next for ARISSat-1. According to a news release from AMSAT, full operational capability of the satellite is still under underway to evaluate its performance with the missing UHF antenna. Those hearing ARISSat-1 are asked to submit reception signal reports on amsat-bb and via the mission's e-mail boxes on located at www.amsat.org.

In the meantime, you can keep an ear on the bird and listen not only for the sound of its telemetry, but also for the voices of people from around the world speaking in many languages and sending greetings like this recorded by Richard Flagg, AH6NM during an earlier test of ARISSat-1 while it was still on-board the ISS:

--

Greetings audio: Hear it in the MP3 audio version of this weeks newscast downloadable at www.arnewsline.org.

--

Right now, the best place to listen out for ARISSat-1 is on 145.95 MHz. If it passes overhead, you will hear it even with as modest antenna such as the dual band vertical in the attic we have here.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, on the U-S West coast in the City of Angels.

--

More on ARISSAT One in future Amateur Radio Newsline reports. (ANS, ARISS, AH6NM, AH6RH, N2AAM, others)

HAM RADIO POLITICS: IARU REGION 1 MEETING TO BE WEBCAST

The upcoming International Amateur Radio Union General Conference to be held August 12th to the 19th in Sun City, South Africa will be streamed live to the Internet. To access it in real time, you will need to take your web browser to live.datamatix.at:8032/listen.pls to activate the stream. If you do so before the meeting begins you should hear the following announcement:

--

IARU Audio: "Welcome to the IARU Region 1 audio stream from the General Conference in Sun City. The live vtransmission will start with the opening meeting."

--

We tested the audio stream on a PC running the Windows 7 operating system using several popular media players. These included Real Player, Microsoft Media Player and Winamp. All three brought up the stream with no problem, albeit in our case we found Winamp to give the best overall quality.

Again the dates to the IARU Region 1 conference is August 12th to the 19th. The planners welcome you to listen in on-line. (IARU R1)

**

HAM RADIO AND 911: KCRA TO OPERATE COMMEMORATIVE STATION FROM CONFERENCE HOUSE

New York City's Kings County Repeater Association has announced that it will be a part of the 911 events commemorative events to be held at the historic Conference House on Staten Island. The group plans to operate under the clubs KC2RA call sign to honor those who lost their lives on September 11th, 2001. This after middle-East fanatics high jacked four U-S flag carrying jetliners, crashing two into the World Trade Center towers in New York and a third into the Pentagon near Washington DC. The forth plane crashed in rural Pennsylvania when the passengers on-board challenged the al Quida lead air pirates.

The operation by the Kings County Repeater Association will take place on September 10th from 1300 to 2100 hours UTC on 7.250 lower and 14.295 MHz upper sideband. There will also be local operation on the New York City 146.430 Mhz repeater that uses an access tone of 136.5 hertz and world-wide using Echolink node 132967 which is the KC2LEB repeater. Frequencies on the high frequency bands may vary due to conditions and usage. Operations may not be on all frequencies at the same time. Please QSL with a a self addressed stamped envelope to the Kings ounty Repeater Association 911 Memorial Event, PO Box 280288, Brooklyn, NY 11228-0288

By way of background, the museum from where the operation will occur is named in memory of the September 11, 1776 conference convened at that location in an attempt to end the Revolutionary War. In attendance were British Admiral Lord Richard Howe, and American representatives

including John Adams and Benjamin Franklin. The conference failed because of Howe demands the colonists revoke the Declaration of Independence. (KCRA)

**

HAM RADIO AND 911: N3U TO COMMEMORATE 911 FROM PENNSYLVANIA

Also, listen out for special event station N3U stroke Flt93 to be activated once again from September 8th to the 15th. Its stated purpose is to remind amateur radio operators world-wide of the tragic events that happened near Shanksville, Pensylvania, New York City and Washington DC on September 11, 2001.

United Airlines Flight 93 was a scheduled morning transcontinental flight across the United States from Newark International Airport in to San Francisco International Airport. On Tuesday, September 11, 2001, the Boeing 757 aircraft was hijacked by four al-Qaeda terrorists as part of the September 11 attacks. It subsequently crashed into a field near Shanksville, Pennsylvania during an attempt by some of the passengers to regain control. Although the evidence remains inconclusive, it is widely presumed the intended target was the United States Capitol or possibly the White House.

Its known that after the hijackers had taken control of the plane, several passengers and flight attendants were able to make telephone calls and learn that attacks had been made on the World Trade Center in New York and the Pentagon in Virginia. As a result, some of the passengers decided to try to regain control of the aircraft. During the attempt, the plane crashed into a field in Stonycreek Township, near Shanksville in Somerset County, Pennsylvania, about 80 miles southeast of Pittsburgh. All on board were killed.

This year's operation will take place during 10th anniversary and the Memorial Dedication for the victims of United Flight 93. If you happen to make contact with N3U, QSL's for this special commemorative operation go with a stamped self addressed envelope to N3U/Flt 93 via W3PN, either direct or via the bureau. (OPDX)

**

RESCUE RADIO: HF LINK ALE TEST AUGUST 5 TO 15

Hams world-wide are being invited to participate in 10 days of High Frequency Automatic Link Establishment activity on the air. The purpose of this event is to encourage A-L-E communication techniques among amateur radio operators globally. The operation will begin at 00:01 UTC on Friday August 5th and continue through 23:59 UTC on Monday August 15th. This H-F Interoperability Event is an on-the-air international exercise to determine readiness for High Frequency Emergency Disaster Relief and Networking communications for the amateur radio service. More is on-line at hflink.com/aotaw. (HF LINK)

**

ENFORCEMENT: SACRAMENTO WOMAN ACCUSED OF MAKING 2457 CALLS TO 911 SINCE JUNE

The California Highway Patrol says that while there was never any emergency, that didn't stop a Sacramento woman from allegedly making 2,457 calls to the states 911 emergency response number since June.

According to CHP Officer Adrian Quintero, the woman identified as Jennifer Arguelles, age 44 was arrested after allegedly placing more than 130 non-emergency calls to 911 dispatchers on one Wednesday morning alone. Authorities claim that Arguelles dialed 911 some 180 times for non-emergencies on July 4 and during the month of June, called 911 for non-emergencies 2,147 times.

News reports say that Arguelles was always polite when she called in but would eventually hang up on dispatchers. By law they were required to call her back and make sure she didn't have an emergency.

Officer Quintero told the press that Arguelles used three different cell phones to make the 911 calls. Arguelles is facing a misdemeanor for unlawful use of the 911 system. (Published news reports)

**

RADIO LAW: MICROSOFT NAMED TO BE A WHITE SPACE DATABASE ADMINISTRATOR

Microsoft Corporation has been designated a white-spaces database administrator by the Federal Communications Commission. This brings the number nationwide to 10.

The purpose of the database and its administrator is to provide a reference for the unlicensed devices now authorized to operate between TV channels. Under the FCC's rules governing the use of white spaces, unlicensed devices must ping a database to make sure frequencies aren't occupied by licensed users. A white-space database must maintain a registry of fixed unlicensed devices and protected services such as full- and low-power TV transmissions, broadcast auxiliary facilities, private land mobile and commercial radio operations.

The commission issued a call for white-space database managers in late 2009. Nine responded, and all were conditionally designated in January of this year. Microsoft didn't apply until April of this year. The FCC now has made Microsoft administrator number 10. Along with the other nine designated administrators, Microsoft's database will be subject to a trial period of at least 45 days. (TVB)

**

HAM HAPPENINGS: EASTERN VHF/UHF CONFERENCE IN ENFIELD CT IN OCTOBER

Turning to the ham radio social scene, word from the North East Weak Signal Group that it will sponsor the combined Eastern VHF/UHF Conference and Microwave Update 2011 Conference in Enfield, Connecticut

from October 13th to the 16th. The venue this year is the Holiday Inn Hotel in Enfield. This is the hotel formerly known as the Crowne Plaza. More information on the convention, its participants and the planned program, along with hotel and conference registration information can be found on-line at www dot microwaveupdate dot org. (WZ1V)

**

HAM HAPPENINGS: AMSAT SEEKS PRESENTATIONS FOR 2011 SPACE SYMPOSIUM

A first call has gone out to solicit papers to be presented at the 2011 AMSAT Space Symposium. The event is slated for Friday, November 4th through Sunday, November 6th at the Wyndham San Jose Hotel, San Jose, California. Proposals for papers, symposium presentations and poster presentations are invited on any topic of interest to the amateur satellite community. A tentative title of a presentation is required as soon as possible. The final copy must be submitted by October 1st for inclusion in the printed proceedings. Abstracts and papers should be sent as soon as possible to Dan Schultz, N8FGV, by e-mail to n8fgv (at) amsat (dot) org (N8FGV)

**

NAMES IN THE NEWS: LEO LAPORTE NOW KJ6QGP

And a warm welcome to amateur radio to TWIT.TV network founder Leo Laporte who now sports the call letters KJ6QGP. But not for long.

With the urging and guidance of both Bob Heil in Gordon West, the self proclaimed "Chief Twit and President of the Internet" has already applied for a vanity call sign and expects W6TWT to reflect the name of his fledgling media empire: "This Week in Technology." He may already have that callsign as we go to air.

Leo, who is known quite well in the world of both the media and by the public as the go-to tech guy, has been a fixture on radio and television for many years. He became involved in the hobby through his association with ham radio's Mr. Audio, Bob Heil, K9EID. This, when he discovered Bob's professional line of microphones and made them his standard mic for all of his live to air and recorded programming.

Bob has been a guest on several Twit interview shows. But the impetus to get his license and perhaps the thing that convinced Leo to launch the "Ham Nation" podcast was when Leo attended Bob's amateur radio reception at the 2011 National Association of Broadcasters convention last April. The two became close friends and with a little help from Bob and ham radio educator Gordon West, WB6NOA, Leo has now become a member of the ham radio fraternity.

Leo studied for and passed his Technician class license while maintaining his nearly 20 hours per week live broadcast schedule and while overseeing the construction of his new 10,000 square ft. studio

and transmission center which opened July 24. Word is that he's planning to take the "General" in about a month. We wish him the very best. (ARNewsalineT)

RADIO SCIENCE: WHAT LIGHT BULB DESIGNATIONS MEAN

Light bulb descriptions can seem mysterious and at times totally unfathomable. That said but they tell a lot about any given lamp.

Many bulb descriptions include a letter followed by a number. A few examples are such nomenclatures as BR30, PAR20, ED28 and T8. The letters are a code for bulb shape and the number is the diameter of the bulb, at the widest point, in 1/8inch increments. To calculate the diameter in inches, simply divide the number by 8.

Now look at a typical fluorescent bulb description: F32T8/841. Translation: F is fluorescent, 32 is watts, T is shape , in this case tubular. The second set of numbers such as an 8 is diameter 1 inch and 841 gives you the color temperature information. Here the first number tells you the color temperature range while the second two numbers indicate color temperature In ths example 41 means 4100K. And as Mr. Spock of Star Trek fame might say: Its all quite logical after its explained. (Science OnLine)

RADIO FROM SPACE: MISSING SPACE ORBITER FOUND ON THE MOON

NASA scientists believe they may have found the final resting place of a 1960's space probe which took what some consider as being the definitive picture of the 21st century. This, before it crash-landed on the far side of the Moon.

The information comes in new imagery radioed back to Earth from the Lunar Reconnaissance Orbiter. This is a spacecraft sent up to circle the Moon under the Bush administration's plan for a manned return to the lunar surface as a precursor to manned missions to Mars. The orbiter was intended to map the lunar surface in unprecedented detail, perhaps discovering useful ice deposits or crater-rim landing sites where solar power would be available year round.

All that became moot when Congress refused to fund the Moonbase plans and president Obama eventually axed them. But the lunar probe has nonetheless produced many fascinating finds. Now, NASA believe that it may have discovered the crash site of a previous Lunar Orbiter 2.

Lunar Orbiter 2 had a similar mission to the Lunar Reconnaissance Orbiter, in that it was sent up to help with selection of landing sites for the Apollo moon missions. However the instrumentation of that era was far less sophisticated than todays.

Despite not being a total success in the matter of moon mapping, Lunar Orbiter 2 did achieve lasting fame when it sent back a stunning oblique image of the Copernicus crater in 1967 dubbed "the picture of the century" by news media. Later that year, its mission complete, the Orbiter was disposed of by commanding it to crash-land on the far side of the moon.

Its exact resting place has never been known, but now the operators of the Lunar Reconnaissance Orbiter have found what they believe is a tell-tale impact site just at the coordinates where the Orbiter should have come down.

It's not yet certain that this marks the final resting place of the greatest robot photographer of the last century, but scientists are working on confirmation. They say, stay tuned for more. (Science On_Line)

WORLDBEAT: SOUTH AFRICAN RADIO LEAGUE CONSIDERS ON-AIR YOUTH FORUM

The South African Radio League Council is considering the formation of an on-the-air youth forum. The objective is to create a space where young radio amateurs can share ideas and talk to each other. The forum will be run with connections to various repeaters and HF. One proposal is to run it once a month at an early evening time slot. The Council would like to begin operations sometime in early December. (SARL)

RADIOSPORTS: WRTC2014 RELEASES NEW PROMOTIONAL VIDEO

A new promotional video for the 2014 World Radiosport Team Championship games has been released by the events planners. Produced for the planners by noted film maker James Brooks, 9V1YC, the video showcases the aspect of radiosports along with showing the planning that goes into preparing to host an event of this magnitude.

For those not aware, the World Radiosport Team Championship or WRTC is held every four years. The games consist of approximately 50 two-person teams of amateur radio operators from around the globe competing in a test of operating skill. Unlike most on-the-air competitions, all stations are required to use identical antennas and to operate from the same geographic region. This eliminates all variables except operating skill and ability.

Hosting rights for the 2014 WRTC have been awarded to the New England WRTC2014 Organizing Committee. This organization is a newly-formed independent group, and not part of any existing organization, national society, or club and has taken the point position oin preparing for this ham radio Olympian-like event. You can see the new promotional video on-line at tinyurl.com/wrtc2014. More information on the planning of the 2014 World Radiosport Team Championship 2is on-line at wrtc2014.org.

(WRTC2014, Southgate, ARNewsline(tm))

ON THE AIR: 8J1A TO CELEBRATE HAM FAIR 2011

To celebrate the Ham Fair amateur radio convention in Tokyo, Japan, special event station 8J1A will be activated between August 1st and the 28th. Planners say to expect stations to be active on all bands and using all modes. If you contact 8J1A, QSL via the J-A-R-L bureau.

(JARL, ICPO)

**

DX

In DX, word that I2DMI, will be on the air as CE0Y from Easter Island through Monday, August 8th. His operations are on 80 through 10 meters, including 17 and 12 meters using mostly RTTY. QSL via his home callsign, direct or via the bureau. His log will be uploaded to Logbook of the World and eQSL.

Members of the Dutch Low Land DXpedition Team are planning a trip to Luxembourg from August 30th to September 6th. Operators PA3EWP, PA9JO, PA7FM and PA1AW will be signing their individual home callsigns portable LX for this operation which will encompass all bands from 160 through 2 meters. The team is willing to accept activity requests reflecting the demand for the LX prefix worldwide. More details are available on line at lx2011 dot lldxt dot nl QSL all callsigns via PA1AW.

Another Netherlands-based team who are all members of the Dutch Amateur Radio Contest and Expedition team will be active as PA9M stroke MU from Guernsey between October 23rd to the 30th. Operations will be on 160 through 6 meters using CW and SSB. QSL via PA9M, direct or by the via the bureau.

Lastly, KBZ0ZIA is now active from Djibouti City as J28FJ and will be there through the spring of 2012. New to DXing, he is currently set up to work 40 through 10 meters mostly SSB, but he may do some changes later. He plans to make a special QSL card for his stay in Africa. QSL via his home callsign.

(Above from various DX news sources)

THAT FINAL ITEM: BATC OFFERS FREE STREAMING SERVICE TO HAM RADIO EVENTS

And finally this week, if you want to webcast a ham radio happening to the world, the British Amateur Television Club is ready and eager to supply the assistance that you might need. According to an e-mail from Ian Abel, G3ZHI, the club has a high capacity streaming server available to any individual radio amateur or ham radio group that would like to use it for webcasting a ham radio event. According to G3ZHI, the server capacity was large enough to stream the recent AMSAT UK Space Colloquium:

--

G3ZHI: "Last weekend we has AMSAT on for the whole of the weekend. We had about 100 in, and we had people all over the world watching the AMSAT-UL webcast."

--

Nor is live netcasting the only aspeact of this free video streaming operation. Abel says that the BATC site is also a video repository for those who want to have their video material made available on-line:

--

G3ZHI: "The other good thing that may be of interest is that on the website you can not only watch live events of other peoples webcasts happening in real time, but there is also on the film archive so that any webcasts that have happened are also saved on the server if people wan't to do that. Then they can thn save it in the Film Archive so that others can look at them. So it's a great resource."

--

Ian tells Newsline that it is very easy to webcast and only requires the Adobe video encoder which is a free download and that use of the British Amateur Television Club streaming service is also free. If you are interested in making use of this service please contact Ian by e-mail to g3zhi (at) hotmail (dot) com. More information and the video archive is on-line at www dot batc dot tv. (G3ZHI)

GLENDALE, WV: The FCC requested July 11, 2000, that Roger L. Wiseman, KC8JBO, retake the General examination elements under the supervision of an ARRL-VEC volunteer examiner team. Wiseman must appear for retesting by September 11, 2000, or his license will be canceled. Applicants appearing for re-examination are granted an Amateur Radio license consistent with the elements passed. The FCC had written Wiseman on March 29, 2000, advising that it had been made aware of "an ongoing personal dispute" between Wiseman and another licensee that included allegations of interference or jamming on 20 meters. FCC Special Counsel for Amateur Radio Enforcement Riley Hollingsworth invited the two licensees to contact him to discuss the matter. Additionally, the FCC had sent Wiseman a Warning Notice last November in response to allegations of deliberate and malicious interference on 20 meters.

Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

I bet KB9RQZ can add his alleged "expertise".

Such as how he managed to work 75M on a 2M quarter wave mag mount antenna
that he stuck on the roof of one of his back yard junk cars.

He would like to be a volunteer moderator.

His byword is "get kelp".

OOPS! I forgot. He was recently banned from rec.radio.amateur.moderated,
from QRZ.com and from several other forums.
Oh...and he was also told to step down from his once lofty position as
President of his CCRAA club as a persona non gratis.

Still....

2200. [RAC-Bulletin] RAC Bulletin 2011-022E - Industry Canada Responds Favourably to RAC request for access to 60M. Public consultation to begin shortly.

RAC Bulletin 2011-022E - Industry Canada Responds Favourably to RAC request for access to 60M. Public consultation to begin shortly.
2011-08-07

Over the last year RAC has been in discussions with Industry Canada with the objective of obtaining access to 60M. This has been a policy objective of RAC since Spring of 2010.

At the last CARAB meeting between RAC and Industry Canada on May 17, 2011, two of the major items discussed were updates to Industry Canada's regulatory documents (RBR-4 and RIC-3), and the RAC request for an assignment of certain frequencies in the 60m (5 MHz) band to the amateur service in Canada. Neither of these subjects was finalized at the time of the meeting, but Industry Canada undertook to respond to RAC on both ofthem this summer.

Industry Canada has now informed RAC that at this point is sees no reason not to respond favourably to the RAC request for frequencies at 60m on a no protection, non-interference basis.

The new frequencies would be included in the schedule of amateur frequencies in the updated edition of RBR-4 to be released for public consultation in the future. Public submissions will be considered by Industry Canada in preparation for the final version of RBR-4. Any new frequencies it contains would become available to Canadian amateurs at the time of release of the updated RBR-4. Thus, if all goes well, Canadian amateurs may expect to gain access to frequencies at 60m, basically the same as those in the US, some time this fall.

The anticipated success of this initiative is the result of many months of effort from the RAC executive and volunteers, including the HF Band Planning Committee, and also from all of those amateurs who have made observations on the use of these frequencies and relayed their comments to RAC on the need for this band in Canada. We would not have been successful without all of your help and input.

Geoff Bawden, VE4BAW
President and Chair Radio Amateurs of Canada
Co-Chair of Canadian Amateur Radio Advisory Board

==> + PROPAGATION NEWS: SOLAR EXPLOSIONS COULD IMPACT EARTH

The National Oceanic and Atmospheric Administration is keeping an
eye on a set of solar storms and explosions that could disrupt
satellite, telecommunications and electric equipment here on Earth in
the next few days. While activity had reportedly returned to somewhat
normal levels when solar winds calmed the morning of Monday, August 8,
another explosion at 0805 UTC on Tuesday, August 9 was three times
larger than the February 15 flare, which, until now, was the most
significant flare of Solar Cycle 24.
```

Given the location of the activity, any coronal mass ejection (CMEs) from the flare would likely be directed away from Earth. As such, the Space Weather Prediction Center is not forecasting "significant Geomagnetic Storm activity," and the most recent storms should not affect radio amateurs. But when a CME does hit the Earth's atmosphere -- approximately 72 hours after exploding on the Sun -- the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF) -- the highest frequency by which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible. Read more here <http://www.arrl.org/news/solar-explosions-could-impact-earth>.

==> + FCC NEWS: VANITY CALL SIGN FEE TO GO UP IN SEPTEMBER

On August 10, the FCC announced via a Final Rule in the Federal Register that the cost of an Amateur Radio vanity call sign will increase 90 cents, from to $13.30 to $14.20. The new fees take effect 30 days after publication, making September 9, 2011, the first day the new fee is in effect. The vanity call sign regulatory fee is payable not only when applying for a new vanity call sign, but also upon renewing a vanity call sign for a new term. The first vanity call sign licenses issued under the current Amateur Radio vanity call sign program that began in 1996 came up for renewal five years ago. The FCC is authorized by the Communications Act of 1934, As Amended, to collect vanity call sign fees to recover the costs associated with that program. Read more here <http://www.arrl.org/news/vanity-call-sign-fee-to-go-up-in-september>.

==> + ARRL VEC TEAM ATTENDS NATIONAL VEC CONFERENCE

Representatives of 12 of the nation's 14 Volunteer Examiner Coordinators (VECs) -- either in person or via proxy -- met July 29 in Gettysburg, Pennsylvania for the 26th Annual National Conference of Volunteer Examiner Coordinators (NCVEC) Conference. NCVEC Chairman Larry Pollock, NB5X presided over the gathering that offered an opportunity for representatives of the VECs to discuss issues facing the volunteer examination program and to meet face-to-face with FCC staff members. The ARRL's delegation to the conference included ARRL VEC Manager Maria Somma, AB1FM, and Assistant VEC Manager Perry Green, WY1O, as well as ARRL Regulatory Information Manager Dan Henderson, N1ND. Read more here <http://www.arrl.org/news/arrl-vec-team-attends-national-vec-conference>.

==> + ON THE AIR: ATTENTION RTTY ROOKIES -- THE 2011 RTTY ROOKIE ROUNDUP IS HERE!

For the first time since the Rookie Roundup <http://www.arrl.org/rookie-roundup> came into being last year, the digital modes will get their day in the Sun: On August 21, the Rookie Roundup meets RTTY! "Created to give the budding operator a place to

learn about contesting at an easier pace, the Rookie Roundup is a six hour contest open to all amateurs who have been licensed for three years or fewer," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "If you were licensed in 2009, 2010 or 2011, you qualify as a Rookie. The Rookie Roundup is run three times per year: SSB in April, RTTY in August and CW in December." But "Old Timers" have a place in the Rookie Roundup, too. "Elmering is a critical component of the Rookie Roundup, and OTs are encouraged to not only get on and work the Rookies, but to host a Rookie and assist them with learning how to participate," Kutzko said. "Rookies can work anybody, but non-Rookies can only work Rookies." Read more here <http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>.

==> + ON THE AIR: GO HIGH FOR THE 2011 ARRL 10 GHZ AND UP CONTEST

If you enjoy the being on the cutting edge of Amateur Radio's technical side, take a look at the microwave bands. The 2011 ARRL 10 GHz and Up Contest gives you the perfect chance to explore this portion of the radio spectrum. This contest boasts two weekends of activity: August 20-21 and again on September 17-18. The contest period for both weekends starts at 6 AM (local time) on Saturday and runs until midnight (local time) on Sunday. Points are awarded based on the distance of a QSO, and operating from several locations during the contest period is not only allowed, it's encouraged! "Most amateurs use SSB, although there is some CW, as well," explained ARRL Contest Branch Manager Sean Kutzko, KX9X. "Power levels are relatively low compared to HF; most stations run several hundred milliwatts. A station running a few watts is considered a 'Big Gun.' Antennas are usually dishes, like those used for receiving satellite TV." Read more here <http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>.

==> SECOND CENTURY CAMPAIGN COMMITTEE MEETS IN NEWINGTON

The year 2014 marks the end of the first 100 years of the ARRL. In these 100 years, amateurs have seen spark gap give way to CW, FM and AM, SSB and the numerous digital modes, with the ARRL leading the way. In celebration of the beginning of a second century of Amateur Radio, the ARRL has formed the Second Century Campaign Committee. This group -- led by David W. Brandenburg, K5RQ, of Osprey, Florida -- had their first formal meeting in Newington on Thursday, August 11.

The Second Century Campaign Committee will develop and lead a multi-million dollar campaign, focused on building the ARRL Endowment to further secure resources to fund the League's commitment to the future. The ARRL Second Century Campaign will open the path to meaningful involvement in Amateur Radio by new generations, providing opportunities for educational enrichment, community service and personal achievement through the exploration and use of the magic of radio communication.

Members of the Second Century Campaign Committee are: Mike Valentine, W8MM, of Cincinnati, Ohio; Bob Allphin, K4UEE, of Marietta, Georgia; Frank Donovan, W3LPL, of Glenwood, Maryland; Ken Byers, K4TEA, of Atlanta, Georgia; L. Dennis Shapiro, W1UF, of Chestnut Hill, Massachusetts, and Glenn Johnson, W0GJ, of Bemidji, Minnesota. ARRL President Kay Craigie, N3KN, and Vice President Rick Roderick, K5UR, are also on the Second Century Campaign Committee, as are ARRL Chief Executive Officer David Sumner, K1ZZ, Chief Financial Officer Barry Shelley, N1VXY, and Chief Development Officer Mary Hobart, K1MMH. All members of the committee serve in a volunteer capacity.

==> GENERAL CLASS Q&A NOW AVAILABLE FOR KINDLE

The fourth edition of ARRL's General Q&A
<http://www.amazon.com/ARRLs-General-Q-A-ebook/dp/B005F0GPYU/ref=sr_1_1?s=digital-text&ie=UTF8&qid=1312818226&sr=1-1>
is now available from Amazon.com for the Kindle. This e-book is your authoritative guide to every question in the General (Element 3) question pool -- everything you need to pass your General class license exam. When you use ARRL's General Q&A, you can be sure that you are using the best way to review for the 35 question exam. The e-book includes every question -- and answer -- in the General class question pool, utilizing a multiple-choice format similar to the one on the actual exam. The current General class question pool is valid through June 30, 2015.

Kindle is shaped much like a book, with a paper-like screen that displays text and pictures. You do not need a Kindle to download and purchase the General Q&A: those who have the Kindle application installed on their Apple <http://www.apple.com/> iPhone <http://www.apple.com/iphone/> iPod touch <http://www.apple.com/ipodtouch/>, Android smartphone -- or even on their computer -- can download the book for use on these devices. Each version of the Q&A lets you review questions and answers from that element's entire question pool so you can pass your exam. The Tech Q&A
<http://www.amazon.com/ARRLs-Tech-Q-5th-ebook/dp/B003NE6D10/ref=sr_1_2?s=digital-text&ie=UTF8&qid=1312818226&sr=1-2>,
General Q&A
<http://www.amazon.com/ARRLs-General-Q-A-ebook/dp/B005F0GPYU/ref=sr_1_1?s=digital-text&ie=UTF8&qid=1312818226&sr=1-1>
and Extra Q&A
<http://www.amazon.com/ARRLs-Extra-Q-A-ebook/dp/B0032Z74TU/ref=sr_1_3?s=digital-text&ie=UTF8&qid=1312818226&sr=1-3>
are available from Amazon.com for $9.99 each. The soft cover version of the General Q&A is also available
<http://www.arrl.org/shop/ARRL-s-General-Q-and-A-4th-Edition/> for $17.95. Upgrade and enjoy more frequency privileges today.

==> AMATEUR RADIO TECHNOLOGY: 30TH ANNUAL ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR SEPTEMBER

The Four Points Sheraton Hotel at Baltimore Washington International Airport is home base for the 30th annual ARRL/TAPR Digital

Communications Conference, September 16-18. This conference is an international forum for radio amateurs to meet and publish their work, as well as present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. Read more here <http://www.arrl.org/news/30th-annual-arrl-tapr-digital-communications-conference>.

==> + MALPELO DXPEDITION TO GET UNDERWAY IN JANUARY 2012

The HK0NA DXpedition to Malpelo -- an island located approximately 235 miles from Colombia's Pacific coast -- is scheduled for January 22-February 6, 2012. Organized by the DX Radio Amateur Club out of Colombia, the DXpedition boasts an international team of 16 operators from eight countries. Malpelo is currently #12 on DX Magazine's 100 Most Needed Countries Survey. According to DXpedition leader Jorge Prieto, HK1R, the HK0NA Team will depart from Buenaventura, Colombia on January 22 for the boat trip to Malpelo. Depending on sea and landing conditions, they expect to be on the air within 36 hours after landing on Malpelo. They will be using SSB, CW and Digital modes on 160-6 meters. Operations are planned on 160-6 meters on CW, SSB and Digital modes, including EME. Read more here <http://www.arrl.org/news/malpelo-dxpedition-to-get-underway-in-january-2012>.

==> SOLAR UPDATE

Tad "The Sun is zooming in <http://www.youtube.com/watch?v=FiVvA9YQpiI>" Cook, K7RA, reports: The average daily sunspot numbers declined more than 24 points to 75.1 this week, while the average daily solar flux was down more than 12 points to 104.3. We saw solar flares recently, with a substantial geomagnetic upset on Friday and Saturday -- August 5-6 -- when the planetary A index was 49 and 31. The largest solar flare of the current sunspot cycle <http://www.arrl.org/news/solar-explosions-could-impact-earth>, an X7 flare, occurred at 0805 UTC on August 9, emerging from sunspot group 1263. This does not appear to be Earth-directed. The latest forecast from NOAA has solar flux at 85 through August 17, then 90, 98, 98 and 100 on August 18-21, and then 105 on August 22-30. The planetary A index is expected to be 7 on August 11, 5 on August 12-15, then 15, 18, 10, 8, 5, 12 and 8 on August 16-22, 5 on August 23-25, and 15, 10, 8, 5 and 5 on August 26-30. Look for more information on the ARRL website on Friday, August 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Clash's London Calling <http://en.wikipedia.org/wiki/London_Calling_%28song%29>.

==> + RTTY DXCC AWARD NOW KNOWN AS DIGITAL DXCC AWARD

At the 2011 Second Meeting of the ARRL Board of Directors
<http://www.arrl.org/news/arrl-board-of-directors-gathers-in-connecticut-for-2011-second-meeting>,
the Board voted to change the name of the RTTY DXCC Award to the Digital DXCC Award. In changing the name, the Board took into account that Amateur Radio technology has advanced to include many variations of digital communications. On July 25, the word "Digital" began replacing "RTTY on these DXCC certificates.

==> + FORMER "WORLD ABOVE 50 MHZ" CONDUCTOR RECEIVES CSVHFS'S PRESIDENT'S AWARD

At the recent Central States VHF Society (CSVHFS <http://www.csvhfs.org/>) Convention -- held July 29-30 in Irving, Texas -- CSVHFS President Chuck Clark, AF8Z, presented the President's Award to Gene Zimmerman W3ZZ
<http://www.arrl.org/news/gene-zimmerman-w3zz-to-retire-from-the-world-above-50-mhz>.
"I truly appreciate this award," Zimmerman told the ARRL. "Central States is one of the best known VHF organizations in the United States, and as a former CSVHFS Director, I know what an honor all CSVHFS awards are." The award was given in recognition of Zimmerman's work on E-skip propagation and being the VHF Editor and conductor of QST's "The World Above 50 MHz" column for the past nine years.

==> THIS WEEK ON THE RADIO

This week:

- August 12 -- NCCC Sprint Ladder
- August 13-14 -- Maryland-DC QSO Party; WAE DX Contest (CW)
- August 14 -- SKCC Weekend Sprint

Next week:

- August 19 -- NCCC Sprint Ladder
- August 20 -- Feld Hell Sprint
- August 20-21 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>;
SARTG WW RTTY Contest; North American QSO Party (SSB); Russian District Award Contest; CWOps CW Open
- August 21 -- ARRL Rookie Roundup (RTTY)
<http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>;
SARL Digital Contest
- August 22 -- Run for the Bacon QRP Contest
- August 24 --
- August 24-25 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out

the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- August 20 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-1>,
Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention
<http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest>,
Huntsville, Alabama
- August 21 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-1>, Salina,
Kansas
- August 28 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>,
New Kensington, Pennsylvania
- September 9-11 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>,
Torrance, California
- September 11 -- ARRL Great Lakes Division Convention
<http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest
>,
Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention
<http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>,
Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention
<http://www.arrl.org/hamfests/connecticut-state-convention-1>,
Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention
<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,
Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,

Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-bay-hamfest-1>,
Palmetto, Florida

What about pranksters who like to make it look like someone dropped a
brand new pack of filtered cigarettes all in and around the wet and
sloppy areas of a mens urinal, just to see how long it takes for
decent people like myself to rescue the little fags before they become
so soaked with piss, water, and Mr. Clean that they can never again
burn and smell and taste the way God intended.

Amateur Radio Newsline(tm) Report 1774 - August 12 2011

Amateur Radio Newsline report number 1774 with a release date of
Friday, August 12th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Only a short time left to comment on a
proposal to grant almost any ham with an expired license full credit
for past examinations; Canadian hams may get a permanent 60 meter
allocation; a possible solution to coordinarting digital voice
repeaters in Texas and the Sun emits a giant X-Class flare. Find out
what this means to your on the air operations on Amateur Radio
Newsline(tm) report number 1774 coming your way right now.

RESTRUCTURING: COMMENT PERIOD ON ANCHORAGE VEC LICENSING WAIVER
REQUEST CLOSES JUNE 19

There's just a bit more than a week left to voice your opinion to the
FCC on a July 6th request by the Anchorage Volunteer Examiner
Coordinator. One that would permit individuals whose amateur radio
operator licenses have expired and are beyond the grace period for
renewal to receive credit for examination elements previously passed.
Amateur Radio Newsline's Bruce Tennant, K6PZW, reports:

--

Section 97.505(a) of the FCC Amateur service requires that the
administering VE's give an examinee holding specified license grants or
documents credit for certain examination elements. Generally, an
examinee must hold an unexpired or expired but within the grace period
for renewal license to receive examination credit. As such, and an
examinee whose license has been expired for more than two years is not
eligible to receive credit for examination elements previously passed.

But the Anchorage VEC's petition requests that that the FCC permit
volunteer examiners to give former holders of Technician, General,
Advanced, and Extra Class licenses appropriate element credit so that
they can obtain new licenses without retaking the examinations. This,
regardless of when a license expired.

In making its argument, the Anchorage VEC says that allowing
examination credit for individuals who previously held an amateur radio
license which has expired and is beyond the grace period for renewal,

would allow these individuals to obtain a new license grant at an early date and thereby allow them to again participate in normal amateur radio activities.

The Anchorage group asserts that a waiver of this sort is in the public interest because it would result in the immediate expansion of the pool of experienced operators. Volunteers that would be available in time of national or regional emergency. It also notes that many of the potential beneficiaries of such a waiver are of advanced years and are interested in prompt resolution of this matter.

The proceeding has been designated as WT Docket 11-130. Comments on it are due no later than August 19th with reply comments due no later than August 29th.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Again the proceeding to address is WT Docket 11-130. Comments on it are due by August 19th with reply comments due no later than August 29th. (ARNewsline(tm), FCC)

**

PROPAGATION: SUN EMITS X-CLASS FLARE - COULD AFFECT HF PROPAGATION

Space Weather reports that on Tuesday August 9, at 0805 UT, sunspot 1263 produced an X7-class solar flare. Tis is only the third X-flare of new Solar Cycle 24 and the most powerful so far.

The brunt of the explosion was not Earth directed, however what's being described as a minor proton storm was in progress around our planet that could have affected satellites in high-altitude orbits. Also, radiation from flare created waves of ionization in Earth's upper atmosphere, briefly disrupting communications at some Very Low Frequency and High Frequency radio frequencies. What we hams call band outages.

According to Space Weather, images from NASA's Solar and Heliospheric Observatory radioed back images to Earth showed a Coronal Mass Ejection emerging from the blast site on the Sun. Astronomers believe the solar cloud created by this C-M-E will probably miss Earth however they would not rule out a glancing blow from its flank on or about the time this newscast went to air. (Space Weather)

**

WORLDBEAT: CANADIAN HAMS MAY GET PERMANENT 60 METER ALLOCATION THIS FALL

Canadian hams could have a permanent 60 meter allocation in the not to distant future. According to a news release by the Canadian national

amateur radio society Radio Amateurs of Canada, telecommunications regulator Industry Canada has now informed the society that it responds favorably to its request for frequencies at 5 MHz on a no protection, non-interference basis.

The new spectrum would be included in the schedule of amateur frequencies update to be released for public consideration in the future. Comments will be considered by Industry Canada in preparation for the final version of the new frequency plan. Any new frequencies it contains would become available to Canadian amateurs at the time of its release. Thus, if all goes as expected, Canadian amateurs may expect to gain access to frequencies at 5 MHz that are basically the same as those in the United States, some time this fall. (RAC)

**

WORLDBEAT: RAC FORMS TASK FORCE TO EXEMPT ONTARIO HAMS FROM DISTRACTED DRIVING LAW

Turning to news from around the world, Radio Amateurs of Canada has announced the formation of a task force to seek a permanent exemption for Ontario Amateurs. This from the ban on operating mobile devices in a vehicle under the provinces new Distracted Driving ban scheduled to take effect on January 1, 2013.

The Task Force has already obtained letters of support from groups that it assists ranging from hospitals to communities to served agencies and others. All of the letters indicate that limiting the ability of ham radio operators to provide communications while mobile would not be in the Ontario's best interests.

The Task Force will present the letters as part of its case to Kathleen Wynne who is Ontario's Minister of Transportation. The objective of the Distracted Driving Task Force is to convince the Ontario government that the regulation, as currently written, will actually decrease public safety in that province. (RAC, VE3XT)

**

RADIO IN SPACE: CERTIFICATES OFFERED FOR ASSISTING ARISSAT - 1

ARISSat One controllers can also use your assistance to keep track of their new bird as it circles the Earth. That being keeping tabs on the satellites telemetry as it downlinks its condition while on-orbit. And you will get a certificate of appreciation for assisting.

Monitoring the telemetry requires no computer or special programs to decode. It is made up from internal monitoring of certain selected satellite operations that are transmitted in a female voice. This voice data consists of Mission Elapsed Time in minutes, Internal Housekeeping and Control Panel temperature in degrees Centigrade, battery voltage and battery current draw. This information along with who you are, where you are and when you heard the telemetry goes by

e-mail to tlmreport (at) arissat1 (dot) org. Those who take part in this telemetry reporting program will receive a certificate in recognition of their contribution to the ARISSat One satellites flight.

Certificates are also available to anyone that receives the voice, digital or Morse code signals signals from ARISSat One. These can be heard using any 2 meter FM transceiver or a scanner radio tuned to 145.950 MHz.

ARISSat One transmits continuously in a round robin format a Voice ID, a greeting from space, voice telemetry, a voice ID and lastly a Slow Scan television image. A Secret password is included in most greetings. If you can catch it, simply e-mail it along with your name, the date, time, location where you heard the transmission along you're your e-mail address to secretword (at) arissat1 (dot) org to receive the certificate. (ARISSAT)

**

SELF POLICING: ACCIDENTAL DOT STATION LOCATED THROUGH GLOBAL INTRUDER WATCH COOPERATION

An unidentified ham in Northern California who inadvertently pushed a keyboard up against his Morse keyer is likely a bit contrite right now. This after the accident wound up producing a stream of dots at 25 words per minute heard world-wide for over a week.

The signal caused what might loosely be called a minor international incident. In fact it caused a global effort beginning in TU Region 3 and eventually involving stations in Region 1 via the Intruder Watch program. It also lead to various posts to DX Clusters and Yahoo groups which eventually resulted in the suspected radio amateur being contacted via the ARRL and being asked to check his station.

Signal reports were first received in New Zealand who's ham radio community heard it and raised the alarm. Others that became involved were hams in Europe, the United States, Afica and Australia. The result was a well coordinated global High Frequency hidden transmitter hunt that resulted in a solid triangulation on the Western United States and eventually right to the front door of the station where the never ending stream of dots were coming from. Once notified, the unwanted signal quickly disappeared from the airwaves. (ZL1GWE, NZART News)

REPEATER COORDINATION: REFARMING OF SIMPLEX FOR DIGITAL VOICE
REPEATERS DEFEATED IN TEXAS NEW PLAN BEING CONSIDERED

A possible solution to a nagging problem that has pitted simplex users against digital repeaters in Texas. Amateur Radio Newslines Don Carlson, KQ6FM, has the details:

--

A highly controversial plan by the Texas VHF FM Society that would have allowed +1 Mhz split, 10 kHz spaced narrowband digital relay modes using channels in the 146 and 147 simplex range has been voted down by a 2 to 1 margin. In its place, the Society has agreed to study an alternative idea submitted by Chris Boone, WB5ITT, to permit narrowband digital duplexed paired systems to use splinter channel pairs on all bands from 2 meters and up.

In the case of Texas, that would mean both 2 meters and 222 MHz which use 20 kHz separation spacing for analog repeater systems would put digital relay devices on the 10 kHz split pairs between them. Likewise, for 70 centimeter UHF operation where the state embraces 25 kHz between analog FM repeaters, digital machines would be placed at the 12.5 kHz points in-between. This same plan would work itself all the way up through all of the bands on which the Texas VHF-FM Society coordinates repeater systems. To help insure that the new plan would work, a minimum 50 mile separation between all new adjacent split channel repeater pairs, analog or digital, would be imposed on all bands.

What this all means is that digital repeaters that have unilaterally set up shop on simplex channels on a temporary basis will be in limbo until mid 2012. This is because in accordance with the Society By-laws regarding changes to the coordination standards in Texas, the WB5ITT proposal was tabled. This gives the Society the time need for the membership to be polled on the idea and then the issue to be voted on at the next summer meeting.

In the meantime, digital repeaters already on the air will remain on their current frequencies but will be expected to move to new channels if the motion passes. That will mean normal 600 kHz input to output separation with non-inverted operation. Until then, no new digital coordination's on simplex frequencies will be allowed since the original proposal to allow these systems onto the simplex channels failed to pass.

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno.

--

If the membership of the Texas VHF-FM Society buys off on the WB5ITT proposal it holds the potential of quieting the furor over digital voice relay systems that has plagued the state for about the past 24 months. It also could set the precedent for the standardized

integration of digital voice repeaters in a crowded analog FM world that repeater coordination councils and band planners nationwide have been seeking. At least it's a place to start for those regions that already use 20 KHz spacing between repeaters on the 2 meter band. (ARNewsline(tm))

**

ENFORCEMENT: NEW ZEALAND CONVICTION FOR SELLING RADIO JAMMERS

An unidentified New Zealand man has been fined $2000 after being convicted in Porirua District Court of supplying illegal radio jamming transmitters. This following a combined effort between government agencies.

New Zealand's Ministry of Economic Development had filed charges under the Radio Communications Act after Police found the transmitters during a house search for drugs. At the hearing the man admitted supplying the radio jammers and also to transmitting outside the terms of his radio license. (Southgate)

**

ENFORCEMENT: BOSS FORCED TO PAY FORMER EMPLOYEE FOR INSULTS MADE OVER CB

If you live in Australia and make disparaging comments about someone over a CB radio, it could cost you big bucks. That's just what has happened down-under as we hear from WIA News reporter Graham Kemp, VK4BB:

--

A southeast Queensland-based security worker who was called insulting names on CB radio has won a $5000 payout from her former boss.

The woman from Eagleby, south of Brisbane, hailed from the former Yugoslavia and complained to the former Anti-Discrimination Commission over offensive comments allegedly made by a security business owner.

The 65-year-old woman's complaint shone a light on the abusive culture of some UHF/CB radio transmissions, with one witness admitting he had even encouraged his four-year-old daughter to use racially loaded terms.

The tribunal was told the security firm had previously employed the complainant and her son, but fell out with the son in 2008 prior to the alleged abuse.

"The culture of the CB radio conversations between the parties, witnesses and other users is carried out in an abusive tone with racially vilifying and sexually harassing words and connotations," the tribunal said.

Im Graham Kemp, VK4BB, of the WIA News reporting for the Amateur Radio Newsline.

--

You can read more about this interesting court finding on line in the Brisbane Times at tinyurl.com/vk-cb-fine. (WIA News)

HAM RADIO READING: THE CHINESE CONNECTION - A CQ EDITORIAL

The Chinese Connection is the title of a thought provoking editorial dealing with the emergence of ham radio gear made in China here in the United States marketplace. This at prices considerably lower than similar radios from Japan and other manufacturing nations.

Authored by CQ Magazine editor Rich Moseson, W2VU, the editorial takes a look back in time to when radio gear from Japan first emerged in the domestic U-S marketplace some 40 years ago and eventually lead to the stalwarts of the time such as Hallicrafters, E.F. Johnson, National Radio and others eventually leaving the ham radio marketplace. The article also asks the paradoxical question as to whether this might be happening again and if the Japanese ham radio manufacturing community will adapt to meet this new challenge. It also notes that this is all happening at a time when the domestic U-S ham radio manufacturing industry is making a major comeback.

The Chinese Connection is an excellent read for any ham that has an interest in the economics of the amateur radio supply industry and how it affects them. You will find it on page 8 of the August issue of CQ Magazine. (CQ)

**

HAM HAPPENINGS: CELEBRATING THE 80th ANNIVERSARY OF THE MIDLANDS ARS

On the social scene, the United Kingdom's Midland Amateur Radio Society plans to celebrate its 80th anniversary by hold an open house day on September 24th from 10am to 4pm local time. Plans are for displays of historic photographs, QSL cards, the original 1931 minutes books and the awards the ckub has received. There will also be refreshments, an opportunity to meet the groups training staff, and the chance to operate club station GB8OTH. More information on the society, which is based in Birmingham, in the U-K can be found on the club web site at www (dot) radioclubs (dot) net/mars. (GB2RS)

**

NAMES IN THE NEWS: DR. LARRY PRICE W4RA NAMED ARRL PRESIDENT EMERITUS

Some names in the news. First some words of congratulations to Dr. Larry Price, W4RA, on his being named ARRL President Emeritus.

Dr. Price served as the League's President from 1984 to 1992 and previous to that as a Vice Director, Director and Vice President of the

ARRL Board of Directors. He also served for 10 years as Secretary of the International Amateur Radio Union and another 10 years as that organization's President. In fact, Dr. Price continues to serve the IARU as an expert consultant and has been recognized as President Emeritus by the IARU's Administrative Council.

The naming of W4RA as ARRL President Emeritus was made in celebration of his ongoing dedication to the Amateur Radio Service and in recognition of his 60th anniversary as a radio amateur. (ARRL)

**

NAMES IN THE NEWS: WD5K BECOMES 5th HAM TO RECEIVE FRED FISH MEMORIAL AWARD

And congratulations also to Thomas Johnson, WD5K, of Dallas, Texas. This for becoming only the fifth radio amateur earning to earn the ARRL Fred Fish Memorial Award.

The Fred Fish Memorial Award was created in honor of the late Fred Fish, W5FF, who was the first amateur to have worked and confirmed all 488 Maidenhead grid squares in the 48 contiguous United States on 6 Meters. The award is given to any amateur who can duplicate this feat. Johnson application was reviewed and approved by ARRL on July 28th. (ARRL)

RADIO AND SPACE: ACMA EXTENDS RADIO QUIET ZONE TO PROTECT RADIO ASTRONOMY DOWN-UNDER

The Australian Communications and Media Authority has enhanced the radio quiet protections for the Mid West Radio Quiet Zone or RQZ in remote Western Australia. Ewan MacLeod, VK4ERM, of the WIA News is here with the details:

--

The RQZ was established in 2005 to provide an environment that protects highly sensitive equipment used for radio astronomy from unwanted radio-communications signals. These arrangements protect the radio telescopes currently in place at the Murchison Radioastronomy Observatory, as well as those proposed in the Australian-New Zealand bid to host the Square Kilometre Array or SKA.

"A clear regulatory framework to support radio quiet arrangements will further assist Australia to create the world's best radio astronomy facility,' said ACMA Chairman, Chris Chapman. `This will provide a platform that should be ideal for future radioastronomy projects, including the $1.5 billion SKA project."

Mr Chapman said the new protection measures provide greater clarity and certainty to the arrangements that protect radioastronomy services in the RQZ.

"The new measures continue to provide for radio quiet while supporting the use of spectrum by other users and placing the lowest feasible burden on industry in the region,' said Mr Chapman. Mr Chapman said the new protection measures will not significantly change the nature of spectrum access and radio quiet arrangements in the Mid West RQZ.

"This will enhance protection for the RQZ by upgrading the existing statements of ACMA administrative practice to more formal regulation," Mr Chapman said.

The introduction of the enhanced protections for the RQZ follows a very extensive consultation process in which the ACMA sought the views of interested stakeholders."

This is Ewan VK4ERM

--

The Australian Communications and Media Authority has also released a Response to Submissions paper. It outlines the regulatory agency's rationale behind its decision and the final package of measures it has instituted to protect radio astronomy resources down-under. (WIA News)

**

RADIO IN SPACE: MARS ROVER OPPORTUNITY ORDERED BY RADIO TO SPIRIT POINT

NASA's Mars Exploration Rover Opportunity will revisit the rim of Endeavour crater on Mars, where its rover twin Spirit finished its 6-year-long mission in May.

The rover scientific research vehicles had completed their three-month prime missions on Mars in April 2004. Both went on to extended missions and in the process each made important discoveries about the environment on ancient Mars which suggested the possibility for microbial life on the red planet.

Driving commands sent by radio to Opportunity directed the rover to make its final push toward Endeavour crater. This is a 14-mile-wide depression near the Martian equator could be the research vehicle's final destination.

The target for Opportunity is a site on the rim of the Endeavour crater named Spirit Point. It was given that designation by the Mars Rover

Controllers in honor of the Opportunity's lost twin. Opportunity should be at that location and beaming signals back to Earth by the time this newscast goes to air. (NASA, other news reports)

**

WORLDBEAT: NEW WSJT EME RECORD CLAIMED

What's believed to be a new digital EME record on 2 meters was set at 20:20 UTC on August 3rd. This when Allan Saul, ZS1LS, in Sunset Beach, South Africa and Jeremy Alexander, W7EME, in operating portable KH6 in Hawaii established a new South African Radio League record of 18,383 Kilometers between the to terrestrial stations.

The contact was established using WSJT during a small window close to moonset in South Africa and only 7 degrees of moonrise in Hawaii. Signal reports varied between minus 26 dB and minus 31 dB below S zero. Signals that would not be audible to the human ear but which are decodable using WSJT. .

For those who never have tried it, WSJT is a digital noise reduction program used for weak-signal radio communication written by Joe Taylor, K1JT. The digital signal processing techniques in WSJT make it substantially easier for radio amateurs to enjoy esoteric propagation modes, such as high speed meteor scatter and moon bounce to name only two. (SARL, Southgate)

**

DX

In DX, Bill Moore, N1CL, at the ARRL DXCC desk, the just concluding ST0R operation has been approved for DXCC credit. This means you can file cards for this one via the usual means of accreditation.

TM5SM will be on the air from the Saint Marcouf Islands through August 15th. Operations will use CW, SSB and RTTY on 80 through 10 meters. QSL via F5RJM either direct or via the bureau.

WA8LOW and four other operators will be active stroke KH8 from American Samoa, until the 17th of August. The group is running four high power stations on 160 to 6 meters using all modes. QSL via WA8LOW.

IZ2DPX will be active from stroke CT9 from Madeira Island on all of the High Frequemcy bands and possibly 6 meters. He will be there through August 21st. QSL via bureau or direct to IK2DUW.

Last, but by no means least, EA3PT is operating portable EA6 from Menorca through August 21st. Operation is SSB only holiday style using SSB only on 40 through 10 meters for at least an hour a day. QSL via Logbook of the World or direct via his home call.

(Above from various DX sources)

**

THAT FINAL ITEM: SWEDISH MAN TRIED TO BUILD A NUCLEAR REACTOR IN HIS KITCHEN

And finally this week, from the truth is stranger than fiction file comes the story of a Swedish man who was arrested after trying to split atoms in his kitchen. No, we are not kidding as we hear from Amateur Radio Newsline's producer Bill Pasternak, WA6ITF:

--

News reports say that Richard Handl was only doing it as a hobby. Trying to build a nuclear reactor, that is.

In an interview, Handl told the media that he had the radioactive elements radium, americium and uranium in his apartment in southern Sweden. That he said was when police showed up and arrested him on charges of unauthorized possession of nuclear material.

The 31-year-old Handl said he had tried for months to set up a nuclear reactor at home and kept a blog about his experiments. He even described how he created a small meltdown on his stove.

Only later did he realize it might not be legal and sent a question to Sweden's Radiation Authority. That appeared to be his downfall. This is because instead of a response by letter or telephone, his information request was answered by an unexpected visit by the police.

Handl went on to say that he has always been interested in physics and chemistry, adding he just wanted to see if it's possible to split atoms at home. Although he says the police didn't detect dangerous levels of radiation in his apartment, Handl now admits that the project might not have been not such a good idea after all. And if I might editorialize a bit: Neither do we.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the City of Angels.

--

The news reports say that the raid on Handl's residence took place in late July, but authorities have refused to comment. If convicted, Handl could face fines or up to two years in prison.

And folks, you just can't make these things up. (GeekNewz, Xydo, others)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.

You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Before we go, a reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day.

Already a group in Pennsylvania and another in New York City are planning on-the-air commemorative operations. If you of any others please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org starting this week.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, in Vero Beach, Florida, saying 73 and we thank you for listening.

2> What does your poasting have to do with radio policy?

Having trouble reading more than one line of text,
rambo? My so-called "poasting" was:

"What does your posting have to do with alt.fucknozzles,
alt.arts.poetry.comments,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy, karol?"

Reread the part between the last two commas on the second
line of that quotation, rambo, and you should have your
answer.

JEWS ARE SATANIC - PURE AND SIMPLE:

By 1999, certain Orthodox Jewish organizations were
forthcoming, openly admitting that the Talmud describes
Jesus as a sorcerer and a demented sex freak.

On the web-site of the Orthodox Jewish, Chabad-Lubavitch
group one of the largest and most powerful Jewish
organizatioins in the world ---> we find the following
statement, accompanied by citations from the Talmud:

The Talmud (Babylonian edition) records other sins of
'Jesus the Nazarene'.

1. He and his disciples practiced sorcery and black
magic, led Jews astray into idolatry and were
sponsored by foreign, gentile powers for the purpose
of subverting Jewish worship
(Sandhedrin 43a)

2. He was sexually immoral, worshipped statues of
stone (a brick is mentioned), was cut off from the
Jewish people for his wickedness, and refused to
repent
(Sanhedrin 107b)

3. He learned witchcraft in Egypt
(Sotah 47a)

Gettin 57a says:
"Jesus is in Hell, being boiled in "hot" excrement."

Sanhedrin 43a says:
"Jesus was executed because he practiced sorcery:

"It is taught that on the eve of Passover Jesus
was hung, and forty days before this the proclamation
was made: Jesus is to be stoned to death because he
has practiced sorcery and has lured the people to
idolatry...He was an enticer and of such thou shalt not
pit or condone."

The rabbinic teacher Moses Maimonides ("Rambam")
is revered in Judaism as a supreme "sage" of the hightest

stature. In his writings Maimonides taught that Christians
should be exterminated.

Yebamoth 98a.
All gentile children are animals.

Abodah Zarah 36b.
Gentile girls are in a state of niddah (filth) from birth.

Sandhedrin 106a.
Says Jesus's mother was a whore:
"She who was the descendant of princes and governors
played the harlot with carpenters."

Also in footnote #2 to Shabbath 104b of the Soncino
edition, it is stated that the "uncensored" text of the
Talmud it is writtenthat Jesus mother,
"Miriam the hairdresser", had sex with many men.

Sanhedrin 57a.
A Jew need not pay a gentile the wages owed him
for work.

Sanhedrin 57a.
When a Jew murders a gentile there will be no death
penalty. What a Jew steals from a gentile he may keep.

Bozo, you were born Jay Smilkstein, here is your
hideous gruesome ugly picture :
http://www.hfunderground.com/wiki/Bozo

"Bozo <Jay Smilkstein> De Niro!!!..."
http://www.coloneljake.com/BAM1BAM/BDN00/

NEW MOVIE AUDIO TRAILER FOR:
WATER FOR REPUBLICAN ELEPHANTS
----------> http://www.exorcist.org.nz/bozo_wild_jew.wav

JEWS = RATS
VERMIN = JEWS
http://www.exorcist.org.nz/jew_rats.wav

Bozo The Jew !

* Promotes Sorcery (Babylon) That Is In Clear Contradiction
To The Teachings Of The Old Testament

* Promotes Child-Adult Sex, Which Is Clearly Satanic
http://www.exorcist.org.nz/music_mafias.html
* Promotes Ever Form Of Filthy Talk, Behaviour, And Actions,
Again I Point Out That It Is Direct Contradiction To The
Teachings Of The Old Testament
* Promotes Jewry (Judaism) Judaic Talmud (Torah \ Kabbalah)
Where The Talmud Is Actually Called By The Jews:
The Babylon Talmud !
* Promotes Pride In The Fact That The Jews Were Going Around
In Circles For 40 Years In The Desert. 40 Years Circling Around
And Around -- Is That Complete Stupidity Or What ?
Finally Discovering "Zion" (Israel \ Judah), Yet Have Now, As
Jews, Hi-Jacked The Entire Hebrew Race Into Clearly Satanic
Babylon Teaching, Babylon Sorcery, Babylon Pedophilia
* Bozo de Nero (Jay Smilkstein) Is Actually A Babylonian,
Which Is In All Actuality Been Labelled As:
"worse than a nigger"
* Jay Smilkstein Like Lucifer Is So Ugly. Lucifer Was Created
As Beutiful (scriptural fact), However Now Has Turned Into
A Hideous Ugly Creature, Of Which The Smilkstein Spawn
Shows Their DNA "Beauty" Which Is Clearly Evolved Ugly
Hideous Flesh.
* Jay Smilkstein (Jew) Is A Babylonian !
'Babylonian Talmud'
* Bozo de Nero (Jay Smilkstein) Is Clue-Less To These Facts
And Thus As *Confused* (Confusion = definition of Babel),
As Nimrod Himself !
* It Is Quite Obvious To Students Of Demonology (Myself) That
Jay Smilkstein (Bozo de Nero) Is Clearly Possessed. I Highly
Speculate That Jay Smilkstein Also Hears Voices, Just As Do
Multitude Of Other Individuals In Today's Society -- For That
Is A Manifestation That Needs Further Study -- The Recent
Increase In People Who Hear Voices !
* Bozo de Nero Is Destined For The Flames Of Hell, I Do Think
That His Seed (DNA) Is Beyond Salvation !
For Curses Do Run Into The 4th Generation At Least
(scriptural warning- fact)
* Hebrews Are Blessed - Jews Are Satanic !
* Go Away Jay Gay Smilkstein, Your Anal Fetish Desires Are
Tantamount To Being Always Labelled A Sick Feces Freak
Of Outstanding Vulgarity On The World Stage !

http://www.exorcist.org.nz/music_mafias.html

* Just Up-Dated !
w/ New Photo Of KFJC 89.7 FM Fundraising Event
w/ New Audio-Mix Attached To Web-Page (longer)

KFJC 89.7 FM <--- You Always Choose To Be Satanic !

"Oh, there are rumblings, are there?"
"No, there is fear."
-Bounty

Read what others are saying about Checkmate!

"You have got to be the biggest butt fucking moron in this place.
You use socks and then admit to it? What the fuck is the point?"

-Wildhare, dazed and confused

"You can sit there all you want and spit out all the denial you can
muster, it still doesn't change the fact that you are the current
king shit of the puppeteers in this group."

-Ragnar, blinded by the light

Read about some of my favorite idiots:

"Nor do I engage in juvenile gay lames like others do."

-Ragnar the Hypocrite, right after posting numerous gay lames.

"Mature, intelligent people don't consider being gay a derogatory issue
worthy of name calling."

-Ragnar the Liar, right after posting another bunch of gay lames.

"Shouldn't you be making a blanket, doing the dishes or some other form
of woman's work?

-Ragnar the Hypocrite to Kachina, right after flaming Greg for being a racist.

"i might be a wank job i'll give you that"

-%

"Try some English the next time you need to get your point accross."

-Ragnar the spelling cop, who apparently can't spell "across."

"As we all can tell by the fact that you spend half you fucking life
right here, casing me around."

-Ragnar the Hypocrite, right after criticizing Kachina for her typos.

"I guess insinuating that you like black cocks is now racist."

-Ragnar the Hypocrite, who thinks that he can improve on a fag lame
by specifying that it's with a black man.

"you are of the misguided opinion that there is something derogatory
attached to an affinity for African American cock"

-Ragnar, who knows what he likes

What does your hallucination have to do with alt.checkmate,
alt.usenet.kooks,rec.radio.amateur.policy,comp.os.os2.advocacy,
persent? In reality, you replied to the newsgroups listed on
the "Newsgroups:" line, which in the present case includes
alt.checkmate,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy, persent.

"Oh, there are rumblings, are there?"
"No, there is fear."
-Bounty

Read what others are saying about Checkmate!
------------------------------------------------------------------------

"You have got to be the biggest butt fucking moron in this place.
You use socks and then admit to it? What the fuck is the point?"

-Wildhare, dazed and confused
------------------------------------------------------------------------

"You can sit there all you want and spit out all the denial you can
muster, it still doesn't change the fact that you are the current
king shit of the puppeteers in this group."

-Ragnar, blinded by the light
------------------------------------------------------------------------
```

Read about some of my favorite idiots:

"Nor do I engage in juvenile gay lames like others do."

-Ragnar the Hypocrite, right after posting numerous gay lames.

"Mature, intelligent people don't consider being gay a derogatory issue
worthy of name calling."

-Ragnar the Liar, right after posting another bunch of gay lames.

"Shouldn't you be making a blanket, doing the dishes or some other form
of woman's work?

You got that right. You're replying to Paul Derbyshire of Canada a known fagboi and pervert who trolls Usenet with his automated crap so he has more time to spend with his cadre of gay lovers. He came over to AUK to spam up more gay lovers. I'm going to cross post this to soc.support.fat-acceptance so Paul might make contact with Ragnar. The two of them might have a lot of fun exploring the Hershey Highway.

It's not Dave Tholen the astronomy prof from Hawaii? His traceroute points to
Hawaii, at any rate.

What does your hallucination have to do with alt.checkmate,
alt.usenet.kooks,rec.radio.amateur.policy,comp.os.os2.advocacy,
persent? In reality, you replied to the newsgroups listed on
the "Newsgroups:" line, which in the present case includes
alt.checkmate,alt.usenet.kooks,rec.radio.amateur.policy,
comp.os.os2.advocacy, persent.

Claims of a fevered mind.

As in you were drafted into the Army as a "Colonel"??
Then you were a Lieutenant, but you threw some guys out an upstairs window of your barracks. Mark...Officers do NOT bunk in the barracks with enlisted troops.
Then you claimed to have been allowed by some obscure Govt. Agency to join the Army under an assumed name.
Your rotten teeth were the fault of some sort of "aicid" damage suffered while in the military. Poor dental hygiene is the culprit here, Mark.
Then you falsely claimed that you are a Geophysicist. Maybe you are, in a sense, since your wife claims that she talks to rocks.
Your claim of holding three college degrees is also a complete fabrication.
And your house that you claimed was burned to the ground? A complete and total lie.

Your List of Lies goes on and on and on....

You truly live in a fantasy world, Markins.
If there is a fevered mind out here, it is yours.

was enlisted before I was comissed man

> Then you claimed to have been allowed by some obscure Govt. Agency to join
> the Army under an assumed name.

nope never made any such claim

> Your rotten teeth were the fault of some sort of "aicid" damage suffered

+ Available on ARRL Audio News <http://www.arrl.org/arrl-audio-news>

==> + ARRL FIELD DAY: 2011 FIELD DAY LOGS POSTED

A record 2654 submissions have been received for the 2011 running of
ARRL Field Day. According to ARRL Field Day Manager Dan Henderson,
N1ND, this is the highest number of entries received for what is one of
Amateur Radio's most popular on-the-air operating events. The combined
list of Logs Received for Field Day has been posted online. The list
includes all logs submitted via the website, as well as those submitted
via e-mail and US Mail. Read more here
<http://www.arrl.org/news/2011-arrl-field-day-logs-posted>.

==> + AMATEUR RADIO IN THE CLASSROOM: ARRL TEACHERS INSTITUTE ON
WIRELESS TECHNOLOGY OPENS HORIZON OF LEARNING OPPORTUNITIES

This summer, the ARRL offered five sessions of the Teachers
Institute on Wireless Technology (TI). Veteran instructors Miguel
```

Enriquez, KD7RPP, and Nathan McCray, K9CPO -- along with new Instructors Tommy Gober, N5DUX, and Matt Severin, N8MS -- led the instruction. A total of 55 educators from 24 states, ranging from elementary teachers to university PhDs, took part in the 2011 TIs.

The first TI session of 2011 was held at Desert Ridge Middle School in Albuquerque, New Mexico, and was hosted by Diane Nihart, KE5UHB, a 2010 TI graduate. Other sessions took place at Parallax, Inc's corporate office in Rocklin, California (Parallax provides the robotics equipment for each TI session); at Mohawk Valley Community College in Utica, New York -- hosted by Bob Decker, AA2CU; and at ARRL Headquarters. The Dayton Amateur Radio Association hosted the TI-2 seminar, Space in the Classroom. The TI-2 curriculum focuses on the nuts and bolts of setting up and operating a satellite ground station. While TI participants do not need to have an Amateur Radio license to attend a session, TI-2 participants must have at least a Technician class license and have already attended a TI session. Read more here <http://www.arrl.org/news/arrl-teachers-institute-on-wireless-technology-opens-horizon-of-learning-opportunities>.

==> + ARRL AND CALIFORNIA RESEARCHERS TEAM UP TO END 12 METER INTERFERENCE

After the resolution of the recent 60 meter Coastal Ocean Dynamics Applications Radar (CODAR) situation on the East Coast, the ARRL noted an earlier report by John Terrell, N6LN, of Palos Verdes, California. Terrell described CODAR activity on the 12 meter band, from 24.93 to 25.058 MHz. Since it appeared likely it was originating on the West Coast -- possibly near Orange Section Official Observer Coordinator Dan Welch, W6DFW -- ARRL Field and Regulatory Correspondent Chuck Skolaut, K0BOG, contacted Welch for assistance. Read more here <http://www.arrl.org/news/arrl-and-california-researchers-team-up-to-end-12-meter-interference>.

==> + CHECK OUT THE SEPTEMBER ISSUE OF QST

The September issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. This issue focuses on Emergency Communications and Public Service, activities that many hams enjoy. >From product reviews to experiments to contesting, this issue of QST has something for just about everyone.

Victor Cid, W3CID, and Andrew Mitz, WA3LTJ, know that radio amateurs have a long history of tinkering, of taking something and adjusting it to their purposes. These two hams -- who work at the National Institutes of Health in Washington, DC -- did just that when they developed a unique way to link a group of Maryland hospitals during major disasters via Amateur Radio. Find out how they did it in their article "Optimizing Amateur Radio Resources for Major Disasters." When your ARES® group is activated during an emergency, you know to grab your go-kit. Geoff Haines, N1GY, took this idea a bit further with his article "An Emergency Radio Package - or The Radio in a Box II." Haines

developed a box to hold a dual-band VHF/UHF radio, a battery and paperwork using only materials and equipment he already had on hand.

David Gillespie, W4LHQ, looks back at the devastating Alabama tornadoes earlier this year in his article "Alabama Slammer." Gillespie recounts that thanks to the the training hams had before the storm -- as well as the experiences they brought with them from past disaster deployments -- was crucial to providing top-notch communications support to the area served agencies. Speaking of practice, it's time to get ready for the 2011 Simulated Emergency Test (SET), set for October 1-2. ARRL Field Organization Supervisor Steve Ewald, NV1X, takes a look at this annual event that tests emergency operating skills and the readiness of communications equipment and accessories in an emergency-like deployment.

QST Contributing Editor Howard Robins, W1HSR, takes a look at the Yaesu VX-8GR dual-band handheld transceiver in this month's Product Review. He says that this radio "incorporates GPS and a slew of features into a rugged, compact package. With so many features in a small package, it will be most appropriate for advanced amateurs wanting to explore and master APRS and GPS technology." QST Contributing Editor Phil Salas, AD5X, also checks out the Ameritron ALS-1300 HF power amplifier. He says this amplifier "delivers the goods and provides a good value for those interested in a solid state near-legal-limit linear power amplifier for 160-10 meters."

Ward Silver, N0AX, delivers the results of the 2011 ARRL International DX Phone Contest. With the bands wide open during the contest, Silver noted that "more butts in more chairs [meant] a 24 percent increase in QSOs reported by US and Canadian stations. There were more single-band logs than ever this year and the big increase was -- no surprise -- 10 meters, which went from 13 logs submitted in 2010 to 60 in 2011."

Of course, there are the usual columns you know and expect in the September QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Technical Correspondence, Vintage Radio and more. Look for your September issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please see the ARRL web page <https://www.arrl.org/join>.

==> + QSL CARD EXHIBIT IN MARYLAND THROUGH SEPTEMBER 15

HPE 2 WRK U AGN SN: Ephemeral Communiqu&#65533; 1920-1980 -- a design exhibit of more than 550 QSL cards -- will be on view until September 15, 2011 at the Chesapeake Gallery on the campus of Harford Community College in Bel Air, Maryland. It is curated by Harford CC Professor of Art and Design Kenneth Jones. Jones will present a talk at the closing reception September 14 from 6-8 PM.

"In an age of communicating wirelessly with avatars, tweets and friending through Facebook. QSL cards are sophisticated communication

devices that reconnect two people to the past," Jones told the ARRL. "Today, the pace of communication is so much faster, and the memory of that communication may be stored or in most cases hidden in histories, caches and the recesses of hard drives and servers. The act and art of QSLing is an act of respect, unity and friendship."

Jones said that he "rediscovered" his grandfather's QSL cards a few years ago: "When I opened [the box], I was overwhelmed by the aroma contained in the contents. The box was full of items from my grandfather (he passed in 1987) and included QSL cards, which transported me to the shack he used which was part of his kitchen. I remembered the big antenna on top of his little home, and how he would let me turn the dial to change its direction. The cards in the box sparked my interest in their design and history, so I began to research and collect them. After collecting about 10,000 of them, I started to think about writing a book about the design history of the cards and applied for a sabbatical, which I was awarded and then took in the fall of 2010."

HPE 2 WRK U AGN SN is a design exhibition of more than 550 QSL cards from the Golden Age of Amateur Radio (1920-1980), presented and arranged by style. Jones selected the cards from the more than 10,000 in his collection. Read more here <http://www.arrl.org/news/qsl-card-exhibit-in-maryland-through-september-15>.

==> + AMATEUR RADIO TECHNOLOGY: 30TH ANNUAL ARRL/TAPR DIGITAL COMMUNICATIONS CONFERENCE SET FOR SEPTEMBER

The Four Points Sheraton Hotel at Baltimore Washington International Airport is home base for the 30th annual ARRL/TAPR Digital Communications Conference, September 16-18. This conference is an international forum for radio amateurs to meet and publish their work, as well as present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. Read more here <http://www.arrl.org/news/30th-annual-arrl-tapr-digital-communications-conference>.

==> SOLAR UPDATE

Tad "The warmth of the Sun is in your smile <http://www.youtube.com/watch?v=LgJsBuJF1So>" Cook, K7RA, reports: Solar activity was down again this week -- the sunspot number on Sunday went all the way to 0 for the first time since January 27, which was 29 weeks ago. The average daily sunspot numbers declined nearly 50 points, to 25.6, while the average daily solar flux was down nearly 16 points to 88.5. The latest prediction from NOAA/USAF on August 17 has the solar flux at 98 on August 18, 100 on August 19-21, 105 on August 22-24, then 110, 115, and 115 on August 25-27, and back to 110 on August 28-31. The predicted planetary A index is 5 on August 18-20, 8 on August 21, 5 on August 22-25, 15, 10 and 8 on August 26-28, and 5

again on August 29-31. Thanks to Max White, M0VNG, of Worcester, England, for sending along this story from NASA, "Solar Flares: What Does It Take to Be X-class? <http://www.nasa.gov/mission_pages/sunearth/news/X-class-flares.html>" Look for more information on the ARRL website on Friday, August 19. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Bangles' Waiting for You <http://en.wikipedia.org/wiki/The_Bangles>.

==> + SILENT KEY: TOM HAMMOND, N0SS

Tom Hammond, N0SS, of Lohman, Missouri, passed away August 4 from cancer. He was 67. Hammond was the first and only Life Member of the Kansas City DX Club, playing an invaluable role in the club for more than three decades, creating his world famous CW pileup files each year for the annual CW Pileup Competition at the Dayton Hamvention. Read more here <http://www.arrl.org/news/tom-hammond-n0ss-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 19 -- NCCC Sprint Ladder
- August 20 -- Feld Hell Sprint
- August 20-21 -- ARRL 10 GHz and Up Contest (local time) <http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>; SARTG WW RTTY Contest; North American QSO Party (SSB); Russian District Award Contest; CWOps CW Open
- August 21 -- ARRL Rookie Roundup (RTTY) <http://www.arrl.org/news/attention-rtty-rookies-the-2011-rtty-rookie-roundup-is-here>; SARL Digital Contest
- August 22 -- Run for the Bacon QRP Contest
- August 24 -- SKCC Sprint
- August 24-25 -- CWops Mini-CWT Test

Next week:

- August 26 -- NCCC Sprint Ladder
- August 27 -- ARCI Welcome to QRP
- August 27-28 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; ALARA Contest; YO DX HF Contest; SCC RTTY Championship
- August 28 -- SARL HF CW Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- August 20 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-1>,
Weston, West Virginia
- August 20-21 -- ARRL Alabama State Convention

Amateur Radio Newsline(tm) Report 1775 - August 19 2011

Amateur Radio Newsline report number 1775 with a release date of
Friday, August 19th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSat One continues to amaze ham radio but its battery is growing weaker as the days pass. Also, Heathkit says that it plans to return to the kit supply business, the cost of vanity calls are going up, the worlds first ever Digital Amateur Television contest is almost here and don't forget to remove the batteries. Find out why on Amateur Radio Newsline(tm) report number 1775 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE: ARISSAT-1 DROPPING TO LOW POWER EVEN IN SUNLIGHT

According to several reports ARISSat-1 has been switching into low duty cycle mode. This, even while in complete sunlight. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the latest:

--

When ARISSat One is in darkness, in order to conserve battery power, it switches into a mode where it transmits for 40 seconds and then shut down for 2 minutes. However, on Thursday, August 11th and Friday the 12th a number of hams began reporting that ARISSat One was in low duty cycle mode when the satellite appeared to be fully illuminated by the sun.

Now comes a probable explanation from hardware developer Tony Monteiro, AA2TX. He reports that at certain bad sun angles, the solar panels may not provide enough power to run the satellite even though it is in full sunlight.

AA2TX says that the power from the panels can actually drop to as low as 2.5 watts at really bad angles but the satellite needs around 8 watts average to run in high power mode. This means that the satellite would have to draw current from the battery to run in high power mode even though it is in the sun. This discharge would reduce the life of the battery so to minimize the damage and prolong the life of the satellite, it will switch itself to low power mode under these conditions.

Monteiro adds that he does not know for sure if this is what is happening but this condition is within the predicted nominal operation of the satellite.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Meantime, ARISSat One controllers have confirmed that the battery voltage of the satellite has been decreasing during eclipse at a faster rate than expected. Specifically, the battery voltage is getting lower with each eclipse period. It therefore is taking longer for the battery to charge up to 32.5V to allow the switch from Low Power to High Power when the satellite enters an illumination period. (AMSAT, ARISSat)

**

HAM RADIO IN SPACE: CHICKEN LITTLE CONTEST FOR ARISSAT 1

Meantime, Amsat has announced that its again holding another of its famed Chicken Little contests. This one to see if anyone can guess or predict as to when ARISSat One will fall out of orbit.

According to AMSAT, this is defined as the time ARISSat One crosses an altitude of 78 kilometers, which is considered to be the point of no return. And as in the past, there will be three Chicken Little divisions. These are a student category for Kindergarten through grade 8 grades, another student category for High School, grades 9 through 12 and then one for the rest of us.

Submissions will close on September 15th at 23:59:00 UTC. Once ARISSat One actually falls from the sky the closest predictions in each category will be recognized for their achievement. Submissions go by e-mail to CHICKENLITTLE (at) ARISSAT1 (dot) ORG

And less we forget, while not part of the contest, the actual re-entry of ARISSat One into the Earts atmosphere may be visible depending on the location where it takes place. As such, reports are encouraged.

And for those not aware, Chicken Little is a fable about a chicken who believes the world is coming to an end. The phrase "the sky is falling" features prominently in the story. As such it has become a rather common expression indicating a hysterical or mistaken belief that disaster is imminent.

(AMSAT)

**

RADIO RULES: VANITY CALL SIGN COST TO RISE STARTING SEPT 9

The price of a vanity call sign in the United States is on the rise. On August 10th the FCC announced that the cost of an Amateur Radio vanity call will increase 90 cents to $14.20 for a 10 year license term. The new fee take effect 30 days after publication in the Federal Register

making September 9th the first day the new fee is in effect. (ARRL)

**

RADIO BUSINESS: HEATHKIT SAYS IT IS RETURNING TO THE KIT SUPPLY MARKETPLACE

Heathkit says it is re-entering the kit business that it abandoned almost two decades ago. In an announcement posted to its www dot heathkit dot com website, Heathkit Educational Systems which is the current name for the company states that in late August the company will debut its new line of do-it-yourself kits for common around-the-house items.

Don't look for ham radio gear to be a top priority even though the word on the street is that kits for the amateur radio market may be down the pike. Right now the company is starting off with more general interest kits with their first entry being a Garage Parking Assistant or G-P-A for short. The Garage Parking assistant kit lets someone build their own system that uses ultrasonic sound to locate a car as it enters the garage. The system signals to the driver using LED lights mounted on the wall when the car is detected and in the perfect spot for parking. Next on the market will be a Wireless Swimming Pool Monitor kit followed by many more novel items.

For those of you to young to remember, it was on March 30, 1992, that the then managers of Heathkit announced that after some 45 years the company was closing out its kits and leaving the business. In its hey-day, Heathkits were products of the Heath Company of Benton Harbor, Michigan. Their build it yourself product line included everything from electronic test equipment to high fidelity home audio equipment, television receivers, and of coarse amateur radio gear. It was the emergence and subsequent domination of the world electronic marketplace by Pacific Rim manufacturers who could produce and market completely assembled equipment at prices far less than Heathkit or anyone else could supply a do it yourself version that lead to the demise of names like Eico, Paco, and of coarse Heathkit.

So why has Heathkit decided to re-enter the kit market? To hazard a guess you have to remember that the current incarnation of Heathkit is an educational materials supplier. As such it has likely taken notice of the burgeoning maker and hacker community. This is an ever expanding group of technology hobbyist's world wide that in recent years has grown into a multi-million dollar business opportunity for those smart enough to recognize it and are ready to fill the void. These are also the people that many believe will be the next generation of technology leaders and radio amateurs.

The Heathkit announcement says nothing about the business rationale for going back into the kit supply business but it does state that the company wants to bring to its customers interesting and unique products. As such it is interested in learning what types of products

that kit builders would like to see brought to the marketplace. Anyone interested can submit their suggestions by mail addressed to 2024 Hawthorne Avenue St. Joseph, Michigan, 49085 or at www.heathkit.com. (ARNewsline(tm) with some information supplied by KC8VWM, N4OZ and others.)

ENFORCEMENT: DUTCH AUTHORITIES TO ISSUE INSTANT FINES TO PIRATE BROADCASTERS

According to news reports, the Radiocommunications Agency of the Netherlands will soon launch a new and tougher policy to deal with pirate radio stations. One which could lead to fines of up to 2,500 euros or $3600 imposed on an unlicensed broadcaster as soon as half an hour after they receive a warning letter.

This the agency's latest move in a cat and mouse game with the pirate stations. It used to take months before someone was punished for illegal broadcasting. That has since been reduced to several weeks, and could now be cut to half an hour under the new policy.

There have already been 1600 warnings issued this year, and 60 people have been fined. The fine is not necessarily for the pirate, but handed to the owner of the land which is used for broadcasting.

The pirate radio broadcasters are now increasingly using mobile stations, so after receiving a warning letter they simply move to a different location to broadcast. The Radiocommunications Agency wants to introduce its new instant fine policy as soon as possible as a way to prevent these nomadic broadcasters from escaping punishment. Its said that some of the wandering pirates use transmission mast as tall as 40 meters in height. (Media Network)

ENFORCEMENT: LAUDERHILL FLORIDA UNLICENSED BROADCASTER HAS FINE CUT IN HALF

Back here in the United States. the FCC has cut in half the amount of a fine that it had issued to Christopher M. Myers, of Lauderhill, Florida. This for his alleged operation of an unlicensed radio transmitter on the frequency 95.9 MHz. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

Back on July 12, 2010, the Enforcement Bureaus Miami Office issued a $10,000 Notice of Apparent Liability for Forfeiture to Christopher Myers for operation of an unlicensed radio station. Myers contested the then proposed fine. In his petition to the FCC Myers requested cancellation or reduction of the proposed forfeiture based on his claims that he did not operate the unlicensed station and that he was unable to pay the $10,000 forfeiture.

Specifically Myers asserted that although he owns the residential condominium referenced in the Notice of Apparent Liability that the condominium was occupied and controlled by a renter from 2007 until 2010 and that he resided elsewhere during that period. He also stated that although he was present in the condominium during the inspection on March 7, 2010, the transmitter was not transmitting at that time and that after he received notice of the unlicensed operation, that he took affirmative steps to terminate the lease with the unidentified renter. His response also stated that a broadcasting organization known as WBIG is responsible for any unlicensed operations on 95.9 MHz and 91.7 MHz; and that he does not hold any pecuniary interest in WBIG. Lastly he claimed that the $10,000 fine constituted a financial hardship and provided the required documentation to back up this claim

In its decision on the matter the FCC said that it did not find Myerss statement that he did not reside in the residential condominium reliable. Myerss drivers license and most recent vehicle registration list the condominium as his residence. The FCC says that Myers received and signed for several documents at the condominium. It says that it believes this demonstrates that Myers did in fact reside in the condominium.

Also says the FCC, it disagrees with Myers statement that the station was not transmitting on March 7, 2010. It notes that at approximately 6:50 P.M. on March 7, 2010, agents from the Miami Office determined that an unlicensed station was operating from the condominium. The Lauderhill Police Department executed a search warrant for the condominium at approximately 10:00 P.M. and found only Myers present. A bit later, FCC agents arrived and found the same. It says that the unlicensed station continued to transmit until FCC agents disconnected the transmitter which was located in the residence, doing so at approximately 11:10 P.M. As such, the FCC says that it finds no reason to cancel or reduce the forfeiture on this basis.

However, regarding Myers inability to pay the entire $10,000 fine, the FCC has determined that, in general, gross revenues are the best indicator of an ability to pay a forfeiture. Based on this it finds that Myers is unable to pay the full proposed forfeiture amount, so it has granted a reduction down to $5,000.

For the Amateur Radio Newsline, Im Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Its unknown if Myers plans to file a further appeal. (FCC)

HAM HAPPENINGS: WORLDS FIRST DIGITAL ATV QSO PARTY AUG 26 -27

The world's first Digital Amateur TV QSO Party will be on Melbourne Australia's VK3RTV repeater next weekend. The QSO Party has been organized by Peter Cossins VK3BFG as control station and will include the Amateur Television Network of California and the British Amateur Television Club.

VK3BFG said that 8 pm Australian Eastern Standard Time on Friday August 26th will be the kick-off time of the two-day event as part of the Amateur Radio Victoria celebration of its centenary. Also, on Saturday the August 27th at 1 pm Australian Eastern Standard Time there be a link up with Don Hill KE6BXT in California and also a connection with the W6ATN ATV Repeater. (VK3PC)

**

HAM HAPPENINGS: PARACHUTE MOBILE TO PERFORM AT PASCIFICON ON OCTOBER 15

Michael Pechner, NE6RD, reports that weather permitting, the group Parachute Mobile will be doing a doing a jump on October 15th. This, in coordination with the Pacificon ARRL Pacific Division Convention being held in Santa Clara, California the weekend of October 14th to the 16th.

Pechner tells Newsline that live video of the flight will be streamed to the World-Wide-Web on Justin dot tv as well at fast scan amateur television outlets. There will also be a live APRS feed using Google Earth mapping showing the APRS beacons with about a 90 second delay. This, due to how aprs-is works.

Sound interesting? Well you can learn more by simply taking your web browser to www.parachutemobile.com, and following the updates. (NE6RD)

**

HAM HAPPENINGS: NEWSLINE TO HOST TOWN MEETINGS AT TWO CALIFORNIA CONVENTIONS

And speaking about Pacificon, it will be one of two venues where Amateur Radio Newsline producer Bill Pasternak, WA6ITF will be hosting two of our popular Ham Radio Town Meetings.

The first of these will take place on Saturday, September 10th at the aRRL Southwest Division Convention to be held at the Marriott Torrance South Bay hotel in the city of Torrance. There the topic will be a repeat of this years Dayton Hamvention Town Meeting titled How to Make a Ham Radio Movie in the 21st century. At airtime the speakers list includes Hollywood Producer Director Dave Bell, W6AQ; video Post

Production Editor Frosty Oden, N6ENV, PBS cameraman George Barker, NA1F and amateur film maker Dennis Smith, KA6GSE. For more information on this event take your web browser to www dot hamconinc dot org and click on the words Tech Talks.

On Saturdary, October 15th Bill will be hosting an Amateur Radio Newsline Ham Radio Town Meeting at Pacificon 2011. The title of this session is "Peering Into the Future: Amateur Radio 100 Years From Now." And helping to give us all a glimpse at ham radio in the year 2011 will be IARU Secretary Rod Stafford, W6ROD; ARRL General Counsel Chris Imlay, W3KD; Nobel Laureate Joe Taylor, K1JT and emergency communications futurist David Witkowski, W6DTW. The venue for this session is the Marriott Santa Clara, in Santa Clara, California in Salons 1, 2 and 3 from 1 to 3 PM Pacific Daylight time. More information on this one is on-line at www.pacificon.org. We hope to see you at one of these two sessions or maybe at both. (ARNewsline(tm))

**

HAM HAPPENINGS: THE HUNTSVILLE HAMFEST

And two major events are taking place at about the time this newscast goes to air. First up is the 2011 Huntsville Hamfest being held August 20th and 21st at the Von Braun Center in Huntsville, Alabama. Activities include DX Card Checking, numerous hospitality suites, license exams and presentation of the 2011 Young Ham of the Year Award to 11 year old Kaitlyn Cole, KS3P, of Harvest, Alabama.

This year's Young Ham of the Year Award ceremony will be hosted by Amateur Radio Newsline's own Don Wilbanks, AE5DW. He will be joined by representatives of the awards principal corporate underwriters Vertex Standard and CQ Magazine.

This years Huntsville Hamfest will again be net-cast live on the World-Wide-Web at W5KUB dot com. Be sure to tune in and enjoy the festivities vicariously if you cannot be there in person. More information on the Huntsville Hamfest itself is on-line at www.hamfest.org. (ARNewsline(tm))

**

HAM HAPPENINGS: THE INAUGURATION OF THE NEW TWIT.TV BRICK HOUSE TV STUDIOS IN PETALUMA CA

August 20th and 21st will also see the grand opening of Leo LaPorte's new TWIT.TV studios in Petaluma, California. According to Bob Heil, K9EID, who hosts the show Ham Nation on the TWIT network, a special event station will be active on 40 and 20 meters in the afternoon and evenings both days to commemorate the official opening of the facility.

The call sign to be used will be W6KB. This is the club call of the Redwood Empire DX Association whose members have been instrumental in

the planning and installation of the ham radio antenna system during the final construction of the new broadcast facility.

Leo Laporte, who now holds the apropos vanity call sign W6TWT will be your host. His TWIT Brick House Studios are located at 140 Keller St. in Petaluma, California. Tours of the new facility, its ham radio station and its classic Collins AM broadcast transmitter will be available 10 am to 7 pm local time each day to all amateur radio operators passing through the area.

And if you happen to work station W6KB during this grand opening event, please QSL direct to W6TWT, P O Box 1018 in Petaluma, California, 94953. You can also drop in and watch the happenings on the web at live.twit.tv. (K9EID)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

INTRUDER WATCH: CODAR AT 24 MHZ

DK2OM reports via the IARU Region 1 website that a Codar ocean wave radar is disturbing radio operations in the 24.920 to 24.990 MHz and its happening around the clock. The location of the offending system is believed to be at or near Venice, Italy. Those hearing these signals report them to your nations Intruder Watch committee.

Codar is an acronym for the Coastal Ocean Dynamics Applications Radar that describes a type of compact High Frequency radar system developed between 1973 and 1983 at the NOAA Wave Propagation Laboratory. It utilizes High Frequency surface wave propagation to remotely measure surface ocean currents and wave height. (IARU)

**

WORLDBEAT: HUNGARIAN CHANNEL 1 TV TRANSMITTER GOES AWAY

Hams in Hungary are no longer bothered by a Channel 1 television transmitter wiping out the 6 meter band. At 00:00 on August 15th that TV transmitter was finally closed down after 54 years in service. This, as a part of Europe's overall conversion to digital only operations on the UHF bands. Channel 1 TV operations had been causing considerable interference on 50 MHz to amateur radio operators in the Budapest and surrounding areas. (Southgate)

**

WORDBEAT: DUTCH HAM RADIO BULLETINS NOW ON CPMMERCIAL RADIO

A report from the VERON which is the Dutch National Amateur Radio Society headquarters station PI4AA is now a part of that nations RTV Stadskanaal programming. This, as a part of the RTVS Media that covers topics in Amateur Radio, local radio and local news media.

The ham radio report airs every last Tuesday of the month from 8:00 p.m. to 9:00 p.m local Netherlands time. This unique partnership is made possible because the PI4AA broadcasts meet the requirements of the standard for I-C-E local public broadcasting. I-C-E stands for Information, Culture and Education.

The broadcast area is south-east and east area of Holland on terrestrial stations 105.3 and 107.8 MHz FM. The cable frequency is 104.1 MHz FM. Listeners outside of The Netherlands can tune in on the web at tinyurl.com/dutch-hamcast. (VERON)

**

WORLDBEAT: MS0INT ISLE OF ROCKFALL IN SPRING 2012

A team of four highly experienced Isands on the Air activators have plans to operate from the extremely rare and dangerous Isle of Rockall next spring. The four operators are identified as EA2TA, EA3NT, IZ7ATN and MM0NDX. All are part of the larger MS0INT Adventure Group which has previously been on air from several other hard to reach sites.

Completing the team is Nick Hancock, a noted climber with considerable experience in reachinbg inhospitable places. They aim to stay atop Rockall for maximum 48 hours, in what will be considered one of the most ambitious island activations the ham radio world has seen. Hopes are to be on the air in late May or early June of 2012. (Rockall 2012 Team)

**

DX

In DX, word that ZL1AAO, will be on the air from Rarotonga in the South Cook Islands, beginning August 19th for 10 days. He will sign as E51AAO and will operate holiday style using SSB only on 40through 10 meters. QSL only via Logbook of the World, eQSL or direct only. He will upload his log when he returns home.

OK1XD will be active from Lichtenstein portable HB0 between September 1st to the 10th. Operations will be holiday style on 80 through 10 meters using mainly RTTY and PSK31, with some SSB and CW. QSL via his home callsign, either direct or via the bureau.

ZS6AYU, will be active stroke A25 from Botswana between September 9th to the 11th. Operations will probably be on 40 through 10 meters including the 17 and 12 meters using CW only. QSL via ZS6AYU.

KI0SO is active as A35CT from Lifuka Island, Tongo on 20 through 6 meters mostly using SSB. The length of his stay is unknown. QSL via KI0SO to hid Callbook address and expect to wait a while for a response.

A team of German operators will activate Namibia between early December and mid-January of 2012. Operators mentioned are DJ2HD, DH3WO, DK1CE and DJ2BQ, each signing portable V5. Activity will be on 160 through 10 meters using CW, SSB and RTTY. QSL as directed on the air.

And lastly I2KRR is a volunteer technical support person to the Catholic mission in Vanimo and will be active as P29FR in Papua New Guinea until March of 2012. He operates on 40, 20 and 15 meter SSB with his time on the air limited to the local evenings, plus Saturday and Sunday afternoons. QSL without any IRC's to I2RFJ, either direct or by the Bureau.

(Above from various DX news sources)

**

THAT FINAL ITEM: PLEASE REMOVE THE BATTERIES BEFORE YOU SHIP ANYTHING THAT TICKS

And finally this week the tale of the ticking box. It comes from Portage, Michigan where an electronic metronome was the cause of a Post Office scare Saturday morning August 13th.

It seems that postal workers noticed a ticking noise coming from a package around 5:30 a.m. Fearing the worst, Portage Police along with the Kalamazoo Department of Public Safety's bomb squad were called in to investigate and the Post Office was evacuated.

In this case, authorities were able to get in contact with the owner of the package, who told police that there was nothing more than an electronic metronome inside. Even so, prior to employees being allowed back inside the building, the bomb squad went in and removed the package. Upon investigation, bomb squad personnel did find nothing more than an electronic metronome inside the package. Postal workers were allowed back into the Post Office just before 8 a.m..

And all this comes with a few words of advice. If you plan to mail a metronome, a clock or anything that makes a ticking noise, take out the batteries before you ship it. That can save your community thousands of dollars spent on an un-needed emergency response and save you a lot of grief. (Kalamazoo News and other published news reports)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at)

arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

Again, a reminder that this coming September 11th will be the 10th anniversary of the al-Queda backed terrorist attacks on September 11th of 2001. Attacks that felled the two World Trade Center tower buildings in New York City and damaged the Pentagon when radical Moslem extremists high-jacked four United States flag carrier jetliners and crashed them into the two structures and killing over 3000 American citizens.

Over the years there have been several ham radio operations in remembrance of those whose lives were lost in this senseless and wanton carnage. With this being the first decade anniversary of the September 11th, 2001 tragedy, we are trying to compile a list of radio clubs and individuals who are planning any form of ham radio memorial operation to honor those whose lives were lost that day.

Already a group in Pennsylvania and another in New York City are planning on-the-air commemorative operations. If you of any others please drop us an e-mail to newsline at arnewsline dot org and let us know all of the details. We in turn will list as many as we can on our website at www.arnewsline.org starting this week.

Those whose lives were lost on 911 deserve to be remembered. We will do our part by providing web-space to list ham radio commemorative activities. It's up to you to do the rest.

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Davis, W2JKD, saying 73 and we thank you for listening.

DO YOU KNOW THIS BOOK ?

Of all the acclaimed masterpieces that the world has seen,
nothing can be compared to the book known as the Qur'an. Millions have become Muslims upon simply hearing a verse from this amazing book, yet still the majority knows nothing of it. The Qur'an is the Final Revelation from the Creator to humanity. It was revealed in the year 610 CE to the Prophet Muhammed (peace be upon him), and completed over a period of 23 years. These 23 years of revelation resulted in a book which comprised of 114 chapters and over 6000 verses. All of this was to become the primary source of law for the whole of mankind to live and die by.
The impact of this book is such that Allah says : "Had We revealed this Qur'an upon a mountain, surely you would have seen it humble itself and crumble out of the fear of Allah. Such are the parables We put forward to mankind so that they may reflect" (Surah Al-Hashr 59:21)
However, it seems as if the hearts of the people have become harder then the mountains which tower above us. When the Qur'an is recited or even mentioned, people turn away with disgust. In the West, this is primarily due to the negative exposure from the media. It has resulted in many non-Muslims not even wanting to hear the name of this amazing book. Muslims too, have become hardhearted because of the cultural influences of the West. Many young Muslims perceive the Qur'an to be nothing more then an old wrapped up book, which comes off the highest shelf once a year during Ramadan!
If people were to truly reflect upon this book, they would realise that nothing in this world is quite the same. So why should this claim be accepted over others? Why should the Qur'an be given precedence over the likes of the Bible, the Gita or the Granth Sahib ? The following reasons will inshallah give an indication as to why this book deserves the attention of all humanity.
• Preservation
"There is probably in the world no other book which has remained twelve centuries with so pure a text". Writing 200 years ago, these are the words of the famous English critic of Islam, Sir William Muir. But as Muslims we do not need Williarn Muir to tell us this. 1400 years ago, the Muslims accepted this reality when Allah revealed to them:
"Indeed it is We who have sent down the reminder (the Qur'an), and indeed it is Us who shall preserve it" (Surah Al-Hijr 15:9)
These words have proved true to this very day. From the moment the first words were revealed to Muhammed (saws), to this very day, every single letter and word of the Qur'an has remained unchanged.

Before Islam, all the revelations sent were not given this divine assurance. This is why we find that books like the Bible are riddled with corruption and inaccuracies. It is well known that man has tampered with the Bible to the extent that annually different versions are produced to suit trends and desires. In fact this has been going on for so long that it is almost impossible to see what of the words of the Creator are left, if any!

With the Qur'an it is the exact opposite. The contents of this amazing book are stored in the hearts of millions of Muslims worldwide. Children as young as 12 have memorised the entire book in its original language, Arabic. There is no other religious scripture on earth which is orally preserved in its original language by so many and over such a period of time, without having been tampered somewhere along the line. The Bible is a prime example of this. Many Christians believe that English is the divine language of the Bible. However Jesus (as) spoke Aramaic. From Aramaic, his life-story was translated into Hebrew. From Hebrew it was translated into Greek. From Greek to Latin, and then finally from Latin to English! There has not been a single vicar, priest or layman in recorded history who has even memorised the Bible in English, let alone the Aramaic! As Muslims we believe the Qur'an can only be in the language it was revealed in, i.e. Arabic. Anything else is a translation and not the divine words of the Creator. A true test of this divine preservation would be to burn all the books and manuscripts in existence, to see which can return as it was. The Qur'an would be the only book which would return in its original form, letter for letter, word for word.

Many Christians say that the Qur'anic claim of preservation needs to be backed-up by manuscript evidence. For us this is not a necessary criteria, but in order to quell the doubts, the Muslims have ample proof. Two copies of the Qur'an are in existence which date back to the Third Caliph Uthmaan, 20 years after the death of the Prophet (peace be upon him). These two copies are to be found in the Topkapi museum, Istanbul, Turkey and in Tashkent, Uzbekistan. The Tashkent copy is thought to have been the personal copy of the Caliph as it still contains stains of his blood, which was shed when he was murdered whilst reading it. Any copy of the Qur'an which is compared to these copies, will show that there is not a single difference between what we have today and what was in existence 1400 years ago. Thus Allah's promise holds true.

• No Mistakes

Man as a creature is fallible. For this reason anything which is produced by him will naturally have faults. With the Qur'an, such a notion cannot even be considered as it is from the one who is Infallible. In fact Allah clarifies this matter beautifully when he says:

"Do they not consider the Qur'an? Had it been from other then Allah surely they would have found much discrepancies within it" (Surah An-Nisa 4:82)

Throughout history many have tried to scrutinise and search the Qur'an for mistakes and errors. To this day no one has been able to bring a

shred of proof showing that this book is not from Allah. Some Christians have even called it the work of the Devil because the book affected them so much when they read it! With other scriptures, contradictions, mistakes and absurdities are constantly present. When people contrast these ambiguities with the Qur'an, it often results in the acceptance of this faultless book.

• The Arabic Language

Upon hearing Qur'anic recitation, you may be rather startled. Besides hearing the reciter of the prayer, you often hear people in the background sobbing and wailing heavily. So what is it that makes these people cry so much? It is nothing more then the beauty and eloquence of this book which moves millions to tears. This beauty is expressed in the language of Arabic. Allah says :

"Indeed We have revealed this as an Arabic Qur'an so that you may understand" (Surah Yusuf 12:2)

At the time of the Prophet (peace be upon him) three modes of expression were used. There was normal speech, the speech of the soothsayer and poetry. The Arabs were the masters of their language, and poetry was their cultural highlight. Arabic poetry is split into 16 categories, each separate from the other. When the Qur'an was proclaimed to the Arabs it amazed them beyond all limits. It was like nothing they had ever heard before. It did not fit into the 16 categories of poetry, nor was it the speech of a soothsayer, and it certainly was not normal speech. If it was not all these, then it could only be the word of Allah.

The eloquence and majesty of the early chapters of the Qur'an moved many to tears, and the beautiful Qur'anic Arabic converted millions of Arabs in the Middle-East. Not only did the Qur'an effect the lives of these Arabs, but it also transformed their culture. Even today, no serious study of the Arabic language is possible without reference to this book.

The reaction of some pagans was that they accused Muhammed (peace be upon him) of being a soothsayer and a madman. In order to silence them, Allah issued a challenge. At first he asked them to produce a book like the Qur'an. When it could not be done, Allah asked them to produce ten chapters like it. When this too could not be done Allah finally stated:

"And if you are in doubt as to what We have revealed to Our slave, then produce a chapter like it" (Surah Al-Baqarah 2:23)

The smallest chapter in the Qur'an is only 3 verses long (Chapter 108). The pagans at the time of the Prophet (peace be upon him) could not even produce something as small as this, and since then no one else has completed this impossible task. All of this is in light of the fact that the Prophet Muhammed (peace be upon him) could not read or write, thus refuting those who say that the Qur'an was his own handiwork.

The Qur'an is the Final book of revelation. After it there will be no more. However, many have tried to deny this by producing their own new versions of the Qur'an. Among them have been the two false prophets, Musailama and Ghulam Ahmed. Many Chapters in the Qur'an are named

after animals, such as the Ant, Spider etc. Musailama tried to copy this, and went about creating a chapter in his book called the Weasel! In Arabic it is called Al-Wabl and it hardly causes people to be struck in awe! On the other hand Ghulam Ahmed, the 'British stooge', claimed to receive revelation in cockney English!! Such foolishness could never compare to the beauty of the Qur'an with its clear and beautiful Arabic language.

• Science

Over the past few decades much interest has been shown in the scientific content of the Qur'an. Scientific data which has been discovered in recent times, has been existent in this book for 1400 years. In fact the very common origin of this universe is stated clearly by Allah, the Most High:

"Do not the disbelievers see that the heavens and the earth were joined together, then We parted them. And We made from water every living thing. Will they then not believe?" (Surah Al-Anbiya 21:30)

This parting of the heavens and the earth is more commonly known to scientists as the 'big bang'. It is also a fact that life originated from water and that every living cell is composed of 85% water. Without water life is impossible.

The mountains of the earth, like icebergs, have roots going deep into the ground. This ensures that they will not topple with their extreme heights - this is known as 'isostasy'. In this way the mountains are like the stakes which are used to anchor a tent. But this fact is already known to us when Allah says:

"Have We not made the earth an expanse and the mountains stakes?" (Surah An-Naba 78:6-7)

and "Allah has cast into the ground mountains standing firm so that it does not shake with you" (Surah Luqman 31:10)

The embryological data which is found in the Qur'an is astounding. Allah describes the formation of a baby inside the womb from the very moment the sperm reaches the ovum, to its formation into a human. This data, which was only discovered about 30 years ago, has amazed many westem scientists. Amongst them is Dr Keith Moore from the University of Toronto, Canada. Dr Moore is a recognised authority in embryological circles, with his university text book being set as a standard text in many universities throughout the world. When Dr Moore was asked as to how this information in the Qur'an could be explained, he replied: "It could only have been divinely revealed".

• History

The Qur'an is a book of historical accuracy. One accuracy which has corrected the mistakes of many Christians and historians, is the fate of the pharaoh who drowned in the Red Sea whilst pursuing Moses. The Biblical story would have us believe that the matter ended when the pharaoh drowned. But the Qur'an explains further. When he was drowning the pharaoh confessed his faith in Allah. But it was too late, and Allah promised him: "This day We shall preserve you in your body, so that you may be a sign for those who come after you. But indeed many of mankind are heedless of Our signs" (Surah Yunus 10:92)

In 1898 the tombs of various pharaohs were discovered in the Valley of

the Kings, in Egypt. In 1975 Dr Maurice Bucaille, an eminent French surgeon was allowed to examine the mummified bodies of Rameses II and the pharaoh who had pursued Moses - Merneptah. Dr Bucaille discovered that Merneptah had received very violent blows to several parts of his body and had suffered a massive heart attack. Amazingly, these are the results which occur when someone dies from drowning! Thus Allah had saved the body of the transgressing pharaoh as a sign for all humanity.

For those who say that Muhammed (saws) knew his history and wrote it in the Qur'an, the following shall prove otherwise. In the year 615 CE the Roman army was defeated by the Persians. About this event Allah revealed: "The Romans have been defeated in the lowest land, but in a few years they shall be victorious again, within three to nine years. The decision of the matter, before and after, is only with Allah" (Surah Ar-Rum 30:2-4)

The words of Allah proved true as the Persians were defeated at the battle of Issus, 7 years later in 622 CE. There is no possible way that Muhammed (peace be upon him) could have known (if he wrote the Qur'an) that the Romans would be victorious. In fact he also did not know that the 'lowest land' at which the battle was fought was literally that. The battle in 615 CE was fought on the shores of the Dead Sea, the lowest point below sea level on earth, at 1300 ft.

A book with these credentials could only be from the Creator of the heavens and the earth. A book which we need to acquaint ourselves with. A book . . . "...which has been revealed to you (O' Muhammed) so that you may lead mankind out of the darkness and into the light" (Surah lbrahim 14:1)

so waht? i maed a typo an spelt "kelp" wehn i ment to speel "help" so
now i say "get kelp" to covar up how stoopid plople thenk i am.
besides, if i watn cock i gofer a man if i watn pussy i gofer a
shemale, simpel as taht. i now poast "fevered mind" on teh nimbusters
cauze i leik to copy off plople cuze i try to tihnk but nohting
happans.

BTW, i nevar toouch a uncut cock.

gavi gives it away as a bonus at teh blow job stand. after buying 3
blow jobs from gavi teh kelp is free. gavi's blow jobs are 25 cents
per knob job or 4 for 75 cents. it feels good to wrap your pecker in
kelp 'cuz gavi has a rough tongue.

It is left as an exercise for the reader to guess which of the above
newsgroups the well-known usenet kook Dave Tholen posted to!

BTW, nice try on setting the followups, asshole.

That is funny coming from the old pussy and asshole farrel who is
pretending not to be her, now let the lying stupid whining cowardly
vile HUNK of shit and convicted child molester go finger herself,
again. Ernie

What does your non sequitur posting have to do with
comp.os.os2.advocacy,ba.broadcast,alt.fucknozzles,
rec.radio.amateur.policy,alt.usenet.kooks, persent?

2561. Re: Gav says sometimes his dick feels funny after he pisses on me, but indeed this is right after he cums on me, so his piss mixes with left over man-milk in his man meat and then teh inside feels funny

No, idiot, I am not pretending not to be Farrel. It is a fact that I
am not him. It has been proven to those with basic understanding of

the internet, but since you are still to stupid to learn how to post a link, we can`t expect you to understand.

Marcus

That is funny coming from the old pussy and asshole farrel who is
pretending not to be her, now let the lying stupid whining cowardly
vile HUNK of shit and convicted child molester go finger herself,
again. Ernie

Are you kosher?

==> + NHC ISSUES HURRICANE WATCH FOR PORTIONS OF NORTH CAROLINA; ARRL
ESTABLISHES HURRICANE IRENE WEBSITE

As Hurricane Irene -- currently a Category 3 storm -- approaches the
US, the National Hurricane Center (NHC) has issued a hurricane watch
earlier this morning for regions north of Surf City, North Carolina to
the North Carolina-Virginia border, including the Pamlico, Albemarle
and Currituck Sounds. A tropical storm watch is also in effect for
north of Edisto Beach, South Carolina to Surf City, North Carolina.

<http://www.arrl.org/images/view/News/Irene_track082511.jpg> In
anticipation of Irene's expected landfall in North Carolina, the ARRL
HQ Emergency Response Team (HQERT) has established a website to keep
amateurs informed of the latest developments. This website will also
provide links to the NHC, WX4NHC -- the Amateur Radio station at the
```

NHC -- the Hurricane Watch Net and the Voice over Internet Protocol Weather Net, where radio amateurs can send in their reports. The HQERT will also be monitoring various nets and providing support to the affected Field Organizations beginning on Friday, August 26 from W1AW, the Hiram Percy Maxim Memorial Station.

The NHC is predicting that it will be issuing hurricane warnings later on Thursday for those areas already covered by the hurricane watch, and is expected to extend the hurricane watch northward along the Mid-Atlantic coast, as well. The NHC advises residents in the Mid-Atlantic States and New England to monitor Irene's progress in anticipation of possible hurricane watches or warnings. Read more here <http://www.arrl.org/news/nhc-issues-hurricane-watch-for-portions-of-north-carolina-arrl-establishes-hurricane-irene-website>.

==> + ARRL MEMBERS NOMINATE CANDIDATES FOR DIRECTOR, VICE DIRECTOR

The policies of the ARRL are established by 15 Directors who are elected to the Board on a geographical basis, with elections for three-year terms held in five divisions each year. At the same time, Vice Directors are elected on the same basis. Responding to solicitations in the July and August issues of QST, ARRL members in the Atlantic, Dakota, Delta, Great Lakes and Midwest Divisions have nominated 15 candidates for the 10 positions of Director and Vice Director.

One candidate for Vice Director was found to be ineligible by the Ethics and Elections Committee, which left one eligible nominee for Vice Director in each of the five divisions. Accordingly, all five have been declared elected to three-year terms beginning at noon on January 1, 2012. Two incumbent Directors were unopposed and have been declared re-elected. There will be balloting for Director in the Atlantic, Delta and Midwest Divisions. Read more here <http://www.arrl.org/news/arrl-members-nominate-candidates-for-director-vice-director-1>.

==> + FCC NEWS: ARRL FILES COMMENTS IN RESPONSE TO ANCHORAGE VEC'S WAIVER REQUEST

In April 2011, the Anchorage VEC -- one of 14 Volunteer Examiner Coordinators -- filed a Petition for Rule Making (RM-11629) that asked the FCC to give permanent credit to radio amateurs for examination elements they have successfully passed. This would, in effect, create a license exam credit that would be valid throughout an amateurs' lifetime, never expiring. On July 6, the Anchorage VEC submitted a Waiver Request with the FCC while RM-11629 is pending. This request asks that the FCC grant a blanket waiver ofSection 97.505 of the Commission's Rules to those radio amateurs whose licenses have expired -- and are beyond the two-year grace period for renewal -- to be afforded credit for examination elements previously passed. On August 11, the ARRL filed comments with the FCC, urging the Commission to dismiss or deny the Waiver Request. Read more here

<http://www.arrl.org/news/arrl-files-comments-in-response-to-anchorage-vec-s-waiver-request>.

==> + SCOUTMASTER ARTHUR ANDERSON, W9WPH, STABBED TO DEATH ON HIKING TRIP

Arthur Anderson, W9WPH, of Kokomo, Indiana, 76, bled to death after being stabbed in what authorities are calling "a senseless act." On Sunday, August 21, Anderson -- together with another man -- was leading two Boy Scouts, ages 11 and 12, on a required five mile nature hike on the Nickel Plate Trail in Bunker Hill, 60 miles north of Indianapolis. According to Indiana State Police Sergeant Tony Slocum, the group had stopped on the trail to discuss a tree when Anderson was attacked from behind. Anderson, a scouting volunteer for 50 years, was an Assistant Scoutmaster of a troop based at Redeemer Lutheran Church in Kokomo. Read more here <http://www.arrl.org/news/scoutmaster-arthur-anderson-w9wph-stabbed-to-death-on-hiking-trip>.

==> + SECTION NEWS: GEORGIA, WESTERN WASHINGTON SEE NO CHANGE IN SECTION LEADERSHIP

Two Section Manager elections this summer were decided by member balloting. In Georgia, incumbent Gene Clark, W4AYK, of Albany, was re-elected to a second term with 820 votes. His opponent Verne Fowler, W8BLA, of Cumming, received 365 votes. In Western Washington, Jim Pace, K7CEX, of Centralia, was re-elected for a third term with 965 votes. His opponent Daniel Stevens, KL7MA, of Kent, received 508 votes. Both men will begin new terms of office on October 1. Read more here <http://www.arrl.org/news/incumbent-section-managers-in-western-washington-georgia-re-elected>.

==> IARU ADMINISTRATIVE COUNCIL HOLDS ANNUAL MEETING IN SOUTH AFRICA

The Administrative Council of the International Amateur Radio Union (IARU) held its annual meeting on August 19-20 in Sun City, South Africa. The AC is responsible for the policy and management of the IARU and consists of the three IARU international officers and two representatives from each of the three IARU regional organizations.

IARU President Tim Ellam, VE6SH/G4HUA, along with IARU Vice President Ole Garpestad, LA2RR, and IARU Secretary Rod Stafford, W6ROD, were in attendance. IARU Region 1 President Hans Blondeel Timmerman, PB2T, IARU Region 1 Vice President Tafa Diop, 6W1KI, and IARU Region 1 Executive Committee Member Colin Thomas, G3PSM, represented IARU Region 1. IARU Region 2 President Reinaldo Leandro, YV5AM, IARU Region 2 Secretary Ramon Santoyo, XE1KK represented IARU Region 2. IARU Region 3 Chairman of Directors Michael Owen, VK3KI, and IARU Region 3 Secretary Ken Yamamoto, JA1CJP, represented IARU Region 3. David Sumner, K1ZZ, attended as recording secretary. Read more here <http://www.arrl.org/news/iaru-administrative-council-holds-annual-meeting-in-south-africa>.

==> + AT THE WORKBENCH: HEATHKIT RETURNS TO THE KIT BUSINESS

A notice on the Heathkit website announces that the venerable kit manufacturer, well-known to all Amateur Radio operators of a certain age, will be reentering the kit business in late August. The notice states, in part: "Heathkit will debut their new line of Do-it-Yourself kits for common around-the-house items. The first kit will be a Garage Parking Assistant (GPA). The Garage Parking Assistant kit lets you build your own system that uses ultrasonic sound waves to locate your car as it enters the garage. The system signals to the driver using LED lights mounted on the wall when the car is detected and in the perfect spot for parking. Read more here <http://www.arrl.org/news/heathkit-returns-to-the-kit-business>.

==> SOLAR UPDATE

Tad "I could feel the Sun on my back <http://www.youtube.com/watch?v=FFthxJKOWok>" Cook, K7RA, reports: Solar activity rose this week, with the average daily sunspot number rising more than 40 points to 66 points, while the average daily solar flux rose more than 13 points to 101.9. The predicted solar flux for August 25-26 is 110, rising to 115 for August 27-30, 110 for August 31, 105 for September 1-3, and 100 for September 4-5. The predicted planetary A index is 5 for August 25-26, 10 on August 27, and 5 on August 28 through September 2, then 8, 10, 10, 10, 7 and 5 on September 3-8. Look for more information on the ARRL website on Friday, August 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Bangles' Something to Believe In <http://en.wikipedia.org/wiki/Everything_%28The_Bangles_album%29>.

==> + SILENT KEY: PETER DAHL, K0BIT (SK)

Peter Dahl, K0BIT, of El Paso, Texas, passed away August 15 of Parkinson's disease. He was 71. In 2007 after more than 40 years, he closed his company -- the Peter W. Dahl Company -- citing health reasons. "I want to thank everyone for their business throughout the years," Dahl told the ARRL upon his retirement. "I have enjoyed making each Amateur Radio transformer." Read more here <http://www.arrl.org/news/peter-dahl-k0bit-sk>.

==> THIS WEEK ON THE RADIO

This week:

- August 26 -- NCCC Sprint Ladder
- August 27 -- ARCI Welcome to QRP
- August 27-28 -- Hawaii QSO Party; Kansas QSO Party; Ohio QSO Party; ALARA Contest; YO DX HF Contest; SCC RTTY Championship
- August 28 -- SARL HF CW Contest

Next week:

- September 2 -- NCCC Sprint Ladder
- September 3 -- Wake-Up! QRP Sprint; GCW Straight Key Party; Russian
Radio WW RTTY Contest
- September 3-4 -- Colorado QSO Party; QCWA Fall QSO Party; All Asian
DX Contest (Phone); CWops Mini-CWT Test
- September 4 -- DARC 10 Meter Digital Contest
- September 4-5 -- Tennessee QSO Party
- September 5-6 -- Michigan QRP Labor Day CW Sprint
- September 6 -- ARS Spartan Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- August 28 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-1>,
New Kensington, Pennsylvania
- September 9-11 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>,
Torrance, California
- September 11 -- ARRL Great Lakes Division Convention
<http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest
>,
Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention
<http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>,
Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention
<http://www.arrl.org/hamfests/connecticut-state-convention-1>,
Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention
<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,
Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa

- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

To find a convention or hamfest near you, click here

No, true you are lying every time you claim I am Farrel.

Since you lie about almost everything, we are not surprised.

Marcus

You should get together with ernie. She has wanted to get a sex change
for years, but due to her age, mental health issues, and the fact she
lives in a trailer park, that is not going to happen.

Marcus

indeed u nust tink i'm extra stoopid. i now thet "mawghn" is jus kook
speek for "morgan" so i tel you too cest and decist you libeel agenis
my famely name.

Amateur Radio Newsline(tm) Report 1776 - August 26 2011

Amateur Radio Newsline report number 1776 with a release date of Friday, August 26th 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. A dedicated ham radio operator and scout leader is murdered in Indiana; some positive words about ham radio related to the August 23rd Eastern U-S earthquake, hams stand ready as Hurricane Irene heads toward the US shoreline and honors for a deserving 11 year old emergency service amateur radio operator at the Huntsville Hamfest. Find out the details are on Amateur Radio Newsline(tm) report number 1776 coming your way right now.

(Billboard Cart Here)

**

RADIO CRIME: HAM RADIO SCOUT LEADER MURDERED IN INDIANA

An Indiana ham radio operator and scouting leader has been brutally murdered. This, while leading a group of scouts on a nature hike. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the details:

--

Seventy-six-year-old Arthur Anderson, W9WPH, of Kokomo, Indiana, was simply in the wrong place at the wrong time.

That the assessment from Indiana state police investigating the murder of the long-time Scout leader from Troop 506 based at Redeemer Lutheran Church in Kokomo.

They say Anderson was leading two scouts, ages 11 and 12 , on Sunday, Aug. 21 on a nature walk on the Nickel Plate Trail near the community of Bunker Hill, about 60 miles north of Indianapolis.

As the group stopped briefly near a tree, authorities say 22-year-old Shane Golitko leaped on Anderson and stabbed him in the neck with a 12-inch knife.

Investigators say another leader who was along on the hike shielded the young Scouts from the attacker, who then fled on foot after the assault.

Despite efforts to stop the bleeding, authorities say Anderson died at the scene.

Authorities arrested Golitko inside his nearby home where he lived with his mother.

He's now being held in the Miami County jail.

Investigators also learned a short time before the deadly attack on Anderson, Golitko had kicked and punched his mother in an unprovoked assault. She ran to a neighbor's home for help.

An Indiana state police detective who is part of the investigation called it a senseless act. Authorities don't have a motive for the attack.

The Miami County prosecutor confirmed Golitko had a prior arrest for possession of marijuana. He says the man also was charged in an assault case in Ohio in July 2010, but court records show that charge was dismissed.

An official from the Boy Scouts' Sagamore Council in Kokomo, called Anderson a great leader who focused on training young Scouts to lead by example and try to motivate others.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Golitko is charged with murder and two felony counts of battery. He is being held without bond in the Miami County Jail in Peru Indiana pending appearance in the Miami Circuit Court where he will likely be formally arraigned. (Various published news reports and listener provided reports)

**

RESCUE RADIO: EAST COAST QUAKE POINTS OUT FRAGILE CELLPHONE INFRASTRUCTURE

Although amateur radio emergency communications was not particularly needed following a 5 point 8 earthquake that shook most of the east coast on Tuesday, August 23rd, the event did point out how fragile the publics personal communications infrastructure really is. Especially the aspect that deals with cellular telephones.

According to several news reports, cellular telephone service was crippled for a short time following the temblor that was centered near Mineral, Virginia. Verizon Wireless admitted that its service was slow for about 20 minutes after the quake struck just before 2 p.m. Eastern time. AT&T and Sprint also report very heavy call volume as East coast residents dealt with Virginia's strongest earthquake since 1897. The three companies say service was compromised because millions of people were making calls at the same time.

Also, according to K3VSA at least one public announcement went out from the FEMA that said due to overload of cell phone usage, there are

reports of cell phone congestion. As such it was requested by cellular carriers that members of the public use e-mail or text messages if possible to communicate for the next few hours, except in cases of emergency. This so that emergency officials can continue to receive and respond to urgent calls.

However one story reported by KADI radio pointed out that even though the cellular carriers could not deliver the level of service the public expected that ham radio operators had no problems contacting one another. The KADI report also noted that this once again proves that ham radio still works in emergencies when all other means of communication fail. (ARNewsline(tm), K3VSA, K0ADI via the PR Reflector)

**

RESCUE RADIO: HAM RADIO EMCOMM AND HURRICANE IRENE

Ham radio operators involved in emergency communications are making ready for the imminent arrival of Hurricane Irene or her remnants to his the U-S shore. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in our newsroom with the latest:

--

As this newscast is being prepared on Thursday evening, August 25th weather forecasters are calling hurricane Irene an extremely dangerous storm that is set to batter the East Coast from North Carolina to New England over the next several days.

Currently a category 3 hurricane with winds in excess of 115 miles per hour. Irene is centered about 490 miles south of Cape Hatteras, North Carolina, and moving north north-east at 14 miles per hour. Depending on the storms exact track, Irene is expected to make landfall over Eastern North Carolina on Saturday, August 27th and then work its way up the coast with it full force being fely between New Jersey, then across New York's Long Island, across Boston and into New England and possibly the Canadian Maritime Provinces.

Ham radio operators involved in emergency communications and relief support efforts are already geared up for Irene's arrival. At ARRL headquarters in Newington, Connecticut, bulletin station W1AW will be on the air beginning 7:00 AM Saturday, August 27th as a backup communications resource. This at least until the severe weather has passed and it can stand down.

As hurricane Irene advances toward the North Carolina coast, the states ARRL Public Information Coordinator Raymond Woodward, K3VSA, reports that ARES members will be staffing the North Carolina Regional Coordination Center in Kinston. This, beginning at 7:00 AM Eastern Daylight time also on Saturday August 27th. Woodward says that they will also be taking requests for additional support from surrounding counties.

Woodward also says that the National Weather Service office in Newport will utilize hams belonging to the SKYWARN network beginning at 9:00 AM the same day. He adds that because of the mandatory evacuations that are occurring, it's likely that radio amateurs will be asked to serve county emergency services facilities and emergency relocation shelters with backup radio communications support.

Meantime similar preparations are ongoing up the Atlantic coast all the way into New England and beyond. In an e-mail to Amateur Radio Newsline, Steve Schwarm, W3EVE, Wrentham, Massachusetts, who is the District Emergency Coordinator says that a list of hams available to server in this emergency is being created. This, for ARES deployment to serve as National Weather Service Storm Survey Teams.

Schwarn's note says that hams would also be dispatched to various Emergency Operations Centers, Red Cross and Salvation Army operations sites as well as hospitals as they are required. W3EVE tells the hams in his region that it is important to keep their situation awareness level high for any updates from ARES leadership. They do this by checking their e-mail and monitoring local SKYWARN, ARES and RACES frequencies for any updates on this developing situation.

Also ready for activation are several established operations. This includes the Hurricane Watch Net on 14.325 MHz. It provides storm watch communications to and from the National Hurricane Center in Miami, Florida during times of hurricane emergencies.

Also in operation will be the VoIP or Voice Over Internet Protocol Weather Net. This operation uses Echolink and IRLP to provide a similar service.

As hurricane Irene tracks up the Eastern seaboard its intensity will, as always, depend on many changing factors. So right now it is too early to meaningfully state how the storm will affect specific areas.

Lastly, as we go to air we advise all residents in the affected regions, be they hams and non hams alike are advised to keep an ear tuned to their local newscasts and weather bulletins. These could very well save your life.

In the newsroom in Los Angeles, I'm Bill Pasternak, WA6ITF, reporting for the Amateur Radio Newsline. Don.

--

More on Hurricane Irene and ham radio involvement in next weeks Amateur Radio Newsline report. (ARNewsline(tm), K3VSA, W3EVE, KC5FM, RAC, ARRL, others)

BREAKING DX NEWS: TIMOR LESTE - EAST TIMOR TO BE QRV SEPT 16

The long awaited 4W6A Timor-Leste DXpedition is now less than one month away. 4W6A will be operational from Atauro Island in East Timor from

September 16th to the 26th. They will be on 160 through 10 meters using CW, SSB and RTTY with up to four stations operating simultaneously.

The QSL manager for this operation is M0URX. You can QSL direct, via the bureau, or electronically using Lognook of the World. Direct or bureau QSLs may also be requested using the M0URX Online QSL Request Service at m0urx.com/oqrs. We will have more DX news later on in this weeks Amateur Radio Newsline report. (OPDX)

WITH NEWSLINE: 2011 YHOTY AWARD PRESENTED TO KAITLYN S. COLE, KS3P

Satrurday, August 20th was a big day in the life of 11 year olf Kaitlyn Cole, KS3P. At the 2011 Huntsville Hamfest, Kaitlyn was presented with this years Amateur Radio Newsline Young Ham of the Year Award. Reading from a prepared statement, Kaitlyn had quite a story to tell about her involvement in the tornadoes that ravaged her home state and her decision to try to help those in need:

--

KS3P: "When the tornado struck on April 27th, I was very scared. We had no power and the phone was dead. I did not know how lucky we were until my parents took us out driving around our community.

"Some of my neighbors had lost everything or had their lives cut short by the tornadoes that struck. It was not some far off event on the news. This was personal to me.

"I didn't think a young ham like myself could do much, especially an 11 year old elementary student. My dad took me down to a command post in a Huntsville church. We signed some release forms and were given wrist bands. We then met up with Charlie, W1CST. Charlie gave me a chance to operate and provided guidance. It was really overwhelming at first because I was completely new to doing net control in a real emergency.

"At the time, I knew I was helping out but didn't think much about it because there were so many hams working. For me it was a way to cope with the devastation and to give something back to my community."

--

Kaitlin also shared her ham radio dreams of the future with the assembled crowd:

--

KS3P: "With amateur radio my goals and opportunities keep expanding. I've accomplished some of my goals but not all.

"I hope in the future to act as a DX station and not just work DX at home.

"I hope to do more videos on YouTube to encourage more youth into the hobby and to work some modes I have not yet tried.

"The sky is the limit with ham radio."

--

I had the honor of emceeing this year's award ceremony along with representatives of corporate underwriters Vertex-Standard, CQ Publishing and Heil Sound. And it was likely Rich Moseson, W2VU of CQ, who summed it up best as to why Kaitlyn was chosen as this year's award recipient.

--

W2VU: "Looking over the nomination for Kaitlyn this year the thing that jumped out at me were that an 11 year old -no go back to age 9 -and your typical 8 year old ham going to the Dayton Hamventionr and going to the Dayton Youth Lounge would be going there to do things and be guided by older young hams in things to do. But not Kaitlyn. She was there to help run the booth.

"And this spring with the tornadoes that hit here. Your average young ham might be helping out in the field or something like that, but Kaitlyn was net control.

"So, she is yet another example of those young hams who are head and shoulders above everyone else which has always been the defining qualification for this award."

--

All in all it was a great afternoon to honor a very giving young woman who even though she is only age 11 has proven that hams of any age are ready and willing to serve their community in times of need. As such, we join with our corporate underwriters and with the Huntsville Hamfest in congratulating Kaitlyn S. Cole, KS3P, for her dedication to the hobby, to the community and really to all of mankind. (ARNewsline(tm))

**

RADIO LAW: LA CELLPHONE TICKET GIVEN TO HAM OPERATING 2 METER MOBILE

A California ham has been cited for operating mobile using a 2 meter radio installed in his car and this could become a test case to find out whether the restrictive anti-cellphone law can be used against other two-way radio users.

According to a note from Dick McKay, K6VGP, a member of the Disaster Amateur Radio Network identified as Irving Osser, KE6YR, received a ticket for using his amateur 2 meter radio in his car. According to McKay, the Los Angeles motorcycle officer stated that he saw Osser on his cell phone. KE6YR tried to show the officer the two meter radio with the coil cord microphone and said he was talking to another amateur on the radio. He also tried to show the officer the hands free system he uses on his BlackBerry and finally tried to show him the cell phone log that indicated no calls were made or received.

But the officer was not interested in hearing about any of it and it has now became a tell it to the judge matter. And here is where the possibly becoming a test case for the California law. This is because Osser is an attorney by profession and plans to represent himself in court with the proper knowledge about how to address the subject.

While California does not provide any exceptions for ham radio operators, CB'ers and other non-emergency two-way radio users, by definition, two-way radio gear is not a hand held cellular telephone. None-the-less, KE6YR will still have the burden to prove in court that what he was doing was legal and that he was in fact not using a wireless telephone as defined by law. (K6VGP)

**

RADIO LAW: FAC AFFIRMS $10,000 FORFEITURE ORDER TO FLORIDA UNLICENSED BROADCASTER

A Florida resident who allegedly operated an unlicensed broadcast radio station has been ordered to pay a ten thousand dollar fine. In an August 22nd release, the Regional Director for the South Central Region of the FCC's Enforcement Bureau ordered Patrick Michael Ford of Fort Myers to pay a previously imposed Notice of Apparent Liability or NAL.

Back on May 5th the Enforcement Bureau's Tampa Office issued the Notice of Apparent Liability for Forfeiture to Ford after it traced illegal broadcasts to him. The FCC says that to date, Ford has not filed a response to the NAL. Therefore, based on the information before it the regulatory agency has now affirmed the forfeiture order and given him 30 days to pay. If he fails to do so the matter can be turned over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: $25000 NAL ISSUED FOR INTERFERENCE TO AIRPORT WEATHER RADAR

The FCC has issued Rapidwave, LLC of Saratoga Springs, Utah, a $25,000 Notice of Apparent Liability for Forfeiture order. This, for operating a 5 Gigahertz unlicensed Part 15 system in a manner inconsistent with rules, and for allegedly causing interference to an FAA Terminal Doppler Weather Radar system serving the Salt Lake City International Airport. Amateur Radio Newsline's Jim Davis, W2JKD, has the details:

--

According to the FCC, on Oct. 27, 2010, an enforcement agent from the Denver office, along with FAA personnel, located emissions at 5600 MHz coming from a Ubiquiti Xtreme Range 5 transceiver located at the Lake Mountain communications site in Saratoga Springs, Utah. The site in question was identified as being operated by Rapidwave LLC. Over the next 24 hours the FCC and FAA personnel established that this system at the Lake Mountain site was the source of the interference.

According to the FCC, all 5 GHz unlicensed national information infrastructure devices operating in the 5.25 to 5.35 GHz and 5.475 to 5.725 GHz bands must contain circuitry known Dynamic Frequency Selection. This is a radar detection capability which allows them to detect the presence of radar systems and avoid co-channel interference. During the Lake Mountain site inspection it was determined that as it was operating, the transceiver did not have Dynamic Frequency Selection functionality. Rapidwave changed the operating frequency to stop the interference to the Salt Lake City Terminal Doppler Weather Radar.

The inspection also revealed that Rapidwave had added a high gain parabolic antenna to the system. Calculations performed by the FCC agent indicated the Effective Radiated Power for this system may have exceeded the maximum permitted by the FCC Rules for operation on the frequency used by Rapidwave. You can read the entire text of this FCC enforcement action at tinyurl.com/fcc-utah-fine.

For the Amateur Radio Newsline, I'm Jim Davis, W2JKD.

--

Rapidwave was given the customary 30 days to pay the fine or to file an appeal. (FCC, RW, TVT)

**

RADIO LAW: FCC TO ELIMINATE ANOTHER 80 OUTDATED RULES

The Federal Communications Commission is eliminating another 83 rules from its books. This, as part of its reform agenda and commitment to a request from President Obama earlier this year to improve or remove any rules that were out of date.

Among the eliminated rules is the Fairness Doctrine enacted back in 1949 which was intended to promote balanced discussion of controversial issues. As more broadcast stations and cable channels became available, the need to mandate a diversity of viewpoints was no longer felt necessary and the rule was abolished in 1987. As a result, the FCC has not enforced it in more than two decades, but it was never officially taken off the books.

Other rules deleted included media-related regulations that have not been in effect for years. The FCC said the 83 rules eliminated will not have any significant impact on broadcast businesses. So far more than 50 outdated rules in all services it oversees have already been

eliminated as part of the FCC's reform agenda aimed at removing obsolete regulations and revising others to keep up with new technology. (FCC)

911 COMMERATIVE EVENTS: N0L FROM THE GUARDIANS OF FREEDOM AIR SHOW

Yet another amateur radio club has announced its decision to commemorate the 10th anniversary of the 911 al-Quida terror attacks on the United States. This with news that the Lincoln Amateur Radio Club will be operating special event station N0L in conjunction with the Guardians of Freedom Air Show to be held September 10th and 11th at the Lincoln Airport in the city of Lincoln, Nebraska.

The air show will feature a dazzling performance by the Navy's Blue Angels precision flying team. Meanwhile, station N0LL will be on the air on most High Frequency bands from Septenber 9th thru the 11th. For more information please visit K0KKV.org or lincolnairshow.com on thw World Wide Web. (K0NEB)

**

HAM RADIO ON THE WEB: QRZ.COM CREATES NEW FORUM FOR HOMEBREW GEAR SELLERS

The QRZ dot com ham radio website has announced the creation of a new Swapmeet Forum called Ham Made Gear dedicated specifically to the sale of home made ham radio equipment. According to site owner Fred Lloyd, AA7BQ, creation of this new area on QRZ is in keeping with the spirit of helping to foster small businesses started by fellow hams.

This forum is designed for hams who build gear themselves to sell to other hams. As explained by AA7BQ, previously, QRZ disallowed such postings as being "commercial" in nature. Cut says Lloyd this new forum solves that problem allowing semi-commercial, part-time, or hobbyist types of sellers to publicize, promote and sell their products on QRZ. There is no charge for this service, and any ham can participate so long as they are engaged in building gear themselves.

Lloyd stipulates that QRZ will not allow resellers of any kind in this area. All products offered must be manufactured by the seller, who must be a ham listed in the QRZ.com callsign database. (AA7BQ)

THE CHANGING OF THE GUARD: TRANSFORMER MANUFACTURER PETER DAHL, K0BIT -S.K.

Transformer designer and manufacturer Peter W. Dahl, K0BIT became a Silent Key on August 15th. According to Radio World magazine, Dahl died after a long illness having been battling Parkinson Disease for a number of years.

Peter Dahl, who founded his company in 1964 while still a college student in Minnesota was best known for his custom-wound transformers. These were particularly popular with ham radio operators, though he also counted radio and TV stations among numerous clients. After retiring in 2007, Dahl sold his designs to Harbach Electronics which continues to supply many of the products K0BIT had designed.

Peter W. Dahl, K0BIT, was age 71 at the time of his passing. He is survived by his wife Clarice, his daughter Tamra and sister, Priscilla. A memorial service was held August 19th in El Paso, Texas. (RW)

NAMES IN THE NEWS: ARRL ANNOUNCES SM ELECTION RESULTS

Two ARRL Section Manager in challenged elections have been re-elected by ballot to serve another term in office. In Georgia, incumbent Gene Clark, W4AYK, of Albany, was re-elected to a second term with 820 votes. In Western Washington, Jim Pace, K7CEX, of Centralia, was re-elected for a third term with 965 votes. Both men will begin new terms of office on October 1st.

Also on October 1st, Colorado will be getting a new Section Manager in the person of Jack Ciaccia, WM0G, of Boulder. He takes over from Jeff Ryan, K0RM, who decided not to run for another term. Ciaccia currently serves as an Assistant Section Manager, Public Information Officer and Official Emergency Station in the Colorado Field Organization.

All other incumbent Section Managers standing for re-election faced no opposition this year. (ARRL)

NAMES IN THE NEWS: IARU REGION ONE ELECTS NEW EXECUTIVE COMMITTEE

Meantime, Region One of the International Amateur Radio Union has elected a new Executive Committee. They are Hans Timmerman, PB2T, as President; Hani Raad, OD5TE, as Vice President; Dennis Green, ZS4BS, as secretary and Andreas Thiemann, HB9JOE as Treasurer.

Four other hams from across IARU Region One were also elected to member status of the Committee. The election took place at the 22nd International Amateur Radio Union Region 1 General conference recently held in Sun City, South Africa. (IARU R-1)

HAM RADIO ON THE WEB: THE LAST US BASED VOA STATION VIDEO

A fascinating video about the last Voice of America transmitter still operational from the continental United States is now available for viewing on-line. The video not only details the services provided by this VOA transmitter site but also pays respect to the work of the 16 engineers at the Greenville, North Carolina facility that keep the 60 year old shortwave technology operational and on-the air. You can sere the University of North Carolina produced video on line at tinyurl.com/voausanc (G8WGN via Facebook)

**

EMERGING TECHNOLOGY: FCC ISSUES EXPERIMENTAL SPACE LICENSE FPOR 2 METER AND 70 CM OPERATIONS

The FCC has issued a new experimental license with the call letters WF2XSP to one James Cutler to operate in 144 to 146 MHz and 437 to 439 MHz spectrum. This, for testing an image processing algorithm that will be used on a future space flight mobile, Low Earth Orbit operations ranging from 450 to 820 kilometers in altitude.

The FCC announcement made no other reference to the nature of Cutler's experimentation nor why he requested to do so in the amateur 2 meter and 70 centimeter bands. QRZ.com lists six radio amateurs by the name of James Cutler, but its unknown if any of them are the same James Cutler who has obtained the Experimental License from the FCC. (FCC)

WORLDBEAT: MONTREAL TO HOST RAC 2012 AGM

Turning to international news, word that the Montreal Amateur Radio Club will host 2012 Radio Amateurs of Canada's Annual General Meeting. The location of the 2012 Annual General Meeting was announced during the 2011 Annual General Meeting held in St. John's Newfoundland. The exact dates in 2012 will be announced this fall in September or October. (RAC)

**

WORLDBEAT: SLOVOKIA GIVES HAMS EXPANDED 60 METER PRIVILEGES

Slovak Radio Amateurs are now allowed to use the entire 60 meter band 5258.5 to 5410.0 kilohertz band instead of the previous allocation of a single channel on 5260 kHz but with some caveats. Operations are allowed for experimental purposes with a maximum power of 100 Watts Effective Radiated Power. Licenses for this spectrum are valid for only 1 year. (Southgate)

WORLDBEAT: RADIO TELESCOPES ASSIST IN STUDY OF BINARY X-RAY STAR

Astronomers from Wales and the Netherlands, in collaboration with five schools, have used eight radio telescopes simultaneously to study the

strange behavior of an X-ray binary star system.

IGR J00291+5934 is a rare X-ray binary system containing a pulsar and a normal star. Only 12 such systems are known.

In September 2008, 00291 increased in brightness at X-ray wavelengths by a factor of at least a thousand times and in visible wavelengths by a factor of around a hundred times. While this type of outburst is not uncommon for this type of system, the timescale is usually months to years. However in this case 00291, was in its outburst for only 20 days and then faded away to its normal faint state but then re-brightened within 30 days.

The results of the study were presented by postgraduate student Fraser Lewis at the RAS National Astronomy Meeting in Llandudno, Wales, on April 18. (Science OnLine)

DX

In DX, a team of experienced operators are preparing an amateur radio expedition to the island Rotuma. Their goal is to activate the island of on all bands from 160 through 2 meters using CW, SSB, FM, RTTY, SSTV, PSK, and several other modes. They expect the first activity on the amateur radio frequencies on September 27th, and plan to be active the next 10 days. QSL via YT1AD, direct or via the bureau

Listen out for the 20 amateur radio special event stations in Spain to be active through September 11th. Each station represents a football team competing in the Spanish Football League Teams. A special 2011 EA Football League Teams Award is available to those who mare contact. Complete details are available at www dot ea-flt dot com.

A number of operators from South Korea and Japan were on the air using the callsign D9A from the South Korean island of Cheju from August 19th to the 26th. If you made contact with D9A, please QSL via DS4EOI.

EI7CC is in Lesotho for through August 30tth and is active as 7P8PB. He hopes to upload his logs to Logbook of the World on a daily basis.

DH2AK and DL1THM will be active stroke PJ2 from the island of Curacao from through September 8th. They will be using an Icom IC-7000

transceiver, a Buddipole and operating holiday style. QSL as directed on the air.

Rugby enthusiasts look out for ZL4RUGBY operated by ZL4PW through October 31st. This is to celebrate the 2011 Rugby World Cup being played in New Zealand. QSL via ZL4PW.

Lastly, a number of operators from South Korea and Japan were on the air using the callsign D9A from the South Korean island of Cheju from August 19th to the 26th. If you made contact with D9A, please QSL via DS4EOI.

(Above from various DX news sources)

THAT FINAL ITEM: SPEED OF LIGHT PRECLUDES TIME TRAVEL

And finally this week word that physicists have confirmed the ultimate speed limit for the packets of light called photons and in doing so have made the concept of time travel even less likely than thought.

The speed of light in vacuum is considered the universe's ultimate speed limit, but experiments in recent years suggested that single photons might beat this. And if that were proven true, then at least in theory time travel might be possible.

Now, a paper in Physical Review Letters shows that individual photons are also limited to the vacuum speed limit. This means that photons maintain the principle of causality laid out in Einstein's theory of special relativity. This appears to mean that an event's effect cannot precede its cause by traveling faster than light. It is violation of this causality that would, in principle, permit time travel.

In ham radio, that would essentially mean that one cannot hold a QSO with a rare DX station until that station is actually on the air. This, even though some radio amateurs have been known to try.

More on this scientific discovery that is bound to annoy believers in warp speed travel is on-line at tinyurl.com/435b833 (BBC via Southgate)

Dirty little secrets.

2641. Who is Mark Morgan, KB9RQZ?

Newsgroup: rec.radio.amateur.policy
Date: 2011-08-26 14:15:31 UTC
From: snow.goon@usa.com
Message-ID: <28f4d49e-e972-4054-9246-6c5c144ef940@dl2g2000vbb.googlegroups.com>

Cross-posted to: alt.baldspot,alt.usenet.kooks,rec.radio.amateur.policy,alt.slack,comp.os.os2.advocacy

Mark C. Morgan of 17366 North River Road, Tapiola, Michigan describes himself as a "kinky bisexual, into bondage, domination, and sado-masochism." As indicated in the CCRAA club newsletter, Morgan was impeached by members of the CCRAA radio club, in the summer of 2008. His impeachment was partly a result of the fact that he falsely accused seven men of child pandering and partly due to the fact that his actions brought disrepute onto the club.

Mark Morgan is under investigation for identity theft related to the unauthorized use of another man's name and email address. Information related to the incident was posted on the website on February 13 at 1:15 AM. Morgan has continuously posted false and defamatory information about various individuals for a number of years.

On February 13, it was also reported that nine (9) accounts used by Morgan to flood multiple newsgroups with annoyance messages had been removed for terms of service (TOS) violations.

Amazingly, after falsely reporting an individual for child sex pandering last year, Mark Morgan has now stolen the email address of the same FCC licensee, and, as of 10 AM eastern time on 2/13/09, Morgan had already posted 308 fraudulent messages. Here is a link to the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and Law enforcement agencies in Michigan have been notified about this latest act of fraud perpetrated by Mark Morgan.

During the period prior to Morgan being impeached by the CCRAA radio club, the turbulence resulting from Morgan's fraud, malicious acts, and false accusations were acknowledged by club members to have cast a bad light on the organization. According to the club leadership: When Morgan began posting statements about the club on his private blog, leading to the possibility of the club being involved in a nasty civil suit, club members realized their mistake in electing him. After a short tenure as a club officer, Morgan was impeached by a margin of 11:1. Morgan's own vote was the only vote in his favor.

Like his friend Karol Madera, Morgan has a long history of involvement with the police, and the mental health industry. Law enforcement officials in Michigan have stated that Morgan was transported for psychiatric examination in 2004, to a hospital in Marquette, Michigan, under supervision of Sheriff's Deputies.

Morgan calls himself an ally of Karol Madera, VE7KFM.

In collusion with Madera, Morgan made malicious and false reports of child pandering to child protective service agencies, against 7 different men, in 7 different states.

Morgan was banned from qrz.com and hamisland.com for posting defamation about various individuals. Morgan has admitted he uses Google services (blogspot) to manage at least 3 defamatory blogs, using material fabricated by Karol Madera.

Morgan creates multiple identities, enabling him to flood the usenet service with thousands of nonsensical messages, in retaliation against those who have revealed his many lies and fabrications over the past 10 years. At last count, Morgan had posted well over 200,000 meaningless posts, using just a few of these multiple identities. Morgan admits he has rendered the service useless, citing "self defense." The removal of one of the many identities used by KB9RQZ on usenet is a victory in the effort to reduce the incessant flood of posts made by Morgan in an effort to deny others the ability to enjoy the usenet service.

Quotable Quotes ~ by Mark Morgan, KB9RQZ

On reporting 7 men for child sex crimes:

"likewise you can prove I made a charge , you can't prove it was flase and malicious you would have to prove that I did not suspect you, indeed if I am mental ill as you suggest in post 2 then your task becomes even harder, since if I am nuts who knows what I believe"

"if you try and stop me either nothing will happen , or I will never even notice the effort or if you manage to inconvence my exercise of my rights I will look into what price I can extract from you."

"you also provoked mater by insisting your had the right to control who responded to your posts in RRAP"

"I made no flase report to CPS (child protective services) indeed you don't what a fasle report is it seems since I did and do and in fact I am more convinced than ever that you are likely the offer of the note claimignt o be willing to rent me the sexual service of that 9 yo but in any event I started nothing with you YOU started thing remeber you insisted I hated Ham radio because I said its response to Katrina could be imporved"

"when you atack me you invite response the only question is wether you have the gut to allow the reponse"

KB9RQZ, on shooting a teenaged boy (according to Houghton County Sheriff's Department, it never happened)

"at about 6:35 this morning I was awakened not by the expected return of my wife form the renfaire but the sound of motors. the motors belong to an ATV that had managed to get a rope onto my tower (30 foot wooden structure and was puling the tower down. O got sever round with the shotgun did not score a good hit but but the cops found blood on

the treea dn the trails lead back to n rover river road after a bit where it stop and free tire marks (looks like one of the pickups that carry atv's around here).

the rope parted and no real damage to the anttenas was done although my masting needs work to make it stable again. have had loads of fun with the cops over the matter. I wonder what poor kid (I could see he was not more than say 16 ish) the nutjobs conned into making the attack and with what lie. sad realy."

February 2009 ~ Yet Another KB9RQZ Identity Banned from Google Groups

Another of the email adresses (kb9rqz@yahoo.com) used by Mark Morgan of Chassell, MI to flood usenet with thousands of nonsensical, useless messages, has been banned by Google groups for numerous violations of Google's terms of use, which include efforts to defame, abuse, harass, stalk, threaten or otherwise violate the legal rights (such as rights of privacy and publicity) of others; posting inappropriate, defamatory, infringing, obscene, or unlawful Content, and; restricting and inhibiting other users from using and enjoying the Service, through repeated flooding, spamming, and changing of thread titles.

The following is a repost about Morgan, made on Daniel Jeswald's blog, attributed to Steven Robeson:

Mark Morgan, KB9RQZ, is a very disturbed, admittedly deviant, and dishonest person who has been harrassing Amateur Radio operators and disrupting radio, and other forums, since at least 1997.

As part of his on-going fusillade, he has, at various times, insisted that he's a "colonel" in the US Army "chemical corps," further insisting that he's been "drafted," and further insisting that he was not allowed to "resign."

Never mind that he was only 8 years old when the draft was stopped in the 70's! He's since recanted the "Colonel" claim, saying he was only a Lieutenant, then claiming he was only a Sergeant at discharge -- under another name that the CIA knows about -- and approved.

Oh, and he was kicked out of the service due to his "nerves" according to Mr. Morgan. However, the HCSD and MSP both have him on record as being transported to Marquette General Hospital in 2004, due to "involuntary commitment for psychiatric evaluation."

Mr. Morgan has perpetuated a smear campaign against other members of various forums, going as far as post-editing comments, forging posts, and even trying to make "complaints" to the Civil Air Patrol Inspector General Corps and the FCC, etc., about perceived slights that have nothing to do with CAP or anything with any bearing on reality.

Recently, Morgan reported 7 different men to Child Protective Services in 7 different states. All this, because he has allied himself with yet another lunatic in Canada, known as Karol Madera, VE7KFM, who is

as bad, or worse, than Mark Morgan.

This behavior is nothing more than an attempt by Morgan to "silence" those who would expose his foolishness and who refuse to tolerate his dishonesty in public forums.

Mr. Morgan has admitted to various acts of perversion and deceit, going as far as bragging about his use of lying, and his belief that deceit should be proactively taught to children as part of their upbringing. He describes himself as a kinky, bisexual, rabbi, who is into bondage, domination, and sado-masochism. He's been banned from almost every polite radio forum on the internet, but he still spams usenet groups, nearly every day, with nonsensical messages and libel.

Mr. Morgan has even gone as far as to create multiple screen names with which to spam usenet and other forums, including one screen name that invokes the name of my deceased daughter in order to perpetuate his demented "point of view".

Be aware. Be informed. Mark C. Morgan is NOT a person of reputable character, nor does he have an honest nature. In fact, not only was he transported to Marquette General Hospital for psychiatric evaluation and treatment in 2004, but he has a long history of similar treatment and harassment of others by various devious and underhanded means.

Mark Morgan has been investigated for the abuse of his elderly father, and for making false sos calls, as recently as December, 2008. There have even been rumors that Mark Morgan stole money from his elderly father, in order to move to Michigan, to avoid prosecution there, for crimes that have not been published, yet.

This summer (2008) Mr. Morgan was voted out of the CCRAA amateur radio club by a vote of 11:1. He was ejected from that club and banned from the websites qrz.com and ham island.net. Reports of dishonesty, slander, libel, and theft, follow Mark Morgan around the internet, like the stench from the local dump.

Here is a link to one of the screen names used to flood forums with unwanted posts and garbage of the type I previously mentioned. And here is another from IP addresses at Hughes satellite services, the latest IP addresses being 69.19.14.28 and 69.19.113.131

In summary, beware of Mark C. Morgan of 17366 North River Road, Tapiola, Michigan. Do not hesitate to contact Houghton County Sheriff's Department if he begins stalking you, or your family. Unfortunately, I have first hand experience with his stalking and harassment.

Mark Christopher Morgan can be reached for comment at kb9rqz@hughes.net or by phone at 906-523-4520 or via his postal address at Mark C. Morgan 17366 North River Road, Tapiola, Michigan 49931

Do you think this kelp you post about will help with my jock itch, kb9rqz?
It seemed to really cool down the old hemorrhoids!

A hemorrhoid deep in my a$$
Gives fear of even passing gas

An itchiness it has deployed
My comfort now is quite destroyed

A hemorrhoid deep in my void
All spicy foods I must avoid

Oh please sweet lass your lips display
And Kiss my a$$ to make this pain just go away

Will he travel to Florida?

Sounds like ernie primeau and Mark are a match.

ernie is not allowed to travel more than 3 hours from his home, due to
what seems to be part of ernie`s parole conditions.

Marcus

You already babbled that. Nothing new erniebald?

Marcus

2659. THE DISTORTED IMAGE OF MUSLIM WOMEN !!!!!!!!!!

Newsgroup: rec.radio.amateur.policy
Date: 2011-08-26 19:18:28 UTC
From: bv <bv6bv6bv6@gmail.com>

THE DISTORTED IMAGE OF MUSLIM WOMEN

Since the height of the feminist movement in the late 70's there has been a magnifying glass placed over the status of Muslim women. Unfortunately, the magnifying glass that has been used is an unusual one.

Unusual in the sense that it is very selective about which items it will magnify; other items it will distort to such a degree that they will no longer look familiar. I remember once reading an "in depth" article about the lives of Muslim women. This article "explained" that at any time a man can divorce his wife by simply stating "I divorce you, I divorce you, I divorce you".

This article can lead anyone ignorant of the Islamic ruling regarding divorce to believe that in less than five seconds the woman is left with no husband and is left to care for herself (and possibly children) by any means necessary.

The question that immediately popped up in my mind was, "Did the author innocently write that out of sincere ignorance or was it another of the many attempts to degrade the religion of Islam and its followers (Muslims)?" It may be out of paranoia, but I tend to believe it was the latter of the two.

The truth of the matter is that Islam has the most humane and most just system of divorce that exists. Firstly, many options are taken and tried before coming to the decision of divorce. If the man and woman decide that they can no longer live together successfully as a husband and wife, the husband (in most cases, not always) pronounces the divorce by saying "I divorce you". At this point the waiting period begins.

The waiting period lasts for three menstrual cycles to assure the woman is not pregnant. This period allows the couple time to think about what they are doing and if this is what they really want to do. There are no lawyers involved to antagonize an already delicate situation.

In the case that it is realized, that the woman is pregnant, the waiting period lasts the entire time she is pregnant. During the waiting period (whether the woman is pregnant or not) the man is obligated to provide food, clothing and shelter to the woman as he did before the divorce pronouncement.

If the couple carries the divorce through to the birth of the child and the woman suckles the baby, the man is obligated to feed and

clothe both his ex-wife for the time the woman suckles (the maximum being two years). After his weaning, the child will be provided for by the father until he/she is no longer in need of support.

It is quite ironic that in such an "advanced society" as America, there are divorce cases in which women are being forced to pay alimony to their ex-husbands. Can this and many other things we know about the American system of divorce compare to the Islamic system of divorce?

I have also read stories wherein it is stated that women are forced to marry men without their consent. This in no way resembles the marriage system in Islam. In Islam the woman marries the man of her choice. She may even marry someone that her mother and/or father objects to.

The point is that it is the woman who makes the final decision as to whom she will marry. Once the man and the woman decide that they are interested in one another for marriage, a dowry is decided upon. A dowry is not a bride’s price but it is a gift from the groom to the bride.

They agree upon a gift that is affordable by the groom. In the time of the Prophet , often things such as livestock and money were given. This is a wise decision in the event that a woman becomes divorced or widowed, she has some financial security to fall back on even if it is for a limited amount of time. Once the man and woman are married, the man is required to clothe, feed, shelter and educate her (or allow her to be educated) in the same manner as he does himself.

The last distorted image that I will cover is that of the Muslim women's dress. The western-influenced media portrays our dress to be outdated and oppressive. Needless to say, I differ with these adjectives. Our dress code does not hinder us from doing anything productive in our lives.

Muslim women maintain a variety of jobs, none of which are devalued nor hampered due to their dress code. And as for the timing of Muslim women's dress during these contemporary times, it seems most appropriate due to decreasing morals in the world today.

For those who say that Islamic dress is outdated, they speak from great ignorance. The decreasing morality and trials of this time makes Hijab even more in need. More than ever before sex crimes are rampant.

Although this society tells women they can wear what they want to wear, anytime a rape occurs the woman is the one put on trial and one of the first questions is, "What were you wearing?" This concept seems as though it is a set up directed against the so-called contemporary woman. Also there is a direct correlation between the respect a man has for a woman and the amount of her body she displays flauntingly.

In conclusion, I hope this article helps to clear up some distorted/ misunderstood aspects of Islam and women. Women in Islam are respected

and held in high regard. We will never find success and/or solutions to our problems until we realize that Allaah knows best and that this disbelieving society will ruin itself.

Can you PROVE you have been to Can`a`duh recently, eh?

No, your word on it is not good enough. You are a proven pathological
liar.

There the frustrated old pussy and asshole farrel from the www.hairlosshelp.com
snake oil site goes again, accusing others of doing what she does, now
let the lying stupid whining cowardly vile HUNK of shit and convicted
child molester go finger herself, again. Ernie

The old pussy and asshole farrel thinks that because she had a sex change operation everybody should have one, just like because none of the crap sold or promoted at her www.hairlosshelp.com snake oil site nothing works for hair loss. Now let the lying stupid whining cowardly vle HUNK of shit and convicted child molester go finger herself, again. Ernie

Farrel never had a sex change operation, though if he had wanted to,
and I am sure he did not, he has the money and could pass the
psychological tests.

You do not have the money or the mental health to get your dream done.

Marcus

Farrel never had the desire for a sex change. He is married to a
woman.

We know you never had the money. You live in a shitty little trailer.

We also know that you have long desired a sex change. You posts on
female hormone therapy clearly comes from you taking them. No wonder
you are ashamed to show any recent pictures. You are older, balder
uglier and most likely have boobs by now.

Marcus

i don't think i'm going to answer you anymore ,
its always the same question from you and ,
i explain i replied to alt.test and you ask the same question again so ,
bye bye tholen , take care

1> Newsgroups:
alt.baldspot,alt.usenet.kooks,rec.radio.amateur.policy,alt.slack,comp.os.os2.advocacy

1> Mark C. Morgan of 17366 North River Road, Tapiola, Michigan
describes
1> himself as a "kinky bisexual, into bondage, domination, and sado-
1> masochism." As indicated in the CCRAA club newsletter, Morgan was
1> impeached by members of the CCRAA radio club, in the summer of
2008.
1> His impeachment was partly a result of the fact that he falsely
1> accused seven men of child pandering and partly due to the fact
that
1> his actions brought disrepute onto the club.

1> Mark Morgan is under investigation for identity theft related to
the
1> unauthorized use of another man's name and email address.
Information
1> related to the incident was posted on the website on February 13 at
1> 1:15 AM. Morgan has continuously posted false and defamatory
1> information about various individuals for a number of years.

1> On February 13, it was also reported that nine (9) accounts used by
1> Morgan to flood multiple newsgroups with annoyance messages had
been
1> removed for terms of service (TOS) violations.

1> Amazingly, after falsely reporting an individual for child sex
1> pandering last year, Mark Morgan has now stolen the email address
of
1> the same FCC licensee, and, as of 10 AM eastern time on 2/13/09,
1> Morgan had already posted 308 fraudulent messages. Here is a link
to
1> the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and
Law
1> enforcement agencies in Michigan have been notified about this
latest
1> act of fraud perpetrated by Mark Morgan.

1> During the period prior to Morgan being impeached by the CCRAA
radio
1> club, the turbulence resulting from Morgan's fraud, malicious acts,
1> and false accusations were acknowledged by club members to have

cast a
1> bad light on the organization. According to the club leadership:
When
1> Morgan began posting statements about the club on his private blog,
1> leading to the possibility of the club being involved in a nasty
civil
1> suit, club members realized their mistake in electing him. After a
1> short tenure as a club officer, Morgan was impeached by a margin of
1> 11:1. Morgan's own vote was the only vote in his favor.

1> Like his friend Karol Madera, Morgan has a long history of
involvement
1> with the police, and the mental health industry. Law enforcement
1> officials in Michigan have stated that Morgan was transported for
1> psychiatric examination in 2004, to a hospital in Marquette,
Michigan,
1> under supervision of Sheriff's Deputies.

1> Morgan calls himself an ally of Karol Madera, VE7KFM.

1> In collusion with Madera, Morgan made malicious and false reports
of
1> child pandering to child protective service agencies, against 7
1> different men, in 7 different states.

1> Morgan was banned from qrz.com and hamisland.com for posting
1> defamation about various individuals. Morgan has admitted he uses
1> Google services (blogspot) to manage at least 3 defamatory blogs,
1> using material fabricated by Karol Madera.

1> Morgan creates multiple identities, enabling him to flood the
usenet
1> service with thousands of nonsensical messages, in retaliation
against
1> those who have revealed his many lies and fabrications over the
past
1> 10 years. At last count, Morgan had posted well over 200,000
1> meaningless posts, using just a few of these multiple identities.
1> Morgan admits he has rendered the service useless, citing "self
1> defense." The removal of one of the many identities used by KB9RQZ
on
1> usenet is a victory in the effort to reduce the incessant flood of
1> posts made by Morgan in an effort to deny others the ability to
enjoy
1> the usenet service.

Actually it was the old pussy and asshole farrel from the www.hairlosshelp.com
snake oil site who wrote that using my name, now let the lying stupid
whining cowardly forger, vile HUNK of shit and convicted child
molester go finger herself, again. Ernie

2933. Crossposting Permitted to rec.radio.amateur.moderated

Newsgroup: rec.radio.amateur.policy
Date: 2011-09-01 06:00:02 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/moderated/crossposting-1-1314856800@panix.com>
Source record: 247254
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/moderated/crossposting
Revision: 1.1 2009/04/12 19:42:04
Posting-Frequency: posted monthly
URL: http://www.panix.com/~rram/usenet/rram/index.html

Changes followed by "|".

After a 30-day public discussion and feedback period to gauge reader
opinions in March of 2009:

http://groups.google.com/group/rec.radio.amateur.moderated/browse_thread/thread/d7d337db35
f23326

the rec.radio.amateur.moderated Moderation Team has decided to consider
amending its charter, and permit limited simultaneous crossposting to
rec.radio.amateur.moderated and one other unmoderated
amateur-radio-related discussion newsgroup. We are currently trying
this on a temporary basis (90 days, through early July 2009), and adopt
it permanently if successful.

Approved rec.radio.amateur.* newsgroups are those that are currently
listed in the latest version of the "List of Big Eight Newsgroups" which
is crossposted monthly to news.announce.newgroups, news.groups, and
news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those
that have been created consistent with the suggestions in "So You Want
to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

Approved regional hierarchy newsgroups are those that contain either
"radio.amateur" or "ham-radio" in their names, including
uk.radio.amateur and aus.radio.amateur.misc.

We will make every reasonable effort to keep our list of approved
newsgroups up-to-date. In case we have overlooked any, and a submission
is rejected in error as a result, the rejected submitter can E-mail us
at our administrative contact address (in the signature at the bottom of
this article, and the default Reply-To for the rejection message)
requesting that it be added, and that the article be approved. We may
still choose to reject articles crossposted to any alt.* newsgroup with
an inappropriate name, including obscene language, embedded
name-calling, or encouragement of unlawful conduct.
```

Please direct any comments, questions, or criticisms to
rec-radio-amateur-moderated-request@panix.com.

Tholen, what does your failure to maintain a erection have to do
with your wife leaving you?

==> PUBLIC SERVICE: HAMS FROM NORTH CAROLINA TO MAINE PROVIDE
COMMUNICATION SUPPORT BEFORE, DURING AND AFTER HURRICANE IRENE

Hurricane Irene -- the first major hurricane of the 2011 hurricane
season -- left extensive flood and wind damage along its path through
the Caribbean, the East Coast of the United States and as far north as
Atlantic Canada. Beginning on August 20 as then-Tropical Storm Irene
headed toward Puerto Rico, radio amateurs were already on alert.

Irene first made landfall in the US as a Category 1 storm on the
morning of Saturday, August 27 on North Carolina's Outer Banks. In
preparation, ARRL Emergency Preparedness Manager Mike Corey, W5MPC,
activated the ARRL HQ Emergency Response Team (HQERT). On Tuesday,
August 23, this team of ARRL HQ staffers began monitoring various nets
and providing support to the affected Field Organizations from W1AW,
the Hiram Percy Maxim Memorial Station. Two days later, the HQERT went
into active mode. Read more here

```

tion-support-before-during-and-after-hurricane-ir>.

==> PUBLIC SERVICE: PUERTO RICO FEELS EARLY BRUNT OF HURRICANE IRENE

When Tropical Storm Irene formed on the evening of Saturday, August 20, the Puerto Rico Emergency Management Agency began to activate in preparation for the storm's approach. According to ARRL Public Information Officer Angel Santana, WP3GW, amateurs affiliated with the Cuerpo Voluntarios Radioaficionados (CVR) began to move throughout the island. In San Juan, CVR activated KP4CVR on the KP4CAR repeater. Hams also monitored 7.195 MHz for traffic and used 146.520 MHz for local contacts. Read more here <http://www.arrl.org/news/puerto-rico-feels-early-brunt-of-hurricane-irene>.

==> KALAUPAPA, HAWAII IS SITE OF SECOND ARRL REMOTE VE TESTING

From the sunny shores of Hawaii's Kalaupapa Peninsula, -- located on the Island of Molokai -- ARRL Volunteer Examiners gave a remote ARRL VE session on the morning of July 25. Well, at least it was morning in Hawaii, but it was late in the afternoon at ARRL Headquarters. What made this VE session so special that it was only the second VE session to be administered via Internet video feed. The first video VE session -- and the first-ever VE session in Antarctica -- took place in October 2010.

Not only was this VE session special due to its location, only one VE was at Kalaupapa for the exam. "This is where the Internet video feed came into play," explained ARRL VEC Manager Maria Somma, AB1FM. "Joe Speroni, AH0A -- who lives in Honolulu but went to the site at his own expense -- was at Kalaupapa, but Bev Yuen, AH6NF, and Ray Moody, AH6LT, were in Honolulu and watching on video. We also had three VEs here at ARRL Headquarters watching via video feed: Penny Harts, N1NAG, Steve Ewald, NV1X, and Rose Anne Lawrence, KB1DMW. These three administer many VE sessions each year here at ARRL HQ." Read more here <http://www.arrl.org/news/kalaupapa-hawaii-is-site-of-second-arrl-remote-ve-testing>.

==> ON THE AIR: HAVE SOME FUN IN THE ARRL SEPTEMBER VHF QSO PARTY

September is here, and that means the VHF bands have been getting a workout. "If you've never experienced the fun of VHF+ operating, the ARRL September VHF QSO Party, the weekend of September 10 is a great place to start," said ARRL Contest Branch Manager Sean Kutzko, KX9X. "With many HF radios now offering at least 6 meter SSB/CW capabilities -- and some offering 2 meters and 70 cm as well -- any amateur with a Technician class license or higher can experience long-haul communication on the VHF bands."

Kutzko explained that September is known for having good tropospheric propagation, as opposed to June, which is known for sporadic-E, or E-skip. "As the summer winds down, the sporadic-E season comes to an end and good tropo conditions flourish," he said. "A modest station -- say a 50 to 100 W SSB/CW transceiver and a small Yagi on 2 meters --

can, with favorable conditions, make QSOs several hundred miles away. If conditions are excellent, QSOs of more than 1000 miles are possible." Read more here <http://www.arrl.org/news/have-some-fun-in-the-arrl-september-vhf-qso-party>.

==> ON THE AIR: SPECIAL EVENT STATIONS MARK TENTH ANNIVERSARY OF 9/11

In remembrance of those who died in the terrorist attacks that occurred on September 11, 2001, several Amateur Radio Special Event Stations are being planned. Click here <http://www.arrl.org/news/special-event-stations-mark-tenth-anniversary-of-9-11> for a list of those stations that have notified the ARRL that they will be on the air. The dates, times and frequencies of these Special Event Stations are listed as they were reported to the ARRL, and as such, are subject to change. This list will be updated as more Special Event Stations notify ARRL HQ of their plans. We recommend that you bookmark the web page and check back periodically for any additions.

==> SOLAR UPDATE

Tad "September Sun, blowing golden hair <http://www.youtube.com/watch?v=kJhUs9PQvHs>" Cook, K7RA, reports: Sunspot activity rose again this week, with the average daily sunspot number up nearly 18 points to 83.6, but the geomagnetic indices were down slightly. The high sunspot number for the week -- 121 -- was recorded on Wednesday, August 31. The last time the sunspot number was higher was on July 31 at 128 and August 1 at 130. The predicted solar flux is 110 on September 1-2, 105 on September 3, 100 on September 4-5, 95, 90, 90, 85, 90, 92 and 95 on September 6-12, 100 on September 13-15, and finally peaking at 105 on September 18-22. The predicted planetary A index is 5 on September 1-2, 8 on September 3-4, 5 on September 5-10, and then 8, 12, 8 and 5 on September 11-14. Look for more information on the ARRL website on Friday, September 2. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Type O Negative's September Sun <http://en.wikipedia.org/wiki/Type_O_Negative>.

==> HQ NEWS: ARRL HQ TO CLOSE IN OBSERVANCE OF LABOR DAY

ARRL Headquarters will be closed in observance of Labor Day on Monday, September 5. There will be no W1AW bulletin or code practice transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, September 6 at 8 AM Eastern Daylight Time. We wish everyone a safe and festive holiday weekend.

==> THIS WEEK ON THE RADIO

This week:

- September 2 -- NCCC Sprint Ladder
- September 3 -- Wake-Up! QRP Sprint; GCW Straight Key Party; Russian Radio WW RTTY Contest
- September 3-4 -- Colorado QSO Party; QCWA Fall QSO Party; All Asian DX Contest (Phone); CWops Mini-CWT Test
- September 4 -- DARC 10 Meter Digital Contest
- September 4-5 -- Tennessee QSO Party
- September 5-6 -- Michigan QRP Labor Day CW Sprint
- September 6 -- ARS Spartan Sprint

Next week:

- September 9 -- NCCC Sprint Ladder
- September 9-10 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 10 -- Ohio State Parks on the Air; Kulikovo Polye Contest
- September 10-11 -- Arkansas QSO Party; WAE DX Contest (Phone)
- September 10-12 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>; ARCI VHF Contest
- September 11 -- SKCC Weekend Sprint
- September 14-15 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 9-11 -- ARRL Southwestern Division Convention <http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>, Torrance, California
- September 11 -- ARRL Great Lakes Division Convention <http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest>, Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention <http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamfest>, Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention <http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane-hamfest>, Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention <http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>, Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention <http://www.arrl.org/hamfests/connecticut-state-convention-1>, Wallingford, Connecticut

- October 14-16 -- ARRL Pacific Division Convention
<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,
Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

I explained what it has to do with alt.baldspot

Why do you ask the same question over and over?

Marcus

Amateur Radio Newsline(tm) Report 1777 - September 2 2011

Amateur Radio Newsline report number 1777 with a release date of
Friday, September 2, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Amsat Oscar 51 appers to be failing as its
batteries die. Also, the ARRL says that it opposes a rules waiver
request filed by the Anchorage V-E-C, ham radio responds to Hurricane
Irene, international cooperation removes CODAR from the 24 MHz band and
a Dancing With The Stars judge teams with the BBC to produce a new
documentary on the sinking of the Titanic with an emphasis on Morse
code. All that and more on Amateur Radio Newsline(tm) report number
1777 coming your way right now. (Billboard Cart Here)

**

HAM RADIO IN SPACE: AO-51 MAY SOON BE LOST

The ageing Amsat Oscar AO-51 may appears to be a dying bird. This,
according to Control Station, Mark Hammond, N8MH reporting via the
Amsat News Service weekly newsletter. Amateur radio Newsline's Don
Carlson, KQ6FM, has the details:

--

In an update on AO-51's health, Mark Hammond, N8MH, noted that since
the failure of the first cell on the six-cell battery, ground
controllers have been limited to simple commands for basic
configurations. Hammond said that ground control stations have evolved
basic control and management techniques for AO-51. These allow them to
set power levels manually, change uplinks and downlinks and the like.
However, features such as telemetry collection and the Bulletin Board
are not functional at this time. If the satellite resets during eclipse
these basic functions must be restored manually by a ground station.

And now ground stations have discovered there is a second cell in the
battery showing problems. Hammond says that the control team thinks
that battery will be the next cell to go. If that happens the probable
result that their limited manual mode of operation probably will no
longer be an option, and the mission might be considered over.

By way of historic background, AO-51 is the on-orbit name designation
of a Low Earth Orbiting microsat previously known as Echo. It was
launched on June 29, 2004 from Baikonur Cosmodrome, in Kazakhstan into
a sun synchronous low Earth orbit.

The AO-51 bird contains an FM repeater with both a 144 MHz and 1.2 GHz uplinks along with 435 MHz and 2.4 GHz downlinks. It also carries a digital subsystem that transmits telemetry on 70 cm and provides a complete PACSAT Bulliten Board System. It also features a 10 meter P-S-K uplink.

As an FM satellite, AO-51 has always been easily workable with gear as simple as an VHF/UHF dual band hand-held radio, as long as a station knows when the satellites footprint is within reach. Transatlantic contacts have been made without much effort, as long as the satellite is approximately mid-Atlantic so that the edge of the satellites footprint is within reach on either continent.

But since this past May, AO-51 has been experiencing problems with its batteries whiuch in turn as made the onboard repeater unavailable at times. While controllers are now back in basic control of the ageing bird, if one more of its batteries fail, Hammond seems to be saying that AO-51 could go perminantly Q-R-T

For the Amateur Radio Newsline, I'm Don Carlson, KQ6FM, in Reno, Nevada.

--

AO-51 is currently operating FM with an uplink at 145.88 MHz on 2 meters and a 70 centimeter downlink at 435.15 MHz that uses left-hand circular polarization. Output power of the 70 centimeter transmitter is just under one watt. How long it will stay operational depends on how much longer its on boards batteries continue to function in orbital space. (ANS)

RADIO RULES: ARRL OPPOSES ANCHORAGE LICENSE CREDIT INTERIM WAIVER REQUEST.

The American Radio Relay League has said no to a waiver request filed by the Anchorage Alaska VEC. One that asks that the FCC to grant a blanket waiver of Section 97.505 of the Commission's Rules and to grant exam credit for test elements previously passed to those radio amateurs whose licenses have expired and are beyond the two-year grace period for renewal.

The story really goes back to this past April when the Anchorage group filed a Petition for Rule Making designated RM-11629. As previously reported, that request asks the FCC to give permanent credit to radio amateurs for examination elements they have successfully passed. This would in effect create a license exam credit that would be valid throughout an amateurs' lifetime and in essence create a United States lifetime amateur license.

Then on July 6th, the Anchorage VEC followed up with its waiver request even though RM-11629 is still pending. After consideration, on August 11, the ARRL filed comments on the waiver request with the FCC, urging

the Commission to dismiss or deny it. The League says that its decision to oppose is based on the fact that if the FCC grants such a waiver request, it would quite obviously prejudge the outcome of RM-11629. And if for any reason RM-11629 is denied or dismissed, those who re-obtained licenses during the term of any temporary waiver would either have been given a privilege not afforded others or else they would have their reinstated or renewed licenses revoked at some later date. In other words, the ARRL filing says that should the Commission grant the temporary waiver, it is equivalent to granting of the underlying petition.

At this time, the ARRL says that it is not taking a position with respect to the merits of the original Anchorage VEC request in RM-11629. Rather, the League only opposes the waiver request because the Anchorage VEC has failed to justify the need for the interim relief that the waiver request seeks. (ARRL)

**

RESCUE RADIO: HAM RADIO AND HURRICANE IRENE

Hurricane Irene is now a storm of the past and provided a good training and response exercise for hams from North Carolina through Canada. Bill Pasternak, WA6ITF, is in the newsroom with what we know so far:

--

Ham radio is always ready to respond in time of disaster. Its star really shines when all other means of communications fail. There were any hams involved in emergency communications who were well trained and fully equipped to respond when it was announced that hurricane Irene was headed to the United States eastern shores.

Initial forecasts said that Irene could make landfall as a Category 2 or even 3 storm with the potential of raving a good part of Florida and other South-East coastal states before working her way northbound. Already the narrow Cat Island in the southeastern Bahamas taken the full force of Irene, and by this time, ARES and other groups from Florida's northward through the Canadian Maritime Provinces were on stand-by alert for the devastation that many news outlets were predicting.

But with the exception of some localized problems, most of what weathercasters were predicting never happened. This was mainly because Irene did not follow initial storm track predictions. Instead of heading directly toward Florida the massive hurricane veered a few degrees to the East, sparing Florida, Georgia and South Carolina. Instead it made landfall in the outer barrier islands of North Carolina as a Category 1 hurricane having lost a lot of energy in the cooler mid-northern latitude waters of the Atlantic.

That said, the work of the Amateur Radio operators began many days before Hurricane Irene hit U.S. shores. That's when several support

networks were activated that relayed storm information to the National Hurricane Center in Miami.

--

".W6LMJ for the Hurricane Watch Net listening for stations in the path of hurricane Irene; specifically interested in stations at this time who can report on wind conditions above 70 mph. Any station experiencing wind conditions above 70 mph please call now."

--

As Irene's winds began hitting the East Coast, more hams came on the air to provide weather spotting information to the National Weather Service's Skywarn Program. The real time, ground level reporting allowed the weather forecasters to make more accurate predictions and issue warnings. This is because the Weather Service's Doppler radar cannot see what is actually happening at ground level and the reports from the ham radio observers were especially essential when tornadoes are possibly mixed into a hurricane's winds.

Several states including New Jersey and Vermont suffered significant damage, most from flooding. According to the ARRL, ham radio volunteers from surrounding regions were brought in at the request of Greene County, New York authorities. Greene County was one of the areas devastated by flooding following Irene. And as we go to air, radio amateurs are still aiding the American Red Cross relief efforts by providing technical expertise and working with the organizations communications staff.

One area where Irene did not impact in way hurricanes usually do was to emergency and personal communications. A report in the New York Times said that wireless phone networks held up well despite widespread losses of power. Many people who lost electric mains power and wired telephone service were able to continue to communicate using e-mail and social networks using battery-powered mobile devices.

Also, according to the FCC which activated its Disaster Information Reporting System, no 911 Emergency Response Center was out of service and that it had received no reports of public safety communications disruptions.

In this case one could say that most dodged the bullet, but only because Mother Nurture chose to downgrade Irene before she made landfall. If she had hit as a Category 3 hurricane with sustained winds between 111 to 130 mph, much of the communications infrastructure that survived Irene would more than likely have been blown away. That would have been the proverbial "when all else fails" scenario and ham radio communications personnel would be out there right now helping in relief operations and damage assessment as has been the case almost since the day that the service first began.

>From the newsroom in Los Angeles, I'm Bill Pasternak , WA6ITF, reporting for the Amateur Radio Newsline.

--

More on ham radio and hurricane Irene as details are made available. (ARNewsline(tm) from various sources. Thanks to K3VR for providing off-air audio.)

COMMEMORATING 911: TWO MORE CLUBS ANNOUNCE COMMEMORATIVE OPERATIONS

Two more amateur radio groups have announced 911 commemorative operations. The Pentagon Amateur Radio Club whose call is K4AF says that it will be operational on Saturday, September 10th and Sunday September 11th to honor all those lost on September 11, 200. This, with a special remembrance of the 184 people who lost their lives at the Pentagon and on board American Airlines Flight 77. Further information including QSL routing will be posted at www.k4af.org during the event.

And the Northeast Wireless Radio Club will take to the airwaves on Sunday, September 1700 to 2300 UTC using the call N2WC. This commemorative operation will be in the High Frequency General class bands on CW, SSB phone and several digital modes. No specific list of operating times or precise frequencies is known as we go to air.

Already announced are groups in Pennsylvania, Nebraska and New York City that are planning on-the-air commemorative operations. These are listed on our website at www.arnewsline.org. (Via e-mail)

ENFORCEMENT: HAMS AND TWO NATIONS PTT SUCCESSFUL IN REMOVING CODAR FROM 24 MHz BAND

The Codar High Frequency Radar operating on on 24920 to 25080 kHz from Northern Italy has gone off the air. This, thanks to a concerted effort by individual hams and members of various European Intruder Watch operations.

A release by IARU Region 1 Intruder Watch Coordinator DK2OM specifically singles out DJ9KR, G4BOH and 9A5W for their assistance. It also thanks the British telecommunications regulator Ofcom and the German P-T-T for their direction finding assistance and other help.

DK2OM says that he and his group will keep an ear on this spectrum in the hope that the CODAR signal will not return. He calls the entire operation to rid the band of CODAR to be a further example for an effective cooperation. (IARU R-1)

**

ENFORCEMENT: SOCAL UNLICENSED BROADCASTER ISSUED NOTICE OF UNLICENSED OPERATION IN THE AM BROADCAST BAND

The Los Angeles FCC Office has issued a Notice of Unlicensed Operation to Willie Walton, of Santa Clarita, California. This for his alleged operation of an unlicensed transmitter in the A.M. broadcast band. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the details:

--

According to a release from the FCC, it received information that an unlicensed broadcast radio station on 1610 kHz was allegedly operating in the Los Angeles suburban community of Santa Clarita, California. On August 11th, agents from the Los Angeles office confirmed by direction finding techniques that radio signals were emanating from one Willie Walton's residence.

The Notice of Unlicensed Operation stated that Commission's records show that no license was issued for operation of a broadcast station on 1610 kHz at Willie Walton's location. The notice then went on to warn Walton that operation of radio transmitting equipment without a valid radio station authorization constitutes a violation of the Federal laws and could subject the operator to severe penalties. This includes confiscation of the transmission equipment, substantial monetary forfeitures, and even criminal sanctions including imprisonment.

Walton was told that he must cease the alleged unlicensed operations immediately. He was also given ten days from the release of the Notice of Unlicensed Operation to respond to it and instructed that he must also supplement his response to the on-scene notice issued to him on August 11th with any evidence that that shows he has the authority to operate granted by the FCC. Lastly the Notice of Unlicensed Operation stated that the Commission's staff will use all relevant material information before it, including that provided by Walton to determine what, if any, enforcement action is required to ensure his compliance with FCC's rules.

You can read the full FCC action in this matter on-line at tinyurl.com/scv-unlicensed.

For the Amateur Radio Newsline, I', Bruce Tennant, K6PZW, in Los Angeles.

--

And before you ask: Yes, Santa Clarita is the home of Amateur Radio Newsline but until now we never knew an unlicensed broadcast station was operating less than 5 miles from our studio location. Obviously,

one never knows where these unlicensed broadcasters will show up. (FCC)

RADIO LAW: 700 MHZ "4G" USE IN THE U.S./MEXICAN BORDER ZONE

The U.S. Department of State has posted a news item entitled, "Amendment to the U.S-Mexico Bilateral Agreement for the 700 MHz Band to Allow for the Timely Deployment of Fourth Generation Wireless Broadband Service."

The news release says that on July 28th, 2011, the FCC and the Mexican Ministry of Communications and Transportation concluded an exchange of letters to amend the 2006 Protocol for the 698 to 806 MHz band This, to increase the power limitations and facilitate increases in parameters when counterpart operators across the border from each other do not exist.

The release says that the changes were necessary to accommodate the advanced technologies employed for 4th Generation wireless broadband service. The amendment became effective this past July 28th. It applies to both sides of the entire common border area with more on the agreement posted in the at www.state.gov/e/eeb/cip/ (CGC)

PUBLIC SERVICE: HAMS NEEDED AT BOSTON'S JIMMY FUND WALK

Steve Schwarm, W3EVE, in Boston says that hams are needed for the Sunday, September 18th for that city's Jimmy Fund Walk. Amateur radio operators who volunteer will be assigned duties on transport busses and at first aid stations. Deployment times run from 5 AM to 7 PM Eastern time and Steve notes that there are still some half day assignments for the morning.

All communications will take place 2 meter FM. An HT with a good antenna and extra batteries is what is needed for those assigned to the First Aid Stations. A mobile antenna is needed for the buses.

Drop an e-mail to w3eve at arrl dot net if you can help. Please be sure to put the words Jimmy Fund in the subject. (W3EVE)

NAMES IN THE NEWS: MR. AUDIO TO SPEAK AT THE UK NATIONAL HAMFEST

Some names in the news. The Radio Society of Great Britain says that ham radio's legendary Mr. Audio, Bob Heil, K9EID, will be attending the U-K's National Hamfest. There, he will be demonstrating his new Genesis and Elite microphones and providing one of his always well received lecture presentations.

The press release says that not only does K9EID make communications headsets but he was the person who brought proper sound reinforcement to many rock bands for stadium concerts as far back as the 1960's. It notes that K9EID is also the inventor of the famed 'Heil Talk Box' used by performer Peter Frampton on the song "Show Me The Way." (National Hamfest PRO)

NAMES IN THE NEWS: ZL3TY RECEIVES 2 METER DXCC NUMBER 69

Bob McQuarrie, ZL3TY, of Greymouth, New Zealand reports over the Zed-L VHF Contest Reflector that he is now the proud recipient of 2 meter DXCC certificate number 69.

ZL3TY notes that all but one of the QSOs was made by moonbounce. The lone exception was a meteor scatter QSO with VK0MT. Also that all but a few were made using WSJT digital mode. He says that WSJT has revolutionized VHF DXing and made EME possible for small stations such as his.

The certificate Bob received from the ARRL was dated June 22nd. What makes this rather special is that it's believed to be a first for New Zealand, for Oceania and possibly the entire Southern Hemisphere. (NZART)

THE CHANGING OF THE GUARD: NOTED BROADCAST ENGINEER EARL ARBUCKLE, K6EFA - S.K.

We have said this before and sadly we must say it once again. The changing of the guard in ham radio continues with word of the sudden passing of noted broadcast engineer Earl F. Arbuckle III, K6EFA, of Secaucus, New Jersey. According to a note from Kent Peterson, KC0DGY, in the early morning hours of Monday, August 29th, K6EFA was taking the trash out but failed to return. Shortly thereafter his wife found him face down on their driveway. While there is no medical confirmation yet, a heart attack is believed to be a possibility.

At the time of his passing, Earl Arbuckle was the Vice President of Engineering for Fox Television Stations group. This is the owned-and-operated stations division of Fox Entertainment Group, which is a part of the News Corporation. His responsibilities included strategic planning and execution of new technologies for the stations in the group. Under his direction, all Fox owned stations were converted to digital transmission and most also upgraded to high-definition studio news production. Just prior to his passing, Earl Arbuckle had worked through the weekend of August 27th and 28th on hurricane Irene contingencies for the Fox owned stations in New York City, Washington DC, Philadelphia, Pennsylvania and Boston, Massachusetts.

Prior to 1996, K6EFA had been employed for 18 years by Tribune Broadcasting. 16 of these were spent at New York City's WPIX and 2 years as corporate engineering manager. He joined News Corporation in 1996 as Vice President of Engineering for American Sky Broadcasting where he was part of the core team that designed and built the huge Arizona digital broadcast center, later sold to EchoStar. In late 1997 he moved to the Fox Television Station Group where he began the digital transition. There he launched the first three Fox Television digital stations in 1998, and completed the remaining stations ahead of FCC deadlines.

Earl Arbuckle was a veteran of the US Navy, reaching the rank of Lieutenant. He was a registered Professional Engineer in the State of

New Jersey, an adjunct professor at Ramapo College of New Jersey as well as Chairman of the Mahwah Township Planning Board. He was also a Senior Member of the Institute of Electrical and Electronics Engineers and a member of the Society of Broadcast Engineers.

A native of southern California, Earl Arbuckle, K6EFA, held a Bachelor of Science degree in Engineering from the University of California at Irvine. He is survived by his wife Pat, his daughter Jennifer and his parents. At airtime memorial services were pending. (KC0DGY, others)

HAM RADIO IN SPACE: NEXT CREW LAUNCH TO ISS MAY BE DELAYED

News reports on Friday, August 26th say that Russia may delay the next manned launch for the International Space Station. This, after an unmanned space vessel crashed into Siberia instead of reaching orbit to rendezvous with the ISS.

Interfax-AVN, the specialist military arm of the Interfax news agency, quoted a source in the rocket and space industry as saying that the planned September 22nd launch could be delayed. Hiis, to give engineering teams time to work out the precise cause of the crash of the Progress cargo vehicle. The Soyuz-FG booster that is due to take the astronauts into space uses the same third stage motor in the Soyuz-U rocket which failed to put the Progress spacecraft into orbit.

The planned return to Earth from the ISS of two Russians and an American astronaut on September 8th may also be delayed. One

possibility is to delay the landing from September 8th to September 22nd and the blast-off the Soyuz-FG from September 22nd to October 6th.

Current ISS residents Russians Andrei Borisenko, RW7LFG, Alexander Samokutyaev and American Ron Garan, KF5GPO had been due to return to Earth on a Soyuz TMA-21 capsule on September 8. Russians Anton Shkaplerov and Anatoly Ivanishin and American Dan Burbank were then due to fly to the ISS on a Soyuz TMA-22 capsule on September 22. (Published news reports)

THAT FINAL ITEM: DANCING WITH THE STARS JUDGE VISITS HAM RADIO CLUB IN IRELAND TO LEARN ABOUT THE MORSE CODE

Dancing With the Stars judge Len Goodman has paid a visit to Lisburn in Northern Ireland to learn about Morse Code. This for a new BBC documentary to be released in the spring of 2012. Amateur Radio Newsline's Norm Seeley, KI7UP, is here with the details:

--

Len Goodman is well known for his appearances on the hit United States television competition series Dancing With the Stars and it's British counterpart known as Strictly Come Dancing. Now comes word that Goodman is in the midst of filming the three part video documentary for the British Broadcasting Corporation titled "Titanic and Me." The purpose of the new serirs is to commemorate the 100th anniversary of the sinking of the then newly minted luxury ocean liner.

For the sake of accuracy, Goodman wanted to learn about the Morse Code and how the radio operators on the Titanic may have use of it to summon help. So he turned to the Lagan Valley Amateur Radio Society, which is based just outside the town of Lisburn, Ireland and club member Jim Henry, GI0DVU. This, to teach him about the Morse code and how the radio operators on board the Titanic might have used it as the disaster unfolded.

At the time it went down, the Titanic was the worlds largest passenger liner. It sank on April 15th, 1912 while on its maiden voyage from Southampton, England, to New York City, after hitting an iceberg in the North Sea. 1,517 of its passengers and crew were lost.

The documentary that Goodman is a part of is expected to reach television screens in the United Kingdom in April of 2012. After that there's a likely chance for it to show up on an educational or adventure television network here in the United States.

For the Amateur Radio Newsline, I'm Norm Seeley, in hot and dry Scottsdale, Arizona.

--

The complete story on ham radios involvement in the three part BBC documentary series is on-line at tinyurl.com/titanic-tv. (Ulster Star, KL2A via Facebook)

you must be talking about kb9rqz:

Who is Mark Morgan, KB9RQZ?
Mark C. Morgan of 17366 North River Road, Tapiola, Michigan describes himself as a "kinky bisexual, into bondage, domination, and sado-masochism." As indicated in the CCRAA club newsletter, Morgan was impeached by members of the CCRAA radio club, in the summer of 2008. His impeachment was partly a result of the fact that he falsely accused seven men of child pandering and partly due to the fact that his actions brought disrepute onto the club.

Mark Morgan is under investigation for identity theft related to the unauthorized use of another man's name and email address. Information related to the incident was posted on the website on February 13 at 1:15 AM. Morgan has continuously posted false and defamatory information about various individuals for a number of years.

On February 13, it was also reported that nine (9) accounts used by Morgan to flood multiple newsgroups with annoyance messages had been removed for terms of service (TOS) violations.

Amazingly, after falsely reporting an individual for child sex pandering last year, Mark Morgan has now stolen the email address of the same FCC licensee, and, as of 10 AM eastern time on 2/13/09, Morgan had already posted 308 fraudulent messages. Here is a link to the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and Law enforcement agencies in Michigan have been notified about this latest act of fraud perpetrated by Mark Morgan.

During the period prior to Morgan being impeached by the CCRAA radio club, the turbulence resulting from Morgan's fraud, malicious acts, and false accusations were acknowledged by club members to have cast a bad light on the organization. According to the club leadership: When Morgan began posting statements about the club on his private blog, leading to the possibility of the club being involved in a nasty civil suit, club members realized their mistake in electing him. After a short tenure as a club officer, Morgan was impeached by a margin of 11:1. Morgan's own vote was the only vote in his favor.

Like his friend Karol Madera, Morgan has a long history of involvement with the police, and the mental health industry. Law enforcement officials in Michigan have stated that Morgan was transported for psychiatric examination in 2004, to a hospital in Marquette, Michigan, under supervision of Sheriff's Deputies.

Morgan calls himself an ally of Karol Madera, VE7KFM.

In collusion with Madera, Morgan made malicious and false reports of child pandering to child protective service agencies, against 7 different men, in 7 different states.

Morgan was banned from qrz.com and hamisland.com for posting defamation about various individuals. Morgan has admitted he uses Google services (blogspot) to manage at least 3 defamatory blogs, using material fabricated by Karol Madera.

Morgan creates multiple identities, enabling him to flood the usenet service with thousands of nonsensical messages, in retaliation against those who have revealed his many lies and fabrications over the past 10 years. At last count, Morgan had posted well over 200,000 meaningless posts, using just a few of these multiple identities. Morgan admits he has rendered the service useless, citing "self defense." The removal of one of the many identities used by KB9RQZ on usenet is a victory in the effort to reduce the incessant flood of posts made by Morgan in an effort to deny others the ability to enjoy the usenet service.

Quotable Quotes ~ by Mark Morgan, KB9RQZ

On reporting 7 men for child sex crimes:

"likewise you can prove I made a charge , you can't prove it was flase and malicious you would have to prove that I did not suspect you, indeed if I am mental ill as you suggest in post 2 then your task becomes even harder, since if I am nuts who knows what I believe"

"if you try and stop me either nothing will happen , or I will never even notice the effort or if you manage to inconvence my exercise of my rights I will look into what price I can extract from you."

"you also provoked mater by insisting your had the right to control who responded to your posts in RRAP"

"I made no flase report to CPS (child protective services) indeed you don't what a fasle report is it seems since I did and do and in fact I am more convinced than ever that you are likely the offer of the note claimignt o be willing to rent me the sexual service of that 9 yo but in any event I started nothing with you YOU started thing remeber you insisted I hated Ham radio because I said its response to Katrina could be imporved"

"when you atack me you invite response the only question is wether you have the gut to allow the reponse"

KB9RQZ, on shooting a teenaged boy (according to Houghton County Sheriff's Department, it never happened)

"at about 6:35 this morning I was awakened not by the expected return of my wife form the renfaire but the sound of motors. the motors belong to an ATV that had managed to get a rope onto my tower (30 foot wooden structure and was puling the tower down. O got sever round with the shotgun did not score a good hit but but the cops found blood on the treea dn the trails lead back to n rover river road after a bit where it stop and free tire marks (looks like one of the pickups that carry atv's around here).

the rope parted and no real damage to the anttenas was done although my masting needs work to make it stable again. have had loads of fun with the cops over the matter. I wonder what poor kid (I could see he was not more than say 16 ish) the nutjobs conned into making the attack and with what lie. sad realy."

February 2009 ~ Yet Another KB9RQZ Identity Banned from Google Groups

Another of the email adresses (kb9rqz@yahoo.com) used by Mark Morgan of Chassell, MI to flood usenet with thousands of nonsensical, useless messages, has been banned by Google groups for numerous violations of Google's terms of use, which include efforts to defame, abuse, harass, stalk, threaten or otherwise violate the legal rights (such as rights of privacy and publicity) of others; posting inappropriate, defamatory, infringing, obscene, or unlawful Content, and; restricting and inhibiting other users from using and enjoying the Service, through repeated flooding, spamming, and changing of thread titles.

The following is a repost about Morgan, made on Daniel Jeswald's blog, attributed to Steven Robeson:

Mark Morgan, KB9RQZ, is a very disturbed, admittedly deviant, and dishonest person who has been harrassing Amateur Radio operators and disrupting radio, and other forums, since at least 1997.

As part of his on-going fusillade, he has, at various times, insisted that he's a "colonel" in the US Army "chemical corps," further insisting that he's been "drafted," and further insisting that he was not allowed to "resign."

Never mind that he was only 8 years old when the draft was stopped in the 70's! He's since recanted the "Colonel" claim, saying he was only a Lieutenant, then claiming he was only a Sergeant at discharge -- under another name that the CIA knows about -- and approved.

Oh, and he was kicked out of the service due to his "nerves" according to Mr. Morgan. However, the HCSD and MSP both have him on record as being transported to Marquette General Hospital in 2004, due to "involuntary commitment for psychiatric evaluation."

Mr. Morgan has perpetuated a smear campaign against other members of various forums, going as far as post-editing comments, forging posts,

and even trying to make "complaints" to the Civil Air Patrol Inspector General Corps and the FCC, etc., about perceived slights that have nothing to do with CAP or anything with any bearing on reality.

Recently, Morgan reported 7 different men to Child Protective Services in 7 different states. All this, because he has allied himself with yet another lunatic in Canada, known as Karol Madera, VE7KFM, who is as bad, or worse, than Mark Morgan.

This behavior is nothing more than an attempt by Morgan to "silence" those who would expose his foolishness and who refuse to tolerate his dishonesty in public forums.

Mr. Morgan has admitted to various acts of perversion and deceit, going as far as bragging about his use of lying, and his belief that deceit should be proactively taught to children as part of their upbringing. He describes himself as a kinky, bisexual, rabbi, who is into bondage, domination, and sado-masochism. He's been banned from almost every polite radio forum on the internet, but he still spams usenet groups, nearly every day, with nonsensical messages and libel.

Mr. Morgan has even gone as far as to create multiple screen names with which to spam usenet and other forums, including one screen name that invokes the name of my deceased daughter in order to perpetuate his demented "point of view".

Be aware. Be informed. Mark C. Morgan is NOT a person of reputable character, nor does he have an honest nature. In fact, not only was he transported to Marquette General Hospital for psychiatric evaluation and treatment in 2004, but he has a long history of similar treatment and harassment of others by various devious and underhanded means.

Mark Morgan has been investigated for the abuse of his elderly father, and for making false sos calls, as recently as December, 2008. There have even been rumors that Mark Morgan stole money from his elderly father, in order to move to Michigan, to avoid prosecution there, for crimes that have not been published, yet.

This summer (2008) Mr. Morgan was voted out of the CCRAA amateur radio club by a vote of 11:1. He was ejected from that club and banned from the websites qrz.com and ham island.net. Reports of dishonesty, slander, libel, and theft, follow Mark Morgan around the internet, like the stench from the local dump.

Here is a link to one of the screen names used to flood forums with unwanted posts and garbage of the type I previously mentioned. And here is another from IP addresses at Hughes satellite services, the latest IP addresses being 69.19.14.28 and 69.19.113.131

In summary, beware of Mark C. Morgan of 17366 North River Road, Tapiola, Michigan. Do not hesitate to contact Houghton County Sheriff's Department if he begins stalking you, or your family. Unfortunately, I have first hand experience with his stalking and

harassment.

Mark Christopher Morgan can be reached for comment at kb9rqz@hughes.net or by phone at 906-523-4520 or via his postal address at Mark C. Morgan 17366 North River Road, Tapiola, Michigan 49931

cy

2> you must be talking about kb9rqz:

2> Who is Mark Morgan, KB9RQZ?
2> Mark C. Morgan of 17366 North River Road, Tapiola, Michigan
describes
2> himself as a "kinky bisexual, into bondage, domination, and sado-
2> masochism." As indicated in the CCRAA club newsletter, Morgan was
2> impeached by members of the CCRAA radio club, in the summer of
2008.
2> His impeachment was partly a result of the fact that he falsely
2> accused seven men of child pandering and partly due to the fact
that
2> his actions brought disrepute onto the club.

2> Mark Morgan is under investigation for identity theft related to
the
2> unauthorized use of another man's name and email address.
Information
2> related to the incident was posted on the website on February 13 at
2> 1:15 AM. Morgan has continuously posted false and defamatory
2> information about various individuals for a number of years.

2> On February 13, it was also reported that nine (9) accounts used by
2> Morgan to flood multiple newsgroups with annoyance messages had
been
2> removed for terms of service (TOS) violations.

2> Amazingly, after falsely reporting an individual for child sex
2> pandering last year, Mark Morgan has now stolen the email address
of
2> the same FCC licensee, and, as of 10 AM eastern time on 2/13/09,
2> Morgan had already posted 308 fraudulent messages. Here is a link
to
2> the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and
Law
2> enforcement agencies in Michigan have been notified about this

latest
2> act of fraud perpetrated by Mark Morgan.

2> During the period prior to Morgan being impeached by the CCRAA
radio
2> club, the turbulence resulting from Morgan's fraud, malicious acts,
2> and false accusations were acknowledged by club members to have
cast a
2> bad light on the organization. According to the club leadership:
When
2> Morgan began posting statements about the club on his private blog,
2> leading to the possibility of the club being involved in a nasty
civil
2> suit, club members realized their mistake in electing him. After a
2> short tenure as a club officer, Morgan was impeached by a margin of
2> 11:1. Morgan's own vote was the only vote in his favor.

2> Like his friend Karol Madera, Morgan has a long history of
involvement
2> with the police, and the mental health industry. Law enforcement
2> officials in Michigan have stated that Morgan was transported for
2> psychiatric examination in 2004, to a hospital in Marquette,
Michigan,
2> under supervision of Sheriff's Deputies.

2> Morgan calls himself an ally of Karol Madera, VE7KFM.

2> In collusion with Madera, Morgan made malicious and false reports
of
2> child pandering to child protective service agencies, against 7
2> different men, in 7 different states.

2> Morgan was banned from qrz.com and hamisland.com for posting
2> defamation about various individuals. Morgan has admitted he uses
2> Google services (blogspot) to manage at least 3 defamatory blogs,
2> using material fabricated by Karol Madera.

2> Morgan creates multiple identities, enabling him to flood the
usenet
2> service with thousands of nonsensical messages, in retaliation
against
2> those who have revealed his many lies and fabrications over the
past
2> 10 years. At last count, Morgan had posted well over 200,000
2> meaningless posts, using just a few of these multiple identities.
2> Morgan admits he has rendered the service useless, citing "self
2> defense." The removal of one of the many identities used by KB9RQZ
on
2> usenet is a victory in the effort to reduce the incessant flood of
2> posts made by Morgan in an effort to deny others the ability to
enjoy
2> the usenet service.

What does your radio-related posting have to do with
alt.slack or comp.os.os2.advocacy, Lepew?

WHO IS JESUS?

Without a doubt, you have often heard the claim that Jesus is God, the second person in the "Holy trinity." However, the very Bible which is used as a basis for knowledge about Jesus and as the basis for doctrine within Christianity clearly belies this claim. We urge you to consult your own Bible and verify that the following conclusions are not drawn out of context:

1. God is All Knowing.....but Jesus was not
When speaking of the day of judgment, Jesus clearly gave evidence of a limitation on his knowledge when he said, "but of that day and hour knoweth no man, no, not the angels which are in Heaven, neither the son, but the Father." Mark 13:32 , and Matt 24:36. But God knows all. His knowledge is without any limitations. That Jesus, of his own admission, did not know when the day of judgment would be, is clear proof that Jesus is not all-knowing, and that Jesus is therefore not God.

2. God is All Powerful.....but Jesus was not
While Jesus performed many miracles, he himself admitted that the power he had was not his own but was derived from God when he said, "Verily, verily I say unto you, the Son can do nothing of himself, but what he seeth the Father do..." St. John 5:19. Again he said, "I can of mine own self do nothing: as I hear I judge: and my judgment is just; because I seek not mine own will, but the will of the Father which hath sent me." St. John 5:30. But God is not only all-powerful, He is also the source of all power and authority. That Jesus, of his own admission, could do nothing on his own is clear proof that Jesus is not all-powerful, and that therefore Jesus is not God.

3. God does not have a God.....but Jesus did have a God.
God is the ultimate judge and refuge for all, and He does not call upon nor pray to any others. But Jesus acknowledged that there was one whom he worshipped and to whom he prayed when he said, "l ascend unto my Father and your Father, and to my God and your God." St. John 20:17. He is also reported to have cried out while on the cross, "My God, my God why hast thou forsaken me?" Matt 27:46. If Jesus were God, then couldn't this be read, "Myself, myself why hast thou forsaken me?" Would that not be pure nonsense? When Jesus prayed the Lord's prayer (Luke 11:2-4), was he praying to ! himself? When in the garden of Gethsemane he prayed, "O my Father, if it be possible, let this cup pass from me: Nevertheless not as I will but as thou wilt." Matt 26:36-39. Was Jesus praying to himself? That Jesus, of his own admission and by his own actions, acknowledged, worshipped, and prayed

to another being as God is clear proof that Jesus himself is not God.

4. God is an invisible spirit.....but Jesus was flesh and blood
While thousands saw Jesus and heard his voice, Jesus himself said that this could not be done with God when he said. "No man hath seen God at any time." St. John 1:18. '"Ye have neith! er heard His voice at any time nor seen His shape." < st1:place>St. John 5:37. He also said in St. John 4:24. "God is a spirit and they that worship him must worship him in spirit and in truth." That Jesus would say that no one had seen or heard God at any time, while his followers both saw and heard him, is clear proof that Jesus was not God.

5. No one is greater than God and no one can direct Him but Jesus acknowledged someone greater than himself whose will was distinct from his own.
Perhaps the clearest indication we have that Jesus and God are not equal, and therefore not one and the same, come again from the mouth of Jesus himself who said in St. John 14:28, "My Father is greater than I." When someone referred to him as good master in Matt 19:17 , Jesus responded, "Why callest thou me good? There is none good but one, that is God..." Furthermore, Jesus drew clear distinctions between himself and God when he said, "I proceeded forth and came from God, neither came I of myself but He sent me." St. John 8:42. Jesus gave clear evidence of his subordination to God, rather than his equality with God, when he said in Luke 22:42 , "not my will but thine be done" and in St. John 5:30 , ! "I seek not mine own will but the will of the Father which hath sent m e." That Jesus would admit that he did not come into the world on his own initiative but was directed to do so, that he would acknowledge another being as greater than himself, and that he would negate his own will in deference to affirming the will of another, give clear proof that Jesus is not the Supreme One and therefore Jesus is not God.

Conclusion
The Church recognizes the Bible as the primary source of knowledge about God and Jesus. But since the Bible makes it clear that Jesus is not the Supreme Being and the Supreme Being is not Jesus, upon what basis have you come to believe otherwise?

My brother or sister, the belief that the Supreme Being is a Trinity is false and completely inconsistent with the words of Jesus as presented in the Bible. God is one, not three. He is a perfect unity.

If you are interested in the truth about God and your relationship to Him, we invite you to investigate the religion of Islam.

What is the word of God about Jesus:

A. Regarding Sonship of Jesus:
That is Jesus, son of Mary, in word of truth, concerning which they are doubting. It is not for God to take a son unto Him. Glory be to Him! When He decrees a thing he but says to it "Be", and it is.

(Qur'an 19:34,35).

And they say, 'The All-merciful has taken unto Himself a son.' You have indeed advanced something hideous. The heavens are well nigh rent of it and the earth split asunder, and the mountains well nigh fall down crashing for that they have attributed to the All-Merciful a son; and it behoves not the All-Merciful to take a son. None is there in the heavens and earth but comes to the All-Merciful as a servant (Qur'an 19:88-93).

Truly the likeness of Jesus, in God's sight, is as Adam's likeness; He created him of dust, then said He unto him, "Be", and he was. (Qur'an 3:59).

People ! of the Book, go not beyond the bounds in your religion, and say not as to God but the Truth. The Messiah, Jesus, son of Mary, was only the Messenger of God, and His Word that He committed to Mary, and a spirit from Him. So believe in God and His Messengers. and say not, 'Three', Refrain, better is it for you. God is only One God. Glory be on Him - that He should have a son! To Him belongs that which is in the heavens and on the earth, God suffices for a guardian. (Qur'an 4:171)

B. Regarding Jesus being God:
And when God said. 'O Jesus son of Mary,did you say unto men, "Take me and my mother as gods, apart from God?" He Said, 'To You be Glory! It is not mine to say what I have no right to. If I indeed said it, You knew it, knowing what is within my soul, and I do not know what is within Your soul; You know the things unseen. I only said to them what You did command me: "Serve God, my Lord and your Lord." And I was a witness over them, while I remained among them; but when You did take me to Yourself the Watcher over them; You ar! e the witness of everything. (Quran 5:116,117)

C. Regarding Crucifiction of Jesus:
And for their unbelief, and their uttering against Mary a mighty calumny, and for their saying, 'We slew the Messiah, Jesus son of Mary, the Messenger of God'...yet they did not slay him, neither crucified him, only a likeness of that was shown to them. Those who are at variance concerning him surely are in doubt regarding him, they have no knowledge of him, except the following of surmise; and they did not slay him of certainty... no indeed, God raised him up to Him; God is Almighty, All-Wise. There is not one of the people of the Book but will assuredly believe in him before his death, and on the Resurrection Day he will be a witness against them. (Qur'an 4:156-159)

you must be talking about kb9rqz:

Who is Mark Morgan, KB9RQZ?
Mark C. Morgan of 17366 North River Road, Tapiola, Michigan describes himself as a "kinky bisexual, into bondage, domination, and sado-masochism." As indicated in the CCRAA club newsletter, Morgan was impeached by members of the CCRAA radio club, in the summer of 2008. His impeachment was partly a result of the fact that he falsely accused seven men of child pandering and partly due to the fact that his actions brought disrepute onto the club.

Mark Morgan is under investigation for identity theft related to the unauthorized use of another man's name and email address. Information related to the incident was posted on the website on February 13 at 1:15 AM. Morgan has continuously posted false and defamatory information about various individuals for a number of years.

On February 13, it was also reported that nine (9) accounts used by Morgan to flood multiple newsgroups with annoyance messages had been removed for terms of service (TOS) violations.

Amazingly, after falsely reporting an individual for child sex pandering last year, Mark Morgan has now stolen the email address of the same FCC licensee, and, as of 10 AM eastern time on 2/13/09, Morgan had already posted 308 fraudulent messages. Here is a link to the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and Law enforcement agencies in Michigan have been notified about this latest act of fraud perpetrated by Mark Morgan.

During the period prior to Morgan being impeached by the CCRAA radio club, the turbulence resulting from Morgan's fraud, malicious acts, and false accusations were acknowledged by club members to have cast a bad light on the organization. According to the club leadership: When Morgan began posting statements about the club on his private blog, leading to the possibility of the club being involved in a nasty civil suit, club members realized their mistake in electing him. After a

short tenure as a club officer, Morgan was impeached by a margin of 11:1. Morgan's own vote was the only vote in his favor.

Like his friend Karol Madera, Morgan has a long history of involvement with the police, and the mental health industry. Law enforcement officials in Michigan have stated that Morgan was transported for psychiatric examination in 2004, to a hospital in Marquette, Michigan, under supervision of Sheriff's Deputies.

Morgan calls himself an ally of Karol Madera, VE7KFM.

In collusion with Madera, Morgan made malicious and false reports of child pandering to child protective service agencies, against 7 different men, in 7 different states.

Morgan was banned from qrz.com and hamisland.com for posting defamation about various individuals. Morgan has admitted he uses Google services (blogspot) to manage at least 3 defamatory blogs, using material fabricated by Karol Madera.

Morgan creates multiple identities, enabling him to flood the usenet service with thousands of nonsensical messages, in retaliation against those who have revealed his many lies and fabrications over the past 10 years. At last count, Morgan had posted well over 200,000 meaningless posts, using just a few of these multiple identities. Morgan admits he has rendered the service useless, citing "self defense." The removal of one of the many identities used by KB9RQZ on usenet is a victory in the effort to reduce the incessant flood of posts made by Morgan in an effort to deny others the ability to enjoy the usenet service.

Quotable Quotes ~ by Mark Morgan, KB9RQZ

On reporting 7 men for child sex crimes:

"likewise you can prove I made a charge , you can't prove it was flase and malicious you would have to prove that I did not suspect you, indeed if I am mental ill as you suggest in post 2 then your task becomes even harder, since if I am nuts who knows what I believe"

"if you try and stop me either nothing will happen , or I will never even notice the effort or if you manage to inconvence my exercise of my rights I will look into what price I can extract from you."

"you also provoked mater by insisting your had the right to control who responded to your posts in RRAP"

"I made no flase report to CPS (child protective services) indeed you don't what a fasle report is it seems since I did and do and in fact I am more convinced than ever that you are likely the offer of the note claimignt o be willing to rent me the sexual service of that 9 yo but in any event I started nothing with you YOU started thing remeber you insisted I hated Ham radio because I said its response to Katrina could be imporved"

"when you atack me you invite response the only question is wether you have the gut to allow the reponse"

KB9RQZ, on shooting a teenaged boy (according to Houghton County Sheriff's Department, it never happened)

"at about 6:35 this morning I was awakened not by the expected return of my wife form the renfaire but the sound of motors. the motors belong to an ATV that had managed to get a rope onto my tower (30 foot wooden structure and was puling the tower down. O got sever round with the shotgun did not score a good hit but but the cops found blood on the treea dn the trails lead back to n rover river road after a bit where it stop and free tire marks (looks like one of the pickups that carry atv's around here).

the rope parted and no real damage to the anttenas was done although my masting needs work to make it stable again. have had loads of fun with the cops over the matter. I wonder what poor kid (I could see he was not more than say 16 ish) the nutjobs conned into making the attack and with what lie. sad realy."

February 2009 ~ Yet Another KB9RQZ Identity Banned from Google Groups

Another of the email adresses (kb9rqz@yahoo.com) used by Mark Morgan of Chassell, MI to flood usenet with thousands of nonsensical, useless messages, has been banned by Google groups for numerous violations of Google's terms of use, which include efforts to defame, abuse, harass, stalk, threaten or otherwise violate the legal rights (such as rights of privacy and publicity) of others; posting inappropriate, defamatory, infringing, obscene, or unlawful Content, and; restricting and inhibiting other users from using and enjoying the Service, through repeated flooding, spamming, and changing of thread titles.

The following is a repost about Morgan, made on Daniel Jeswald's blog, attributed to Steven Robeson:

Mark Morgan, KB9RQZ, is a very disturbed, admittedly deviant, and dishonest person who has been harrassing Amateur Radio operators and disrupting radio, and other forums, since at least 1997.

As part of his on-going fusillade, he has, at various times, insisted that he's a "colonel" in the US Army "chemical corps," further insisting that he's been "drafted," and further insisting that he was not allowed to "resign."

Never mind that he was only 8 years old when the draft was stopped in the 70's! He's since recanted the "Colonel" claim, saying he was only a Lieutenant, then claiming he was only a Sergeant at discharge -- under another name that the CIA knows about -- and approved.

Oh, and he was kicked out of the service due to his "nerves" according to Mr. Morgan. However, the HCSD and MSP both have him on record as being transported to Marquette General Hospital in 2004, due to "involuntary commitment for psychiatric evaluation."

Mr. Morgan has perpetuated a smear campaign against other members of various forums, going as far as post-editing comments, forging posts, and even trying to make "complaints" to the Civil Air Patrol Inspector General Corps and the FCC, etc., about perceived slights that have nothing to do with CAP or anything with any bearing on reality.

Recently, Morgan reported 7 different men to Child Protective Services in 7 different states. All this, because he has allied himself with yet another lunatic in Canada, known as Karol Madera, VE7KFM, who is as bad, or worse, than Mark Morgan.

This behavior is nothing more than an attempt by Morgan to "silence" those who would expose his foolishness and who refuse to tolerate his dishonesty in public forums.

Mr. Morgan has admitted to various acts of perversion and deceit, going as far as bragging about his use of lying, and his belief that deceit should be proactively taught to children as part of their upbringing. He describes himself as a kinky, bisexual, rabbi, who is into bondage, domination, and sado-masochism. He's been banned from almost every polite radio forum on the internet, but he still spams usenet groups, nearly every day, with nonsensical messages and libel.

Mr. Morgan has even gone as far as to create multiple screen names with which to spam usenet and other forums, including one screen name that invokes the name of my deceased daughter in order to perpetuate his demented "point of view".

Be aware. Be informed. Mark C. Morgan is NOT a person of reputable character, nor does he have an honest nature. In fact, not only was he transported to Marquette General Hospital for psychiatric evaluation and treatment in 2004, but he has a long history of similar treatment and harassment of others by various devious and underhanded means.

Mark Morgan has been investigated for the abuse of his elderly father, and for making false sos calls, as recently as December, 2008. There have even been rumors that Mark Morgan stole money from his elderly father, in order to move to Michigan, to avoid prosecution there, for crimes that have not been published, yet.

This summer (2008) Mr. Morgan was voted out of the CCRAA amateur radio club by a vote of 11:1. He was ejected from that club and banned from the websites qrz.com and ham island.net. Reports of dishonesty, slander, libel, and theft, follow Mark Morgan around the internet, like the stench from the local dump.

Here is a link to one of the screen names used to flood forums with unwanted posts and garbage of the type I previously mentioned. And here is another from IP addresses at Hughes satellite services, the latest IP addresses being 69.19.14.28 and 69.19.113.131

In summary, beware of Mark C. Morgan of 17366 North River Road, Tapiola, Michigan. Do not hesitate to contact Houghton County Sheriff's Department if he begins stalking you, or your family.

Unfortunately, I have first hand experience with his stalking and harassment.

Mark Christopher Morgan can be reached for comment at kb9rqz@hughes.net or by phone at 906-523-4520 or via his postal address at Mark C. Morgan 17366 North River Road, Tapiola, Michigan 49931

What do model trains and ham ops have in common?

Are model trains and ham gear homoerotic?

Do they like each other and hold conventions together?

Has there ever been a model train and ham radio Joke Off?

-bdn-

http://www.youtube.com/watch?v=GzvdlE45XEI

http://www.youtube.com/watch?v=NDYmfaH7VtQ

Is there a YouTube equivalent to this but for Ham Ops? If so is it like "Perverted Justice" and "To Catch a Predator", or does it just have the NBC Dateline crew and correspondent Chris Hansen holding a big mic?

-bdn-

alt.slack,rec.radio.amateur.policy,alt.usenet.kooks,rec.radio.shortwave,comp.os.os2.advoca
cy

20> you must be talking about kb9rqz:

20> Who is Mark Morgan, KB9RQZ?
20> Mark C. Morgan of 17366 North River Road, Tapiola, Michigan
describes
20> himself as a "kinky bisexual, into bondage, domination, and sado-
20> masochism." As indicated in the CCRAA club newsletter, Morgan was
20> impeached by members of the CCRAA radio club, in the summer of
2008.
20> His impeachment was partly a result of the fact that he falsely
20> accused seven men of child pandering and partly due to the fact
that
20> his actions brought disrepute onto the club.

20> Mark Morgan is under investigation for identity theft related to
the
20> unauthorized use of another man's name and email address.
Information
20> related to the incident was posted on the website on February 13
at
20> 1:15 AM. Morgan has continuously posted false and defamatory
20> information about various individuals for a number of years.

20> On February 13, it was also reported that nine (9) accounts used
by
20> Morgan to flood multiple newsgroups with annoyance messages had
been
20> removed for terms of service (TOS) violations.

20> Amazingly, after falsely reporting an individual for child sex
20> pandering last year, Mark Morgan has now stolen the email address
of
20> the same FCC licensee, and, as of 10 AM eastern time on 2/13/09,
20> Morgan had already posted 308 fraudulent messages. Here is a link
to
20> the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and

Law
20> enforcement agencies in Michigan have been notified about this
latest
20> act of fraud perpetrated by Mark Morgan.

20> During the period prior to Morgan being impeached by the CCRAA
radio
20> club, the turbulence resulting from Morgan's fraud, malicious
acts,
20> and false accusations were acknowledged by club members to have
cast a
20> bad light on the organization. According to the club leadership:
When
20> Morgan began posting statements about the club on his private
blog,
20> leading to the possibility of the club being involved in a nasty
civil
20> suit, club members realized their mistake in electing him. After a
20> short tenure as a club officer, Morgan was impeached by a margin
of
20> 11:1. Morgan's own vote was the only vote in his favor.

20> Like his friend Karol Madera, Morgan has a long history of
involvement
20> with the police, and the mental health industry. Law enforcement
20> officials in Michigan have stated that Morgan was transported for
20> psychiatric examination in 2004, to a hospital in Marquette,
Michigan,
20> under supervision of Sheriff's Deputies.

20> Morgan calls himself an ally of Karol Madera, VE7KFM.

20> In collusion with Madera, Morgan made malicious and false reports
of
20> child pandering to child protective service agencies, against 7
20> different men, in 7 different states.

20> Morgan was banned from qrz.com and hamisland.com for posting
20> defamation about various individuals. Morgan has admitted he uses
20> Google services (blogspot) to manage at least 3 defamatory blogs,
20> using material fabricated by Karol Madera.

20> Morgan creates multiple identities, enabling him to flood the
usenet
20> service with thousands of nonsensical messages, in retaliation
against
20> those who have revealed his many lies and fabrications over the
past
20> 10 years. At last count, Morgan had posted well over 200,000
20> meaningless posts, using just a few of these multiple identities.
20> Morgan admits he has rendered the service useless, citing "self
20> defense." The removal of one of the many identities used by KB9RQZ

on
20> usenet is a victory in the effort to reduce the incessant flood of
20> posts made by Morgan in an effort to deny others the ability to
enjoy
20> the usenet service.

What does your conclusion about a radio amateur have to do with
alt.slack,alt.usenet.kooks,comp.os.os2.advocacy, Hojnacki?

Who is Mark Morgan, KB9RQZ?
Mark C. Morgan of 17366 North River Road, Tapiola, Michigan describes himself as a "kinky bisexual, into bondage, domination, and sado-masochism." As indicated in the CCRAA club newsletter, Morgan was impeached by members of the CCRAA radio club, in the summer of 2008. His impeachment was partly a result of the fact that he falsely accused seven men of child pandering and partly due to the fact that his actions brought disrepute onto the club.

Mark Morgan is under investigation for identity theft related to the unauthorized use of another man's name and email address. Information

related to the incident was posted on the website on February 13 at 1:15 AM. Morgan has continuously posted false and defamatory information about various individuals for a number of years.

On February 13, it was also reported that nine (9) accounts used by Morgan to flood multiple newsgroups with annoyance messages had been removed for terms of service (TOS) violations.

Amazingly, after falsely reporting an individual for child sex pandering last year, Mark Morgan has now stolen the email address of the same FCC licensee, and, as of 10 AM eastern time on 2/13/09, Morgan had already posted 308 fraudulent messages. Here is a link to the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and Law enforcement agencies in Michigan have been notified about this latest act of fraud perpetrated by Mark Morgan.

During the period prior to Morgan being impeached by the CCRAA radio club, the turbulence resulting from Morgan's fraud, malicious acts, and false accusations were acknowledged by club members to have cast a bad light on the organization. According to the club leadership: When Morgan began posting statements about the club on his private blog, leading to the possibility of the club being involved in a nasty civil suit, club members realized their mistake in electing him. After a short tenure as a club officer, Morgan was impeached by a margin of 11:1. Morgan's own vote was the only vote in his favor.

Like his friend Karol Madera, Morgan has a long history of involvement with the police, and the mental health industry. Law enforcement officials in Michigan have stated that Morgan was transported for psychiatric examination in 2004, to a hospital in Marquette, Michigan, under supervision of Sheriff's Deputies.

Morgan calls himself an ally of Karol Madera, VE7KFM.

In collusion with Madera, Morgan made malicious and false reports of child pandering to child protective service agencies, against 7 different men, in 7 different states.

Morgan was banned from qrz.com and hamisland.com for posting defamation about various individuals. Morgan has admitted he uses Google services (blogspot) to manage at least 3 defamatory blogs, using material fabricated by Karol Madera.

Morgan creates multiple identities, enabling him to flood the usenet service with thousands of nonsensical messages, in retaliation against those who have revealed his many lies and fabrications over the past 10 years. At last count, Morgan had posted well over 200,000

meaningless posts, using just a few of these multiple identities. Morgan admits he has rendered the service useless, citing "self defense." The removal of one of the many identities used by KB9RQZ on usenet is a victory in the effort to reduce the incessant flood of posts made by Morgan in an effort to deny others the ability to enjoy the usenet service.

Quotable Quotes ~ by Mark Morgan, KB9RQZ

On reporting 7 men for child sex crimes:

"likewise you can prove I made a charge , you can't prove it was flase
and malicious you would have to prove that I did not suspect you, indeed if I am mental ill as you suggest in post 2 then your task becomes even harder, since if I am nuts who knows what I believe"

"if you try and stop me either nothing will happen , or I will never even notice the effort or if you manage to inconvence my exercise of my rights I will look into what price I can extract from you."

"you also provoked mater by insisting your had the right to control who responded to your posts in RRAP"

"I made no flase report to CPS (child protective services) indeed you don't what a fasle report is it seems since I did and do and in fact I
am more convinced than ever that you are likely the offer of the note claimignt o be willing to rent me the sexual service of that 9 yo but in any event I started nothing with you YOU started thing remeber you insisted I hated Ham radio because I said its response to Katrina could be imporved"

"when you atack me you invite response the only question is wether you
have the gut to allow the reponse"

KB9RQZ, on shooting a teenaged boy (according to Houghton County Sheriff's Department, it never happened)

"at about 6:35 this morning I was awakened not by the expected return of my wife form the renfaire but the sound of motors. the motors belong to an ATV that had managed to get a rope onto my tower (30 foot
wooden structure and was puling the tower down. O got sever round with
the shotgun did not score a good hit but but the cops found blood on the treea dn the trails lead back to n rover river road after a bit where it stop and free tire marks (looks like one of the pickups that carry atv's around here).

the rope parted and no real damage to the anttenas was done although my masting needs work to make it stable again. have had loads of fun

with the cops over the matter. I wonder what poor kid (I could see he
was not more than say 16 ish) the nutjobs conned into making the
attack and with what lie. sad realy."

February 2009 ~ Yet Another KB9RQZ Identity Banned from Google Groups

Another of the email adresses (kb9...@yahoo.com) used by Mark Morgan
of Chassell, MI to flood usenet with thousands of nonsensical, useless
messages, has been banned by Google groups for numerous violations of
Google's terms of use, which include efforts to defame, abuse, harass,
stalk, threaten or otherwise violate the legal rights (such as rights
of privacy and publicity) of others; posting inappropriate,
defamatory, infringing, obscene, or unlawful Content, and; restricting
and inhibiting other users from using and enjoying the Service,
through repeated flooding, spamming, and changing of thread titles.

The following is a repost about Morgan, made on Daniel Jeswald's blog,
attributed to Steven Robeson:

Mark Morgan, KB9RQZ, is a very disturbed, admittedly deviant, and
dishonest person who has been harrassing Amateur Radio operators and
disrupting radio, and other forums, since at least 1997.

As part of his on-going fusillade, he has, at various times, insisted
that he's a "colonel" in the US Army "chemical corps," further
insisting that he's been "drafted," and further insisting that he was
not allowed to "resign."

Never mind that he was only 8 years old when the draft was stopped in
the 70's! He's since recanted the "Colonel" claim, saying he was only
a Lieutenant, then claiming he was only a Sergeant at discharge --
under another name that the CIA knows about -- and approved.

Oh, and he was kicked out of the service due to his "nerves" according
to Mr. Morgan. However, the HCSD and MSP both have him on record as
being transported to Marquette General Hospital in 2004, due to
"involuntary commitment for psychiatric evaluation."

Mr. Morgan has perpetuated a smear campaign against other members of
various forums, going as far as post-editing comments, forging posts,
and even trying to make "complaints" to the Civil Air Patrol Inspector
General Corps and the FCC, etc., about perceived slights that have
nothing to do with CAP or anything with any bearing on reality.

Recently, Morgan reported 7 different men to Child Protective Services

in 7 different states. All this, because he has allied himself with yet another lunatic in Canada, known as Karol Madera, VE7KFM, who is as bad, or worse, than Mark Morgan.

This behavior is nothing more than an attempt by Morgan to "silence" those who would expose his foolishness and who refuse to tolerate his dishonesty in public forums.

Mr. Morgan has admitted to various acts of perversion and deceit, going as far as bragging about his use of lying, and his belief that deceit should be proactively taught to children as part of their upbringing. He describes himself as a kinky, bisexual, rabbi, who is into bondage, domination, and sado-masochism. He's been banned from almost every polite radio forum on the internet, but he still spams usenet groups, nearly every day, with nonsensical messages and libel.

Mr. Morgan has even gone as far as to create multiple screen names with which to spam usenet and other forums, including one screen name that invokes the name of my deceased daughter in order to perpetuate his demented "point of view".

Be aware. Be informed. Mark C. Morgan is NOT a person of reputable character, nor does he have an honest nature. In fact, not only was he
transported to Marquette General Hospital for psychiatric evaluation and treatment in 2004, but he has a long history of similar treatment and harassment of others by various devious and underhanded means.

Mark Morgan has been investigated for the abuse of his elderly father,
and for making false sos calls, as recently as December, 2008. There have even been rumors that Mark Morgan stole money from his elderly father, in order to move to Michigan, to avoid prosecution there, for crimes that have not been published, yet.

This summer (2008) Mr. Morgan was voted out of the CCRAA amateur radio
club by a vote of 11:1. He was ejected from that club and banned from the websites qrz.com and ham island.net. Reports of dishonesty, slander, libel, and theft, follow Mark Morgan around the internet, like the stench from the local dump.

Here is a link to one of the screen names used to flood forums with unwanted posts and garbage of the type I previously mentioned. And here is another from IP addresses at Hughes satellite services, the latest IP addresses being 69.19.14.28 and 69.19.113.131

In summary, beware of Mark C. Morgan of 17366 North River Road, Tapiola, Michigan. Do not hesitate to contact Houghton County Sheriff's Department if he begins stalking you, or your family. Unfortunately, I have first hand experience with his stalking and harassment.

Mark Christopher Morgan can be reached for comment at
kb9...@hughes.net or by phone at 906-523-4520 or via his postal
address at Mark C. Morgan 17366 North River Road, Tapiola, Michigan
49931

KC6QRO <kc6qro@rocketmail.com> writes:

1> Newsgroups:
alt.slack,rec.radio.amateur.policy,alt.usenet.kooks,comp.os.os2.advocacy

1> Who is Mark Morgan, KB9RQZ?
1> Mark C. Morgan of 17366 North River Road, Tapiola, Michigan
describes
1> himself as a "kinky bisexual, into bondage, domination, and sado-
1> masochism." As indicated in the CCRAA club newsletter, Morgan was
1> impeached by members of the CCRAA radio club, in the summer of
2008.
1> His impeachment was partly a result of the fact that he falsely
1> accused seven men of child pandering and partly due to the fact
that
1> his actions brought disrepute onto the club.

1> Mark Morgan is under investigation for identity theft related to
the
1> unauthorized use of another man's name and email address.
Information
1> related to the incident was posted on the website on February 13 at
1> 1:15 AM. Morgan has continuously posted false and defamatory
1> information about various individuals for a number of years.

1> On February 13, it was also reported that nine (9) accounts used by
1> Morgan to flood multiple newsgroups with annoyance messages had
been
1> removed for terms of service (TOS) violations.

1> Amazingly, after falsely reporting an individual for child sex
1> pandering last year, Mark Morgan has now stolen the email address
of
1> the same FCC licensee, and, as of 10 AM eastern time on 2/13/09,
1> Morgan had already posted 308 fraudulent messages. Here is a link
to
1> the fraudulent profile created by Mark Morgan, KB9RQZ. The FBI and
1> Law
1> enforcement agencies in Michigan have been notified about this
latest
1> act of fraud perpetrated by Mark Morgan.

1> During the period prior to Morgan being impeached by the CCRAA
radio

1> club, the turbulence resulting from Morgan's fraud, malicious acts,
1> and false accusations were acknowledged by club members to have
cast
1> a
1> bad light on the organization. According to the club leadership:
When
1> Morgan began posting statements about the club on his private blog,
1> leading to the possibility of the club being involved in a nasty
1> civil
1> suit, club members realized their mistake in electing him. After a
1> short tenure as a club officer, Morgan was impeached by a margin of
1> 11:1. Morgan's own vote was the only vote in his favor.

1> Like his friend Karol Madera, Morgan has a long history of
1> involvement
1> with the police, and the mental health industry. Law enforcement
1> officials in Michigan have stated that Morgan was transported for
1> psychiatric examination in 2004, to a hospital in Marquette,
1> Michigan,
1> under supervision of Sheriff's Deputies.

1> Morgan calls himself an ally of Karol Madera, VE7KFM.

1> In collusion with Madera, Morgan made malicious and false reports
of
1> child pandering to child protective service agencies, against 7
1> different men, in 7 different states.

1> Morgan was banned from qrz.com and hamisland.com for posting
1> defamation about various individuals. Morgan has admitted he uses
1> Google services (blogspot) to manage at least 3 defamatory blogs,
1> using material fabricated by Karol Madera.

1> Morgan creates multiple identities, enabling him to flood the
usenet
1> service with thousands of nonsensical messages, in retaliation
1> against
1> those who have revealed his many lies and fabrications over the
past
1> 10 years. At last count, Morgan had posted well over 200,000
1> meaningless posts, using just a few of these multiple identities.
1> Morgan admits he has rendered the service useless, citing "self
1> defense." The removal of one of the many identities used by KB9RQZ
on
1> usenet is a victory in the effort to reduce the incessant flood of
1> posts made by Morgan in an effort to deny others the ability to
enjoy
1> the usenet service.

What does any of that amateur-radio-related content have to do with
alt.slack or comp.os.os2.advocacy, KC6QRO?

Page: 192

"Next agent to evade the New Zealand police was
Christine Cabon, alias Frederique Bonlieu,
working on an American-supervised evacuation
at Pardes Hanna near Tel Aviv. According to
the Israeli police, the telegram from the
New Zealand police asking them to hold Bonlieu
for questioning by a New Zealand detective
arrived the same day, 25 July, as another
telegram from France. The French message,
which Cabon received first, told her to
return home at once because her father was
critically ill. An American student working
on the excavaton with Bonlieu said the
Frenchwoman came into her dormitory looking
pale and anxious, and announced that she
had to leave for France immediately. She
flew out of Israel the following day.

In fact, of course, her father was already
dead. The telegram was a coded message from
the DSGE warning her to leave Israel before
the New Zealand police got to her. That she
received it before the Israeli police acted
on the request from New Zealand raises a
strong possibility that they co-operated in
her escape. Given that she had worked
previously for the Israeli Secret Service,
this would not be surprising."

The "get kelp'er" is obviously a demented homosexual, most probably a screaming queen who attempts to hide it in public.

I googled kelp and find the only reference which seems fitting to the bozos insane and inane comments is the fact kelp is used for treating hemorrhoids. Since the "kelp poster" has put so much importance on kelp, you can only imagine what "dark void" his respect for kelp has come from ...

However, it must have worked for him, and still is, or it would seems unlikely that he keeps recommending it to others -- thinking they suffer the same medical problems his homosexual lifestyle has given to him ...

However, one can draw a logical and accurate conclusion about one aspect of his fondness for kelp, it doesn't work for mental illness, else we would have expected to have seen some improvement in his condition over the large expanse of time he has been afflicted.

Regards,
JS

3127. Seeking New FAQ/Intro Maintainers for rec.radio.amateur.*

Newsgroup: rec.radio.amateur.policy
Date: 2011-09-07 06:05:00 UTC
From: rram@panix.com
Message-ID: <radio/ham-radio/recruitment-1-1315375500@panix.com>
Source record: 247398
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

```
Posted-By: auto-faq 3.3.2 beta (PGPMoose V2.0, Perl 5.005)
Archive-name: radio/ham-radio/recruitment
Revision: 1.2 2009/11/25 14:41:01
Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

One significant omission, requiring immediate updates, for this article |
is that it does not mention newer amateur radio newsgroups created since |
it was written, including: |

rec.radio.amateur.antenna |
rec.radio.amateur.boatanchors |
rec.radio.amateur.dx |
rec.radio.amateur.equipment |
rec.radio.amateur.homebrew |
rec.radio.amateur.moderated |
rec.radio.amateur.space |

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:
```

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

i used to know a WA6JMO and a WA6QYQ, what do you think they were
affectionately called?

3157. Age of consent

New Zealand's Labour Party Leader: Phil Goff stated:

" What was the Israeli search and rescue team
doing in an area where it wasn't allowed to be? "

" The suspicion is that this is a cover-up to
avoid embarrassing Israel."

Additional Information In Regards To Anti-Nuclear
New Zealand And Israel (Israel Has Already Tested
Nuclear Bombs West Of South Africa) --->

In 1963 John Fitzerald Kennedy Was Embroiled In A Bitter
Secret Conflict With Israel Leader David Ben-Gurion over
Israel's Drive To The Atomic Bomb. Ben-Gurion resigned
In Disgust, Saying That Because Of J.F.K., Israel's
"existence (was) in danger". Upon J.F.K.'s Assassination,
U.S. Policy Toward Israel Began An Immediate 180-degree
Turnaround. The Fact Is That When New Orleans District
Attorney Jim Garrison Prosecuted Trade Executive Clay
Shaw With Conspiracy In The Assassination, Garrison Had
Stumbled On The MOSSAD Link -- Shaw Served On The Board
Of PERMINDEX, A Front For MOSSAD Arms Procurement
Operations. A Key PERMINDEX Shareholder, The Swiss-Based
Banque De Credit Internationale, Was The Fiefdom Of Tibor
Rosenbaum, A Top MOSSAD Official, And Chief Money Laundry
For Meyer Lansky, "Chairman" Of The Crime Syndicate And
Israeli Loyalist. The CEO Of PERMINDEX Was Louis Bloomfield
Of Montreal, An Operative Of The Bronfman Family, Intimate
Lansky Associates And Leading Patrons Of Israel. James
Angleton, The C.I.A.'s MOSSAD Liaison, Was A Devoted Partisan
Of Israel Who Orchestrated A False Scenario Linking Accused
Assassin Lee Harvey Oswald To The Soveit KGB. Even
"mainstream" Organised Crime Sources Note That Leading
"Mafia" Figures Accused Of Being Behind The Assassination
Were Lansky Subordinates. Perhaps Oliver Stone Failed To
Mention These Details In The Movie: JFK -- Because His
Film Was Financed By Aron Milchan, An Israeli Arms Dealer
Linked To Smuggling Of Material To Israel's Nuclear
Program -- The Point Of Contentioni Between J.F.K. And
Israel.

My Own Investigation Into The Assassination Of J.F.K.
And Reggae Singer Bob Marley:

Michael King
ISBN: 0-14-009738-4

Page: 192

"Next agent to evade the New Zealand police was
Christine Cabon, alias Frederique Bonlieu,
working on an American-supervised evacuation
at Pardes Hanna near Tel Aviv. According to
the Israeli police, the telegram from the
New Zealand police asking them to hold Bonlieu
for questioning by a New Zealand detective
arrived the same day, 25 July, as another
telegram from France. The French message,
which Cabon received first, told her to
return home at once because her father was
critically ill. An American student working
on the excavaton with Bonlieu said the
Frenchwoman came into her dormitory looking
pale and anxious, and announced that she
had to leave for France immediately. She
flew out of Israel the following day.

In fact, of course, her father was already
dead. The telegram was a coded message from
the DSGE warning her to leave Israel before
the New Zealand police got to her. That she
received it before the Israeli police acted
on the request from New Zealand raises a
strong possibility that they co-operated in
her escape. Given that she had worked
previously for the Israeli Secret Service,
this would not be surprising."

I see you've taken a cue from Tholen, Markie. You do that, you know.
You don't have an original thought in that over sized melon head of
yours. You're always picking up and using other peoples quotes and
sayings. As stated, you don't have an original thought.

It doesn't have have anything to do with shortwave or kelp. It has
everything to do with the fact you're a sexual deviant.You are the one
who posted to a usenet group that a 17 year old boy fucked you up the
ass. You posted to a usenet group about licking your shit off of some
guy's cock. You spread your filth in these news groups and every where
you go on the internet. You're a piece of shit Markie and your family
is a freak show.

I see you've taken a cue from Tholen, Markie. You do that, you know.
You don't have an original thought in that over sized melon head of
yours. You're always picking up and using other peoples quotes and
sayings. As stated, you don't have an original thought.

It doesn't have have anything to do with shortwave or kelp. It has
everything to do with the fact you're a sexual deviant.You are the one
who posted to a usenet group that a 17 year old boy fucked you up the
ass. You posted to a usenet group about licking your shit off of some
guy's cock. You spread your filth in these news groups and every where
you go on the internet. You're a piece of shit Markie and your family
is a freak show.

Vitamin Supplement ...for you, mom & dad and the Kids!

1997-2011 Kelp Products of Florida, Inc.

This 100% All Natural Organic Vitamin Supplement contains all the
wonderful properties of true Norwegian Kelp combined with Cod fish
liver oil, packaged and quality controlled by a U. S. Pharmaceutical-
Grade Facility (under FDA inspection) as an added guarantee of
assurance and safety. Our Norwegian Kelp tablets do not contain
colors, flavors, or preservatives!

"When you need help, Norwegian Kelp!"

Indeed.

==> + PUBLIC SERVICE: GET SET FOR THE ARRL SIMULATED EMERGENCY TEST

Simulated ARRL's Simulated Emergency Test (SET) is October 1 and 2,
2011. This nationwide exercise is the chance to test your emergency
operating skills and the readiness of your communications equipment and
accessories in an emergency-like deployment. ARRL Field Organization
Leaders at the Section and local levels -- along with many other
volunteers who are active in public service and emergency
communications -- are developing emergency-like scenarios in
consultation with a variety of agencies for whom radio amateurs are
known to provide service during emergencies.
```

To find out how you can step up and be a part of the local or Section-level activities, contact your Section Manager. You can find contact information for all 71 ARRL Section Managers on page 16 of any issue of QST. Additional contact information may also be found on the ARRL website. The Amateur Radio Emergency Service® (ARES®), the

National Traffic System (NTS), the Radio Amateur Civil Emergency Service (RACES) and members of the ARRL Field Organization will participate and practice emergency operation plans, nets and procedures. Read more here <http://www.arrl.org/news/get-set-for-the-2011-arrl-simulated-emergency-test> .

==> + PROPAGATION NEWS: STANFORD UNIVERSITY RESEARCHERS ANNOUNCE SUNSPOT BREAKTHROUGH

Imagine forecasting a hurricane in Miami weeks before the storm was even a swirl of clouds off the coast of Africa -- or predicting a tornado in Kansas from the flutter of a butterfly's wing in Texas. These are the kind of forecasts meteorologists can only dream about. Could the dream come true? A new study by Stanford University researchers suggests that such forecasts may one day be possible -- not on Earth, but on the Sun. In the August 19 issue of Science, Stathis Ilonidis, together with co-workers Junwei Zhao and Alexander Kosovichev, announced that they can see some sunspots while they are still submerged, before they are visible to the naked eye. "This could lead to significant advances in space weather forecasting," Ilondis said.

Most Amateur Radio operators are aware of sunspots, those dark blemishes on the surface of the Sun. This is because sunspots influence propagation. They can be a boon to hams interested in HF propagation, as sunspots are the sites of ultraviolet or extreme ultraviolet radiation that creates our ionosphere. But sunspots can also be destructive. They are the source for disturbances, such as flares and the roots of coronal mass ejections (CMEs) that can hinder propagation. When a CME hits the Earth's atmosphere, the low bands will be depressed and signals will be weaker the lower the frequency. The absorption rate will be most severe on 160 meters, less on 80 and somewhat better on 40 meters. The maximum usable frequency (MUF <http://www.hfradio.org/muf_basics.html>) -- the highest frequency by which a radio wave can propagate between given terminals by ionospheric propagation alone, independent of power -- will be lower and auroral propagation on the VHF bands is quite possible. Read more here <http://www.arrl.org/news/stanford-university-researchers-announce-sunspot-breakthrough>.

==> + CHECK OUT THE OCTOBER ISSUE OF QST

The October issue of QST is jam-packed with all sorts of things that today's Amateur Radio operator needs. In this issue -- our annual DX issue -- you'll discover both technical and feature articles to get you in the mood for hunting down that rare DX. And just like every issue of QST, you will find something to pique your Amateur Radio interests.

A receive antenna can improve the signal-to-noise ratio of those weak, distant stations. Some transceivers don't include the capability to use separate antennas for both receiving and transmitting. In his article

"A Receive-Only Antenna Adapter," Gerald Fasse, W8GF, offers a simple schematic for an adapter you can build that will add functionality to your shack. Joe Ostrowski, KI5FJ, shows how you can reduce transmission line loss by matching your antenna at the antenna feed point. In his article "A Remote Impedance Matching Network," he presents a simple to use -- and easy to build -- network that doesn't have to use microprocessors or relays to switch RF components.

In the October 2010 issue of QST, Cezar Trifu, VE3LYC, told his nail-biting account of being stranded on an uninhabited island in the Canadian arctic. Now for October 2011, Trifu describes his memorable DXpedition to the islands of the southern tip of South America in his article "CE9 DXpedition to the Tip of South America." Sean Patrick Doran, W8OKN, now knows that the ARRL's Logbook of The World is the best way to track his progress toward the DXCC and WAS awards. Read about his Eureka! moment in his article "LoTW: Like Taking Your QSLs to the Bank."

Have you ever gone to a movie and saw ham radio gear up on the big screen and wondered just how it got there? ARRL News Editor S. Khrystyne Keane, K1SFA, did when she went to see Mr Popper's Penguins over the summer. She tracked down the owner of the ham gear featured in the movie and tells of its journey from shack to screen in "Ham Radio 'Pops' on the Big Screen." Keane also presents all the details from the ARRL Board of Directors 2011 Second Meeting in "ARRL Board of Directors Looks to 2014 -- and Beyond."

NCJ Managing Editor Rick Lindquist, WW3DE, takes a look at the ICOM IC-7410 HF and 6 meter transceiver in this month's Product Review. He says that this rig "replaces the IC-746PRO and adds an improved receiver, much faster DSP performance and new features to the mix, but drops 2 meter coverage. Although the new radio does a lot, the 7410 user interface will be familiar to users of current ICOM radios." QST Technical Editor Joel Hallas, W1ZR, checks out the Coaxial Dynamics Model 81041 USB wattmeter: "This is a very nice wattmeter with some extra features that you are likely to appreciate. It does not offer the absolute accuracy of more recent instruments, but will be familiar and handy to many. The provided PC software is useful, but we hope that more will come."

Of course, there are the usual columns you know and expect in the October QST: Happenings, Hints & Kinks, The Doctor Is IN, How's DX, Vintage Radio and more. Look for your October issue in your mailbox. QST is the official journal of ARRL, the national association for Amateur Radio. QST is just one of the many benefits of ARRL membership. To join or renew your ARRL membership, please visit the ARRL web page <https://www.arrl.org/join>.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which

covers the month of August -- takes a look at how the ARRL HQ Emergency Response Team helped monitor various nets and provide support to the affected Field Organizations from W1AW, the upcoming Director elections in the Atlantic, Delta and Midwest Divisions, helping to solve interference problems on 60 meters, filing comments with the FCC, reports from the Official Observer Desk and more. Read more here <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-37>.

==> + REPORT CALLS ON NASA TO HIRE MORE ASTRONAUTS

Even as the space shuttle era has come to a close, a NASA-commissioned report says the space agency needs to hire more astronauts to maintain its presence on the International Space Station and prepare for the next generation of spaceflight. The report warns that "the Astronaut Corps appears to be sized below the minimum required" and that the current corps size "poses a risk to the US investment in human spaceflight capabilities." NASA commissioned the report from the National Research Council, part of the National Academy of Sciences, to examine the agency's astronaut and astronaut training needs in the post-shuttle era. NASA Spokesman Michael Curie said that the report "offers helpful advice about the appropriate size of our astronaut corps as we enter this exciting new era of space exploration and crew transport operations." Beginning in November 1983 with Owen Garriott, W5LFL, on board STS-9, Amateur Radio has been an integral part of NASA missions in space. More than 100 NASA astronauts have received their Amateur Radio license. Read more here <http://www.arrl.org/news/report-calls-on-nasa-to-hire-more-astronauts>.

==> + ON THE AIR: DX0DX SPRATLY DXPEDITION "PERMANENTLY CANCELLED"

After numerous setbacks, Chris Dimitrijevic, VK3FY, announced on the DX0DX website <http://www.dx0dx.com/> that the planned 2012 DX0DX DXpedition to the Spratly Islands has been "permanently cancelled." No explanation was given for the cancellation and Dimitrijevic did not respond to e-mails from the ARRL. Spratly currently sits at #32 on DX Magazine <http://www.dxpub.com/dx_news.html>'s "Most Wanted" List.

The DX0DX Spratly DXpedition had been postponed at least twice. It was first supposed to happen in January 2011, and then it was delayed until April. According to Dimitrijevic, the postponement to April 2011 was "due to circumstances beyond the control of the DX0DX Team and in the best interests of the Team of Operators." On April 10, 2011, Dimitrijevic sent out a notice that said that 10 of the original 37 operators of the planned 2011 DX0DX DXpedition indicated that they will return in April 2012, but that will not be happening.

In April 2012, however, another group is planning a DXpedition to the Spratly Islands. According to the September 4 edition of the Ohio/Penn DX Association's bulletin, members of the Malaysian Amateur Radio Transmitter Society (MARTS <http://www.marts.org.my/>) are planning a "2012 Project" to activate Pulau Layang Layang (AS-051) in the Spratlys during the first two weeks of the month. The team leader is C.L. Neoh,

9M2CLN, with support by Tack Kumagai, JE1CKA, and the 9M4SDX Team <http://island.geocities.jp/layang9m4sdx/sub1.html>. The DXpedition coordinator is Tex Izumo, 9M2TO. MARTS is Malaysia's IARU Member-Society. Read more here <http://www.arrl.org/news/dx0dx-spratly-dxpedition-permanently-cancelled>.

==> SOLAR UPDATE

Tad "September Sun, you made me see" Cook, K7RA, reports: Solar indicators rose again this week, with the average daily sunspot numbers increasing nearly 21 points to 104.3, while the average daily solar flux was up nearly 12 points to 115.5. The geomagnetic numbers were up as well, with the most active geomagnetic day occurring on September 3. The latest prediction from NOAA/USAF has solar flux at 110, 105 and 100 for September 8-10, 95 on September 11-13, 100 on September 14-15, 103 on September 16-17, and 105 on September 18-22. The planetary A index is predicted at 5 on September 8-9, 18, 15, 10 and 8 on September 10-13, 5 on September 14-17, 7 on September 18-19, and 5 on September 20-23. Geophysical Institute Prague predicts minor storm for September 9-10, active conditions September 11, unsettled September 12, quiet to unsettled September 13 and quiet on September 14-15. Both the NOAA and Prague predictions for September 9-10 are probably based on a recent X2 class solar flare on September 6. Look for more information on the ARRL website on Friday, September 9. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by Human Nature's September Girl.

==> + ARRL RECOGNIZES: DOUG HALL, K4DSP, WINS AUGUST QST COVER PLAQUE AWARD

The winner of the QST Cover Plaque Award for August is Doug Hall, K4DSP, for his article "The FSKit -- A Simple Sound Card Interface for Generating Radioteletype Frequency Shift Keying." Congratulations Doug! The QST Cover Plaque award -- given to the author or authors of the best article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll Web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the September issue today.

==> THIS WEEK ON THE RADIO

This week:

- September 9 -- NCCC Sprint Ladder
- September 9-10 -- PODXS 070 Club Jay Hudak Memorial 80 Meter Sprint (local time)
- September 10 -- Ohio State Parks on the Air; Kulikovo Polye Contest
- September 10-11 -- Arkansas QSO Party; WAE DX Contest (Phone)
- September 10-12 -- ARRL September VHF QSO Party <http://www.arrl.org/september-vhf-qso-party>; ARCI VHF Contest
- September 11 -- SKCC Weekend Sprint

- September 14-15 -- CWops Mini-CWT Test

Next week:

- September 16 -- NCCC Sprint Ladder; AGB NEMIGA Contest
- September 17 -- Connecticut QSO Party; Feld Hell Sprint
- September 17-18 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>;
South Carolina QSO Party; Washington State Salmon Run; CIS DX QPSK63
Contest; Scandinavian Activity Contest (CW); SRT HF Contest (SSB); QRP
Afield
- September 18 -- North American Sprint (SSB); WAB 144 MHz QRP Phone
Contest; BARTG Sprint 75
- September 19 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 22 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page
<http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 9-11 -- ARRL Southwestern Division Convention
<http://www.arrl.org/hamfests/southwestern-division-convention-hamcon-2011>,
Torrance, California
- September 11 -- ARRL Great Lakes Division Convention
<http://www.arrl.org/hamfests/great-lakes-division-convention-findlay-hamfest
>,
Findlay, Ohio
- September 17 -- ARRL Roanoke Division Convention
<http://www.arrl.org/hamfests/roanoke-division-convention-virginia-beach-hamf
est>,
Virginia Beach, Virginia
- September 24 -- ARRL Washington State Convention
<http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane
-hamfest>,
Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention
<http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>,
Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention
<http://www.arrl.org/hamfests/connecticut-state-convention-1>,
Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention
<http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>,

Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention
<http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>,
Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention
<http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention
<http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and
-computer-expo>,
Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention
<http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-b
ay-hamfest-1>,
Palmetto, Florida

Amateur Radio Newsline(tm) Report 1778 - September 9 2011

Amateur Radio Newsline report number 1778 with a release date of
Friday, September 9th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. ARISSAT One celebrates its first month in
space, IARU Region 1 adds two new repeater pairs on 2 meters, Canadian
hams on alert for hurricane Katia, an unlicensed broadcaster in
Brooklyn New York is hit with a $10,000 fine and on ham remembers 911
with an on line tribute to the New York City Fire Department. Find out
the details are on Amateur Radio Newsline(tm) report number 1778 coming
your way right now.

HAM RADIO IN SPACE: ARISSAT-1 CELEBRATES ITS FIRST MONTH ONORBIT

ARISSat One has celebrated its first month on-

orbit and it still p[utting out a mighty good

signal. Take a listen:

--

Actual ARISsat 1 here.

--

ARISSat One was deployed from the from the International Space station
on August 3rd by two space walking cosmonauts . Now, a month later
strong signal reports continue to be reported even though its internal
battery is almost depleted and the bird is totally dependant on power
from power from the sun.

In addition to hearing the bird live on 145.950 MHz, you can receive
ASISSat One data in near real time on your smart phone or mobile
device. Information on how to do this is online at
tinyurl.com/arissat-data-now (WA4SXM)

**

HAM RADIO IN SPACE: ISS COULD BE VACATED IF RUSSIAN LAUNCH VEHICLE
PROBLEM NOT RESOLVED QUICKLY

According to Space.com, the International Space Station may have to start operating without a crew in November. This, if Russian engineers cannot quickly figure out what caused a recent launch booster failure. And this would indirectly impact on ham radio as well. Amateur Radio Newsline's Bill Pasternak, WA6ITF, has the details:

--

As widely reported, an unmanned Russian Progress cargo ship crashed just after launch on August 24th. That flight was to deliver three tons of supplies to the orbiting space station. The failure was caused by a problem with the Progress' Soyuz rocket. One very similar to the one Russia uses to launch its crew-carrying vehicle.

In an August 29th statement, NASA says that three members of the current crew on the ISS are due to return to Earth this month, and the rest are scheduled to come back in midNovember.

At the moment, Russia's Soyuz is the only way to get astronauts to and from the station. So if the booster glitch isn't identified and fixed quickly, a fresh crew won't be able to reach the orbiting lab before the last three current crew members head for home.

One of the reasons for this is that the two Soyuz spacecraft that are currently docked to the ISS are only rated to spend about 200 days in space so they will have to depart before their time on-orbit ends. Also, the lighting conditions at the Soyuz's landing site in Kazakhstan is also an issue. Both NASA and the Russian space agency require that landings occur between one hour after dawn or one hour before dusk. This, to facilitate better search and rescue operations should any be required.

The lighting window closes for about five weeks on September 19th for the first crew and around November 19th for the second. Waiting for a new window to open would stretch the Soyuz spacecraft beyond their 200 day on-orbit ratings in both cases.

The bottom line: NASA says that it will not put any crews on a Soyuz until the rocket has had several successful unmanned launches. Russian engineers are working to give Soyuz the best chance to meet that 200 day deadline. The next one is technically slated to blast off on September 21st, but most experts seem to think that's almost certainly not going to happen. So if Russia cannot find the failure cause of the Soyuz and get it proofed for carrying human passengers, it could mean that the ISS could be unmanned for the first time since 2001.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

If the International Space Station were to be temporarily evacuated it would mean at least a temporary hold with scheduled on-orbit astronaut to classroom ham radio contacts. Obviously, random contacts by the ISS

ham radio crews with amateurs world-wide would cease as well. (SPACE.com, Houston News, other published news reports)

RESTRUCTURING: IARU REGION 1 ADDS NEW 2 METER REPEATER PAIRS

IARU Region 1 has voted in favor of creating a pair of new 2 meter repeater channels to relieve some of the on-the-air congestion in that region of the world. The new frequency pairs are 144.9750 MHz and 144.9875 MHz as inputs with 145.5750 MHz and 145.5875 MHz as their complimentary outputs.

And if those of you outside of I-A-R-U Region One are wondering about the strange channel allocations, heres some background. In I-A-R-U Region One, the 2 meter band is only two Megahertz wide running from 144 to 146 MHz. Only a small portion is allocated for FM repeater and simplex operations. According to the bandplan posted on the Internet, back in 1996 it was decided to change from 25 Khz inter system spacing to 12.5 kHz with very narrow deviation to accommodate as many repeaters in a given area as is possible.

The latest newly added frequencies were proposed by the South African Radio League and approved by a vote of twenty seven in favor, fourteen opposed and seven abstentions. No implementation of this modification to the Region One bandplan was announced. (IARU Region 1)

RESCUE RADIO: CANADIAN HAMS ALERT FOR HURRICANE KATIA

Hams in Eastern Canada's Maritime Provinces went on alert on September 6th. This as Hurricane Katia had been tracking toward the northwest for several days as a major category 3 storm.

Based on a suite of computer models and the expected evolution of weather systems over Eastern Canada, Katia was forecast to make a sharp eastward turn on Friday, September 9th. That would result in its impact being limited to the offshore areas but also creating large waves that would reach the southern coastlines of Nova Scotia and Newfoundland.

According to the United States National Hurricane Center in Miami and the Canadian Hurricane Center, Hurricane Katia is not expected to make landfall anywhere in North America. However its projected path is across the entire North Atlantic and map projections say it actually may hit northern England early on Monday, September 12th, before completely falling apart.

But before it makes its Atlantic crossing, Hurricane Katia does pose a threat to Canada's eastern most area and Radio Amateurs of Canada suggests that hams as well as the public stay tuned to updates regarding the storms path. The Canadian Hurricane Center notes that predicting the timing of sharp turns for a hurricane like Katria can be particularly challenging. You can track Katia's progress yourself by

going to the National Hurricane Center web page at www dot nhc dot noaa dot gov. (RAC, NOAA, Canadian Hurricane Center)

**

RESCUE RADIO: WASHINGTON HAMS AID HIKER

According to a report posted on QRZ dot com by Glen Ahlborn, KF7QLH, several Washington State hams were responsible for the rescue of a camper who had slid off a ledge near Emerald Lake. It went down on Saturday, August 27th when John Myers, KD7AAT, of Spokane received an emergency call over a local repeater from Todd Cady, K7PKT. Cady informed Myers that a camper had fallen over the side of a ledge and had suffered a major compound fracture of his femur.

Using a hand held GPS unit, Cady provided Myers with the exact coordinates. Cady also told Myers that there was absolutely no way of getting a stretcher in the area. Myers relayed this information to emergency response personnel which dispatched an ambulance to the scene.

As it turned out, Cady's assessment was correct. There was no way to perform a ground rescue due to the terrain. The first responders could only make sure the patient was stabilized, and also find an area for a helicopter landing. Meantime, a rescue helicopter was launched from Spokane. It picked up the injured man and transported him to a medical facility where he is reported to be recovering from his injuries. (KF7QLH)

RESCUE RADIO: SIMULATED EMERGENCY TEST OCTOBER 1 and 2

This years national Simulated Emergency Test takes place on October 1st and 2nd. Sponsored by the ARRL, the Simulated Emergency Test is a nationwide exercise to assess ham emergency operating skills and the readiness in an emergency like operation.

According to the ARRL, its Field Organization in association with a variety of served emergency response agencies is busy developing emergency like scenarios for this years S-E-T. To find out how you can be a part of these activities, please get in touch with your ARRL Section Manager. Contact information can be found on page 16 of any issue of the Leagues monthly QST magazine. (ARRL)

**

RESCUE RADIO: FEMA TO TEST NATIONAL EAS SYSTEM IN NEVADA

Nevada will conduct a state-wide test of the national Emergency Activation or EAS system later this month. Radio World reports that at the recent annual meeting of the Nevada State Emergency Communications Committee broadcasters learned that the Federal Emergency Management Agency's Integrated Public Alert and Warning System office plans a mini-national EAS test for the state before months end.

The test would be launched from FEMA to KKOH AM in Reno and KDWN AM in Las Vegas and propagate from there to other stations in the Nevada EAS Operational Area. Nevada State Emergency Communications Committee Chair Adrienne Abbott told the meeting she would track results through a conference call with station engineers and report results to the Nevada Broadcasters Association.

Radio World says that similar tests are expected in at least some other states. The Michigan Association of Broadcasters has already announced that it is planning a statewide "soft test" of the monthly local test on September 22nd. (RW)

**

RESCUE RADIO: ALERTFM TO BE INTRODUCED TO EUROPEAN MARKEWT

AlertFM which is the provider of an FM-based emergency alert system, has announced that broadcast equipment manufacturer WorldCast Systems is offering the Alert FM system in Europe.

The Alert FM system sends text-based messages over FM frequencies to end users. Those end users can be anyone with an Alert FM receiver, including radio stations, first responders, schools, municipalities or citizens. More on this story is on-line at tinyurl.com/alert-fm-europe (AlertFM)

**

ENFORCEMENT: UNLICENSED BROOKLYN NY BROADCASTERS DINGED $10000

The FCC has affirmed Forfeiture Order in the amount of ten thousand dollars issued jointly to Andre Alleyne and Jessie White. This, for operating an unlicensed radio station on the frequency 96.5 MHz in Brooklyn, New York. Amateur Radio Newslines Jeff Clark, K8JAC, is here with the story:

--

This story goes back to July 23 and 24, 2008. That's when acting in response to a complaint of interference from a licensed FM broadcast station; agents from the FCC Enforcement Bureau's New York Office monitored 96.5 MHz in Brooklyn, New York. On each of those days, the agent observed a radio signal on that frequency and used directionfinding techniques to locate the source of the transmissions

to an apartment building on Flatbush Avenue in the borough of the city.

On July 24, 2008, after completing the field strength measurements, agents from the New York Office conducted an investigation on the roof of building where they observed an FM broadcast antenna with a coaxial cable leading from the antenna into an apartment window in the building. The agents learned from the building superintendent that the coaxial cable went into the apartment jointly leased by Mr. Alleyne and Ms. White.

When the agents attempted to inspect the station, the two women who answered the door refused to allow the agents to enter the apartment. However, one of the women, who was later identified as Ms. White, stated that she resides in the apartment with her boyfriend. The agents advised her that the radio station in the apartment was operating without a license and requested that she turn off the station. After returning to their vehicle, the agents monitored 96.5 MHz and noted that the station was off the air.

On July 30, 2008, the New York Office issued a Notice of Unlicensed Operation to Mr. Alleyne and Ms. White. The notice warned the pair that operation of the unlicensed radio station violated section 301 of the Communications Act and outlined the potential penalties for such a violation. The Notice directed Mr. Alleyne and Ms. White to terminate operation of the unlicensed station immediately and provided them ten days to reply. The New York Office says that it did not receive a response to the Notice.

On December 10, 2008, the New York Office issued a Notice of Apparent Liability for Forfeiture in the amount of $10,000 to Mr. Alleyne and Ms. White for operating an unlicensed radio station. In their response, Mr. Alleyne and Ms. White did not dispute the findings in the Notice of Apparent Liability, but requested that the FCC cancel the proposed forfeiture for several reasons. This because of their claim that they allowed a friend to operate the station from their apartment. Also, that they believed the radio station complied with all FCC regulations; that they ceased operating the station as soon as they became aware that it was illegal and that they do not have the financial resources to pay the forfeiture.

In denying all of these requests the FCC noted that Mr. Alleyne and Ms. White did not dispute the circumstances of the stations operation and that on examining all of the evidence that the Commission finds that Alleyne and White are jointly liable for operating the unlicensed radio station on 96.5 MHz. The FCC also turned down the request to cancel or reduce the proposed forfeiture based on their inability to pay. This is because neither Mr. Alleyne nor Ms. White submitted any supporting documentation providing proof that they could not pay the fine. As such the FCC concluded that the $10,000 forfeiture is warranted and gave them the customary 30 days to pay or take the matter to appeal.

I'm Jeff Clark, K8JAC.

--

If Alleyne and White they fail to do either, the entire matter will likely be handed over to the Department of Justice for collection. (FCC)

**

ENFORCEMENT: CANADIAN TEEN UNLICENSED BROADCASTER GETS 15 MONTHS PROBATION

A Canadian youngster described in news reports as an illtempered teenaged unlicensed broadcaster has been put on 15 months probation. This after threatening a pair of Ottawa radio personalities and an Industry Canada radio inspector.

According to news reports, the now 15 year old had set up a radio station out of his home using transmitting equipment he purchased with money from an inheritance and began broadcasting without a license. After repeated warnings Telecommunications regulator Industry Canada shut him down and seized his equipment in January 201. At that time he reportedly threatened and harassed one of the agency's investigators.

At trial, the unnamed young offender was convicted of violating the Radiocommunications Act. He was also found guilty of threatening to kill Hot 89.9 radio personality Ryan Lindsay. The court says that he went as far showing up at the radio station with his father, and threatening to harm another employee identified as John Mielke.

And heres the kicker. While news reports say that the teen's crimes were serious, Justice Donald Ebbs sentenced him only to conditional discharge and probation. The only conditions placed on the teen was that he stay away from the people he threatened and not possess any radio transmitters or other equipment that could allow him to broadcast on federally regulated airwaves. The teen was also ordered to perform 60 hours of community service. More about this case is on-line at tinyurl.com/canada-teen. (Adapted from the Ottawa Citizen)

**

NAMES IN THE NEWS: PAUL ROBINSON 2E1EUB AWARDED LOUIS VARNEY CUP

The 2011 Louis Varney G5RV Cup for Space Communications has been awarded to Paul Robinson 2E1EUB of Stoke on Trebt, England. This in recognition of his work in promoting and encouraging the use of amateur radio satellites and perfecting the art of a portable ground station. This years presentation was hosted by RSGB president Dave Wilson M00BW and took place at the Telford Hamfest on Sunday, September 4. (GB2RS)

**

NAMES IN THE NEWS: ARNEWSLINET TO BE GUEST ON HAM NATION SEPTEMBER 13

Amateur Radio Newsline producer Bill Pasternak, WA6ITF, along news anchor Don Wilbanks, AE5DW, will be the guests of Bob Heil, K9EID, and

Gordon West, WB6NOA on the Tuesday, September 13th edition of Bob's Ham Nation. This is the streaming video podcast seen live on Leo LaPorte's TWIT.TV Internet Television Network.

Bill and Don plan to discuss a bit of the history of the news service and talk about some of its ancillary projects including the Young Ham of the Year Award. They also may have a surprise announcement as well.

Ham Nation airs live every Tuesday Night at live.twit.tv. If you miss the show you can download the audio only or audio with video podcasts about 24 hours later at www.twit.tv/HN, from iTunes, and many other normal podcast sources. (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: UK COLOSSUS COMPUTER DESIGNER TONY SALE - SK

The Radio Society of Great Britain has announced the passing of Tony Sale, the man behind the Bletchley Park Colossus computer rebuild project.

During his rather illustrious career, Sale was the British intelligence agency's principal scientific officer and later worked at the Science Museum. He helped create the Computer Conservation Society and, more recently, the National Museum of Computing at Bletchley Park, where his Colossus remains today.

Considered to be a remarkable and skilled individual, Sale had a long history in engineering that encompassed robotics, radar and computing. In January 2008 Tony Sale and Colossus were featured on the cover of the RSGB's RadCom magazine. (GB2RS)

**

EMERGING TECHNOLOGY: NEW HIGH EFFICIENCY SOLAR CELL

A photovoltaic cell that reaches record-breaking efficiency could make solar energy competitive with fossil fuels according to the company that created the cell.

Alta Devices of Santa Clara, California presented research at the 37th IEEE Photovoltaic Specialist Conference that claims its thin-film gallium-arsenide cell can convert 27.6 percent of the sunlight striking the cell into electricity, under standardized conditions.

Since the paper was submitted, the company says it has upped the efficiency to 28.2 percent. That beats the previous record of 26.4 percent for a solar cell with a single p-n junction, which was the first improvement in years over 26.1 percent. Both numbers, according to Alta, were independently confirmed by the National Renewable Energy Laboratory. (Photo Voltaics)

**

RADIO FROM SPACE: PROSPERO MAY LIVE AGAIN

United Kingdom researchers say that they are planning to try to revive a 1970's satellite on 137.560 MHz.

The Prospero spacecraft was the United Kingdoms first first satellite, launched on a UK-built 40 years ago on a Black Arrow rocket. It was put into orbit on October 28, 1971 carrying a series of experiments to investigate the effects of the space environment.

The satellite operated successfully until 1973 and was contacted annually until 1996. Its beacon on 137.560 MHz was last heard by radio amateurs in 2006.

Now a team from the Mullard Space Science Laboratory in Surrey are attempting to revive it. Audio recordings of the 0.3 watt phase modulated signal at 2048 bit/s from Prospero on 137.560 MHz can be heard on the Sounds from Space website of Matthias Bopp, DD1US. To listen in, take your web browser to tinyurl.com/prospero-sound and then scroll down the page to Prospero One. (Southgate)

**

HAM RADIO IN SPACE: STUDENTS GET NZART GRANT TO DEVELOP KIWISAT SOFTWARE

A group of fourth-year Honors Students and a Masters student from New Zealand's Massey University School of Engineering and Advanced Technology have been awarded a $7,500 grant from the New Zealand Association of Radio Transmitters' Radio Science Education Trust. This, to develop the software for the new KiwiSAT amateur radio satellite.

KiwiSAT is being designed and built by a team of New Zealand radio amateur volunteers supported by Massey and various corporate sponsors. In addition to the usual repeater in space operations, KiwiSAT will carry out experimental work in small satellite Attitude Determination and Control. This is a low cost control system that works through interaction with the Earth's magnetic field to position the satellite at a specific attitude.

KiwiSAT is micro satellite is the size of a basketball. It will be launched on a Russian orbital booster when the project is completed. You can read the entire story on-line at tinyurl.com/kiwisat-software. (NZART)

**

HAM RADIO IN SPACE: HAM RADIO SPACE HISTORY TALK ON THE WWW

A video dealing with the history of ham radio space communications is now available on the World-Wide-Web. The program features a talk given in English by Mario Lorenz, DL5MLO, from AMSAT Germany was recorded this past summer as a part of the Hacker Space Program track at the Chaos Communication Camp 2011.

Held near Berlin, Chaos Communication Camp attracted hackers and makers from across Europe. Lorenz notes that building amateur radio satellites involves using technology in creative ways and as such has great appeal to the hacker community.

Lorenz talk is titled, "From OSCAR 1 to Mars and beyond Amateur Space Exploration - The last 50 years, Now, and the Future." It runs just about an hour and might make a good club meeting presentation. You can find it on-line at tinyurl.com/amsat-sat-talk (Southgate)

**

HAM HAPPENINGS: CASTLES AND STATELY HOMES ON THE AIR

An interesting ham radio event out of the United Kingdom. The Castles and Stately Homes On The Air organization will be holding a UK Heritage Event during this month to coincide with the European Heritage Month. For ham radio, this is a great opportunity to access locations that may previously have been inaccessible or closed to the public. Details on activations appear on line at www.cashota.co.uk. (GB2RS)

**

ON THE AIR: SPECIAL RUGBY WORLD CUP CALLSIGNS DOWN UNDER

On the air, keep your ears open for some New Zealand amateur radio operators to replace their ZL prefix with a ZM prefix throughout September and October. This, in celebration of the Rugby World Cup which runs from September 9th through October 23rd.

Also listen out for two special event stations in celebration of the Rugby event. The first has the unique call of ZL4RUGBY. It will be on the air through October 31st. QSL via ZL4PW.

The other is ZL6RWC. It will be operated by various members of the Papakura Radio Club, which will also be operational through October 31st. Please QSL ZL6RWC via ZL1VK, direct, via the bureau or electronically using Logbook of the World. (NZART)

**

DX

In DX, listen out for Canadian special event station CJ3A to be active during the entire month of October 2011 to celebrate the Centennial of Parks in Canada. Operations will be on all High Frequency bands. QSL via VE3LA.

The Wessex Contest Group will be active from the island of St Martin's, Isles of Scilly, using the club callsign MX0WCB, between September 11th to the 17th. Operation will be mainly QRP on the 40, 20, 17, 15 and 10m bands. QSL direct, by the Bureau, eQSL or via M0WAY.

K3GV stroke VY2 is on 15m and 20m from Prince Edward Island for one month that began on September 1st. QSL via K3GV either via the bureau or direct.

WB6OJB will be on the air as 7P8JK from Lesotho between September 15th to the 22nd. While no other information was given, during his last Lesotho operation he was on the High Frequency bands from 40 to 10 meters using mostly SSB with some CW. QSL direct to his home callsign WB6OJB.

Lastly, N6NO will show up as VK9OL from Lord Howe Island from September 10th to the 18th. He is reportedly celebrating his 75th birthday and 60 years iun amateur radio. He plans to work mainly in CW on 40 through 10 meters listening especially for Europe. QSLs via bureau or direct to N6NO or electronically using Logbook of the World.

(Above from DX news sources)

**

THAT FINAL ITEM: REMEMBERING 911 AND THE FIREFIGHTERS OF NYC

And finally this week, Mark Lacy, W5TXR, tells Newsline that he has added the New York Fire Department logging tapes of 911 to his website. The audio file contain transmissions of first responders as they realized what was happening and began the work of trying to save lives while not realizing that the buildings they were working in would soon crumble around them:

--

Mobile: "Marine 6 to Manhattan, urgent." Dispatch: "Hazmat 1 stand-by. Marine 6 go." Mobile: "You have a second plane into the other tower pof the Trade Center. (unintelligible) your fire." Dispatch: ".Marine 6 advising a second plane into the World Trade Center. Kay. Mobile: "Marine 6. That's the other tower." Dispatch: "That's the second tower of the World Trade Center. Kay"

--

What you will hear is very graphic and Mark warns on the website that as you listen to history unfold that it will send chills through your body.

To hear these sad moments in United States history please take your web browser to wwwW5TXR.net and click on the words "Historical Audio Archives." The page also explains some of the radio codes and terminology used by the firefighters in New York.

W5TXR adds that for him, as a volunteer firefighter of over 30 years this really hits home. He says that the files will remain on line only through September 15th. (W5TXR)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's W-I-A News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is Newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editor's desk, I'm Jim Damron, N8TMW, saying 73 from Charleston, West Virginia and we thank you for listening.

>

wrong. it never worked for me either and I have a completely new tv
with a built-in digital atsc and used other such tvsets in the past.
and converter boxes in the further past. And NONE of them ever worked
for ota reception. Even the ham radios who had the best equipment
available were not able to get any ota atsc reception here at all
while we all, including them, got several channels when it was analog
ntsc.
Daniel Rouse is correct regarding atsc and ntsc, and I also frequently
see digital atsc breakup and freezing on the analog cable channels
from them transmitting atsc digital at the
source.
However, Daniel most likely will not be happy much longer. where I am,
the cablle compamy has already moved several of their analog channels
to digital, and for the first time, the numbler of analog stations we
get on cable has went down insead of up. And it is my undersanding fcc
rules say the cablle companies only have to transmit in analog until
2012. Then in 2012, the cable tv companies are free to remove all
analog cable transmission and have every channel in digital only,
which I have already verified does not work even with digital cable
when I used to have digital cable. The digital system is
flawed.
so then his only choice (and all of us who have cable tv)n will be
digital cable or nothing, and the digital cable is as bad, unwatchable
freezing picture with audio stopped, and
skipping.
the government has ruined free over the air tv and cable tv also. the
effects of it on cable tv simply is not fully felt yet since cable tv
companies still have to broadcast in analog until 2012. I have already
seen digital cable and ota atsc. tv is
dead.

3253. Re: Getting amateur Kelp -- Whenever somebody mentions ham ops, I think of model trains, why's that?

Another Obamba gaff, in his so-called jobs speech he said that Abraham Lincoln founded the Republican Party which isn't true, but thanks to the in-the-tank-for-obamba-media, they took that out of the speech transcript.

Back on your meds, radioguy. Your spelling in your complaint is no better
than it is here. You're singing the same song as you were a year ago. Your
facts and logic are no better now than they were then.

ATSC works fine for everybody but you and Daniel. I believe
you to be in need of a revival of sorts.

Your sin is that of Unholy Location. You surely live in the
most God-forsaken, outback, boondock, backwoods,
backwater, hell-hole, Never-never Land known to
Civilized Man. This must end and you can do it.

Move! Move away, I say! Move away from the swamp, the
hand-pump well, the outhouse, the chain gangs on the
road, the broke-down car on your front lawn and those
festering, inbred neighbors.

There's some hope for you boy, but not until you bathe
in the light that is the Glory of ATSC Tee-Vee.

Hallelujah!

3269. I FOUND THIS GREAT DOCUMENTARY MOVIE , THAT TALKS ABOUT THE UGLY TRUTH OF WHAT REALLY HAPPENED IN 9\11

Newsgroup: rec.radio.amateur.policy
Date: 2011-09-11 07:37:54 UTC
From: bv <bv6bv6bv6@gmail.com>
Message-ID: <56e37643-76c0-4416-bc70-bdb5f9d4dbdc@m18g2000vbe.googlegroups.com>
Source record: 247590

as many truth seekers
i found this great documentary movie , that talks about the ugly truth
of what really happened in 9\11
and the pentagon crash
which have been followed by so many lies about the middle east, and
them being criminals and terrorists
after it they gave themselves a stupid excuse to start a war against
Iraq and Afghanistan

but guess who did it??
.....i think we all know

if you really want to know the truth , and stop getting lied at by the
american government and media
you have to see this movie series or at least one of them that called
(911 loose change 2nd addition)

http://www.seedoftruth.com/Loosechange.gif

http://www.youtube.com/watch?v=mY5YoTbOmOY

trailer

made by 3 great american young men :

http://www.foxnews.com/images/301973/0_61_loose_change_roweaveryberma.jpg

you will be amazed from the amount of informations in this movie,,
you may laugh at your self and say : how didn't i noticed this!!!
but what you should do is : not trusting any of the nonsense the media
feed us with

torrent download:

http://www.mininova.org/tor/220762 (http://www.mininova.org/tor/
220762)

you can also watch the movie online on youtube (full length)

http://www.youtube.com/watch?v=1Yx9NRX37SM (http://www.youtube.com/
watch?v=1Yx9NRX37SM)

the official website:

http://www.loosechange911.com/

a new movie in the series called "Loose Change 9/11: An American
Coup", will be released on 9-22-9,

http://www.youtube.com/watch?v=laoFWKUvoY8 (http://www.youtube.com/watch?v=laoFWKUvoY8)
trailer

the other two movies in the series are called:
- 9 11 loose change (2005)
- 9 11 loose change : final cut (2007)

i'm not against american people , but some of the tyrants act are really irritating
---

dedicate to the lost , guiltless lives who died at 9\11

please forward this e-mail as much as you can

even if you were not interested ,, some one may be

don't stop the truth from seeing the light

together , we will know

to
78> do with OS/2, kd8ctl.gavi?

Rather ironic that you should suddenly show any interest in
relevance to the alt.sex.gay,comp.os.os2.advocacy,
rec.radio.amateur.policy,alt.slack,alt.usenet.kooks
newsgroups, "thoolen".

Don't you have something better to be doing, tholen?

>Don't you have something better to
>do than to ask questions that have no obvious relevance to
>the newsgroups in which you've posted them, dizzy?

As if your kooky tholing has any relevance, tholen.

You do know, tholen, that your efforts have not helped increase the
relevancy of discussion in the COOA, right? Where is the logic in
that, tholen?

1541> Newsgroups:
alt.fucknozzles,rec.radio.amateur.policy,rec.radio.cb,comp.os.os2.advocacy,alt.checkmate

1541> tholen tholed:

What was allegedly endured while writing, dizzy?

1541> Don't you have something better to be doing, tholen?

What does your ironic question have to do with alt.fucknozzles,
rec.radio.amateur.policy,rec.radio.cb,comp.os.os2.advocacy,
alt.checkmate, dizzy?

1541> As if your kooky tholing has any relevance, tholen.

What does your classic erroneous presupposition have to do
with alt.fucknozzles,rec.radio.amateur.policy,rec.radio.cb,
comp.os.os2.advocacy,alt.checkmate, dizzy?

1541> You do know, tholen, that your efforts have not helped
1541> increase the relevancy of discussion in the COOA, right?
1541> Where is the logic in that, tholen?

There is no logic in your question, dizzy. When I ask someone
what their posting has to do with the newsgroups in which it
was posted, I'm trying to find out the relevance, if any, of
that posting to those newsgroups. It is not an attempt to
increase, or decrease, for that matter, the relevancy of
discussion in any newsgroup, dizzy. Of course, that much
should have been obvious by the wording of the question itself,
but it takes decent reading comprehension and logic skills to
understand that, dizzy. You have a lack in that capability,
dizzy, as evidenced by your inability to comprehend how
persent spells his or her alias.

==> + PUBLIC SERVICE: MISSOURI HAMS HELP OUT WHEN 911 SERVICE GOES DOWN

It doesn't take a major disaster for Amateur Radio to step in and
save the day. Around 9 PM on September 5, a cable cut completely
isolated the Johnson County 911 Center in Warrensburg, Missouri,
impacting landline, Internet and cellular service. Johnson County --
home to Whiteman Air Force Base -- is located just east of the Kansas
City metro area.

Johnson County's emergency plan called for the telephone company to
transfer all 911 calls to the Henry County 911 facility in Clinton,
Missouri; Henry County is the next county south of Johnson County. But
an equipment problem at Henry County's center prevented the transfer
from completing successfully. Calls were then routed to the Benton
County 911 Center in Warsaw, Missouri; Benton County is the next county
west of Henry County. This transfer was successful and calls started
coming in to Warsaw. Unfortunately, Warsaw is more than 40 miles from
Warrensburg, and the two centers were unable to establish communication
using the county VHF radio facilities. It was then that radio amateurs
```

were brought in to provide communications support. Read more here <http://www.arrl.org/news/missouri-hams-help-out-when-911-service-goes-down>.

==> + ARRL TO WELCOME USTTI STUDENTS NEXT MONTH

Next month -- October 3-7 -- the ARRL will welcome international students who want to learn how to administer and regulate Amateur Radio programs in their home countries. This course, offered by the United States Telecommunications Training Institute (USTTI) for learners from developing countries, will help the participants create, administer and foster an Amateur Radio Service in their countries. This is the 27th year that the ARRL has participated in the USTTI program. Read more here <http://www.arrl.org/news/arrl-to-welcome-ustti-students-next-month>.

==> + ARRL SEEKS TREASURER

After more than 31 years of distinguished service to the ARRL as its volunteer Treasurer, Jim McCobb, K1LU, has decided to step down when his current term expires in January 2012. The ARRL is seeking qualified candidates from among its membership. The Board of Directors elects the Treasurer and other officers at its Annual Meeting in even-numbered years.

The Treasurer is a non-voting member of the Board of Directors and must be a licensed radio amateur and a Full member of the ARRL for four continuous years prior to nomination. The ARRL By-laws <http://www.arrl.org/arrl-by-laws> define the role of the Treasurer as follows:

- In consultation with and subject to the general supervision of the Administration and Finance Committee, provides for the investment and reinvestment of the surplus funds of the League in any bonds or stocks or other securities as would be selected by a trustee with the care of a prudent investor.
- Reports to and attends all regular meetings of the Board of Directors.
- Serves as a member of the Administration and Finance Committee.

The position is unpaid; however, necessary expenses including travel to meetings are reimbursable.

A Search Committee has been established to recommend one or more candidates for Treasurer to the Board. Additional information about the position is available here <http://www.arrl.org/files/media/News/ARRL_Treasurer-Position_Description.pdf>.
Interested and qualified members are invited to submit a Statement of Interest and qualifications by November 14, 2011 to the Secretary, preferably by e-mail <dsumner@arrl.org>.

==> + ARRL FACEBOOK PAGE: 20,000 FANS STRONG

With more than 20,000 fans on Facebook, the ARRL Facebook page is the number one spot for hams on the Internet's most popular social networking site. Not only is the ARRL page the most popular Amateur Radio page on Facebook, it is attracting many young -- and not-so-young -- hams to share their opinions and ham radio-related news with other hams. According to Facebook demographics, more than 460 people between the ages of 13-17 are fans of the ARRL's page, with 74 percent of users below the age of 55. Since September 2010, hundreds of users post their own comments on the page, make a comment on a post or "like" a comment each week. The ARRL has been active on Facebook since July 2010; since that time, the page has been viewed almost 14.5 million times by fans and non-fans alike. The ARRL also has a Logbook of the World Facebook page. Premiering in June 2011, this popular page has almost 1000 ham fans. Read more here <http://www.arrl.org/news/arrl-facebook-page-20-000-fans-strong>.

==> + HEATHKIT'S AMATEUR RADIO PLANS TAKING SHAPE

Heathkit Educational Systems hopes to reenter the Amateur Radio market by the end of 2011. Back in August, Heathkit announced <http://www.arrl.org/news/heathkit-returns-to-the-kit-business> its return to the kit business and actively solicited suggestions. The response from Amateur Radio operators convinced Heathkit to develop several Amateur Radio products.

"When we made the announcement on our web page about a month ago, we had no intention of entering the Amateur Radio kit market," Ernie Wake, Heathkit's Director of Sales and Marketing, told the ARRL. "The response was really overwhelming, exciting and scary. The scary part is that the brand name has so much loyalty that we don't want to disappoint the people who have such fond memories."

Wake said that Heathkit is presently working on developing a few Amateur Radio kits. "Initially, the kit line will include a few 'accessories,' like kits for a Dual Watt Meter, Antenna Tuners and the Cantenna," he explained. "Once we are a little more 'settled,' I think we will develop a QRP receiver. We won't rush to market just to get there. We want to develop a line of kits in the tradition of Heathkit. I'm hoping to have one or two kits by the end-of-the-year."

==> QEX -- THE SEPTEMBER/OCTOBER 2011 ISSUE

The September/October issue of QEX <http://www.arrl.org/qex> is already out, and it is full of theoretical and practical technical articles that you won't want to miss. QEX is the ARRL's "Forum for Communications Experimenters." Published bimonthly, it features technical articles, columns and other items of interest to radio amateurs and communications professionals. The mission of QEX is threefold: To provide a medium for the exchange of ideas and information among Amateur Radio experimenters; to document advanced technical work in the Amateur Radio field, and to support efforts to advance the state of the Amateur Radio art. Read more here <http://www.arrl.org/news/em-qex-em-the-september-october-2011-issue>.

==> SOLAR UPDATE

Tad "When the Sun is setting
<http://www.youtube.com/watch?v=znOOaKPTH2Y>" Cook, K7RA, reports:
Although the average daily sunspot numbers are lower -- down nearly 13
points to 91.7 -- the average daily solar flux is higher by 6.7 points,
rising to 122.2. Yes, solar activity is rising rapidly. You could see
it coming earlier this week by glancing at the STEREO mission
<http://stereo.gsfc.nasa.gov/> when you looked at the back side of the
Sun. There was lots of activity, and you can still see quite a bit more
(those white patches) just over the eastern horizon, which is on the
left side of the image beyond -90 degrees. The image of the daily Sun
<http://spaceweather.com/> shows a disc peppered with sunspots, a
welcome sight after watching the current solar cycle seem to stall.
Numerous CME events disturbed the Earth's magnetic field. The planetary
A index record shows September 9, 10 and 12 were the most active days,
with the index at 36, 33 and 27. The autumnal equinox in the northern
hemisphere is just a week away: September 23 at 0905 UTC, which is 5:05
AM EDT or 02:05 AM PDT. Luckily, the increased sunspot activity should
continue. The predicted solar flux is 145 on September 15-17, 150
September 18-22, 110 on September 23-24, and 115 on September 25-29.
The predicted planetary A index is 5 on September 15-18, 7 on September
19, 5 on September 20-23, 7 on September 24-25, 5 on September 26-29,
and 15 on September 30. Look for more information on the ARRL website
on Friday, September 16. For more information concerning radio
propagation, visit the ARRL Technical Information Service Propagation
page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad
Cookism" is brought to you by The Go-Go's Beneath the Blue Sky
<http://www.youtube.com/watch?v=znOOaKPTH2Y>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page
<http://www.arrl.org/quickstats> on the ARRL website. Let your voice be
heard!

Questions in this month's QuickStats poll:

- What is the longest time you've ever spent at your radio (including
brief breaks)?
- Do you analyze your antenna designs with modeling software before
you build the antennas?
- Have you monitored signals from the new ARISSat-1 satellite?
- How far are you willing to drive for a hamfest?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the December 2011 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

==> THIS WEEK ON THE RADIO

This week:

- September 16 -- NCCC Sprint Ladder; AGB NEMIGA Contest
- September 17 -- Connecticut QSO Party; Feld Hell Sprint
- September 17-18 -- ARRL 10 GHz and Up Contest (local time)
<http://www.arrl.org/news/go-high-for-the-2011-arrl-10-ghz-and-up-contest>;
South Carolina QSO Party; Washington State Salmon Run; CIS DX QPSK63
Contest; Scandinavian Activity Contest (CW); SRT HF Contest (SSB); QRP
Afield
- September 18 -- North American Sprint (SSB); WAB 144 MHz QRP Phone
Contest; BARTG Sprint 75
- September 19 -- Run for the Bacon QRP Contest; 144 MHz Fall Sprint
(local time)
- September 22 -- NAQCC Straight Key/Bug Sprint

Next week:

- September 23 -- NCCC Sprint Ladder
- September 24 -- AGCW VHF/UHF Contest
- September 24-25 -- ARRL EME Contest
<http://www.arrl.org/eme-contest>; Texas QSO Party; CQ Worldwide DX
Contest (RTTY)
- September 25 -- UBA ON 6 Meter Contest
- September 26 -- QRP Homebrewer Sprint
- September 27 -- 222 MHz Fall Sprint (local time)
- September 28 -- SKCC Sprint
- September 28-29 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest
Branch page <http://www.arrl.org/contests>, the ARRL Contest Update
<http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest
Calendar <http://www.hornucopia.com/contestcal/index.html> for more
information. Looking for a Special Event station? Be sure to check out
the ARRL Special Event Stations Web page

Amateur Radio Newsline(tm) Report 1779 - September 16 2011

Amateur Radio Newsline report number 1779 with a release date of
Friday, September 16th, 2011 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio comes to the aid of San Diego when
a power black-out takes down a part of the areas emergency service
communications network, a new Red Cross emergency team down-under seeks
alliances with amateur radio, Puerto Rico originates its first ever EAS
message, the ARRL seeks information on young hams in the 21st century
and Amateur Radio Newsline become a part of Ham Nation on TWIT.TV. Find
out the details are on Amateur Radio Newsline(tm) report number 1779
coming your way right now.

**

RESCUE RADIO: HAM COMES TO THE AID OF SAN DIEGO WHEN ITS FAIL SAFE
COMMUNICATIONS SYSTEM FAILS

A ham radio operator uses his knowledge of two-way radio to supplement
communications when power goes out and a failsafe 800 MHz system fails.
Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

According to news reports, the power mains problem began near Yuma,
Arizona. Affected by the September 8th black-out were parts on
Southern California, South-Western Arizona and Northern Mexico. All of
these areas share the same power grid and in Southern California alone
some 8 million customers lost electric service. And when the lights
went out in San Diego, so did parts of the regions 800 MHz shared
emergency communications network.

The problem that arose was that in some North County service areas
mobiles in the field could not hear their dispatchers. In other places
the dispatchers could not communicate with mobile stations. But thanks
to some thoughtful planning by North County Fire Battalion Chief Don
Stevens, KF6ATL, a combination of ham radio know-how and an ageing
commercial VHF radio system, not all was lost:

--

KF6ATL: "Probably 15 years ago most of the Fire Departments in North
San Diego County were on the VHF system. Subsequent to that, San Diego
County, fot inter-operability reasons built a regional communications

that they call the RDS system. It's a Motorola system like other Motorola systems throughout the United States.

"Before we went to the system we are dispatched on at present, we were one of the last holdouts to go onto the 800 MHz system. And when we did that, one of the decisions that a couple of us made was not only to keep our (VHF) licenses, but also to turn our then remote-base transmitters into repeaters. We felt that we were not going to do what a lot of other cities did and that was to completely get rid of their VHF infrastructure all together."

--

Stevens tells Newsline that while his department is a part of the county wide 800 MHz system, when the switchover took place he decided to keep the San Diego North County VHF system as a back-up:

--

KF6ATL: "We had about 6 or 7 frequencies licensed to what was then the Fallbrook Fire Department which is now the North County Fire Department, and slowly but surely I took those licenses and turned three of them into what we call "Command Channels" or "Command Frequencies" and we strategically located them on mountaintops throughout North San Diego County.

"One of the first repeaters we put up was at a place called Buffalo Bump. Its on Camp Pendleton. It was followed by a same-licensed repeater up on Palomar Mountain and then another frequency located on Red Mountain, all within eye-sight of Fallbrook.

"And then I have one other repeater that bI consider a low level repeater located in downtown Fallbrook."

--

That forward planning by KF6ATL paid off then the power failure hit:

--

KF6ATL: "I was off on the day that the 800 MHz failure occurred with the power outage. Luckilly, one of my counterparts who works for the city of San Marcos - Dave Schloss - recognized that there was a failure - and like myself - he realized that we needed to do something with our 800 system to have redundancy. So he reacted quickly and called the Dispatch Center and started moving all the traffic over to my North County Fire VHF repeaters."

--

We asked Stevens if his experience as a radio amateur helped in the pre-planning of the North County VHF radio back up system:

--

KF6ATL: "Pretty much everything that I've done, Iv'e done myself. I've taught myself how to program repeaters. The only thing that I didn't do was was to hang the antennas."

--

In the end, Stevens hopes other communities will do as his did and make certain that some sort of back up emergency radio system is in place. This, just in case the unthinkable happens and the primary system fails.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the studio in Los Angeles.

--

If nothing else, this is another incident that proves putting all emergency communications eggs into a single, supposedly fail-safe system can very easily fail is not a very good idea. (CGC, ARNewsline(tm))

**

RESCUE RADIO: NEW RED CROSS EMCOMM GROUP DOWN-UNDER

A new Emergency Communications Network has recently been set up by the architects of Australia's Red Cross Emergency Communications known by the acronym RECOM. The RECOM organizational and technical model adopted in 1997 has been extremely successful in its work with Red Cross, and RECOM would now like to offer the new network infrastructure to other similarly setup amateur emergency communications organizations. You can find out more about this new network in an article by Phil Wait, VK2DKN, which can be found at tinyurl.com/3ccbys8 (WIA)

**

RESCUE RADIO: PUERTO RICE ORIGINATES IRS FIRST EAS NESSAGE

For the first time ever the government of Puerto Rico originated an Emergency Alert System message during the aftermath of Hurricane Irene.

According to FEMA Integrated Public Alert and Warning System Program Manager Manny Centeno, Puerto Rico had previously used NOAA Weather Radio to originate E-A-S alerts. Centeno noted that broadcasters and cable operators helped the Puerto Rico Emergency Management Agency transmit a message on August 24th.

The hurricane hit the island on August 21st and 22nd, leaving more than one million residents without power.

The Emergency Alert System or EAS is a national warning system in the United States put into place in January of 1997. This, when it superseded the Emergency Broadcast System which in turn had superseded the original CONELRAD System. In addition to alerting the public of local weather emergencies such as hurricanes, tornadoes and flash

floods, the E-A-S is designed to enable the President of the United States to speak to the citizenry within 10 minutes. However, to date the nationwide federal EAS has never been activated. (RW)

**

RESCUE RADIO: CANWARN NET ACTIVATED FOR HURRICANE MARIA

I'm Bill Pasternak, WA6ITF, back with some breaking news.

Ham radio operators in Eastern Canada are being activated once again. This as yet another tropical storm is expected to hit the Maritime Provinces in coming days.

According to Radio Amateurs of Canada, it's expected that Tropical Storm Maria will have a direct impact on Newfoundland, particularly the Avalon Peninsula. Due to a low pressure system that will likely merge, an exact track is difficult to predict. However, in the effected area storm surge, pounding surf, high winds and a unknown amount of rain tht can be expected.

As a result, full activation of a Newfoundland and Labrador Hurricane CANWARN Net will begin at 1430 UTC on Friday, September 17th on 3.740 MHz. Its operation will continue for the duration of the severe weather event. Other amateurs who are within radio range of this net are requested to keep this frequency clear until Hurricane Maria has past the area and net operations are secured. Meantime, hams in the affected area are advised to keep tuned to their local news and weather reports. (RAC)

**

YOUNG HAMS: ARRL FORMS YOUTH IN THE SECOND CENTURY COMMITTEE

The ARRL wants to learn more about getting youngsters into ham radio and has formed a special committee to find out how.

According to a Internet posting credited to K0CA, at its July meeting, the ARRL Board of Directors approved a motion authorizing the appointment of a Youth in the Second Century Committee. ARRL President Kay Craigie, N3KN, has since appointed the committee, which is chaired by Rocky Mountain Division Director and former Amateur Radio Newsline Young Ham of the Year Brian Mileshosky, N5ZGT.

The purpose and goals of this committee are to enhance the League's outreach to potential radio amateurs among America's youth. The League's centennial in 2014 will highlight not only the accomplishments of the past but also point towards Amateur Radio's future. The ARRL believes that meaningful plans to excite young Americans about amateur radio today and in the future must take into account the ideas, lifestyles, and experiences of youthful amateur radio operators.

The Committee on Youth in the Second Century will seek input from younger members of ham radio society and also from adult amateurs

working with young people., It will make recommendations to the Staff and will report to the Board of Directors beginning in January 2012. (K0CA, UseNet)

NEWS OF NEWSLINE: AMATEUR RADIO NEWSLINE JOINS THE HAM NATION TEAM

Amateur radio Newsline is now a weekly feature of Ham Nation on the TWIT TV Internet television network. The announcement was made on the Tuesday evening, September 13th edition when this reporter along with out producer Bill Pasternak, WA6ITF, joined Bob Heil, K9EID, and his co-host Gordon West, WB6NOA, to make the announcement:

--

K9EID: "Each week we are going to bring a couple of minutes of Newsline to Ham Nation and kind of keep our audience up on some of the top news."

--

TWIT TV Network founder Leo LaPorte, W6TWT, was also on hand to welcome us into the Ham Nation family:

--

W6TWT: "We are thrilled to have the addition of regular news on this show. What better place to run Newsline than right here.

--

After that, I had the honor of doing the first of the weekly 2-minute news capsules live. Ill be there for the next few weeks after which former Newsline anchorman Robert Sudock, WB6FDF, will be taking over the weekly Ham Nation news reports.

If you missed the live show, you can download the podcast and listen or watch. Both can be reached by taking your web browser to www.twit.tv/hn.

And less I forget, speaking for the entire Amateur Radio Newsline team, its great to be a part of Ham Nation. (ARNewsline(tm))

**

ENFORCEMENT: FCC FINES LPFM $12000 FOR UNCERTIFIED TRANSMITTER

The FCC has issued a $12,000 Notice of Proposed Liability to Power Ministries' owned low power FM station WRLE (LP), in Dunellon, Florida. This, after a June 2010 investigation of interference to Federal Aviation Administration operations in the near-by city of Jacksonville revealed that the stations transmitter was the source.

After receiving the complaint from the FAA, an FCC agent used direction finding techniques and traced the interfering signal to the WRLE transmitter. When instructed by the agent to turn off the transmitter the operator on-duty refused to do so. Nor would the station owner authorize it.

The agent then spoke to the station owner on the telephone, reiterating the safety of life hazard and requesting that the station turn off its transmitter. The station owner still refused to do so unless his station engineer was present. Thirty minutes later, the owner himself arrived and allowed a station inspection and then turned off the transmitter.

While waiting for the owner to arrive, the field agent noticed the transmitter wasn't certified. The gear was a CSI exciter, model EX20F and a model FM250E PTEK amplifier. When the transmitter was turned off, the agent said that the spurious emissions and interference to the FAA ceased.

Power Ministries later told the FCC the non-certified transmitter had been used at WRLE from March to June of 2010. It added a certified transmitter was being used as of that July.

Traditionally fined low-power FM stations are only fined in the hundreds of dollars for rule infractions. But in making its decision to fine WRLE $12,000, the commission found the violations were particularly egregious because of the safety issues posed to flights into and out of the Jacksonville area. (FCC)

**

ENFORCEMENT: NEW MEXICO ALLEGED POLICE JAMMER DINGED $25,000

The FCC has issued a $25,000 Notice of Apparent Liability to Monetary Forfeiture to Esteven J. Gutierrez. This for his alleged jamming of the Las Vegas Police Department's two way radio system. Amateur Radio Newslines's Norm Seeley, KI7UP, has more:

--

The story goes back to this past February 15th. That's when an agent from the Enforcement Bureau's San Diego Office arrived with an mobile direction-finding vehicle to investigate, locate, and assist in resolving the interference on 159.150 MHz. .

On his arrival, the FCC agent was briefed by the Las Vegas New Mexico Police Department's Deputy Chief about the situation that included the

subject's use of obscenities and threats against police officers and their families. A police sergeant identified the voice as that of to Esteven J. Gutierrez, who was known to the sergeant from prior incidents. The sergeant told FCC agent that he believed that the individual interfering with the dispatch channel was Gutierrez but that he had no known current address.

That evening the subject transmitted on 159.150 MHz making threats to police officers. The San Diego agent, accompanied by the police officers used radio direction-finding techniques and determined that the signal was mobile and was not transmitting from a fixed location.

On February 16th the subject again began transmitting and the agent again used direction finding and that this time the signal was coming from inside a duplex apartment. The San Diego agent informed the police sergeant of the subjects location. The sergeant along with several other officers identified and observed Gutierrez inside the duplex holding a handheld radio and shortly thereafter apprehended him. The San Diego agent and the police sergeant identified the handheld radio as an Icom model IC-F50, tuned to 159.150 MHz.

And now it appears as if its time for Guiterrez to pay the piper for his purported jamming of the Las Vegas, New Mexico Police communications system. While the combined base forfeiture for this sort of illegal action is $17,000 the rules give the FCC leeway in assessing a proposed fine. In this case the agency says that it finds Gutierrez's alleged misconduct particularly egregious because his unlicensed operation included willful and malicious interference police operations. Based on this the FCC says that an upward adjustment of $8,000 to the combined base forfeiture is warranted. Adding the two amounts together, that's $25,000 that the FCC wants for Guiterrez to pay.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona

--

Guiterrez was given the customary 30 days to pay or to file an appeal. (FCC)

**

ENFORCEMENT REQUIRED: HACKER ISSUES FALSE TERROR REPORTS ON NBC NEWS WEBSITE

Talk about a truly sick joke. On the eve of the 10th anniversary of the 911 terror attacks on New York City and the Pentagon, a hacker gained access to the Twitter account of NBC News and sent out a handful of false tweets about a suspected hijacking and a plane attack at ground zero.

Staffers at NBC noticed the false tweets at around 6 p.m. Eastern time on Friday, September 9th. They quickly contacted Twitter and had the account suspended. NBC News anchor Brian Williams then read a statement on the air saying the reports were false. Several hours later the NBC Twitter account was restored and the false postings were removed.

A group calling themselves Script Kiddies mentioned themselves in the tweets and appeared to be responsible. NBC says that it has contacted authorities including the New York Police Department and FBI about the incident. As we go to air, several investigations are underway. (Published news reports)

**

BAND PLANNING: ARRL LOOKING AT SHF BANDPLANS

The ARRL Board has established a committee to update the suggested band plans on 33, 23, 13 and 9cm. If you are active on any of these bands or are using them in any unique ways, please send your e-mail address to Southwest Division Vice-Director Marty Woll, N6VI, who serves on that committee, and he'll let you know how to provide your input to the process. His e-mail is N6VI at arrl dot org. Or you can contact your Division's representative on the group. (ARRL Southwest Div. Communicator)

**

RADIO POLITICS: VE3WXM RE-ELECTED RAC DIRECTOR FOR SOUTH ONTARIO

And words of congratulations to Jeffrey Stewart, VA3WXM who was recently re-elected as the Radio Amateurs of Canada Director for Ontario South. Stewart was initially voted in as the Director in May 2011 and has involved in many aspects of the hobby. Stewart's ran unopposed. His new term will cover January 1, 2012 to December 31, 2013. (RAC)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

STUFF FROM SPACE: LOOK OUT BELOW

A NASA official says that the decommissioned Upper Atmosphere Research Satellite is expected to re-enter Earth's atmosphere in an uncontrolled fall in late September or early October. Much of the spacecraft is expected to burn up during re-entry, but some pieces are expected to

make it to the ground,

The Amsat News Service says that Leonard David reported in his September 7th Space Insider Column that NASA computer analysis showed about 150 component types, including the parent body of the satellite, will burn during re-entry, but up to 26 would endure the fiery fall to Earth. The analysis indicated a surviving mass of 1,170 pounds will reach Earth within a debris footprint some 500 miles long.

NASA says that the risk to public safety or property is extremely small but admits that there is a chance that pieces of debris from the satellite will crash in areas accessible to the public. It asks that if you find something you think may be a piece of the fallen bird that you do not touch it. Instead, please contact a local law enforcement official for assistance.

The Upper Atmosphere Research Satellite is 35 feet long, 15 feet in diameter, and weighs 5.7 metric tons. It's operational orbit was at 375 miles inclined at 57 degrees to the equator. The full story of its upcoming demise was published on September 7th on the Space.com website at tinyurl.com/falling-satellite. (AMSAT News Service, Space.com)

HAM RADIO IN SPACE: CUBESAT STRAND-1 GETS OPERATING FREQUENCY

The International Amateur Radio Union Satellite Frequency Coordination Panel has agreed a frequency of 437.575 MHz for the UK STRaND-1 CubeSat. This satellite will carry a Smartphone and plans to have a UOSAT style speech synthesizer and a 9600 or 19200 bps AX.25 packet downlink.

STRaND-1 is a 3 unit mini-bird measuring only 30 by 10 by 10 cm. and weighing 4 kg. Unlike previous CubeSats STRaND-1 will feature full 3-axis control with the attitude an orbit control system comprising a nano-magne-torquer, nano-reaction wheels, GPS receiver, 8 pulse plasma thrusters and a butane thruster.

A six page article on STRaND-1 appeared in the Spring issue of OSCAR News available at tinyurl.com/strand-one. (M5AKA)

VICARIOUSLY IN SPACE: NEW NASA WEB SPACE RIDE ALONG

NASA is giving the public the power to vicariously journey through the solar system using a new interactive Web-based tool. The "Eyes on the Solar System" interface combines video game technology and NASA data to create an environment for users to ride along with agency spacecraft and explore the cosmos. Screen graphics and information such as planet locations and spacecraft maneuvers use actual space mission data. You can begin your ride at solarsystem.nasa.gov/eyes (ANS)

HAM RADIO AND THE WWW: HAM RADIO DELUXE WILL CONTINUE

Development of the very popular Ham Radio Deluxe software suite will continue. This with word that its current developer, Simon Brown, HB9DRV, has accepted an offer from Mike Carper WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC, to purchase the source and rights to it.

Ruhl has blogged via QRZ dot com and Facebook that they plan to continue the development and support of this fine product. Among their plans appear to be a new Digital Desktop for certain Alinco, Icom, Kenwood and Yaesu radios. This would allow the use of a single USB cable to interface with select radios or a full version for MFJ, Kantronics or AEA Terminal Node Controllers. This in turn would permit faster access for emergency communications operators to their Packet TNC's.

As to when a new edition of Ham Radio Deluxe will be made available? Ruhl, who owns W4PC Software says to be please patient. A formal announcement will be forthcoming in the not to distant future. (W4PC via QRZ and Facebook)

HAM RADIO ON THE WEB: ADIF SEARCH WIDGET AVAILABLE FROM DH9SB

And DH9SB has announced that because more and more DXpeditions use Wordpress, that he has written a widget for Wordpress that can do a search for callsigns in the operations logs. It supports more than one callsign and references. Also, the log can be uploaded as A-D-IF to different electronic logbooks. More information on this software plug-in is available at tinyurl.com/wordpress-widget. (DH9SB)

WORLBEAT: SOUTH SUDAN TO MOVE ITS CAPITAL CITY

South Sudan's Information Minister Marial Benjamin says the new nation is planning to move its capital from the bustling but crowded city of Juba to a town that offers ample room to expand.

Marial Benjamin released a statement on Sunday, Septembr 3rd that said the government has secured more than 15 square miles of land in the town of Ramciel, which he says lies along the Nile River in Lakes State. The current capital of Juba, in the south, only allocated less than 2 square miles. Benjamin says the plan's implementation will take several years.

Deputy speaker Daniel Awet Akot added the new capital city is located some 150 miles north of Juba. The South Sudan became independent in July after a January referendum. It came to the ham bands with the ST0R DXpedition which racked up over 121,000 QS0's in its time on the air this past July 22nd through August 10th. The ARRL approved the ST0R operation for DXCC credit on August 5th. (Southgate)

DX

The long awaited 4W6A Timor - Leste DXpedition should be fully operational by the morning of September 17th, UTC time. The team will be active as 4W6A from Atauro Island 160 through 10 meters, using CW, SSB and RTTY with up to four stations simultaneously. MM0NDX is their pilot station for the operation and may be contacted at dxer59 (at) gmail (dot) com. QSL as directed on the DXpedition website at www.4w6a.com.

WB6OJB and K5LBU will once again be active from Lesotho as 7P8JK and 7P8CF, respectively. This, through September 22nd. In their last operation WB6OJB was on the 40 through 10 meters using mostly SSB with some CW. K5LBU will probably be mainly on PSK31 and RTTY. QSL via their home callsigns.

IN3VZE will once again be active from Malawi as 7Q7CE from the shack of his friend 7Q7HB through and October 3rd. His operation will be holiday style on 80 through 10 meters using SSB and RTTY. QSL via his home callsign, by the Bureau or direct.

JK1KSB, will once again be operational as 8Q7SO from Mirihi Island in the Maldives between October 28th and November 4th. His activity will also be holiday style on 80 through 10 meters using CW, SSB, RTTY and PSK31. QSL via his home callsign.

N1SNB will be active as 6V7V from La Somone, Senegal during the CQ World Wide DX CW Contest on November 26th and 27th. Outside the contest he plans to be on 160 and 80 meter CW and SSB from November 23rd to the 29th. QSL via N1SNB.

Lastly, Members of the "Holyland DX Group" will be active as 4X5A from Akhziv Island between 0700 UTC on Friday, October 21st through 1200 UTC on Saturday, October 22nd. Operation will be on 40 through 10 meters using CW and SSB. QSL via 4Z5LA.

THAT FINAL ITEM: HERE COMES THE BRIDE - ON ATV

And finally this week the story of a couple that will soon be getting married with a world wide audience. This thanks to fast scan amateur television. Robert Broomhead, VK3DN, of the W-I-A News spent some time with the happy couple and learned a lot more:

--

Audio report only. To hear it please download the MP3 version of this newscast at www.arnewsline.org

--

Our congratulations to Emily and Matthew and thank you for sharing the wonderful day iin your lives with all of us.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Don Wilbanks, AE5DW, saying 73 and we thank you for listening.

BOOKS: REVIEWS & VIEWS
11/9
THE BIG LIE

OF THE MANY EVENTS marking the first
anniversary of the 9/11 attacks, the most
peculiar one was the book '9/11 The Big Lie',
the English edition of a French best seller.
- 9/11: The Big Lie
- Thierry Meyssan
- Carnot Publishing Ltd.
London, United Kingdom
- 2002, Pp. 236
It asserts that the official version of the
tragedy is a total fabrication of the US
government. The events of 9/11 were
devastating. This book does not try to refute these facts. The book
seriously
challenges the official version of these facts concocted.
In fact, the book brings forth several other ideas backed with
incontrovertible factual and logical evidence. When both these
versions are
juxtaposed, one wonders as to how the Government was restive to
exploit
this human tragedy for advancing its own war agenda.
The Big Lie argues, among other things, that no airliner crashed into
the
Pentagon (the 757 airline) as no piece of the plane is ever recovered
(historic,
in the sense, that after crash for the first time no pieces of the
cashed plane
were founded on American soil). And that the planes that hit the World
Trade towers were steered by remote control and that the towers fell
because of explosives planted in the bases of these towers.
'The Big Lie' of Thierry Meyssan of the Voltaire Network, France, is
based
on the US government documents, statements of the US citizens,
military
junta, observers and independent analysts and commentators.
An attentive observer of international affairs, the author is
intrigued by
the anomalies in the first photographs released after the attack on
the
Pentagon, followed by the confusion and contradictions in official

statements--including those about the events at the World Trade Centre. He
thus carried out his own investigation, which led him from surprise to
surprise, each more astonishing and terrifying than the last. Most crucially,
the author contends that these attacks were plotted not by Osama bin Laden
but by a clique of right-wingers in the US military. Qadar Bakhsh Baloch The Dialogue
143
In The Big Lie, the author closely examines the details of the events of
that fateful day and the result is a story which makes one realises that what
a thing looks is always deceptive. Nothing in his book goes
unsubstantiated--he refers only to official documents published by the
White House and the US Department of Defense and statements made by
leaders to the international press.
The book is categorised into three distinct parts, containing 11 chapters.
The first part, 'The Bloody Stage is Set', comprises of four chapters.
CHAPTER ONE, 'The Pentagon's Phantom Plane', unfolds the attack on
Pentagon, which had signaled the world over that invincibility of the United
States has become vulnerable even on its own soil.
Firstly, he looks at the events at the Pentagon that day: eyewitness
reports, official statements and new eyewitness reports; transcripts of
hearings held by the Senate Armed Services Committee and a press
interview with various civilian and military authorities. The author quotes
different reports on the attack, each contradicting others. Some extracts for
instance:
On 11 September 2001, shortly before 10:00 AM (the Washington's time),
Secretary Rumsfeld of Defense voiced concern for the families of injured
and killed, directing operation from his command centre at the Pentagon.
No mention of the attackers and kinds of attack was made in the statement.
The following examples from the book highlight the fractures in the
fabrication.
First on the scene Reuter's news agency announced that the Pentagon
had suffered damage from a helicopter explosion which was laterally
corrected by the DoD, saying that a plane was involved.
The security arrangements protecting the Pentagon included:
i. Anti aircrafts defences, five batteries of missiles installed on the
top of Pentagon;

ii. Two F-16's and F-18's fighter squadrons stationed at Presidential airbase of Saint Andrew.
Questioned On September 13 by the Senate Armed Services Committee, the Chairman of the Joint Chiefs of Staff, General Richard Myers, was unable to report on the measures taken to intercept the Boeing or any other
attack on Pentagon.
"Whereas, North American Aerospace Defense Command (NORAD)
issued a press release on 14th
September, claiming that it only
received warning of the hijacking at 9:24 am, and assured that it had immediately ordered two F-16 fighters from the Langley Air Force base in Virginia to intercept the Boeing. But the air force could not locate it."
Should we believe that US military's radar system was incapable of locating a Boeing within a zone of only a few miles of radius? 9/11 The Big Lie The Dialogue
144
Why did the anti aircraft defense system deployed to protect Pentagon, let the Boeing approach the Pentagon's inner circle?
Are we really to believe that the armed forces of the United States remained passive during the attacks (spread over nearly two hours)?
"To recap the official version: a hijacked Boeing eluded the F-16 fighters sent in its pursuit and foiled the anti-aircraft defense system in Washington. It landed vertically on the Pentagon parking lot while remaining in a horizontal position. It struck the façade at ground level. Its nose and fuselage are supposed to have penetrated into the building. One of its wings, perhaps both of them, burned outdoors, while the fuselage disintegrated inside. The fuel, stored in the wings, burned just long enough to start a
fire in the building, and then was transformed to a puddle which moved itself to the spot where the plane's nose supposedly came to a halt. . . .
The official version is only propaganda. But the facts remain that 125 passengers died at the Pentagon and that an airplane carrying 64 passengers disappeared."
They say an airliner crashed into the Pentagon, but if so, why isn't there
the debris of an airliner crash at the scene of the attack on Pentagon?
The façade of the Pentagon was damaged along 19 meters, but a Boeing's wingspan is at least 38 meters.
The DoD says that the entire plane and its contents were consumed by the fire,
which would be the first time that has happened in aviation history, and would defy
the laws of physics if the fire was caused by jet fuel.
What caused the explosion that damaged the Pentagon?
The damage caused to the interior of Pentagon is too deep and too

collimated to
be from the liquid fuel of an airliner. Only a shaped-charge warhead
can cut a
circular hole in a wall after going through 3-m of poured concrete.
The easiest way to cause the greatest amount of damage to the Pentagon
would
have been that, the Boeing should have dived into the Pentagon roof as
the building
covers the surface of about 29 acres. Instead the terrorist chose to
strike on of the
façade and despite its weight (100 tons) and its speed (between
250-440mph) it only
destroyed the first ring of the building. (It looks as if the
terrorists were on a
courtesy visit).
What became of American Airlines flight 77?
Are the passengers dead?
If so, who killed them and why? If not, where are they?
What does Thierry Meyssan think of having happened at the Pentagon?
Meyssan begins by looking closely at photographs of the section of the
Pentagon reportedly hit by the Boeing 757. If a plane of this size
crashed
into the Pentagon wall, why did it make such a small hole? The hole
may
have admitted the plane's fuselage but certainly not its wings. What
happened to the wings? The fragments one would expect to see scattered
over the area outside the Pentagon wall are not there. Meyssan
concludes Qadar Bakhsh Baloch The Dialogue
145
that the Pentagon was hit not by a large airplane but by a missile
fired from
a plane that roared away.
Because the plane penetrated the Pentagon airspace without being fired
on, Meyssan apprehends that the missile was launched from a US
military
aircraft, transmitting a friendly code and as such could enter
Pentagon
airspace without disturbing the counter-missile protection of the
Pentagon.
In concluding remarks of the first chapter Meyssan raises some
questions
and so lays the foundations of the next chapter.
"If the Bush Administration faked the attack on the Pentagon to
cover up certain internal problems, did it also dissemble
concerning some elements of the attacks that occurred at the
World Trade Center?"
IN CHAPTER TWO, Thierry Meyssan tries to high-light the attacks on New
York World Trade Center (WTC) by sorting interviews and comments from
pilots, engineers and other specialists in the relevant fields. He
tries to prove

that the planes that hit the WTC towers were probably guided to their targets by radio signals that beamed from inside the towers, and the buildings fell not simply from the explosion of the planes' fuel but also
because dynamites had been placed inside the towers. Though all these points are supported by the remarks of observers or of outside specialists,
none of them have been investigated mainly because the government immediately foreclosed the possibility of examining these hypotheses by
projecting and propagating absolute certitude that the attacks were conducted by Al Queda, a terrorist organisation.
Besides, twin towers, the 47 story WTC building 7 was leveled in 8 seconds, seven hours after the twin towers came down. As it had neither
been hit by any plane nor sustained any significant damage from the "collapse" of the twin towers earlier two buildings away, why did the building collapsed? The videos clearly show that it was a controlled demolition. Here is a list of questions that agitate the reader's mind.
How did the WTC planes manage to hit their targets with such accuracy?
What are the possibilities of radio beacons being activated in the towers
to guide the planes to their targets?
It would be the first time in history that a fire has ever caused the collapse of a steel building--the theory fails to account for at least four other
major phenomena connected with the collapse.
First, the flight 175 hit the south tower at a close angle that caused most
of the plane's fuel to exit and ignite outside the building. Both the towers
however collapsed in precisely the same fashion.
Secondly, if jet fuel caused both buildings to collapse, how was it possible for the south tower to collapse 30 minutes ahead of the north tower,
given that the north tower was struck 20 minutes before the south tower? 9/11 The Big Lie The Dialogue
146
Thirdly, why did a fire continue to burn at a constant three thousand degree temperature below the debris of the WTC for a little over three weeks, when the lower levels were composed mostly of concrete and, being
smothered, lacked oxygen to keep the fires alive?
How did the towers collapse?
Experts maintain that explosives could only initiate such a collapse. Firefighters on the scene say they heard explosions on the ground level.
What was tower 7?
How did that building collapse, being separate from the twin towers

and
still stable after the attacks?
Did it house a secret CIA base? Is that why it too was destroyed?
Why was there less than the usual number of occupants in the twin
towers on that particular day?
Who initiated the email warning to the occupants of the offices in the
towers two hours before the attacks?
How did US the President George W Bush come to watch the first tower
being hit before his appearance in a classroom in Florida? How is it
that he
saw the first plane hit the northern tower when these were supposed to
be
surprised attacks?
According to his own statement, Andy Card his Chief of Staff,
whispered
in his ear (while sitting in side the class) that the second tower is
also hit.
Chapter two ends with the statement of Bush followed by a question by
the
author:
"The first plane hit the north tower at about 8:45 am and the
second plane hit the southern tower at 9:03 am with the interval of
just 18 minutes. According to his own declaration, the President of
the United States saw pictures of the first crash in Florida school
before the second plane had struck the second tower. It must thus
have been secret images transmitted to him without delay in the
secure communications room that was installed in the elementary
school in preparation for his visit."
This statement of The President Bush generates certain questions. Did
the CIA have foreknowledge of the attack?
If US intelligence services could have filmed the first attack that
means they
must have been informed before hand. And in that case, why didn't they
do
anything to save their fellow countrymen? All this took place under
the eye
of intelligence services that observed but did not intervene.
After seeing the pictures of first hit, what actions were taken by the
President? Why did he take it so normal and a routine matter that he
went
inside the class room to lecture the kids? Was the President
psychologically
incapacitated or was it planned to ignore the happening?
"Could an operation of this nature have really been conceived and
directed from a cave in Afghanistan, and then carried out by a
handful of Islamic militants?" Qadar Bakhsh Baloch The Dialogue
147
CHAPTER THREE, Moles in the White House, reveals some of the clearest
proof
that 9/11 was an act of the US sponsored terrorism comes from a close

examination of the Pentagon Attack.
"The press on 12 and 13 September claimed that, according to Presidential spokesman (Ari Fleischer) the secret service received a message from the attackers indicating that they planned to destroy the White House and Air Force One. Even more surprisingly, according to the New York Times, the attackers established the credibility of their call by using the Presidential identification and transmission codes and other important Government agencies" (p.43). What so ever the case may be, the business of the codes reveals that there exists some traitors at the highest levels of the American state apparatus."
Another fact, which disappeared from the official version, was the firebreak in white house annex. ABC did broadcast live images of this fire on 11 September, at 9:42 AM.
The reader, reviewer of the book inquires:
1. What was going in the White House on this particular day?
2. Was there an attempted coup d'etat or at least a "palace coup" which involved people who knew the Presidency's transmission and authentication codes?
CHAPTER FOUR projects the performance of FBI and other intelligence and security agencies, which constitute the hallmark of the US. The masterpiece of their investigation blitzkrieg was locating of the operation leader "Atta" who at the last moment left his suitcase full of clues in transit between the two connecting flights. The bag contained training videos on piloting Boeing aircraft, a book of Islamic prayers and an old letter in which he announces his intentions to die as martyr. His presence in the Kamikaze was further confirmed by his passport, which was found intact in the smoking ruins of WTC.
I should ask over here about the probability of the following: Why did Atta burden himself with baggage when he was about to commit suicide? Despite all the efforts, America failed to find out any one out of the four black boxes of hijacked aircrafts but FBI was lucky enough to discover Muhammad Atta's passport intact in the smoking debris of WTC. (Fire melted thousands of tons of steel, but somehow preserved the passport).
Another amaising element that catches our attention is that although all the US agencies were unable to prevent the terrorists from committing this crime against humanity even in years, they were somehow able to piece things together within hours and determine with certainty that these terrorist attacks were conducted by Osama bin Laden and his Al Queda

network.
The list of 19 hijackers the FBI intelligence designated as the masterminds or terrorists of 9/11, all are Arab-Muslims of between 25-35 9/11 The Big Lie The Dialogue
148
years age. Out of this list five have been found alive in their own countries.
Moreover none of the hijacker's name is there in the list of victims published
by the airline companies on September 13.
The stock exchange was extremely busy in the weeks ahead of the attacks. Interestingly enough, it involved insider trading targeting all the
airline companies who had planes hijacked on that day, including companies who had offices in the WTC buildings and the insurance companies involved in the post 9/11 claims. The Securities and Exchange
Commission of Chicago raised an alert after noticing this, which apparently
prevented insiders from collecting another 2.5 million USD on their deals.
Given the unprecedented means of investigation at its disposal, the FBI
should have devoted itself to elucidating each of the contradictions that
have been raised above.
For instance:
* Should have tracked down the insider financial dealers who had made the capital gains through the stock of victim airlines few days before 9/11;
* Should have established what really happened at the Pentagon;
* Should have discovered the source of the message sent to Odigo warning occupants of the WTC two hours before the attack took place;
* Why the evidence like the indisputable fact that a number of the 19 supposed hijackers are still alive and well, is being ignored? Seven of the supposed hijackers turned out to be alive and not even in the US on 9/11. Three of the hijackers listed at the US Navy base as per their driving licenses.
IN CHAPTER SIX, the author unfolds the story of preparations and prayers for
the holy war undertaken in the National Cathedral.
"An unprecedented ceremony took place in the National Cathedral. President and Mrs. Bush, four former Presidents (Bill Clinton, George Bush, Sr., Jimmy Carter, and Gerald Ford) and nearly all of Congressmen got together in prayer. A cardinal, a rabbi, and an imam all took turns in leading the proceedings. The most famous TV evangelist in the world, Pastor Billy Graham, who had converted George W. Bush fifteen years earlier, pronounced a homily . . .. We also know that God is going to give

wisdom and courage and strength to the President and those around him. And this is going to be a day that we will remember as a day of victory. . . .
President Bush then mounted to the pulpit and also delivered a sermon...prepared by his adviser, the fundamentalist Biblical scholar Michael Gearson: '...Our responsibility to history is already clear: to answer these attacks and rid the world of Evil'. . . .
(Pp75-
76) Qadar Bakhsh Baloch The Dialogue
149
The Washington Post would later analyze the metamorphosis of George W. Bush: 'For the first time since religious conservatives became a modern political movement, the president of the United States has become the movement's de facto leader--a status even Ronald Reagan...never earned'.
At noon on 14 September, following the prayer by the President of the United States, the 43 states of the Council of Europe (including Russia) and many other countries on all continent, observed three minutes of silence in memory of the victims of the attacks.... Neither the psychological shock, nor the respect that one might feel for the deceased, can explain this intense religious fervor...There was moreover no historical precedent of an American president pronouncing a declaration of war in a cathedral." (p77)
It may not be out of place to quote the two of the highly influential Christian
leaders to show that how religious rhetoric serves political and military interests.
God Almighty has withdrawn his protection from us, because we wallow in the
search for material pleasures and sex reverend Pat Robertson.
Falwell blamed the American Civil Liberties Union (ACLU), and the federal courts on Fox Channel:
"The abortionists have got to bear some burden for this because God will not be mocked." "And when we destroy 40 million little innocent babies, we make God mad. I really believe those pagans, and the abortionists, and the feminists, and the gays and the lesbians who are actively trying to make that an alternative lifestyle, the ACLU, all of them who have tried to secularize America, I point the finger in their face and say, 'you helped this happen."
IN Chapter SEVEN describes the death story of basic human rights enshrined in
USA constitution through Bill of Rights since 1792. Just 45 days after the
September 11 attacks, with virtually no debate, Congress passed the USA
PATRIOT Act. Many parts of this sweeping legislation take away checks on
law enforcement and threaten the very rights and freedoms. For

example,
without a warrant and without probable cause, the FBI now has the
power
to have access to your most private medical records, your
library records,
and your student records... and can prevent anyone from telling you it
was
done.
The USA PATRIOT Act showers abundant new law enforcement powers on
federal agents. Most of its provisions are not limited to terrorism
offenses,
but instead apply to all federal investigations; among the most far-
reaching
provisions in the law are the following:
* It permits the Attorney General to detain non-citizens based on
mere suspicion, and to deny re-admission to the United
States of
non-citizens (including legal, long-term permanent residents) for
engaging in speech protected by the First Amendment; 9/11 The Big Lie
The Dialogue
150
* It minimises the power of the courts to prevent law enforcement
authorities from illegally abusing telephone and Internet
surveillance in both anti-terrorism investigations and ordinary
criminal investigations of American citizens;
* It expands the authority of the government in both terrorism and
non-terror investigations to conduct so-called "sneak and peek" or
"black bag" secret searches, which do not require notification of the
subject of the search;
* It grants the FBI and, under new information sharing provisions,
many other law enforcement and intelligence agencies broad access
to highly personal medical, financial, mental health and student
records with only the most minimal judicial oversight;
* It permits law enforcement agents to investigate American citizens
for criminal matters without establishing probable cause based on
an assertion that the investigation is for "intelligence purposes";
* It puts the CIA firmly back in the historically abusive business of
spying on Americans by giving the Director of Central Intelligence
broad authority to target intelligence surveillance in the United
States; and
* It empowers the Attorney General to detain a non-citizen if he
believes there are "reasonable grounds to believe" the individual
may be a threat to national security. The suspect may be detained
for seven days before criminal or deportation charges are brought,
but thereafter may be detained indefinitely in six-month increments
without meaningful judicial review.
CHAPTER EIGHT blames bin Laden for 9/11. It tells us how a few hours
after
the terrorist attacks on the WTC and the Pentagon, the Bush
administration

concluded without a supporting evidence, that "Osama bin Laden and his Al
Queda organisation were prime suspects". The CIA Director George Tenet
stated that bin Laden has the capacity to plan "multiple attacks with little or
no warning". Secretary of State Colin Powell called the attacks "an act of
war" and publically called bin Laden a "suspect". President Bush confirmed
in an evening televised address to the Nation that he would "make no
distinction between the terrorists who committed these acts and those who
harbours them".
The book also uncovers the relationship between Bin Laden, his family,
CIA, the Carlyle Group and the Bush family. It narrates different operations
conducted by Bin Laden in collaboration with CIA and against the wishes of
CIA. Ineffectiveness of CIA's actions to punish OBL breeds doubts in the
reader's mind that OBL is not an enemy but an agent of the USA. Freezing of
assets and banning of various firms/organisation suspected for any form of
linkages with OBL on one hand and continued operation of Carlyle Group
Qadar Bakhsh Baloch The Dialogue
151
managing financial assets of Bin Laden Group on the other points to
something different. Chapter ten touches upon the operation "Enduring
Freedom" and unmasks the true face of the "most humane civilization"
which succeeded in imprisoning the "most dangerous terrorists" in the
military base of the Guantanamo Bay (Cuba). These bare footed terrorists
were brought by plane from Afghanistan after having been dragged and
chained to their seats. Where they are subjected to sensory deprivation,
blindfolded ness, with muffled ears, and plugged noses. They are denied
the status of POWs.
Why is the coalition bombing Afghanistan, when none of the alleged
bombers actually came from there, could there be another reason for USA
presence in that region, like oil?
CONCLUSION
AT THE END Thierry Meyssan concludes his hypothesis that the attacks were
plotted not by Osama bin Laden but were masterminded from inside the
American state apparatus. Nevertheless this conclusion may shock and
offend many because it pains to contemplate the idea that American

could
cynically sacrifice almost three thousand of their fellow countrymen.
Yes, it
is very much possible, in the past a US Chief of Staff had planned a
campaign of terrorism against their own population.
Author James Bamford in 'Body of Secrets' highlights a set of
proposals on
Cuba by the Joint Chiefs of Staff codenamed Operation Northwoods.
This
document, titled 'Justification for U.S. Military Intervention in
Cuba', was
provided by the JCS to Secretary of Defense Robert McNamara on March
13,
1962. Written in response to a request from the Chief of the Cuba
Project,
Col Edward Lansdale, the Top Secret memorandum describes US plans to
covertly engineer various pretexts that would justify a US invasion of
Cuba.
These proposals, part of a secret anti-Castro program, known as
Operation
Mongoose, include staging the assassinations of Cubans living in the
United
States, developing a fake "Communist Cuban terror campaign in the
Miami
area, in other Florida cities and even in Washington," including
"sinking a
boatload of Cuban refugees (real or simulated)," faking a
Cuban air force
attack on a civilian jetliner, and concocting an incident by blowing
up a US
ship in Cuban waters and then blaming the incident on Cuban sabotage.
In the epilogue the author sums up the beneficiaries of the episode as
follow:
* The energy lobby is the main beneficiary of the war in Afghanistan;
* George Bush could denounce the ABM Treaty, which fixed limits to the
weapons development.
* Rather than dismissing the Director of CIA on its apparent failure
on
9/11, the agency funding was increased by 42% to enhance its
capacity to conduct "Worldwide Attack Matrix"; 9/11 The Big Lie The
Dialogue
152
* The military budget of US, which has been steadily reduced since the
dissolution of USSR has undergone to a sudden increase. Over the
five years the US budget will represent more than two trillion dollars
equal to combined total for the twenty-five next biggest armies in the
world;
* Military industrial lobby was the great victor of September11.
Meyssan's final conclusion is that the main purpose of the internal
plot in the US was to get increased funding for the military,

especially
for weapons in space, a prime tool in the hands of US imperialism.
The American Administration is on the way to announce plenty of
"blood, sweat and tears". It remains now to be seen who else than Iraq
will
bear the brunt.

Don't you have something better to be doing, tholen?

3413. Colonel Mark Morgan...The Big Lie

Newsgroup: rec.radio.amateur.policy
Date: 2011-09-18 06:30:16 UTC
From: Anon <anon@anon>
Message-ID: <510omk.73h.17.1@news.alt.net>
Source record: 247734

He was a Colonel in the US Army...he said.
Then he backtracked and said he was a Lieutentant.
Said that the Army "drafted" him and gave him an Officer's Commission.

Turns out that there is no record of Mark ever being in the military.

He said that he has three college degrees, but can't name a single college
he attended.

How do you spell LIAR?

Mark Morgan.

189> thank you for adding to my post count

What does your post count have to do with rec.radio.amateur.misc,
alt.slack,alt.usenet.kooks,comp.os.os2.advocacy,
rec.radio.amateur.policy, persent?

"so , bye bye tholen , take care"
--persent

And some people wonder why I call them Famous Last Words.

==> + ON THE AIR: RADIO AMATEURS TAKE TO THE AIR TO SUPPORT NATIONAL
WILDLIFE REFUGE WEEK

Amateur Radio operators will be on the air in observance of the 2011
National Wildlife Refuge Week, October 8-16. This event will coincide
with festivals and special events at refuges that help connect people
with nature at the country's more than 500 National Wildlife Refuges.
Radio amateurs are helping spread the word about the National Wildlife
Refuge System by operating from refuges during National Wildlife Refuge
Week. This event is a chance to combine Amateur Radio's communication
capabilities with enjoyment of the outdoors, while helping others learn
about the National Wildlife Refuge System (NWRS). Hams will highlight
refuge features, wildlife and geography when making contact with other
stations across North America. Operators will make contact using SSB,
```

CW and various digital modes, including RTTY and PSK31. Read more here <http://www.arrl.org/news/radio-amateurs-take-to-the-air-to-support-national-wildlife-refuge-week>.

==> + ARRL RECOGNIZES: 2010 ARRL TECHNICAL EXCELLENCE AWARD WINNERS ANNOUNCED

Joe Taylor, K1JT, and Bruce Walker, W1BW, are winners of the 2010 ARRL Doug DeMaw, W1FB, Technical Excellence Award for their article "WSPRing Around the World" that appeared in the November 2010 issue of QST. Established in 1975 as the ARRL Technical Excellence Award, the name was changed in 1997 to honor the late Doug DeMaw, W1FB, a former ARRL Headquarters technical editor and well-known Amateur Radio author. The award consists of an engraved 9 inch pewter cup.

Joe Taylor was first licensed as KN2ITP in 1954, and has since held call signs K2ITP, WA1LXQ, W1HFV, VK2BJX and K1JT. He was Professor of Astronomy at the University of Massachusetts from 1969 to 1981 and since then Professor of Physics at Princeton University, serving also as Princeton's Dean of the Faculty from 1997 to 2004 and retiring in 2007. He was awarded the Nobel Prize in Physics in 1993 for discovery of the first orbiting pulsar.

Bruce Walker has a Bachelor in Science degree in Physics from the Massachusetts Institute of Technology and is the Director of Genome Assembly and Analysis at the Broad Institute in Cambridge, Massachusetts. Bruce was an avid shortwave listener in his youth and became a ham in 1991. His involvement in Amateur Radio has gone through several phases: homebuilt QRP, amateur satellites, early computer-based digital modes (PSK31, MSFK, etc), and occasional contesting. Read more here <http://www.arrl.org/news/2010-arrl-technical-excellence-award-winners-announced>.

==> ON THE AIR: YAESU DONATES FT DX 5000 HF/6 METER TRANSCEIVER TO W1AW

Thanks to the generosity of Yaesu <http://www.yaesu.com/>, W1AW <http://www.arrl.org/w1aw.html>, the Hiram Percy Maxim Memorial Station, now boasts Yaesu's premier transceiver -- an FT DX 5000 <http://www.yaesu.com/indexVS.cfm?cmd=DisplayProducts&ProdCatID=102&encProdID=12FF98B9C73C8988F2398C979793E2E1&DivisionID=65&isArchived=0> and SM-5000 Station Monitor. Dennis Motschenbacher, K7BV, Executive Vice President for Yaesu's Amateur Radio Sales Division, visited ARRL Headquarters on August 26 to present the radio. ARRL Chief Executive Officer David Sumner, K1ZZ, accepted the radio on behalf of the station. Sumner also serves as W1AW trustee.

"Yaesu is thrilled to continue its long support of the ARRL by donating our new premium class FT DX 50000 transceiver," Motschenbacher said. "We understand this transceiver scored some of the best receiver performance numbers every measured during ARRL Lab product testing, so ARRL Headquarters guests will now be able to slip into one of the W1AW

operating studios to get on the air and spin the knobs on one of the best of the best radios ever manufactured for the enjoyment of Amateur Radio."

W1AW Station Manager Joe Carcia, NJ1Q, thanked Yaesu for their donation of the FT DX 5000 transceiver to W1AW: "This radio is installed in Studio Three and is available for use to Amateur Radio operators visiting W1AW. The Yaesu Quadra amplifier, DMU-2000 and Yaesu SM-5000 Station Monitor are all attached and make for an excellent operating spot. The FT DX 5000 certainly complements the station."

Motschenbacher, who worked at ARRL HQ before moving to Yaesu, remarked that returning to Newington to make the presentation "was a wonderful personal experience for me. I was so happy to see many old friends inside HQ, friendships made during the four and half years I spent with ARRL before joining Yaesu. It didn't take me long to see that the staff is very busy supporting its membership and Amateur Radio as a whole!"

==> + FCC NEWS: FCC UPHOLDS $17,000 FORFEITURE ORDER TO TENNESSEE HAM

In March 2009, the FCC issued a Notice of Apparent Liability for Forfeiture (NAL) in the amount of $17,000 to David Edward Perka, KA3PRB, of Lewisburg, Tennessee. The FCC alleges that Perka "willfully and repeatedly violat[ed] section 301 of the Communications Act of 1934, as amended, by operating without a license in the Maritime Radio Service and willfully violat[ed] Section 333 of the Act by maliciously interfering with the United States Coast Guard on the International Distress, Safety and Calling Channel in Annapolis, Maryland." Perka, who admitted to the findings, requested a reduction in the forfeiture amount, based on his inability to pay, but in a Forfeiture Order released by the FCC on September 21, 2011, the Commission refused to lower the amount. Read more here <http://www.arrl.org/news/fcc-upholds-17-000-em-forfeiture-order-em-to-tennessee-ham>.

==> + ARRL SEEKS TREASURER

After more than 31 years of distinguished service to the ARRL as its volunteer Treasurer, Jim McCobb, K1LU, has decided to step down when his current term expires in January 2012. The ARRL is seeking qualified candidates from among its membership. The Board of Directors elects the Treasurer and other officers at its Annual Meeting in even-numbered years.

The Treasurer is a non-voting member of the Board of Directors and must be a licensed radio amateur and a Full member of the ARRL for four continuous years prior to nomination. The ARRL By-laws <http://www.arrl.org/arrl-by-laws> define the role of the Treasurer as follows:

- In consultation with and subject to the general supervision of the Administration and Finance Committee, provides for the investment and reinvestment of the surplus funds of the League in any bonds or stocks

or other securities as would be selected by a trustee with the care of a prudent investor.
- Reports to and attends all regular meetings of the Board of Directors.
- Serves as a member of the Administration and Finance Committee.

The position is unpaid; however, necessary expenses including travel to meetings are reimbursable.

A Search Committee has been established to recommend one or more candidates for Treasurer to the Board. Additional information about the position is available here <http://www.arrl.org/files/media/News/ARRL_Treasurer-Position_Description.pdf>.
Interested and qualified members are invited to submit a Statement of Interest and qualifications by November 14, 2011 to the Secretary, preferably by e-mail <dsumner@arrl.org>.

==> HAYS AFFINITY GROUP PROVIDES ARRL MEMBERS WITH EQUIPMENT PROTECTION, CLUB LIABILITY INSURANCE PLANS

On May 1, 2011, the ARRL began a new partnership with Hays Affinity Group to provide its ARRL-sponsored Equipment Insurance and Club Liability Insurance plans. Hays -- who took over from Marsh Affinity Group Services -- serves as the program administrator to provide equipment insurance to ARRL members who choose to elect coverage. In addition, Hays will also provide club liability insurance to ARRL Affiliated Clubs for those clubs that wish to take advantage of that program. Hays has introduced new policies for both plans, underwritten by the Hanover Insurance Company. Read more here <http://www.arrl.org/news/hays-affinity-group-provides-arrl-members-with-equipment-protection-club-liability-insurance-plans>.

==> + HB9DRV SELLS RIGHTS TO HAM RADIO DELUXE

Simon Brown, HB9DRV, has sold the rights to his popular Ham Radio Deluxe software package to a group consisting of Mike Carper, WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC. All three principals have more than 25 years of experience with radio data communications. Rick Ruhl is the president of W4PC Software, Inc whose products include the PakRatt, PKTerm and Radio Operations Center software suites. Randy Gawtry is the president of Timewave Technology Inc whose products include the PK and DSP families of data controllers and other commercial data products. Mike Carper is an experienced Fortune 500 technology executive, educator and featured speaker in the areas of wireless technologies and IT Service Management. Read more here <http://www.arrl.org/news/hb9drv-sells-rights-to-ham-radio-deluxe>.

==> SOLAR UPDATE

Tad "Somewhere the Sun is shining <http://www.youtube.com/watch?v=Fo0j5a6e8WA>" Cook, K7RA, reports:
Compared to the uneventful past few years, sunspot activity was truly

remarkable this week. The daily sunspot number for September 16 was 173. We haven't see numbers like this in more than six years, when the sunspot number was 181, way back on July 5, 2005 in Solar Cycle 23. The solar flux reached 150.1 on September 18. Just six months ago it was slightly higher, 153 on March 7 and 155 on March 8, but prior to that the only higher number was 157.3 on August 22, 2005, about 7 weeks after the sunspot number of 181. Currently, the solar flux and planetary A index forecast from USAF/NOAA calls for solar flux of 144 on September 22-23, 140 on September 24-25, 145 on September 26-28, 130 on September 29 through October 1, and 135 on October 2-5. The planetary A index is predicted at 5 on September 22-24, 8 on September 25, 5, 8, 5, 5, 15 and 8 on September 26 through October 1, and 5 on October 2-7. Look for more information on the ARRL website on Friday, September 23. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>. This week's "Tad Cookism" is brought to you by The Go-Go's Stuck in My Car <http://www.youtube.com/watch?v=Fo0j5a6e8WA>.

==> + ARRL INVITES MEMBERS TO EXPRESS OPINIONS IN QST

Each month in QST, the ARRL devotes a page to print letters from its members. This is a chance for you to express your opinions -- good or bad -- on ham radio-related matters. Your opinion counts! Send your letters electronically to qst@arrl.org or via postal mail to Correspondence, 225 Main St, Newington, CT 06111. You can also fax your letters to 860-594-0259. We read every letter received, but we can only publish a few each month. We reserve the right to edit your letter for clarity and to fit the available page space. Letters published in QST may also appear in other ARRL media. The ARRL assumes no responsibility for statements made by correspondents.

==> + ON THE AIR: JARL QSL BUREAU HAS NEW ADDRESS

As of October 1, 2011, the Japan Amateur Radio League's (JARL) QSL Bureau will have a new address. If you use the JARL QSL Bureau, please send your QSL cards to JARL QSL Bureau, 1324-3 Kanba, Hikawa-cho, Izumo-shi, Shimane 699-0588 JAPAN.

==> THIS WEEK ON THE RADIO

This week:

- September 23 -- NCCC Sprint Ladder
- September 24 -- AGCW VHF/UHF Contest
- September 24-25 -- ARRL EME Contest <http://www.arrl.org/eme-contest>; Texas QSO Party; CQ Worldwide DX Contest (RTTY)
- September 25 -- UBA ON 6 Meter Contest
- September 26 -- QRP Homebrewer Sprint
- September 27 -- 222 MHz Fall Sprint (local time)
- September 28 -- SKCC Sprint

- September 28-29 -- CWops Mini-CWT Test

Next week:

- October 1 -- TARA PSK Rumble Contest; EU Autumn Sprint (SSB)
- October 1-2 -- California QSO Party; Oceania DX Contest (SSB); WAB HF Phone Contest; EPC Russia DX Contest
- October 2 -- UBA ON Contest (SSB)
- October 3 -- German Telegraphy Contest
- October 4 -- ARS Spartan Sprint
- October 5 -- 432 MHz Fall Sprint1 (local time)

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations Web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- September 24 -- ARRL Washington State Convention <http://www.arrl.org/hamfests/washington-state-convention-35th-annual-spokane-hamfest>, Spokane Valley, Washington
- October 8-9 -- ARRL Florida State Convention <http://www.arrl.org/hamfests/florida-state-convention-melbourne-hamfest>, Melbourne, Florida
- October 9 -- ARRL Connecticut State Convention <http://www.arrl.org/hamfests/connecticut-state-convention-1>, Wallingford, Connecticut
- October 14-16 -- ARRL Pacific Division Convention <http://www.arrl.org/hamfests/pacificon-2011>, Santa Clara, California
- October 21-22 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-texoma-hamarama>, Ardmore, Oklahoma
- October 22 -- ARRL Iowa State Convention <http://www.arrl.org/hamfests/iowa-state-convention-hamboree-2011>, Sergeant Bluff, Iowa
- November 6 -- ARRL Iowa Section Convention <http://www.arrl.org/hamfests/iowa-section-convention>, Davenport, Iowa
- November 19-20 -- ARRL Indiana State Convention <http://www.arrl.org/hamfests/indiana-state-convention-fort-wayne-hamfest-and-computer-expo>, Fort Wayne, Indiana
- December 3-4 -- ARRL West Central Florida Section Convention <http://www.arrl.org/hamfests/west-central-florida-section-convention-tampa-bay-hamfest-1>, Palmetto, Florida

Amateur Radio Newsline(tm) Report 1780 - September 23 2011

Please note that this is an extended Amateur Radio Newsline report and contains three breaks.

Amateur Radio Newsline report number 1780 with a release date of Friday, September 23rd, 2011 to follow in 5-4-3-2-1.

The following is a QST. Ham radio assists as a 145 square mile wildfire rages in an isolated area of Minnesota, IARU Region One looks at a possible change to the QRP Center of Activity Frequency, the DX0DX operation from the Spratley Islands is cancelled due to safety concerns and Soyuz flights to the International Space Station to resume in November. All this and more on Amateur Radio Newsline(tm) report number 1780 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: RACES AND THE BOUNDARY WATERS CANOE AREA FIRE

Hams in Minnesota became a backbone of communications for several days. This as authorities continue to deal with a 145 square mile wildfire that began in mid-August from a lightning strike in a remote area of the state.

The fire is located in an area called the Boundary Waters Canoe Area. This is a very large region along the US and Canadian border in North-East Minnesota where no motorized equipment or vehicles are allowed. Generally, wildfires in remote areas such as this are allowed to burn out as a part of natures own forest renewal. This fire went for several weeks with no problem until a front came through with strong North-West winds and blew it into a lightly populated zone. That in turn brought out a massive firefighting effort.

In a recent news story, WDIO television interviewed Jim Anderson, N0JWA, about the involvement of amateur radio in this emergency. We caught up with Jim a few days later and he told us that hams from Lake County RACES were called out on Tuesday, September 13th when the evacuation of the small fishing town of Isabella appeared imminent:

--

N0JWA: "We been training with all types of drills or activities through the years and the real call came last Tuesday from the Lake County EOC and the Lake County Sheriff. So seven of our guys got their

stuff together, grabbed their go kits and away they went."

--

Also sent to the area was the groups well equipped communications trailer:

--

N0JWA: "We also had a communications trailer that went to Lake County first and they were directed to go up to Isabella. We had hams located there in Isabella, and we also had them in Silver Bay and in Finland (Minnesota). And those were evacuation points."

--

Anderson told Newsline that a formal net was in place to handle health and welfare traffic:

--

N0JWA: "N0MR, he was in a city in-between Duluth and the fire area and he served pretty much as net control. I was on this end here in Duluth prepared to do wgt I would have to do in any calling-out or calling family members o let them know that their relatives, sons, daughters, mothers, fathers, whomever that were up in the fire area were OK."

--

N0JWA that he was preparing to drive up to the fire area to act as a relief net control when word came on Sunday, September 18th that the services of the RACES operators were no longer required. This was because it had begun to rain in the fire area.

Winter weather tends to arrive early in the Northern Latitudes. Hopefully, this seasonal change will help to quickly extinguish this rather fearsome blaze. (N0JWA, N0ZRD)

**

RESTRUCTURING: REGION ONE QRP CENTER OF ACTIVITY COULD CHANGE

The IARU Region 1 High Frequency Committee meeting minutes caused some alarm and confusion over the future of 7030 kHz as the Region 1 QRP center of activity. This relates to the discussion about moving the frequency, and possible further discussion at the Region 1 Interim Meeting in 2013.

It is important to note that these discussion points did not feature in the minutes of the final General Conference Plenary. The question as to whether 7030 kHz is the best frequency for the QRP center of activity was actually raised in the context of discussing a proposal from Germany's Deutscher Amateur Radio Club to change the 40 meter Contest Preferred Segment.

The High Frequency Committee decided that this change couldn't be done without first seeking the views of the Region 1 QRP community. Further discussion across IARU Region 1 is expected over the coming months and years. It's important to remember that any change in the Region 1 plan for any spectrum will in some way eventually impact on Q-R-P operations in Regions 2 and 3 as well. (IARU R-1)

**

DX NEWS: SPRATLEY ISLANDS OPERATION CANCELLED DUE TO SAFETY CONCERNS

Plans to activate Thitu Island in the Spratley group have been cancelled. This due to the deteriorating safety to life and property issues in the South China Sea.

Back in January, some 30 hams had planned to operate for three weeks from the Philippines controlled island using the call DX0DX. Due to the security concerns the DXpedition was put on hold. Now, the Team Leader VK3FY says that it's off for good.

The Spratlys which lie between Vietnam, China, Malaysia, Brunei, and The Philippines is a much sought DX entity. However, VK3FY indicates that having a responsibility for the well being of the operators, he has concluded that the risks outweigh the wants or needs of the hobby. Its well known that personal safety conditions in the region have been deteriorating over the past 12 months.

And we will have more DX news near the end this weeks newscast. (VK3PC)

**

HAM RADIO IN SPACE: NEXT MANNED FLIGHT TO ISS WILL BE NOV 14

NASA and the Russian Federal Space Agency have agreed on a November 14th date for the first manned Soyuz rocket. This following the launch failure of a similar booster carrying a robotic cargo ship last month.

The decision follows an investigation by Russian space officials to identify the source of that failure and ensure it won't plague future launches. It also clears the way for a new three-member crew to launch on a Soyuz to the International Space Station, sustaining the orbiting lab's 10-year streak for a continuous human presence in space.

The two space agencies had temporarily suspended all manned Soyuz flights while Russian engineers investigated the August 24th launch failure that sent the Progress 44 spacecraft packed with food and supplies for the space station. That spacecraft crashed over Siberia shortly after liftoff.

As most listeners know, in the wake of last summer's retirement of NASA's space shuttles, the Russian Soyuz is the only means of transportation for people to and from the ISS. (Various reports)

**

HAM RADIO IN SPACE: THREE ISS CREW MEMBERS RETURN TO EARTH

Meantime, another Russian Soyuz capsule carrying three returning Expedition 27 astronauts from the International Space Station touched down safely in central Kazakhstan on September 16th.

NASA astronaut Ron Garan, KF5GPO, and Russian cosmonauts Andrei Borisenko, RW7LFG, and non-ham Alexander Samokutyayev landed some 93 miles southeast of the city of Zhezkazgan at 10 a.m. their local time. This, after spending 164 days in space on board the International Space Station.

But during re-entry there were some rather tense moments due to a yet unexplained communications breakdown. Repeated calls to the Soyuz TMA-21 capsule from Mission Control outside Moscow, went unanswered for several minutes, well after the craft had de-orbited. Communication was eventually established between the crew and an Antonov fixedwinged aircraft circling the landing site.

Sergei Volkov, UA1OSS, Mike Fossum, KA5AQG and Satoshi Furukawa, KE5DAW, are serving as the current Expedition 29 crew aboard the ISS. (Various reports)

**

ENFORCEMENT: HAM FINED $17000 FOR MARITIME BAND INTERFERENCE

The FCC has told a Tennessee ham that he must pay a $17,000 fine. This after admitting that he transmitted without a license on a United States Coast Guard frequency. Amateur Radio Newsline's Don Carlson, KQ6FM, is in Reno with the details:

--

In an acation date September 20th, the FCC has affirmed a $17,000 forfeiture order issued to to David Edward Perka, KA3PRB, of Lewisburg, Tennessee. This, for willfully and repeatedly violating section 301 of the Communications Act by operating without a license in the Maritime Radio Service and maliciously interfering with the United States Coast Guard on the International Distress, Safety, and Calling Channel in Annapolis, Maryland.

This case goes back to the spring of 2008. At that time agents in the FCC's Columbia Maryland Office alleged that on April 6th and April 7th of that year David Edward Perka operated on Marine Channel 16 or 156.800 MHz, which is the International Distress, Safety, and Calling Channel for stations operating in the Maritime Radio Service.

The unauthorized transmissions on April 6th, 2008 consisted of Perka making threatening statements to the United States Coast Guard. The ones on April 7, 2008 consisted of tones from a Dual-Tone Multi-Frequency keypad.

Although Perka holds an amateur license, the FCC says that he does not hold any form of certification to operate in the Maritime Service. The FCC order says that Perka later admitted to FCC agents that the transmissions on April 6, 2008 were intentionally transmitted to harass the United States Coast Guard. .

On March 27, 2009, the Columbia Office issued Perka a $17,000 Notice of Apparent Liability for Forfeiture. In his response, Perka admitted to the findings leading to the proposed fine. At the same time he requested a reduction based on his inability to pay.

In examining Perka's response, the FCC says that is required to take into account the nature, circumstances, extent and gravity of the violation. Also, with respect to the violator, the degree of culpability, any history of prior offenses and ability to pay.

The FCC says that its Notice of Apparent Liability issued to Perka specifically stated that a cancellation or reduction based on inability to pay will not be considered unless the petitioner provides certain specific documentation. The Commission says that the only documentation Perka submitted was a single unemployment check from the State of Maryland dated April 6, 2009.

After receiving Perka's response the Enforcement Bureau staff provided him an additional opportunity to submit the proper documentation. The regulatory agency says that while it has evidence that Perka received that letter, to date it has received no response. Based on this the FCC says that it has no basis for assessing Perka's financial situation As such a forfeiture in the amount of $17,000 in this matter is warranted in this case.

For the Amateur Radio Newsline, Im Don Carlson, KQ6FM, in Reno.

--

Perka was given the usual 30 days to pay the monetary forfeiture or to file a further appeal. (FCC)

**

ENFORCEMENT: MAJOR REDUCTION IN FINE TO FLORIDA UNLICENSED BROADCASTER

And a follow-up to another case we recently reported on. This involving an unlicensed broadcaster in Florida named Fritzner Lindor who was caught operating on 94.7 MHz in the city of Orange Park.

Back in June 2010, agents from the FCC's Tampa office had traced an unauthorized signal on 94.7 MHz to Lindor's home. During a station inspection, the commission said that Lindor admitted he had purchased the transmitter and operated it without a license. He also admitted

that he knew his actions violated the Communications Act.

Lindor was eventually issued a $15,000 Notice of Apparent Liability. In his response he did prove the fine to be a severe economic burden by submitting the required documentation. In the end the Commission agreed to a dramatic reduction in fine from $15,000 down to only $300. Lindor was given the normal 30 days to pay. (FCC)

**

RADIO RULES: FCC GRANTS CAP-EAS TIME EXTENSION

Broadcasters and cable-casters are issuing a collective sigh of relief. This, with word that the FCC has approved another extension for broadcasters to comply with the Common Alerting Protocol or CAP-EAS deadline.

The new deadline is June 30, 2012 and supersedes the previous compliance date o this coming Sept. 30th. An earlier deadline was extended in March of this year.

The announcement was made at a regulatory session at the Radio Show that was being held this year in Chicago. In its statement the FCC noted that no one can yet comply with the new E-A-S rules because the commission has not finalized all the key technical specifics necessary for receiving CAPformatted alerts. (RW)

**

RADIO RULES: W6TIA ON CAP-EAS PROTOCOL

Meantime, EAS expert Richard Rudman, W6TIA, blogs that FEMA has a plan for how broadcast stations will get domain names or I P addresses that they will need to program in to their Common Alerting Protocol or CAP encoders/decoders. These are the devices which will then "poll" the federal CAP message alerting system. That's how primary stations will get their EAS alert messages to be re-transmitted across the daisy chain.

Rudman says Antwane Johnson, who is the Division Director and Program Manager for FEMA's Integrated Public Alert and Warning or IPAWS System told him that a PIN will be assigned to each of the approved EAS equipment vendors. To receive a PIN, each vendor will need to e-mail FEMA IPAWS requesting the PIN and the structure of the Atom feed URL.

W6TIA adds that once final security checks have been completed, FEMA IPAWS will update the EAS community with the release of the domain names to be used by the broadcaster community. More about the Integrated Public Alert and Warning System and how it might affect you can be found online at www.fema.gov/emergency/ipaws. (RW)

**

RESCUE RADIO: HAM RADIO TO FOLLOW A ZS HIKING GROUP

Ham radio will be used for lifeline and safety communications. This as a group of South African hikers embark on a 12 day hike across some rugged terrain.

The trip begins on the 26th of September at Mount Aux Sauces and end at the city of Boesmansnek. At least two South African radio amateurs will be involved in the mission. Johan Leslie, ZR4CAA, is a member of the hiking group with the base camp station manned by John Longland, ZS6AA.

The bands to be used are 80, 40 and 2 meters. Hams worldwide are being requested to listen out for these call signs and assist if an emergency situation should arise. (SARL)

**

BREAK 2

Coming to you this week from Florida's sunny shores, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM RADIO BUSINESS: HRD VERSION 5.1 TO BE FREE UPGRADE TO REGISTERED USERS

The version 5.1 release of Ham Radio Deluxe will be made available at no charge to registered users when completed. So say Mike Carper,WA9PIE, Randy Gawtry, K0CBH and Rick Ruhl, W4PC.

The trio announced last week that they had acquired the source and rights to the Ham Radio Deluxe suite of software from Simon Brown, HB9DRV. Since then there had been a lot of rumor on the Internet chat sites as to what would happen next.

A lot of that was cleared up with the release of a statement by Carper, Gawtry and Ruhl over the weekend of September 17th and 18th posted on Facebook and other websites. In addition to making version 5.1 a free upgrade to registered users, the trio say that they plan to continue improving Ham Radio Deluxe to keep it as the best ham radio package available.

Whether or not it will remain free after the release of version 5.1 was not discussed in their news release. Right now Carper, Gawtry and Ruhl say that they are in the process of building a development environment for Ham Radio Deluxe. They say that their main concern is to begin by addressing some of the bugs in the existing "To Do List" for the upcoming version 5.1 release. (HRD Team)

**

HAM HAPPENINGS: K9HAM AT THE WINGS AND WHEELS FLY IN

Turning to ham radio happenings, word that the Lewis and Clark Radio Club of Godfrey, Illinois, will be operating special event station K9HAM on September 24th. This, for the 17th annual Wings and Wheels Fly-in slated to be held at the St. Louis Regional Airport.

Operation of K9HAM will be from 10:00 A.M. until 4:00 P.M. Central Time, weather rpermitting. The primary operating frequency will be 14.245 S.S.B. +/- QRM on 20 meters. A commemorative certificate will be available with your card and a self addressed stamped envelope or electronically direct to your e-mail.

The Wings and Wheels Fly-In is an annual event that features a display of historic war aircraft and vintage automobiles. More about it is on-line at www.stlouisregional.com. (KF9F)

**

HAM HAPPENINGS: THE CANADIAN AMATEUR RADIO HALL OF FAME 2011

Nominations for Canadian Amateur Radio Hall of Fame for 2011 close on September 30th. This award recognizes deserving Canadian amateur radio operators for outstanding achievement and sustained service to amateur radio in Canada or to ham radio at large. Nomination forms and details of the procedure are available from the Radio Amateurs of Canada website, or direct at tinyurl.com/canada-award (RAC)

**

NAMES IN THE NEWS: K0KG NAMED NEW CQ DX AWARDS MANAGER

Some names in the news. First is Keith Gilbertson, K0KG, who as been named by CQ Magazine to succeed Billy Williams, N4UF, as its CQ DX Awards Manager. According to an announcement from CQ, Keith Gilbertson is retired vocational and technical education teacher and community college administrator. He is a veteran of the U.S. Air Force and Air Force Reserve who lives in Rochert, Minnesota, with his wife, Jeannie. They have two adult children and four grandchildren.

CQ adds that effective immediately, any correspondence relating to the CQ DX Award program should be directed to Keith Gilbertson, K0KG, 21688 Sandy Beach Lane, Rochert, Minnesota. 56578-9604. K0KG can also be reached by e-mail ato keith (dot) gilbertson (at) cq (dot) com.

Gilbertson's appointment follows the retirement of Billy Williams, N4UF, after more than three decades of service to the amateur radio DX'ing community. (CQ)

**

NAMES IN THE NEWS: N5HYP AND THE SCOUTING MERIT BADGE CLASS

Congratulations to Tom Schuessler, N5HYP, for a successful Radio Merit Badge class and amateur radio satellite demo at the National Scouting Museum. The Boy Scout station K2BSA/5 had contacts with numerous stations during its operational hours. It will again be again be

active on October 15th for the 2011 Scouting Jamboree on the Air. (ANS)

**

NAMES IN THE NEWS: KA3HDO RETIRES FROM NASA AFTER 36 YEARS

After an illustrious 36 year career with NASA, Frank Bauer, KA3HDO, has retired from the agency.

In his farewell note to his colleagues, Bauer said that for someone who dreamed about space exploration as a very young child and started at NASA when the Apollo program was in its twilight, it has been truly a pleasure to spend over 3 decades developing and operating systems as part of the NASA team. Bauer said that he has had what he called a phenomenal time contributing to countless Human and Robotic spaceflight missions, flight tests, technology experiments, pioneering systems, studies, formulations and on-orbit operations activities as well as numerous agency-level, U.S. Government and international strategies and initiatives.

In addition to his job with NASA, KA3HDO, had a parallel volunteer career as one of the leaders of the manned Amateur Radio in Space program. Among his many achievements was taking manned ham radio operations on-orbit from the now retired space shuttles under the SAREX operation over to the International Space Station and into the ARISS program.

Bauer, who stepped down from ARISS and AMSAT duties in March of 2009, had served as ARISS Program Leader and ARISS International Working Group Chair. Since 1991, he had also held the title of AMSAT Vice President for Human Spaceflight Programs.

In May of 2009 Bauer was presented with the ARRL President's Award for his many contributions to ham radio's part of mans exploration of space. (ANS)

**

DOWN BUT NOT OUT: GET WELL WISHES TO WB6FDF AND W2ML

Two people long associated with Amateur Radio Newsline are currently suffering medical problems. Retired news anchor and board member Robert Sudock, WB6FDF, is in a rehab facility in Long Beach, California where he is recovering from a badly burned foot and a flare-up of an previous medical problem. Once back on his feet Robert will be come the permanent news anchor for the weekly Newsline-produced news capsules that you will see on the Ham Nation Internet TV show that airs Tuesday nights at live dot twit dot tv. Get well wishes go to him via e-mail to wb6fdf (at) arnewsline (dot) org.

And Steve Mendelsohn, W2ML, who many knew as an early Newsline reporter before becoming the ARRL Hudson Division and later as ARRL 1st Vice President has been diagnosed with stage 4 pancreatic cancer. That said, Steve says that he is determined not to let his chemotherapy

treatments slow him down. At least not very much.

Steve who works for ABC Television in New York City and who also brought game-day frequency coordination to the National Football League is profiled in a rather amazing to read story in the NY Jets on-line magazine. You can view by taking your web browser to tinyurl.com/Steve-Mendelsohn. Steve can be reached by e-mail to W2ML (at) arrl (dot) net and we are sure a kind word of support from the ham community would be very welcome right now. (ARNewsline(tm), CGC, others)

HAM RADIO IN SPACE: FUNCUBE GROUP MEMBERSHIP EXCEEDS 2000 In under a year the AMSAT-UK FUNcube Yahoo Group has achieved over 2000 members.

The group was created by Rob Styles, M0TFO, at the end of October 2010. Its purpose is to provide support for the AMSAT-UK FUNcube satellite and the FUNcube Dongle Software Defined Radio package.

For those not aware, the FUNcube satellite is an educational micro-bird project with the goal of educating young people about radio, space, physics and electronics. Once on-orbit, FUNcube will provide a strong 145 MHz telemetry beacon for the pupils to receive. The bird will also have a 435 to145 MHz linear transponder for cross band SSB and CW communications.

The target audience for FUNcube is school students age 8 to 18. Planners say that FUNcube will support the educational science, technology, engineering and maths initiatives. It will also provide an additional resource for the RSGB's GB4FUN radio communications demonstration van.

Information on the FUNcube satellite project is at FUNcube.org.uk. You can join the FUNcube Yahoo Group at groups dot yahoo dot com and using the search feature to locate the FUNcube group. (M0TFO)

**

RADIO IN SPACE: FIND YOUR GRAIL - ON X BAND

The NASA Grail mission to the Moon should downlink on 2280.6 MHz and 2279.511 MHz. Also, X-Band Doppler ranging beacons are on 8451.5995 MHz and 8451.7995 MHz. And with due respect to Monty Python, if you have the gear to receive these frequencies, with this information at hand, you might just find your Grail. (ANS, others)

**

ON THE WEB: THE SIX AND TEN REPORTING CLUB

If you are a ham who likes to operate in the boundary area between High Frequency and low VHF, then the Six and Ten Reporting Club may be for you. This is an informal group of radio amateurs, mostly from the UK, who are interested in propagation studies at frequencies around the HF to VHF boundary. This means the 6 and 10 meter amateur bands.

The club produces a monthly newsletter that includes analysis of 28MHz propagation based on beacon monitoring, analysis of 50MHz activity reports broken down by propagation mode. Also included are discussions on unusual propagation events, compilations of solar and geomagnetic data, lists of activity world-wide, beacon news, and results of ongoing experiments.

The latest edition of the Six and Ten report is now available. You will find it in cyberspace at g7kse.co.uk/6and10. (Southgate)

RADIOSPORTS: REGION 3 ARDF CHAMPIONSHIP IN VK SEPTEMBER 23 - 28

The 8th ITU Region 3 Amateur Radio Direction Finding Championships are being held from September 23rd to the 28th at Maldon in Australia's Victoria state. This is a historic gold mining area about a two hours drive from Melbourne airport.

This competition is being hosted by the Wireless Institute of Australia, and run by the Victorian Amateur Radio Direction Finding Group. Accommodation will be at the Victorian Blue Light Youth Camps in Maldon. For further information, please contact Wireless Institute of Australia A-R-D-F Coordinator John Bramham by e-mail to vk3www (at) wia (dot) org (dot) au. More is on-line at www.ardf.org.au. (WIA, Southgate)

**

DX

In DX, word that preparations for the large multi-national 3D2R DXpedition to Rotuma are going according to plan. The team will meet in Suva, Fiji on September 22nd and depart for Rotuma on the 25th. They expect to be operational sometime on the 27th on 160 through 10 meters using CW, SSB, RTTY, PSK and SSTV. They also will hve stations

on 6 and 2 meter moonbounce with a focus on Europe and Africa. QSL via YT1AD or electronically using Logbook of the World.

The Oh J-Zero-X team has successfully landed on Market Reef for the first leg of its three week stay. Their focus will be on low-bands and RTTY, including the weekend's CQ World Wide RTTY Contest. Please keep watching the Oh J-Zero-X on QRZ dot com for updates. QSL this one via OH2BH

KL7JR and his XYL WL7MY will be active stroke HI3 from the northern coast of Hispaniola using SSB on the High Frequency bands until 2013 concentrating on 80, 40, 22, 17 and 6 meters. They also plan some experiments with mobile antennas from their 3rd floor balcony. Skeds are possible via e-mail to KL7JR (at) yahoo (dot) com Their QSL route can be found on QRZ.com.

W6HGF/KH0, will be active from Saipan from Sep 20th through the 30th. He will focus on RTTY and and plans to take part in the CQ World Wide RTTY Contest. Other modes will be used if time permits. QSL direct to W6HGF either direct or via Logbook of the World.

TA1AMC is on a humanitarian mission in Mogadischu, Somalia and will be operational stroke T5 during his spare time. He will be there for the next three months. QSL as directed on the air.

IZ4AMS will be active from Tinetto Island on October 9th and 10th using the call IZ4AM. If you make contact, please QSL as directed on the air.

Lastly, a Belgian team attempt at landing on

Rockall Island in May 2009 was unsuccessful due

to the weather conditions at the time. They are

now planning to try again, with the projected

date being around September 27th or 28th.

Rockall is the rarest of the European Islands on

the Air and has only been activated once a few

years ago when just over 200 QSO's were made.

Foir the latest information keep a cyberspace

eye on www.rockall.be. The Islands on the Air

reference for Rockall Island is EU-189.

(Above from various DX news sources)

**

THAT FINAL ITEM: LPFM DONATED TO ILLINOIS STATE UNIVERSITY And finally this week, students at Illinois State University are the recipient of a Low Power FM license given to the school by a religious broadcaster. Bill Pasternak, WA6ITF, is in the nerwsroom with the details:

--

Some good news for the proponents of college level radio. On September 1st, the Federal Communications Commission approved the ownership transfer of WEWT-LP from Rock in Victory Ministries to the Illinois State University Foundation. This was accompanied by a change in call letters to WZND-LP. As a result, 103.3 MHz will be the Low Power FM voice of Illinois State University students with the potential of reaching nearly 75,000 listeners with its 83 watts of power.

It should be noted that college radio advocates have long been protesting the loss of student-run FM stations. On campuses nationally, cash-strapped colleges and universities are selling or leasing stations to outsiders. And as broadcast licenses and studio equipment are lost, at best, students end up with Internet-only stations.

At least in Illinois, that's about to change.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the Newsroom in Los Angeles.

--

And that's a nice way to round out this week's newscast. (Radio Survivor)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News and Australia's WIA News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www (dot) arnewsline (dot) org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73 from sunny Vero Beach, Florida, and we thank you for listening.

several states have now outlawed using ham radio while walking. this
is part of their ban on ALL electronic devices while walking as a
result of the lady who fell into a fountain while walking in a mall.
however, instead of outlawing only texting while walking, the new laws
state using ANY electronic device while walking is against the law and
violators will get fined over two hundred dollars for doing such. And
unlike the driving laws, there are NO exceptions for ham radio or cbl
radio in these states laws against using ANY and ALL electronic
devices while walking.

I'd like to see the text of such legal codes.
What states and where did you get this story?

Hearing aids.
LED flashlights
Pace makers

All electronics devices?

Once again, you show us what ignorant asshole you are.
Post the proof, asshole. Post a link to an actual state law.

Apparently, several states have proposed the banning of certain devices
while crossing a street. But most of those are just proposals. The first
one, in arkansas, was dropped because the guy said there wasn't enough
backing.

It is ridiculous on the face of it. If your wristwatch is electronic, you could get a $200 fine for checking the time while walking.... Or, how about listening to a radio while jogging? Or using a heart rate monitor while jogging?

It all boils down to people in the legislature who have nothing new to
write laws on. So they dream this shit up because of one person got injured
from it.

A couple of years ago Ohio passed a real doozie.
If you own a dog in ohio, you have to set up an escrow account for the dog.

Ohio law: No train may pass until the other has.

I've read that many states are now outlawing walking while chewing gum.
This will directly effect Radioguy.
Next up? The new Wrigley's gum packages will soon come with a warning label,
similar to those on cigarette packages that state, "Warning. Walking and
Chewing Gum At The Same Time Can Cause Injury or Death."

The violation of this law is a simple infraction, but can result in a $25.00
fine and the confiscation of the gum.

Yes, but it all illustrates a basic problem with our government. since the legislature is there to, "Paqss laws", they are not considered to be doing anything unless laws are passed. So, they busy themselves passing laws whether those laws are needed or not. In fact, there are way too many laws on the books now, and what the legislature should be doing is UN- passing laws, or getting rid of them. We need a law that says the legislature can't pass any law without first removing one of equal length first. And, they should get as many brownie points for removing a law as they do for passing

a new one.

That's right. Walking and listening at the same time is forbidden.... As a matter of fact, listening in general might as well be forbidden. It has become a lost art.....

Ya know, I think I few western states still have on their books, that gentlemen must check their guns upon entering a bar. Or some such silly thing.
You might even find a law in a state that requires a vehicle being propelled other than by horses, to have an escort on foot waving a warning flag.

Well, these kinds of laws are quaint, and like artificts in a museum, do little harm. The laws I am talking about are modern concoctions that juswt restrict peoples liberties for no real reason, like the "cant walk with an electronic device" law. Every time some new law is passed, someone's freedom is restricted in some way. It the law also protects the freedoms of someone else, then perhaps it is a good thing. But when the law doeswn't protect anyones rights from transgressions by someone else, then I seriously question its constitutionality. As a libertarian, I am generally against any law that restricts one persons rights without protecdting those of someone else. The motorcycle helmit law is a good example of this. If I get into an accident with you, you are better off if I am not wearing a helmit. So whose rights does such a law protect? Of what business is it of society to be protecting my head? My head is my own business. If I want to break it, well whose going to be hurt by that? There will just be a little more air and water for the rest of the society. So, in general, I resent laws that protect me, or purport to protect me from myself and my own foolishness. That's not what I want my legislature to be doing. The ultimate, and obvious endpoint of such laws is to put all of us in padded cells for, "our own protection". That's why I call these kinds of laws, "Padded cell laws". IOW, I think we should all have the right to harm ourselves, as long as in so doing, we don't harm anyone else.

Lon, you really should consult with teh kosher ham about this, he is
bisexual and kinky, and target of hell of lot of total BS as well as being a
moderator and kelpmaster so I'm sure he can be of some kelp.

Here is his blog -
http://kb9rqz.blogspot.com/

Best Regards,
Radio Rambo.

Dear ARRL Member,

I am pleased to send you the link to the most recent version of Spectrum Defense Matters, the newsletter that provides you with an update on how ARRL is working constantly to protect our Amateur Radio frequencies. Your feedback on this issue-and others in the on line archive-and the information there is welcome.

Here's the link to the September 2011 issue:

http://www.arrl.org/spectrum-defense-matters-newsletter

As we approach the last quarter of the year, the Spectrum Defense Fund needs your support. We still need to raise $187,752 before December 31 to fund the work of CEO Dave Sumner, K1ZZ and CTO Brennan Price, N4QX and others who work on your behalf. Next year work in the international arena will be front and center during the World Radiocommunication Conference in Geneva. Updates will be coming from those meetings during the year.

If you have made a contribution to the 2011 Spectrum Defense Fund, thank you. If not, I hope you will do so after reading the newsletter. The easiest way to support the fund is to use the on-line Donation form at www.arrl.org/arrl-donation-form. Thank you in advance for your generosity.

73,
<<Picture (Device Independent Bitmap)>>
